Before using your phone

Please read this chapter before using this product.

- Cautions in use
- Contents checkout
- Name and function of handset elements
- Screen status display and function
- Battery insertion and detachment
- Charging the battery
- Tips on efficient battery use
- Battery life depending on service environment

Cautions in use

1

When you use the handset for the first time, please make sure that you charge your battery fully

Do not use in high-temperature or high-humidity environments. If the handset is soaked with rainwater or spilled drinks, it may not be possible to repair

Do not take apart or modify the handset

Do not touch the antenna during the call with any part of your body

Keep the handset in a safe place when not in use to avoid vibration and impact and to prevent damage

Do not clean your handset with chemical solutions such as solvent or thinner

Do not use your handset near explosives or flammable liquids

Contents checkout **Name and function of handset elements** **1**

Thank you for your purchasing Hyundai CDMA cellular phone. Please check the product contents by comparing them with the following pictures.

Part name of the handset

◄ Handset

◄ Traveller Charger

◄ Holder

◄ User's Manual

◄ Slim battery

◄ Feature summary table

◄ Standard battery

▲ Portable Loop

◄ Ear-micro phone

● Ear-microphone jack

● Volume button
Used to adjust earpiece volume, key tone volume and handsfree volume.

● Feature Buttons

● Folder Cover
Key lock is enabled when the folder cover is closed (however, key lock is disabled when receiving a call).

● Earpiece
Used for hearing other party's voice.

● LCD Display

● Antenna
It is recommended to pull up the antenna when calling. Do not touch the antenna with your hand as it may downgrade the voice quality.

● Power Button
Used to power on/off the phone.

● Dial Button
(Numeric Keypad)
Used to enter phone numbers or edit text.

● Etiquette Feature Button
Used to enable/disable the Etiquette Feature.

● Microphone

Check with your local distributor which battery type is supplied as standard. If there are any product defects, please report them to the place of purchase immediately.

Role of the function buttons

This button is used when you use the menu.

This button is used when you make a call or receive a call.

Short pressing of this button is used when you terminate a call or get out of current menu in the menu. More than one second press button is to turn on or off.

This button is used to clear the digits and /or texts from the display or exit the current menu in the menu.

This button is used to go to a lower level menu or store set parameter; put phone number and name into memory or erase them which were input during the waiting state. And this button is also used when you look up the list of stored phone number or name or phone number you just called. Also used for Scheduler and Electronic Calculator.

These buttons are scroll buttons which you use to select screen contents.

This button is used to find character message and voice messages.

Used to enable or disable Etiquette mode.

Signal Strength
The strength of current signal is displayed with the number (0-5) of bar.

Roaming
This icon shows the user is outside the normal service area.

Service state indicator
☒ is displayed when you are in an area where service impossible, 𝄐 is displayed when you try a call and the line is busy, and ☎ is displayed when you are in an area where service possible.

Short message service
Blinks when character or voice messages have been received and are currently held.

Digital mode
Displayed when the line is busy or standby in the digital mode.

Balance of battery power
The balance of battery power available is displayed with the number (0-4) of bar.

Etiquette mode indicator
Displayed when Etiquette mode is enabled.

Battery insertion and detachment　　　Charging the battery　　1

Battery insertion method

1 As shown in the picture ①, insert the battery to fit into the groove at the bottom of the handset.
Then press in the direction of ② until it snaps.

> • The battery must be correctly placed in the battery compartment. If battery is incorrectly inserted, the handset won't turn on or the battery may slip out during use.

Battery detachment method

2 Push handset separation tab ① with one hand and pull in the direction of ② to separate.
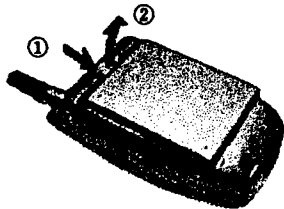

• Battery is not charged when you purchase the product. Use the battery after full charge.
• Charge your battery when the battery low-voltage alarm sounds from the handset.

---

1 **Power Connection**
Plug in the jack from the traveller charger to the connector at the back of the holder. Then, Insert the AC plug in a power outlet.

