6. If the keyboard doesn't work properly, please remove the USB dongle receiver from computer's USB port, then repeat do step 2 to step 5 again.

Enjoy using your keyboard.

## Troubleshooting

**What do I do if the cordless keyboard does not work?**

- Check the USB dongle receiver is connected to your computer's USB port.
- Make sure the batteries are correctly installed into your cordless keyboard.
  (The positive (+) and negative (-) ends of each battery must match the polarity signs in the battery housing)
- Make sure the batteries power qualities are good for use.
- **Make sure the ID Setting process is well completed.**
- Please change batteries immediately when the cordless keyboard battery low indicator light up.
- Warning: Please remove batteries from your cordless mouse when not using for a long period of time.
- Less performance：Metal object close to or in between the device. (Please remove objects.)

- Microsoft® Windows® ME, 2000, XP, Vista™ or above

## Safety instructions

- Do not open or repair this device.
- Do not use the device in a damp environment.
- Clean the device with a dry cloth.

**Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pur-suant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated ra-dio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

◎Reorient or relocate the receiving antenna.
◎Increase the separation between the equipment and receiver.
◎Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
◎Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, (example – use only shielded interface cables when connecting to computer or peripheral devices). Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environ-ment. This equipment should be installed and operated

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two condi-tions:

(1) This device may not cause harmful interference, and(2) this device must accept any inter-ference received, including interference that may cause undesired operation.

## Welcome

Congratulations on your purchase of an i-rocks™ RF-6521 cordless keyboard. The i-rocks™ RF-6521 wireless keyboard uses the latest 2.4GHz Frequency Hopping Spread Spectrum (FHSS) ISM RF technology to provide you with extended range and flawless communication between the keyboard and your computer. Four automatically selected channels eliminate any possible interference when this keyboard is used around other RF devices. The 2.4GHz ISM RF Digital Radio technology allows the RF-6521 to stay connected to the devices in up to a 15M radius. The 2.4GHz wireless communication link operates in the 2400 - 2483 MHz frequency band available unlicensed world wide for Industrial, Scientific and Medical (ISM) applications. For users that demand the highest performance, quality, and convenience, the RF-6521 keyboard is a perfect choice.
