QUICK START GUIDE

Car WiFi with the
Buzzard 2 from EE

Thank you for choosing Car WiFi from EE.

This guide briefly describes how to set up your Car WiFi. For more info about Car WiFi and your Buzzard 2 device please visit ee.co.uk/carwifisetup

Please remember that you're responsible for using your Car WiFi in a way that complies with road safety law. Car WiFi is designed for use by your passengers, so please do not attempt to go online whilst driving your car. This product is not for public carrying vehicles, please contact EE if you would like details of our public WiFi services.

Inserting your Micro SIM

1. Open the SIM door.

2. Insert the Micro SIM (push out the Micro SIM from the full size SIM provided).

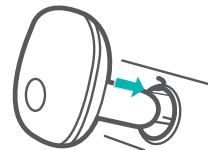

3. Close the SIM door.

Connecting your tablet or phone to the WiFi

1. Insert device into the 12v power socket. Now press and hold the power button for two seconds.

2. Now wait for a static yellow or green light. More lighting info overleaf.

3. Now search for your WiFi network on your tablet or phone. And once prompted enter the WiFi password.

Almost there

On pay as you go?

So you've got your yellow or green light on your device. Brilliant. Open a web browser window and you'll automatically be taken to a registration page. Fill in some short details, and then activate your SIM. Now you're ready to go.

IMPORTANT

On the back of your SIM pack is a number starting with '07' Please write it on your Keep Me Card for safe keeping.

You'll need this number if you want to call us up to talk about your device or if you're on pay as you go and need to top up.
