# 1 Getting Started

## About This Guide

This guide describes how to find and use the functions of menus of your phone.

All the images in this guide are provided only for your reference. The actual appearance and display depends on the phone that has been delivered.

## Packing List

Your phone package box contains the following:

- One HUAWEI U3205 mobile phone
- One Li-ion battery
- One travel charger
- One USB data cable
- One User Guide
- One Headset (Optional)

## Installing SIM Card and Memory Card

Insert your SIM card before using your phone. Remove the SIM card and the battery only after powering off your phone. To use the SIM card properly, please read the following instructions carefully.

**NOTE:**

- *Keep the SIM card out of the reach of children.*
- *The SIM card and its metal contacts can be easily damaged by scratching or bending. Be careful when you carry , insert or remove the SIM card.*
- *Always disconnect the charger from the phone before loading or removing the SIM card.*

Your phone supports a memory card (microSD) with a capacity of up to 8 GB.

To load or remove the memory card, remove the battery cover.

## »» Getting Started

The following figures show the installation of the SIM card and memory card.

|   |                                    |
|---|------------------------------------|
| 1 | Remove the battery cover.          |
| 2 | Insert the SIM card.               |
| 3 | (Optional) Insert the memory card. |
| 4 | Insert the battery.                |

## Charing the Battery

### **NOTE:**

- *The battery discharges even while not being used. If you have not used it for a long time, please recharge it first.*

- *The charging time depends on the environmental temperature and the age of the battery.*
- *Do not strike, throw or cause any kind of violent shock to the battery, otherwise liquid leakage, body damage, overheating, fire or explosion may occur.*
- *The battery can be recharged but eventually wears out. If the battery lasts for a shorter time period than usual after being charged normally, replace it with a battery of the same type.*
- *Charge the battery by using the charger connector and the USB cable supplied with your phone.*

Before charging the battery, ensure that the battery has been properly loaded into your phone.

1. Connect the USB interface of the USB cable to the travel charger.
2. Plug in the travel charger to a power socket.
3. Connect the mini USB interface of the USB cable to the charger connector of your phone. When the battery is being charged, the charging indicator blinks continuously.
4. When the charging indicator stops blinking, it indicates that the battery is full. Disconnect the charger connector from the power socket.

## »» Getting Started

5. Disconnect the USB cable from the phone.

***NOTE: The plug of the cable is in trapezium shape. Reversely inserting the plug may damage the mobile phone and the charger.***

## Appearance of Your Phone

|    |                   |    |               |   |                    |
|----|-------------------|----|---------------|---|--------------------|
| 1  | Left function key | 2  | Send key      | 3 | Music key          |
| 4  | Scroll key        | 5  | Camera key    | 6 | Clear key          |
| 7  | Volume key        | 8  | Power/End key | 9 | Right function key |
| 10 | Ok key            | 11 | Camera        |   |                    |

## »» Getting Started

|                                      |   |
|--------------------------------------|---|
| Left function key/Right function key | Perform the corresponding functions displayed above these keys.   |
| Send key                             | Answer a call or view call records in standby mode.   |
| Music key                            | Quick access to <b>Music</b> menu.  |
| Scroll key                           | <ul style="list-style-type: none"><li>• Scroll through a menu.</li><li>• Access the corresponding shortcut menu in standby mode.</li><li>• Short press the up scroll key twice to switch on the flashlight. And then, press once to switch off.</li></ul> |
| Camera key                           | Activate the camera.  |
| Clear key                            | Delete characters to the left of the cursor in input mode.  |
| Power/End key                        | <ul style="list-style-type: none"><li>• Switch on and off your phone by holding down this key.</li><li>• Return to the standby mode and reject or end a call.</li></ul>   |
| OK key                               | Perform the corresponding functions displayed above OK key.   |

