How to Select the Aspect Ratio

- Users can adjust Aspect Ratio as users want.
- This function is available only with the remote control.

ASPECT

Press the ASPECT button, then Aspect Ratio changes in order below.

⇒ 15:9 ⇒ 4:3 ⇒ Zoom 1~5 ⇒ Panorama ⇒ 16:9 ⇒ (HQL260WR)
 ⇒ 16:9 ⇒ 4:3 ⇒ Zoom 1~5 ⇒ Panorama ⇒ (HQL320WR)

16:9

General broadcast picture is adjusted to 16:9.

▲ HQL260WR

▲ HQL320WR

16:9

General broadcast picture is adjusted to 16:9.

15:9

The full screen of the image adjusted to 15:9.

▲ HQL260WR

Panorama

Picture size for panorama video.

4:3

General picture size.

▲ HQL260WR

Zoom1~5

Zoom in 4:3 in horizontal and vertical direction. (This mode is recommended in letter box format.)

ASPECT

- In case the PIP mode

When you are viewing the main and PIP images at the same time :
The PIP image will change only from 4:3 to 16:9.

4:3

16:9

TIP

OSD menu displays the current aspect ratio.

If you press the ASPECT button second time, aspect ratio will be changed according to Input mode as follows :

HQL260WR -

- **Under DTV or DVD inputs** : Users can select ⇨ 15:9 ⇨ 4:3 ⇨ Zoom1~5 ⇨ 16:9 ⇨ in order.

- **Under PC inputs** : Users can select ⇨ 15:9 ⇨ 4:3 ⇨ in order.

- **Under other inputs** : Users can select ⇨ 15:9 ⇨ 4:3 ⇨ Zoom 1~5 ⇨ Panorama ⇨ 16:9 ⇨ in order.

HQL320WR -

- **Under DTV or DVD inputs** : Users can select ⇨ 16:9 ⇨ 4:3 ⇨ Zoom1~5 ⇨ in order.

- **Under PC inputs** : Users can select ⇨ 16:9 ⇨ 4:3 ⇨ in order.

- **Under other inputs** : Users can select ⇨ 16:9 ⇨ 4:3 ⇨ Zoom 1~5 ⇨ Panorama ⇨ in order.

How to Freeze Picture

The user can temporarily stop the playing picture.

STILL

Press Still button.

Playing picture is stopped.

** In PIP mode, the main picture stops.*

To deselect Still function.

Press Still button once more.

How to view Closed Captions

This is to displays the closed captions that are broadcasted with certain TV shows.

Press Menu button.
Menu items appear on the screen.

Care and Cleaning	81
Product Specifications	82

Glossary

Component video Component video is sent through three cables: two color shade (chrominance) signals and one brightness (luminance) signal. Component video achieves greater color accuracy than composite video or S-VIDEO by splitting chrominance into two separate portions.

Composite video Composite video is sent through a single cable. Composite video combines the color shade (chrominance) and brightness (luminance) information into one video signal.

S-VIDEO S-VIDEO requires a single cable, which carries the brightness (luminance) and color (chrominance) signals of the picture separately. S-VIDEO provides better resolution than composite video, which carries the signals together.

480i Provides 480 lines of resolution. Displays images using interlaced scanning, which first transmits all the odd lines on the TV screen and then the even lines.

480p Provides 480 lines of resolution. Displays images using progressive scanning, which transmits each line from top to bottom.

720p Provides 720 lines of resolution. Displays images using progressive scanning, which transmits each line from top to bottom.

1080i Provides 1080 lines of resolution. Displays images using interlaced scanning, which first transmits all the odd lines on the TV screen and then the even lines. 1080i is one of the formats used by HDTV (High Definition TV).

Digital television (DTV) A new technology for transmitting and receiving broadcast television signals. DTV provides higher resolution and improved sound quality over analog television.

HDTV(High Definition TV) HDTV is a new kind of digital TV, creating a high quality picture, high definition. The HDTV provides a theater-like screen with an aspect ratio of 16:9. Supports 480p or higher.

SDTV(Standard Definition TV) SDTV is a new kind of standard definition digital TV, having a range of lower resolution than the HDTV. Supports 480i.

Cable Broadcast Receiver (Converter) A device that receives cable broadcasting. Connecting it to your TV set allows you to watch a various channels.

Satellite Broadcasting Provides crisp picture and clear audio quality throughout the country via a satellite.

VHF/UHF VHF (Very High Frequency) is the part of the frequency spectrum from 30 to 300 megahertz. UHF (Ultra High Frequency) is the part of the frequency spectrum from 300 to 3,000 megahertz.