> • You can use the charger, with automatic FREE VOLTAGE feature, at 110V or 220V anywhere without making any settings. When power is connected, orange-colored light blinks once.

---

2 **Charging the battery only**
To charge the battery only, insert the battery pack into the charging slot.

---

3 **Charging the battery with the handset**
To charge the battery with handset, insert the battery-mounted handset into the charging slot.

---

4 **Charging the battery while travelling**
Connect the traveller charger's jack directly into the connecting slot at the bottom of the handset.

> • Make sure the battery is inserted when charging or using the handset.

5 Charging completion
Charging is completed when the green-colored lamp stays on.

- It may take longer to charge the battery if the handset is powered on or traveller charger is used.
- There's no harm done to the handset or the charger if the handset is left inserted into the charger while the green light is on.
- Charge your battery when the battery low-voltage alarm sounds from the handset and "Very Low Battery!" message appears on the screen.
- If the handset is powered off after "Low Battery Warning! Phone is Turning OFF!" message appears on the screen. Do not turn on the handset as it may cause damage to the memory. Change or charge the battery immediately.

Time to complete battery charging

Battery type	Standard battery	Slim battery
Charging time	About 200 mins.	About 200 mins.

Battery life (for new battery)

Status \ Type	Standard battery	Slim battery
Continuous Call	120-150min.	40-60min.
Continuous Standby	30-60 hours	13-26 hours

- More current is consumed during an active call than in standby status, making the standby time shorter as the call gets longer.

- Battery life varies depending on the use environment, such as charge status or temperature, use habit, the condition of radio waves, and keypad lighting time.

- Digital continuance standby time can be different depending on the service type related to the slot mode of mobile communication system of the service provider.

- Slot mode is a mutual communication cycle between the mobile communication system and the handset during digital continuance standby.

The less the slot mode, the more the communication, which causes more consumption of current, resulting in less standby time.

- If the lamp is not on or the red light blinks, check the cleanliness of the battery connection area.
- If the charger is not working even after the cleaning, contact your local dealer.

1 Do not keep the battery near fire or do not disassemble and contact the battery charge terminals.
It may explode.

2 Do not drop or subject the battery to a sharp impact.
Sharp impacts can damage the battery inside the battery pack making its life shorter.

3 Use only the battery that comes with the handset. Use only the recommended charger.
Using other batteries or chargers may cause damages to the handset and the battery. There is a danger of explosion

4 Purchase a new battery when battery use exceeds half its normal life.
Battery life becomes shorter as charge/discharge is repeated.

5 Charging efficiency is better at room temperature.
Avoid charging where there's direct sunlight, in front of a heater or an air conditioner.
If it's too hot or cold, battery cannot be charged and charging is resumed when the charger and the battery is placed in a room of adequate temperature.

6 Always store batteries in normal room temperatures.
If you leave the battery in a very hot or cold environment for a long time, the capacity of the battery drops and its life shortens.
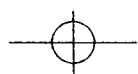

Chapter 2

Basic Operation

This chapter describes the basic operation of the handset.

- ● Basic operation
- ● How to adjust volume
- ● Ringer volume/vibration selection function
- ● Selection function for ringer type
- ● Adjusting Ring Bell Volume
- ● Auto answering Feature

Basic operation   2

How to turn the handset on

① Hold down (📞) button until a beep is heard.

```
Tᵈ ▦ ▫ ▫ ▫ ▯ ▦ ᵃᵐ
    HYUNDAL
   XXX-XXX-XXXX
```

```
Tᵈ   ▪      ▦ ᵃᵐ
    HYUNDAL
   JAN 28, WED
     4:03pm
```

- If the phone is in Auto Lock mode, "Lockcode?" message will appear on the screen. You should enter the 4-digit lock code to use the phone. However, you can make emergency calls in Auto Lock mode. Unless set otherwise, the initial lock code shall be "0000" (refer to p.60).
- If an error message appears on the screen, contact your local dealer.