## Home Screen

|   |            |
|---|------------|
| 1 | Icon bar   |
| 2 | Desktop    |
| 3 | Prompt bar |

|   |   |   |                                  |
|---|---|---|----------------------------------|
|    | Indicates signal strength.                        |    | Alarm clock is enabled.          |
|    | Indicates power level of the battery.             |    | The normal profile is activated. |
|  | The phone is currently in a GSM or WCDMA network. |  | The headset is plugged in.       |

## »» Getting Started

|   |  |   |  |
|---|--|---|--|
|  | The phone is currently in a WCDMA network.               |  | Your PC connects to the Internet through your phone. |
|  | The phone is currently in a HSDPA network.               |  | You have new text messages.                          |
|  | You are using the roaming service.                       |  | You have new voice mails.                            |
|  | Bluetooth is enabled.                                    |  | You have new multimedia messages.                    |
|  | Call line 2 is enabled currently.                        |  | You have new Emails.                                 |
|  | Forwarding all incoming voice calls to line 1 or line 2. |  | You have new PUSH messages.                          |
|  | Flashlight is enabled.                                   |   |  |

## Security Settings

Select **Settings** > **Security** > Desired item.

- Reset your phone to the factory settings.

- Enable or disable the "Phone lock" and "PIN lock".
- Modify the phone password and PIN code.
- If your SIM card supports the Fixed Dialer Number (FDN) function, you can set the limit for phone numbers.

**NOTE:**

- *For certain SIM cards, you need to enter the PIN2 code to use certain special functions.*
- *If you enter a wrong PIN code or wrong PIN2 code for three consecutive attempts, the SIM card is locked. To unlock the SIM card, enter the PIN Unlocking Key (PUK) code or PUK2 code.*
- *The PIN code, PIN2 code, PUK code, or PUK2 code is provided together with the SIM card. For details, consult your service provider.*
- *The initial phone password of the phone is 0000.*

## 2 Text Input

**NOTE:**

- *Press the \* key to switch between input methods. Press and hold the \* key to enable or disable the T9 input mode.*
- *Press repeatedly the \* key and you will see "abc", "Abc", "ABC" or "123" on the upper left corner of the screen successively. It indicates the words to be entered will be in lower case, first letter capitalized or in upper case.*
- *Press the # key to display the symbols list. Press and hold the # key to set the input language.*
- *Press the clear key to delete the letter before the cursor.*

### Using T9<sup>®</sup> Input Method

With the T9 input method, you can easily and quickly enter words. T9 is a predictive text entry mode. Press the relevant key that corresponds to the required letter and T9 will offer you candidate words.

Press each key carrying the desired letter once, and then the predictive text scheme will present the word suggestions composed by the letters you have entered.

## Using Traditional Input Method

When T9 input method is off, you can use the traditional input method for entering alphabetic characters. Repeatedly press the key that carries the letter to be entered when it appears on the screen.

## Using Other Input Method

In a text editing screen, press and hold the character/number keys to enter corresponding numeric characters.

You can also press successively the \* key to switch to the "123" numeric input method, and enter corresponding numeric characters by pressing the character/number keys.

## Using Symbol Input Method

You can press the # key to display the symbols list and then select symbols to input.

You can also press the key with number 1 to input the commonly-used symbols in a text editing screen (except numeric input method).

# 3 Customized Settings

## Profiles

You can set different profiles according to different scenarios.

Select **Settings** > **Phone settings** > **Profiles** > Desired item. Select a profile. And then, press the OK key to enable the profile or select **Edit** to modify the profile.

