Getting to Know the ME906V	1
Assembly.....	4
Installation Guide.....	4

Thank you for purchasing HUAWEI ME906V LTE M.2 Module (hereinafter referred to as the ME906V)

Note:

- This manual briefly describes the preparation, the process for PCB Design, Assembly and safety precautions.
- It is recommended to read the manual before using the ME906V.

Getting to Know the ME906V

- The ME906V module is 75 pin Gold Finger with a dimension of 42 mm × 30 mm × 2.3mm. It is applied to the user interface board, and can be used as a wireless terminal in a network environment.

① Antenna interface

It is used to connect and fix an antenna.

② Fixing hole

A screw, metal fastener, and nut are used to fix an ME906V module on a development board through this fixing hole.

③ Gold Finger

It is connected to the M.2 connector on the development board.

Note:

- In certain cases, your development board may be disassembled only by the professionals.
- Before you install the ME906V onto the development board, consult the development board manufacturer or read the user manual of the development board.

Assembly

Through the M.2 connector

Installation Guide

Installing and Using an ME906V Module

1. Connect an antenna connector to the antenna interface of an ME906V.

Note:

- Insert the antenna connectors vertically into the antenna interfaces of the ME906V.
 - Do not pinch the antenna cable or damage the connectors. Otherwise, the wireless performance of the ME906V be reduced or the ME906V cannot work normally.
 - Ensure that the antenna is placed normally.
2. Fasten the the gold finger in the ME906V module to a M.2 connector of a development board to fix the ME906V module on the development board.
 3. Place a metal fastener between the ME906V module and the development board. Put a screw through the fixing hole of the ME906V, metal fastener, and fixing hole of the development board in sequence. Then fasten a nut on the screw.
 4. Insert a UIM card into the UIM card socket in the development board.

Removing an ME906V Module from a Development Board

1. Remove the UIM card from the UIM card socket.
2. Power off
3. Remove the screw on the ME906V module.
4. Remove the ME906V module from the development board.
5. Remove the antenna from the ME906V module.