How to turn the handset off

① Hold down (📞) button until the phone powers off.

```
Tᵈ   ▪      ▦ ᵃᵐ
    HYUNDAL
   JAN 28, WED
     4:03pm
```

Use only the [📞] button to turn off the phone. Turning off the phone by removing the battery could result in memory damage and call information such as air time, last calls and phone numbers may not be saved.

```
Tᵈ   ▪      ▦ ᵃᵐ
   ▬▬▬▬▬▬▬▬
   Powerring Off
```

- If the phone does not power on or if it acts abnormally, remove and install the battery and turn on the power.
- Wait for at least 5 seconds before turning on the phone after turning off the phone.

## How to call

| Area Code | o | Phone Number | o | 📟 |

(1) Press the area code then the phone number.

To delete a wrong number, press [CLR] to back up. To delete all entered digits, press [END] or hold down [CLR] to return to the standby display.

```
Tᵈ  ☎  📶 📊
213-555-5262
```

(2) Press (📟).

• If the line is busy, terminate the call, wait for a moment, then try again.
• "Call Failed" message will appear on the screen if the call cannot be connected.

```
Tᵈ  ☎  📶 📊
Call
213-555-5262
```
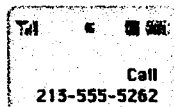

(3) Start the conversation after the call is connected.

• If the Call Connect Alert Feature(refer to p57) is set, a combination of beep will be heard before the talk time is displayed. It will be convenient to start talking after hearing the call connect beeps.

```
Tᵈ  ☎  📶 📊
00:00:01
Call
213-555-5262
```
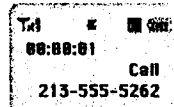

(4) To end the call, close the phone or press (📟) If you are using the ear-microphone, press the ear- microphone button for more than 1/2 second.

```
Tᵈ  ☎  📶 📊
HYUNDAI
JAN 28, WED
4:05pm
```
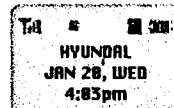

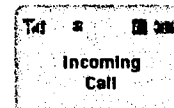

• To call the number you have just called, Press [📟].
  If you are using the ear-microphone, press the ear-microphone button for more than 1/2 second.
• If ⚡ is displayed, you are in an out-of-service area and you cannot make a call.

How to answer a call

(1) Phone bell rings and the green LED on the folder cover flashes.

• To change receiver type (Ringer/Vibration/Ringer + Vibration/Lamp), please refer to P26. Initial setting is "Ringer".

```
Tᵈ  ☎  📶 📊
Incoming
Call
```

(2) Open the folder or press any key if the folder is already open.

If you are using ear-microphone, press the ear-microphone button for more than 1/2 second.

```
Tᵈ  ☎  📶 📊
00:00:01
```
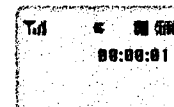

(3) Start the conversation.

• Closing the folder while using the ear-microphone does NOT end the call.

(4) To end the call, close the folder or press (📟) button.

• If Auto Answering Feature is enabled, the bell rings for the number of bells set before the call is connected automatically (refer to p29)
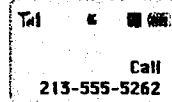

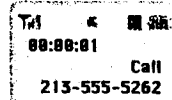

Recalling Last dialed number

Used to call the number that you have just called.

(1) Press ( ) without pressing any numbers and the phone number you have just dialed or the number most recently saved will be displayed on the screen and that number is dialed.

If you are using ear-microphone, press the ear-microphone button for more than 1/2 second.

> Tal
> Call
> 213-555-5262

(2) Start the conversation after the call is connected.

* Closing the folder while using the ear - microphone does NOT end the call.

> Tal
> 00:00:01
> Call
> 213-555-5262

(3) Press ( ) or close the folder to end the call. If you are using ear-microphone, press the ear-microphone button for more than 1/2 second.

Received Signal Strength

(1) Tall The strength of the received signal is displayed by the number of bars (0~5).

Remaining Battery Indicator

(1) The bars inside the battery figure displays the remaining power in the battery. Fully charged batteries are displayed with four bars. If the battery power expires and needs to be charged, no bar is displayed inside the battery figure and an alert beep sounds with a "Very Low Battery" message on the screen.

When using the volume button

(1) Press the volume button to adjust the volume for the present state.

* Conversation state : Adjusts ear-piece volume
* Standby state : Adjusts key-tone volume
* Conversation state while using hands-free : Adjusts hands-free volume

> Tal
> Ear Volume
> [END]
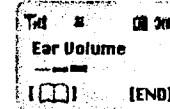

(2) After adjusting the volume, press button to save the settings.