## Phone Settings

Select **Settings** > **Phone settings** > Desired item, You can set the following:

- Time of your phone
- Profile of your phone
- Language of your phone
- Keypad tones
- Enable automatic keypad lock
- Set shortcuts of your phone
- Set time to automatically switch phone on and off

## Display Settings

Select **Settings** > **Display settings** > Desired item, you can set the following:

- Wallpaper in standby mode
- Themes of your phone
- Brightness of the screen
- keypad backlight
- Time of backlight
- Intermittently alert.
- Greeting message
- Goodbye message

## Network Settings

Select **Settings** > **Network** > Desired item. You can set the following:

- Network mode
- Manual or automatic network selection
- Enabling of the cell information
- Preferred operators

# 4 Call Service

**NOTE:** *In the 3G network, you can make video calls, provided that the called party has a device supporting the video call function.*

## Contacts

You can save or manage the information about contacts in **Contacts**. You can also set a contact number as a speed dialing number.

### Adding a Contact

1. Select **Contacts** > **Add new contact**.
2. Enter the information about the contact.
3. Select **Options** > **Save** to save the contact.

### Searching for a Contact

1. Select **Contacts**.
2. Select **Options** > **Advanced** > **Search contacts**.

3. Enter the contact name you are searching for.
4. The contacts corresponding to your input are listed.

You can also use quick search in the contacts list screen. You can find a contact by entering the initials of the first name or the last name of the contact. For example, to find a contact named "Alice Green", enter the letter "a" or "g". The contact is displayed in the candidate list.

## Making a Call

### **NOTE:**

- You can access **Video call** and enter phone number to make a video call directly.
- During a call, you can select **Options** to perform operations in the option lists.

## Making a Call from Keyboard

1. In standby mode, press number key to enter phone number.
2. To make a call, perform one of the following operations:
  - Press the send key to make a voice call.
  - Select **Options** > **Voice call** to make a voice call;
  - Select **Options** > **Video Call** to make a video call.

## »» Call Service

- Press the music key to make a video call.
3. Press the end key to terminate a call.

## Making a Call from Contacts

1. Access **Contacts**.
2. Select the desired contact.
3. To make a call, perform one of the following operations:
  - Press the send key to make a voice call.
  - Select **Options** > **Call** > **Voice call** to make a voice call
  - Select **Options** > **Call** > **Video call** to make a video call.

## Making a Call from Call History

You can view all the missed calls, received calls, or dialed numbers in **Calls**.

1. Access **Calls**.
2. Select the desired call history.
3. To make a call, perform either of the following operations:
  - Press the send key to make a voice call.

- Select **Options** > **Call** > **Voice call** to make a voice call.
- Select **Options** > **Call** > **Video call** to make a video call.

## Answering or Rejecting a Call

When there is an incoming call, press the send key to answer the call, or press the end key to reject the call. You can set the any key answer mode or auto answer mode.

1. Select **Settings** > **Call settings** > **Answer mode** to set the answer mode.
2. You can answer a call according to your settings.

## Call Settings

To enable call forwarding, call waiting and call barring, consult your service provider.

By selecting **Settings** > **Call settings**, you can set the following:

- Call forwarding type.
- Call barring mode.
- Enable call waiting.
- Prompt to save unknown numbers.
- Automatic redialing after a call fails.

## »» Call Service

- Answering mode of incoming calls.
- Automatic answering mode.
- Display of your number to the called party. If you set it to automatic, the displaying is subject to your network.
- Calling line of your mobile phone.
- Set my number. You can create, edit or delete your records.

# 5 Messaging

## Sending a Message

1. Select **Messaging** > **Create message** to create a message. you can create new SMS, MMS, Album, and Email.
2. During editing a message:
  - You can press down scroll key to add attachment files.
  - You can select **Options** to perform operations in the option list.
3. After editing the message, press OK key to add a recipient's number.
4. Press OK key to send the message.

**NOTE:** Select **Messaging** > **Settings**. You can also change the settings of **Push messages**, **Broadcast** or **Common phrases**.

## Viewing a Message

Your phone provides four folders for messages. Received messages are stored in **Inbox**. Messages that are created but not yet sent saved in **Drafts**. Messages that are failed to be delivered are stored in **Outbox**. Messages that are successfully delivered are stored in **Sent**.