DVD	DVD (digital versatile disc) is an optical disc that can store a huge volume of multimedia such as video, game, and audio application, etc.
Coaxial Cable	Coaxial cable is the kind of rounded copper cable, which is generally used for TV antenna.
LNA(Low-Noise-Ampilfler)	Satellite applied technology. It is capable of amplifying weak signals so that any area experiencing a signal interruption may enjoy a clearer picture quality.
Aspect ratio	Refers to the ratio between the width and height of the screen. This TV has a 16:9 (widescreen) aspect ratio, as opposed to a 4:3 aspect ratio.
PIP (Simultaneous Screen)	PIP allows you to view two images at the same time in a single screen.
SWAP	PIP function provides a main picture (larger image) and sub-picture (smaller image). The SWAP is designed to swap the sub-picture for the main picture. For example, while you are watching a main picture on TV and watching a sub-picture on VCR, you can instantly switch the two pictures by using the SWAP function.
Picture Mode	Picture Mode features the optimal picture quality. There are Custom-Standard-Sport-Natural-Mild features in order. "User Control" allows you to adjust Contrast, Brightness, Colour, Tint, etc.
Sound Mode	Sound Mode features the optimal sound quality. There are Standard-Music-Film-Speech-Custom features in order. "User Control" allows you to adjust high frequency sound, middle frequency sound and low frequency sound.
Channel Tuning	The feature allows you to enjoy optimal broadcasting. This product provides automatic tuning feature for the best broadcasting status. You can tune the channels manually.
SRS WOW	A well-recognized 3D sound technology developed by US SRS Labs, Inc. This technology delivers the ultimate audio experience only with two speakers as if through multi-channel speakers.

Troubleshooting

Installation Problems

Symptom

How can I install an antenna?

TV screen is not clear after installing an indoors antenna.

How can I view cable broadcasting?

Possible solution

Refer to pages 23~24.

Indoors antenna may experience poor reception due to surrounding buildings. Please install an outdoors antenna or wireless antenna.

Please install a cable broadcasting receiver (Converter).

Picture Problems

Symptom

Neither picture nor sound comes up.

Picture turns on slowly after power is on.

Vertical and horizontal lines and web patterns briefly appear on the picture and shake.

Input Source information only appears on black screen.

Poor reception on some channels.

Black and white on some channels.

TV won't turn on.

Screen is too bright or too dark.

Possible solution

Check whether power is on.
Check whether the power is cut or whether power cord is properly connected.
Try to plug another product's power cord to the outlet the LCD TV is plugged into.

This symptom is not a malfunction. This delay is designed to prevent the distorted and noisy picture when power is on. However, if the picture does not appear more than 5 minutes after power is on, call a service center.

This symptom may be caused by interference from other electric appliances. Please avoid using a cordless phone, hairdryer, and electric drill, etc.

Check whether your TV is properly connected to external devices.

Check whether you selected proper channels. Try re-orienting your antenna. Ensure LNA is activated.

Check other channels for black and white screen. Adjust colour.

Ensure the power cord is plugged.

Adjust brightness.

Auto On does not work.

Ensure to use the remote control or power button on the product to turn off your TV. If you unplug the power cord, the stand-by consumption power becomes 0 (zero), which causes the programmed time to be erased.

After setting the time, I turned TV off and turn it on. The programmed information has been erased.

Ensure to use the remote control or power button on the product to turn off your TV. If you unplug the power cord, the stand-by consumption power becomes 0 (zero), which causes the programmed time to be erased.

Sound Problems

Symptom

Possible solution

Too much noise occurs.

Check whether the audio setting is in the Stereo mode. In the Stereo mode, the sound may be distorted in the area where experiences poor reception or is located far away from a TV broadcasting station.

No sound while viewing a cable channel

Make sure an audio or audio/video component is securely inserted into the appropriate jacks. Check other channels for sound. Check the volume settings on the cable broadcasting receiver.

Picture is OK but sound does not come out.

Try to press volume up/volume down buttons of your remote control.

One of the speakers does not produce sound.

Select sound balance and make proper adjustment. (Page 43)
Check the speaker connection cables.

General

Symptom

Possible solution

Remote control won't work.

Check whether there is a blocking object between the remote control and LCD TV. Make sure your LCD TV is Power On. (In case of normal, LED on the front panel is in Red.)
Check whether batteries are inserted with proper polarities(+, -).
When the batteries are worn out, replace with new ones.

Where does the S-Video cable plug in for audio output?

Connect the two Audio jacks from the S-Video cable to the left and right ports on the Composite.

Strange noises are heard.

Ticking noise during or after watching is caused by the change of ambient environment such as humidity and temperature, which is characterized by plastic products. Strange ticking noise occurs because a signal is suddenly transmitted to the LCD panel. So, this is not a malfunction.

I tried to use the TV screen as a PC monitor but it doesn't work.

Adjust the resolution referring to the standard signal mode table. Check the specification of your video card installed in your PC. If your video card does not work in supported hardware. Try upgrading the video card's driver.

Care and Cleaning

Cabinet Cleaning

Wipe a soft dry cloth.

Do not use inflammables like Benzene or Thinner, or wet clothes.
Do not scratch the panel of TV with a fingernail or pointed object.

Screen Cleaning

Clean the screen with a soft cloth moistened in mild glass detergent and dry with a soft cloth.

Never use any solvent on the screen such as Acetone, Benzene, or Thinner, etc.

Cleaning Inside

When the inside needs to be cleaned, contact a service center or distribution agent where the item is purchased.

It is recommended cleaning is complete before the rainy season.