* The volume setting is automatically saved 2 seconds after the volume is adjusted.
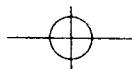

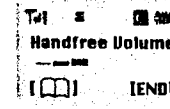

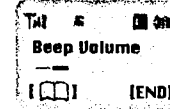

> Tal
> Beep Volume
> [END]

> Tal
> Handfree Volume
> [END]

This feature is used to select between ringer, vibration or lamp for receiver type.

① Press (🔲)→②→① from the standby state.

> T.il　　🔲 📶
> **Receive Type**
> ➝Ringer
> [📖]　　[END]
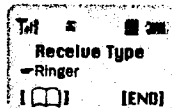

② Use the scroll buttons to select the receiver type you want.

- Ringer
- Vibration
- Vib + Ringer : Vibrates for 3 seconds then the bell rings.
- Lamp

③ Press (🔲) button.

This feature is used to select the bell type the user wants.

① Press (🔲)→②→② from the standby state.

> T.il　　🔲 📶
> **Ringer Select**
> ➝0 TYPE
> [📖]　　[END]

② Use the scroll buttons to select the bell type you want.

③ Press (🔲) button.

Adjusting Ring Bell Volume / Auto answering feature

2

Using the menu button

① Press ( ) → ② → ③ from the standby state.

To move between the menu items, use the scroll buttons (/) or the volume buttons.
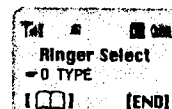

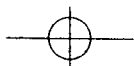

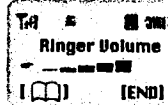

> Tal   🔳 🔳
> **Ringer Volume**
> ◀━━━━━━▄▄🔳🔳
> [🕮]   [END]

② Adjust the volume by pressing the volume buttons or the scroll buttons, then press ( ) button to store the setting.

The call is connected automatically after the bell rings for the number of times set.

① Press ( ) → ② → ④ from the standby state.

> Tal   &   🔳 🔳
> **Auto Answer**
> ━Off
> [🕮]   [END]
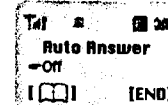

② Use the scroll button to select the setting you want.

- 1/2/4/6 Rings : The number of times the bell rings before the call is connected automatically.
- Off : Auto answering feature is disabled.

③ Press ( ) button.

- If the receiver type is not set for "Ringer" or if the folder is closed, auto answering feature is disabled. However, if you are using ear-microphone, this feature is not disabled whether the folder is closed or not.
- In hands-free mode, this feature works regardless of the receiver type and whether the folder is closed or not.

This feature allows you to choose whether you want to receive the call by opening the folder. This is particularly useful if you want to see the Caller ID before answering calls.

(1) Press ( ) → ② → ⑤ from the standby state.

> Flip Answer?
> ⇐Yes
> [ ]   [END]
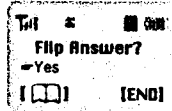

(2) Use the scroll button to select the desired setting.

- Yes : Allows you to receive calls by opening the folder.
- No : Does not allow you to receive calls by opening the folder. To receive a call when the folder is closed, open the folder then press any key.

(3) Press ( ) button.

Chapter 3

Memory Function

How to store a phone number   3

Up to 100 phone numbers can be stored in memory and there are a lot of ways to retrieve them letting you make the call fast and easy.

| Phone Number | ○ | [icon] | ○ | Location Number (2-digit) | or | [icon] | ○ | Location Name | ○ | [icon] |

**(1)** Enter the phone number you wish to store and press ([icon])button.

* The first available location is automatically displayed.

```
Tel      [icons]
Default :     XX
  213-555-5262
[   ]       [END]
```
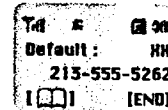

(2) To store the number at the first available location displayed, press ([icon]) button.