## »» Messaging

1. Select a mailbox from **Messaging**. And then switch between four mailboxes and templates through the scroll key.
2. Select a message, and then select **Options** to perform the operations of the option list.

**NOTE:** *If your phone is enabled with the broadcast function, select **Messaging > Broadcast Inbox** to view broadcast messages.*

## Message Settings

1. Select **Messaging > Settings > SMS & MMS**, or select **Settings > Message settings > SMS & MMS**.
2. Set the parameters related to messages.

**NOTE:** *Select **Messaging > Settings**. You can also change the settings of **Push message, Broadcast or Common phrases**.*

## Setting Your Email Account

Select **Settings > Messaging settings > Email > Desired item**, or **Messaging > Setting > Email > Desired item** to set up the email account. Select an account, and then choose **Options**.

- You can edit an account and set general, incoming, or outgoing attributes.
- You can add a new account.

- You can set an account to the default account.

## Sending an Email

1. Select **Messaging** > **Email** > **Create Email** to access the email editing screen.
2. In the email editing screen:
  - Select **To** to enter reception.
  - Select **Subject** to edit the contents.
  - Select **Text message** to edit the content.
  - Select **Options** to perform the operations of the option list.
3. In the email editing screen, select **Options** > **Send** to send the email.

## Viewing an Email

Your phone provides five mailboxes for Email. **Inbox** stores received emails. **Drafts** stores created and saved emails. **Outbox** stores the emails failed to be send. **Sent** stores sent emails. **Blocked** stores screened emails.

## »» Messaging

1. Select a mailbox from **Email**. And then switch among five mail-boxes through the scroll key.
2. Select an email, and then select **Options** to perform the operations of the option list.

# 6 Entertainment

## Accessing the Internet

You can perform the following when browsing:

- Select **Browser** to access the internet.
- Opening the homepage
- Entering a website to access and connect to it
- Saving or editing frequently visited websites
- Browsing saved web pages offline
- Browsing history web pages
- Connecting to the website accessed recently
- Setting the Browser

## Playing Music or Video

1. Select music files, video files, or playlists.
2. Press the OK key to play music or video.
3. During the playing of a file, you can perform the following operations:
  - Press the OK key to pause or resume the playing.

## »» Entertainment

- Follow the displayed prompts and use the scroll key to perform corresponding operations.
- Select **Options** to perform the operations of the option list.
- Select **Exit** to exit from the player.

## Using Camera or Video Camera

1. In standby mode, press the camera key or select **Camera** to launch the camera.
2. In the viewfinder screen, you can:
  - Select **Options** to perform the operations of the option list.
  - Press the volume key to adjust the focus.
  - Press the up and down scroll key to adjust the brightness.
3. After taking a picture or recording a video clip, you can select **Options** to perform the operations of the option list.

## Using FM Radio

1. Connect the headset to your phone.

2. Select **Music > FM Radio**.
3. If the channel list is empty, select **Options > Tuning > Automatic Tuning** or **Manual Tuning** to set channels.

During enjoy the FM radio program, you can select **Options > Record** to record the radio program as an audio file. Recorded audio file is saved in **My files/Music**.

***NOTE:** The size of audio file rests with memory status of your phone.*

## Games and Applications

You can install and run Java applications on your phone. For details, please refer to the help of the applications.

### Facebook

Select **Entertainment > Applications > Facebook**.

User can keep up with the latest news and posts with Facebook on your phone. Show your friends what you're up to. Send messages to any of the people in your friends list. Upload picture right to Facebook. Manage your profile and post anytime, anywhere.

### Nimbuzz

Select **Entertainment > Applications > Nimbuzz**.

## »» Entertainment

Nimbuzz Mobile lets you call, chat, message, and send files on the go, for free. It combines all your buddies from MSN, Yahoo, ICQ, AIM, Google Talk and more. One login, one contact list, all accounts.

See who's online and where, chat/chatrooms, offline messaging, send photos/music/video, voice messaging.

