- After the phone is connected with the computer, select [U Disk] in the phone. When the computer identifies the U disk successfully, the status bar will appear a small green icon of the USB device in the lower right corner of the phone.
- Open "My Computer"and you can see the "Removable Disk", then the operation to U disk can be carried out.
- The multimedia files, which you browse through the mobile phone, must be stored in the specified directory to identify, or it will be not read or play through the phone if they are stored on the other directory. For example the image files only in the "Photos" directory can be readed through the phone.

Note:

1. When the the phone is used in the state of U disk, you can see some default application files, and once you remove them, the default files will be lost permanently.
2. After using the U disk, at first remove the U disk from the computer equipment and get the notice from system, and then you can pull U disk safely, otherwise it will make data loss easily, even lead to the damage of U disk file system.
3. To support USB1.1.

14. Phone maintenance

Mobile phone is an electronic product with high-precision, please maintain it carefully. The following suggestions can help you to maintain phoneand extend the lifespan of it:

- The phone and its accessories should be placed out of the reach of children.
- Keep the device dry. Rain, humidity or moisture will corrode the circuit board. If the phone is flooded accidentally, you should remove the battery promptly and sent it to the local authorized service center for processing immediately.
- Do not place your phone in places which are full of dust, or it may affect the normal use of your phone.
- LCD display is the part of phone which can be damaged easily, so you should avoid dropping the mobile phone onto the ground or making the phone vibrating strongly; prohibit using sharp objects to touch the screen.
- Do not place the phone where¬ the temperature is too high. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt plastic shell phone.
- Do not place the phone where the temperature is too low. Otherwise, when the temperature of the phone raise to normal temperature, moisture will be generated internally and it could damage the device of electronic circuit boards.
- Do not drop, knock or shake the phone severely, so as not to damage the internal circuit boards and precision mobile structure.
- Do not use chemicals, cleaning solvents or strong detergents to clean the device. You need use the soft cloth soaked in soapy water to scrub it gently.
- Do not use the pigment to paint your phone.It can avoid the moving parts be stuck, with which can affect the proper operation of your phone.
- Please use clean soft cloth to clean the lens, such as camera lens.
- Only the supplied or designated antenna can be used to replace the old antenna. The use of unauthorized antennas, phone accessories or modification could damage the device and may violate correlative regulations about radio devices.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Federal Communication Commission (FCC) Radiation Exposure Statement

This EUT is compliance with SAR for general population/uncontrolled exposure limits in ANSI/IEEE C95.1-1999 and had been tested in accordance with the measurement methods and procedures specified in OET Bulletin 65 Supplement C. This equipment should be installed and operated with minimum distance 1.0cm between the radiator & your body.

To maintain compliance with FCC RF exposure requirements, use only belt-clips, holsters or similar accessories those do not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