* If you want to store the number at a different location, use the numeric keypad to enter the 2-digit location number you want.
* Locations 90 to 99 are stored with hidden feature.
* If the desired location already has a phone number stored in it, "Overwrite? " message will appear on the screen.
  - To overwrite, press [[icon]]button.
  - To store the number at a different location, press [[icon]].

```
Tel      [icons]
 Overwrite?
 -Yes
[   ]       [END]
```

```
Tel      [icons]
 Location :    XX
 Name?
 --
[   ]       [END]
```
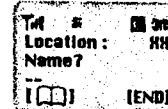

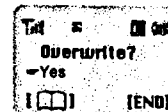

(3) Use the numeric keypad to enter the name for that location. (refer to P32)

(4) Press ([icon])button after entering all the letters.

Editing Alphabet and Numerics

● Press the numeric keypad to select the letter.

Keypad	Once	Twice	3 times	4 times
1 QZ&	Q	Z	&	1
2 ABC	A	B	C	2
3 DEF	D	E	F	3
4 GHI	G	H	I	4
5 JKL	J	K	L	5
6 MNO	M	N	O	6
7 PRS	P	R	S	7
8 TUV	T	U	V	8
9 WXY	W	X	Y	9

* To enter the number "0", press [◯] button.
* To enter special characters, keep pressing [◯] button.
(| ? . , ( ) ' * # = $ _ + [ ] @)

● To enter the next letter, press (◯) button.

* The cursor automatically goes left 2 seconds after a letter has been entered.
* The maximum number of letters allowed is 8.

To correct incorrectly entered letters (using the [◯] button)
* To delete a letter : Press [◯].
* To delete all letters : Hold down [◯].

One-touch dialing function

This feature allows you to make the call for the phone numbers stored in memory location 0 to 9 without having to press the [SEND] key.

① Hold down the location number for more than 1 second.

> Tll ☎ ▪▪▪
> Dialing to
> memory X

> Tll ☎ ▪▪▪
> EUGENE
> 213-555-5262

> Tll ☎ ▪▪▪
> EUGENE
> Call
> 213-555-5262

Two-touch dialing function

This feature allows you to make the call for the phone numbers stored in memory location 10 to 99 without having to press the [SEND] key.

① Press the first digit, then hold down the second digit for the location.

* If the location is empty, " EMPTY LOCATION" message appears on the screen.
* If the phone number was stored with hidden feature, the number is not displayed on the screen while calling.

> Tll ☎ ▪▪▪
> Dialing to
> memory XX

> Tll ☎ ▪▪▪
> EUGENE
> 213-555-5262

> Tll ☎ ▪▪▪
> EUGENE
> Call
> 213-555-5262

How to find the list of the last calls

① Press (📷) → ① → ①.

• Ten last calls can be seen.
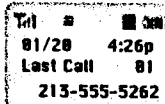

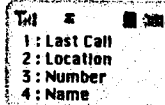

```
Tal  =      ▓ ▓
1 : Last Call
2 : Location
3 : Number
4 : Name
```

```
Tal  =      ▓ ▓
01/20     4:26p
Last Call    01
213-555-5262
```
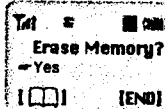

② Use the scroll buttons to find the phone number you want.

• [◀] goes to the previous number and,
  [▶] goes to the next number.

③ To delete the stored number, hold down the CLR button.

• "Erase Memory?" message appears on the screen. Use the scroll keys to select between "YES/NO", then press [📷].

```
Tal  =      ▓ ▓
Erase Memory?
←Yes

[ 📖 ]      [END]
```

④ To call the number displayed, press (📞).

Recalling by memory location number

① Press (📷) → ① → ②.

```
Tal  =      ▓ ▓
Recall
Location?
--
[ 📖 ]      [END]
```

② Enter the two-digit memory location.
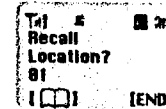

```
Tal  =      ▓ ▓
Recall
Location?
01
[ 📖 ]      [END]
```

③ Use the scroll buttons to find the phone number you want.

• [◀] goes to the previous number and,
  [▶] goes to the next number.

```
Tal  =      ▓ ▓
EUGENE
Location :    01
213-555-5262
```

④ To delete the stored number, hold down the CLR button.

• "Erase Memory?" message appears on the screen. Use the scroll keys to select between "YES/NO", then press [📷].

```
Tal  =      ▓ ▓
Erase Memory?
←Yes

[ 📖 ]      [END]
```
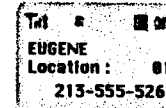

⑤ To call the number displayed, press (📞).