# 7 Connection Function

Select **Settings** > **Connectivity**. You can set the Bluetooth, network access point or select data connection modes.

**NOTE:**

- *Your phone supports USB 2.0.*
- *Your phone supports plug and play function.*
- *The PC assistant installation programme and USB driver are embedded in the mobile phone.*
- *The PC Options software supplied on your phone will run automatically after you connect your phone to the PC.*

## Installing PC Options

By using *PC options* software, you can synchronise data between your phone and PC, and read the memory card by USB cable.

**NOTE:**

- *Your phone supports USB 2.0.*
- *Your phone supports plug and play function.*
- *The PC assistant installation programme and USB driver are embedded in the mobile phone.*
- *The PC Options software supplied with your phone will run automatically after you connect your phone to the PC.*

## »» Connection Function

To install a *PC options* software, perform the following operations:

1. Connect your phone to the PC by using the USB cable.
2. The USB driver is embedded in your phone, and will be installed automatically.
3. The *PC Options* software supplied with your phone will run automatically. Wait for the dialog box to appear (this may take up to 30 seconds). Buttons showing *File Transfer* and *PC Assistant* should be displayed.
4. Select the desired button to install the software.
  - Select *File Transfer* to perform the microSD Card Reader operation.
  - Select *PC Assistant* button to install the *PC Assistant* software.
5. For the first time, follow the wizard to complete the installation.

### **NOTE:**

- *To connect your phone with a PC through USB cable, first connect the USB connector to your phone, and then connect the other end of the cable to the PC. To disconnect your phone from the PC, first disable the PC Assistant, then disconnect the USB connector from the PC, and finally disconnect the USB cable from your phone.*
- *If the PC cannot recognise your phone when connecting through the USB cable, power off and restart the PC and then retry.*

- *Please do not plug the USB cable in and out of your phone frequently.*

## Using PC Options

### USB-Based Synchronization

You can synchronize data between your phone and PC. With a USB cable and the *PC Suite* software, your phone can communicate with a PC.

1. Connect your phone with a PC through USB cable delivered with your phone.
2. Run the *PC Suite* software on the PC.
3. Now you can perform the USB-based synchronization. For details, refer to the help section in the *PC Suite* software.

**NOTE:** *Only Windows 2000, Windows XP and Windows Vista are supported.*

### microSD Card Reader

**NOTE:** *The function of microSD card reader and the other functions using the USB cable are incompatible. If you enable the microSD card reader, other functions using the USB cable are unavailable.*

1. Insert the microSD card to your phone.
2. Connect your phone to the PC by using the USB cable.

## »» Connection Function

3. *Found New Hardware* and a device icon are displayed at the notification area of your PC.
4. The *PC Options* software supplied on your phone will run automatically. And then select *File Transfer*.
5. An icon for the mobile memory drive appears on your PC. Then you can read the files saved in the microSD card directly.
6. After reading the files, right-click on the device icon at the notification area of your PC to delete the device on your PC.

## Connecting via Bluetooth

### Bluetooth-Based Synchronization

Your phone can respond to data synchronization requests from a PC. To operate the Bluetooth synchronization with your phone, your PC needs to support Bluetooth function.

1. Install the *PC Assistant*.
2. Select **Settings > Connectivity > Bluetooth > Switch On/Off** to enable the Bluetooth function.
3. Run the driver software for Bluetooth on the PC, and pair the phone. After the PC detects and recognizes the phone serial port service, activate the Bluetooth serial port service on the phone.

4. Run the *PC Assistant* on the PC.
5. You can now operate the synchronization. For details of the operation, refer to the Help of the *PC Assistant* .

**NOTE:** Only *Windows 2000, Windows XP and Windows Vista* are supported.

## Bluetooth-Based Data Transfer

You can exchange data between your Bluetooth phone and other Bluetooth devices. If you want to exchange data between your phone and another device, that device must support Bluetooth and the Bluetooth function must be enabled.

