SAFETY INSTRUCTIONS

Save These Important Instructions

1. This Air Purifier is designed for use on a flat, level surface and may not work properly on an uneven surface. ALWAYS place this Air Purifier on a firm, level surface. ALWAYS place the Air Purifier at least six (6) inches away from walls and three (3) feet from heat sources such as stoves, radiators, or heaters.
2. Place the Air Purifier in an area that is out of the reach of children.
3. Before using the Air Purifier, extend the cord and inspect for any signs of damage. DO NOT use the product if the cord has been damaged.
4. To reduce the risk of electric shock, this product has a polarized plug (one blade is wider than the other) as a safety feature. This plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. DO NOT attempt to defeat or override this safety feature.
5. ALWAYS UNPLUG the Air Purifier when it is not in operation, while the filter is being changed, and while it is being cleaned.
6. DO NOT tilt or move the Air Purifier while it is in operation. Shut off and unplug before moving.
7. DO NOT immerse the Air Purifier in water as permanent damage will occur. Refer to and follow the CLEANING AND FILTER REPLACEMENT instructions.
8. DO NOT run the ionizer if tobacco smoke, air fresheners, dripless wax candles, or grease from cooking is present.

INSTRUCTIONS

Thank you for purchasing the HEPAtch™ Air Purification System from Hunter Fan Company. You have purchased our latest development in portable Air Purification Systems. This system has been developed to improve the quality of the air you breathe.

Our HEPAtch™ Air Purification System outperforms other air purification systems by

quickly and effectively removing dust, smoke, and pollen particles as small as .3 microns in size. Room air is pulled in through the front grill where larger particles and odors are caught on the pre-filter. Smaller particles passing through the pre-filter are caught on the main filter. The ionizer helps remove the remaining particles before being pushed back into the room through the top vent.

The filter on this unit is treated with Microban Antimicrobial technology which inhibits the growth of bacteria, mold and mildew that can cause odors and adversely affect filter performance.

USING YOUR AIR PURIFIER

1. Take the air purifier out of the box and remove the clear plastic protective bag. Place the unit on a firm level surface.
2. Before turning the Air Purifier "on", You need to open the front cover and remove the protective plastic that is surrounding the HEPAtch™ system filter. Press the buttons that are on each side of the front grill (See Figure 1). When they are pressed inward, you will be able to pull the front grill forward, opening the unit.
3. The filter comes to you installed in the correct position. Grasp the filter, and pull it forward, up, and out of the unit. Remove the plastic wrapping and replace the filter in the unit. The white HEPAtch™ filter material should be facing outward (towards you).
4. Before closing the front cover, check the placement of the pre-filter. It is installed under clips in the front cover. The pre-filter should be replaced every three months.
5. Close the front cover by once again pressing the buttons and allowing the front cover to slip into place over the buttons. The unit is now ready for normal operation.
6. Plug the unit into a 120V electrical outlet.

OPERATING YOUR AIR PURIFIER

7. Select a speed by sliding the speed selector to the appropriate location. The red power light will be illuminated when you have selected a speed.
8. Turn the ionizer 'on', by sliding the ionizer switch to the 'on' position. The green light will be illuminated when the ionizer is 'on'.

NOTE: The ionizer can release negative ions when the fan is not blowing. If it is used consistently without the fan, the dust particles that are attracted to the negative ions may deposit on your walls and floors. To minimize these deposits, we recommend that you use the ionizer only when the fan is blowing (when the unit is on LO, MED, or HI speed).

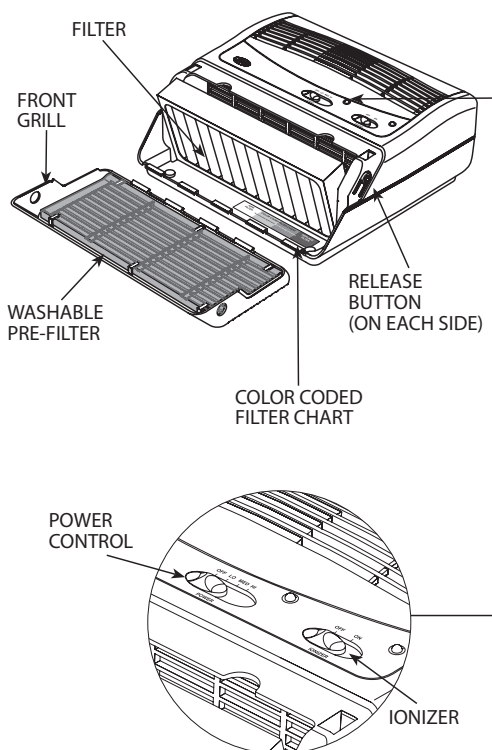

Figure 1.

Power Control - Choose Hi, Med, or Lo speed. The red light will be illuminated when the power is 'ON'.

Ionizer - Allows you to turn the ionizer 'ON'. The green light will be illuminated when the ionizer is 'ON'.

CLEANING AND FILTER REPLACEMENT

1. Clean the outside of the unit with a soft, damp cloth. Figure 3.
2. At least every 90 days, open the front grill, remove the carbon pre-filter, and replace it. This is necessary to maintain proper odor-removing and overall filtration performance. If necessary, it can be changed more often. Mark the new filter installation sticker included with the new carbon pre-filter and set the filter calendar dial. Be sure to remove any plastic wrapping that may be on the new filter before you place it into the Air Purifier.
3. Every 6 months you should remove the front grill and check the HEPAtch filter to see if it needs to be replaced. Compare the color of the filter to the filter change chart located above the filter in the air purifier.

HOW THE HEPATECH SYSTEM WORKS

The above is an illustration of how the HEPAtch™ air purification system works. Dust and other irritants are pulled into the air purification system and cleaned through the Carbon Pre-Filter, HEPAtch™ Filter, and by the ionizer. Clean, purified air is then released into the room through the top grill.