• If the phone number stored with the hidden feature was found, only the name of the location is displayed on the screen and "Lockcode?" message appears on the screen.?
• To view the phone number, enter the 4-digit lock code.

Recalling by phone number

(1) Press (▨) → ① → ③.

```
Tel    &    ▨ ▨
Recall
Number?
--
[▥]        [END]

• Up to 7 integer digits and up to 2 decimals can be displayed and if the calculated result has more than 7 digits, the result is displayed by 7 digit logarithm.
• There are no (-) sign. To express a negative number, use '0-value'.
• To see the help screen, press the volume key even if you are in the middle of a calculation.

• Example)
  To calculate 128 X 32 =
  1. Enter 128
  2. Press [⏸]
  3. Enter 32
  4. Press [📷]
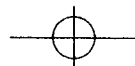

Chapter 4

Convenient Functions

- Basic method of using menu
- Menu structure
- How to adjust the screen status
- Function of verifying call time
- Alert Function
- Secret Information
- Features used while call is connected
- Phone Information

(1) Press the (📱)button from the standby state and use the numeric keypad to choose the desired menu item.

- Use the scroll buttons (⬆️/⬇️) or the volume buttons to move between the menu items.

(2) To go back to the upper menu, press the (🔙)button. To go back directly to the standby state, press the (📞) or (📱)button.

- If there are lower level menu items the lower menu is displayed on the screen.
- If there are no lower level menu items Use the scroll buttons to select the desired value for that menu item, then press the [🔘] button to store the value. To cancel, press the [🔙] button.

```
Tal   &     ⬛ ☎:
HHHHH days old
P  ▮▬▬ 98
E  ▮▬▬ 98
I  ▮▬▬ -98

↑  Dangerous day
→  Vital period
←  Lethargic period
```

• The number of days elapsed since the birthday is displayed on the top of the screen, and the physical (P), emotional (E), intelligent (I) quotients are displayed.

• What is biorhythm?
Biorhythm is a life rhythm that is governed by three rhythm curves called physical, emotional, and intelligent and starts from within our bodies from our birth to death.
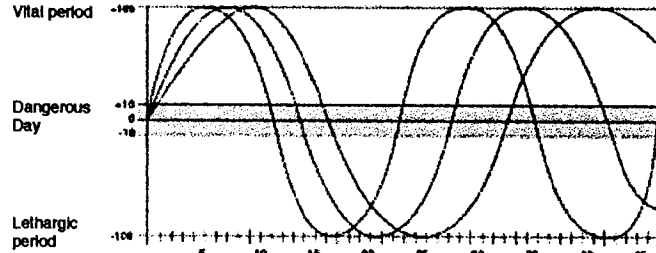

● Physical rhythm (P)
This rhythm controls wide-ranging physical elements related to resistance to diseases, physical strength, adjustment of muscle exercise, speed, physiology, and other basic physical function with a cycle of 23 days.

● Emotional rhythm (E)
This rhythm adjusts creativity, sensitivity, mental health, and recognition about world and humans with a cycle of 28 days.

● Intelligent rhythm (I)
This rhythm affects our memory, susceptibility to fright, acceptance of knowledge, and logical and analytic power with a cycle of 33 days.

Vital period

Dangerous Day

Lethargic period

	Physical rhythm (23 days) (Health and sports rhythm such as weight, stamina, courage etc.)	Emotional rhythm (28 days) (Stability rhythm such as work or love life)	Intelligent rhythm (33 days)(Learning and efficiency rhythm such as memory, ability to analyze, concentration)
Vital period	Suitable for tasks requiring physical strength, travel, intensive sports training. But be careful about overconfidence in your body and overdrinking. Good period for rapid recovery from surgery.	Takes care of works full of vitality. Good time for joint work, love seeking, and date.	Fast brain activity, lots of mental work. Planning, reviewing. Good time to make decisions about important matters.
Dangerous Day	High probability of increased body temperature, occurrence of chronic disease, cold, headache. Be careful about driving and other hazardous situations.	Emotions and nerves are easily shaken. Irritation, slip of the tongue, malicious gossip can worsen the condition of a disease.	Lack of attention and concentration leads to a mistake. Better to postpone important decisions or entering into contracts. Be careful about driving.
Lethargic period	Easily be fatigued. Need to refrain from drinking, overeating, and excessive physical exercise. Rest is important. Regular and light exercise will increase your potential power.	Become passive at work. Better not tackle work requiring patience and creativity. Need to take rest while avoiding personal relationships and challenges.	Relatively low level mental work. Avoid demanding brain work and courses you are not confident in. Organize materials, notes and cards.
Stopwatch function

(1) Press([icon])→⑤→②.