1. Select **Settings > Connectivity > Bluetooth > Switch On/Off** to enable the Bluetooth function.
2. Select **Settings > Connectivity > Bluetooth > My devices > Search for devices** to search a Bluetooth device. When the Bluetooth device is found for the first time, authentication is required.

Now you can exchange data between your phone and the other Bluetooth device.

## Using Bluetooth Headset

You can answer a call by a Bluetooth headset or Bluetooth loudspeaker. For details, refer to the corresponding user manual of a Bluetooth headset or loudspeaker.

1. Set the Bluetooth headset to the status for detecting.
2. Select **Settings > Connectivity > Bluetooth > Switch On/Off > On** to enable the Bluetooth function.
3. Select **Settings > Connectivity > Bluetooth > My devices > Search for devices** to search a Bluetooth device. When a Bluetooth device is found for the first time, authentication is required.
4. If a Bluetooth headset is detected and recognized for the first time, it should be authenticated by a PIN code.

Now you can use the Bluetooth headset as the connection has been established between your phone and the Bluetooth headset.

The Bluetooth headset should be set to the status for detecting only when authentication is needed. Once the headset has been authenticated, you just need to turn on your Bluetooth headset. For more information, refer to the user manual of your Bluetooth headset.

**NOTE:** *The procedure for using a Bluetooth loudspeaker is similar to that for a Bluetooth headset. For details, refer to the user manual supplied with your Bluetooth loudspeaker.*

# 8 Organizer

## Manging Files

1. Select **My Files** > Desired item.
2. Select **Options** to perform the operations of the list.

When your phone finds the memory card, the memory card tab is automatically displayed on the folder screen. Select the required files in the memory card and perform operations as required. In addition, you can also format the memory card.

## Using the Torch

In the idle screen or the phone is locked, you can press the up scroll key twice to switch on the torch. And then, press the up scroll key once to switch off the torch.

## Viewing the Calendar

1. Select **Calendar**, and then select the desired date.

## »» Organizer

2. Press the OK key to view the reminder.
3. Select **Options** to create a reminder, set the view mode, set the calendar and check the memory status.

## Creating a Task

1. Select **Organiser & Tools > Task**.
2. You can press the OK key to edit a task.
3. Select **Options >** Desired item to perform the operations of the option list.

## Creating a Note

Select **Organiser & Tools > Memo > Options > New** to create a memo.

1. Select **Memo** and select a note.
2. Click **Options** to edit, send or delete the note.

## Creating an Alarm

1. Access **Organiser & Tools > Alarms > New alarm** to set an alarm.

2. Select an alarm from the alarm list, press the OK key to enter edit mode.
3. You can select the corresponding option to activate, deactivate, or delete the alarm.
4. When it is time for an alarm clock to ring, the selected alarm tone is played and a prompt is displayed. You can stop the ringing or snooze the alarm.

**NOTE:** *If your phone is powered off, the alarm clock will still ring. When the alarm rings, you can choose to power on the phone.*

## Synchronizing Data

You can synchronize information between your phone and the server through the wireless network. The information that can be synchronized includes the contacts, calendar, and to-do list. This service requires network support. For details, consult your service provider.

1. Select **Organiser & Tools > Synchronize > Options > New** to create a profile.
2. Press the scroll keys to switch among **Synchronise items**, **Server Settings**, and **Network profile**.
  - **Synchronise items:** You can synchronize contacts, calendar, task.

## »» Organizer

- **Server Settings:** You can connect to the server or set the synchronization direction.
- **Network profile:** You can enter proxy address, proxy port, networkaccesspoint.

## Using Other Tools

Your phone also provides **Calculator**, **Unit converter**, **Currency converter**, **Voice recorder**, **World Time**, **Stopwatch**, **Timer**, and **Service dial number**.

# 9 Warnings and Precautions

This section contains important information pertaining to the operating instructions of your device. It also contains information about how to use the device safely. Read this information carefully before using your device.

## Electronic Device

Power off your device if using the device is prohibited. Do not use the device when using the device causes danger or interference with electronic devices.

## Medical Device

- Follow rules and regulations set forth by hospitals and health care facilities. Do not use your device when using the device is prohibited.
- Pacemaker manufacturers recommend that a minimum distance of 15 cm be maintained between a device and a pacemaker to prevent potential interference with the pacemaker. If you are using a pacemaker, use the device on the opposite side of the pacemaker and do not carry the device in your front pocket.
- Some wireless devices may affect the performance of hearing aids. For any such problems, consult your service provider.

## Potentially Explosive Atmosphere

Power off your device in any area with a potentially explosive atmosphere, and comply with all signs and instructions. Areas that may have potentially explosive atmospheres include the areas where you would normally be advised to turn off your vehicle engine. Triggering of sparks in such areas could cause an explosion or a fire, resulting in bodily injuries or even deaths. Do not power on your device at refueling points such as service stations. Comply with restrictions on the use of radio equipment in fuel depots, storage, and distribution areas, and chemical plants. In addition, adhere to restrictions in areas where blasting operations are in progress. Before using the device, watch out for areas that have potentially explosive atmospheres that are often, but not always, clearly marked. Such locations include areas below the deck on boats, chemical transfer or storage facilities, and areas where the air contains chemicals or particles such as grain, dust, or metal powders. Ask the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) whether this device can be safely used in their vicinity.

## Traffic Security

Observe local laws and regulations while using the device. In addition, if using the device while driving a vehicle, comply with the following guidelines:

- Concentrate on driving. Your first responsibility is to drive safely.
- Do not talk on the device while driving. Use hands-free accessories.
- When you have to make or answer a call, park the vehicle at the road side before using your device.

- RF signals may affect electronic systems of motor vehicles. For more information, consult the vehicle manufacturer.
- In a motor vehicle, do not place the device over the air bag or in the air bag deployment area. Otherwise, the device may hurt you owing to the strong force when the air bag inflates.
- Do not use your device while flying in an aircraft. Power off your device before boarding an aircraft. Using wireless devices in an aircraft may cause danger to the operation of the aircraft and disrupt the wireless telephone network. It may also be considered illegal.

## Operating Environment

- Do not use or charge the device in dusty, damp, and dirty places or places with magnetic fields. Otherwise, it may result in a malfunction of the circuit.
- The device complies with the RF specifications when the device is used near your ear or at a distance of 1.5 cm from your body. Ensure that the device accessories such as a device case and a device holster are not composed of metal components. Keep your device 1.5 cm away from your body to meet the requirement earlier mentioned.
- On a stormy day with thunder, do not use your device when it is being charged, to prevent any danger caused by lightning.
- When you are on a call, do not touch the antenna. Touching the antenna affects the call quality and results in increase in power consumption. As a result, the talk time and the standby time are reduced.

## »» Warnings and Precautions

- While using the device, observe the local laws and regulations, and respect others' privacy and legal rights.
- Keep the ambient temperature between 0 °C and 45 °C while the device is being charged. Keep the ambient temperature between -10 °C to 45 °C for using the device powered by a battery.

## Prevention of Hearing Damage

Using a headset at high volume can damage your hearing. To reduce the risk of damage to hearing, lower the headset volume to a safe and comfortable level.

## Safety of Children

Comply with all precautions with regard to children's safety. Letting the child play with your device or its accessories, which may include parts that can be detached from the device, may be dangerous, as it may present a choking hazard. Ensure that small children are kept away from the device and accessories.

## Accessories

Use the accessories delivered only by the manufacturer. Using accessories of other manufacturers or vendors with this device model may invalidate any approval or warranty applicable to the device, result in the non-operation of the device, and cause danger.