```

```
This feature is useful for places such as library or cinema.

To enable

(1) Press the Etiquette (🔘) button.

> Tₒ𝐥 ⚡ ▌▒
> **ETIQUETTE**
> **MODE**

> Tₒ𝐥 ⚡ ▌▒
> **HYUNDAI**
> **JAN 28, WED**
> **4:03pm** ☺
> (Standby state)
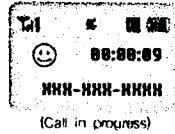

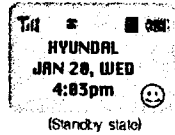

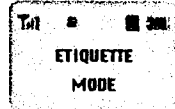

> Tₒ𝐥 ⚡ ▌▒
> ☺ **00:00:09**
> **XXX-XXX-XXXX**
> (Call in progress)

To disable

(1) Press the Etiquette (🔘) button.

> • The phone returns to the state before entering the etiquette mode.

> Tₒ𝐥 ⚡ ▌▒
> **NORMAL**
> **MODE**

> Tₒ𝐥 ⚡ ▌▒
> **HYUNDAI**
> **JAN 28, WED**
> **4:03pm**
> (Standby state)

> Tₒ𝐥 ⚡ ▌▒
> **00:00:09**
> **XXX-XXX-XXXX**
> (Call in progress)
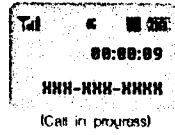

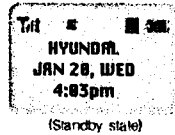

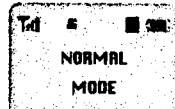

> • Etiquette button can be used both in standby state or while a call is in progress.
> • If this feature is enabled, all the key tones and DTMF tones, alerts and call connect beeps are muted and the receiver type turns into vibration regardless of the type chosen by the user.
> If the phone is powered off, etiquette feature is disabled and the phone returns to the state before entering the etiquette mode.
Appendix

- Optional devices
- Summary table of functions

Hands-free kit for vehicles

Hands-free kit allows you to use the phone while you are driving in a vehicle. The handset gets power from the vehicle hence the long talk time and the battery can be charged as well.

Contents of the hands-free car-kit

◀ Mounting Stand

◀ Mounting Stand Base(including crews)

◀ Hands-free Box

◀ Hands-free Box Base (including screws)

◀ Power Cable

▲ Hands-free Microphone
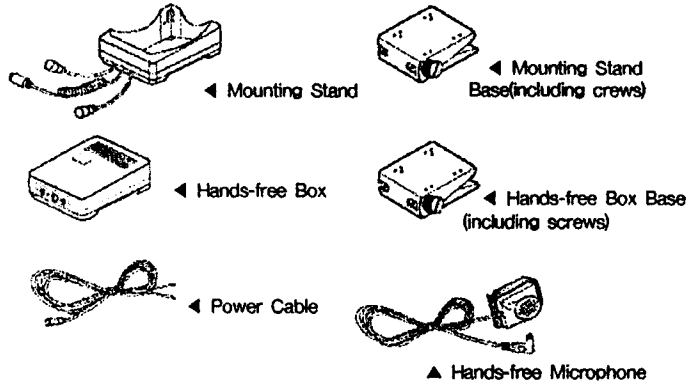

• For more information, refer to the hands-free kit user manual.

Others

Cigar Lighter Charger

Allows you to use the handset with or without the battery pack installed. The handset gets power from the cigar lighter jack and if the battery pack is installed on the handset, the battery pack gets charged.

Extend Sifetime Battery   **Slim Battery**