## Battery and Charger

- Unplug the charger from the electrical plug and the device when not in use.
- The battery can be charged and discharged hundreds of times before it eventually wears out. When the standby time and the talk time are shorter than the normal time, replace the battery.
- Use the AC power supply defined in the specifications of the charger. An improper power voltage may cause a fire or a malfunction of the charger.
- Do not connect two poles of the battery with conductors, such as metal materials, keys, or jewelries. Otherwise, the battery may be short-circuited and may cause injuries and burns on your body.
- Do not disassemble the battery or solder the battery poles. Otherwise, it may lead to electrolyte leakage, overheating, fire, or explosion.
- If battery electrolyte leaks out, ensure that the electrolyte does not touch your skin and eyes. When the electrolyte touches your skin or splashes into your eyes, wash your eyes with clean water immediately and consult a doctor.
- If there is a case of battery deformation, color change, or abnormal heating while you charge or store the battery, remove the battery immediately and stop using it. Otherwise, it may lead to battery leakage, overheating, explosion, or fire.
- If the power cable is damaged (for example, the cord is exposed or broken), or the plug loosens, stop using the cable at once. Otherwise, it may lead to an electric shock, a short circuit of the charger, or a fire.

## »» Warnings and Precautions

- Do not dispose of batteries in fire as they may explode. Batteries may also explode if damaged.

## Cleaning and Maintenance

- The device, battery, and charger are not water-resistant. Keep them dry. Protect the device, battery, and charger from water or vapor. Do not touch the device or the charger with a wet hand. Otherwise, it may lead to a short circuit, a malfunction of the device, and an electric shock to the user.
- Do not place your device, battery, and charger in places where they can get damaged because of collision. Otherwise, it may lead to battery leakage, device malfunction, overheating, fire, or explosion.
- Do not place magnetic storage media such as magnetic cards and floppy disks near the device. Radiation from the device may erase the information stored on them.
- Do not leave your device, battery, and charger in a place with an extreme high or low temperature. Otherwise, they may not function properly and may lead to a fire or an explosion. When the temperature is lower than 0°C, performance of the battery is affected.
- Do not place sharp metal objects such as pins near the earpiece. The earpiece may attract these objects and hurt you when you are using the device.
- Before you clean or maintain the device, power off the device and disconnect it from the charger.
- Do not use any chemical detergent, powder, or other chemical agents (such as alcohol and benzene) to clean the device and the charger.

Otherwise, parts of the device may be damaged or a fire can be caused. You can clean the device and the charger with a piece of damp and soft antistatic cloth.

- Do not dismantle the device or accessories. Otherwise, the warranty on the device and accessories is invalid and the manufacturer is not liable to pay for the damage.

## Emergency Call

You can use your device for emergency calls in the service area. The connection, however, cannot be guaranteed in all conditions. You should not rely solely on the device for essential communications.

## Certification Information (SAR)

This mobile device meets guidelines for exposure to radio waves.

Your device is a low-power radio transmitter and receiver. As recommended by international guidelines, the mobile device is designed not to exceed the limits for exposure to radio waves. These guidelines were developed by the independent scientific organization International Commission on Non-Ionizing Radiation Protection (ICNIRP) and include safety measures designed to ensure safety for all users, regardless of age and health.

The Specific Absorption Rate (SAR) is the unit of measurement for the amount of radio frequency energy absorbed by the body when using a device. The SAR value is determined at the highest certified power level in laboratory conditions, but the actual SAR level of the device when being

## »» Warnings and Precautions

operated can be well below the value. This is because the device is designed to use the minimum power required to reach the network.

The SAR limit adopted by the USA and Canada is 1.6 watts/kilogram (W/kg) averaged over one gram of tissue. The highest SAR value reported to the FCC and IC for this device type when tested for use at the ear is 0.622 W/kg, and when properly worn on the body is 0.891 W/kg.

## FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful

interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications made to this device not expressly approved by Huawei Technologies Co., Ltd. may void the FCC authorization to operate this device.
