## Icom Inc.

# IMPORTANT

**READ ALL INSTRUCTIONS** carefully and completely before using the transceiver.

**SAVE THIS INSTRUCTION MANUAL** — This instruction manual contains important operating instructions for the **IC-F5011, IC-F5013/H, IC-5016/H, IC-F5018H VHF MOBILE TRANSCEIVERS** and the **IC-F6011, F6013/H, F6018H UHF MOBILE TRANSCEIVERS**.

# EXPLICIT DEFINITIONS

| WORD | DEFINITION |
|------|------------|
| ⚠WARNING | Personal injury, fire hazard or electric shock may occur. |
| CAUTION | Equipment damage may occur. |
| NOTE | If disregarded, inconvenience only. No risk of personal injury, fire or electric shock. |

Icom, Icom Inc. and the Icom logo are registered trademarks of Icom Incorporated (Japan) in Japan, the United States, the United Kingdom, Germany, France, Spain, Russia and/or other countries.
All other products or brands are registered trademarks or trademarks of their respective holders.

# FCC INFORMATION

• **FOR CLASS B UNINTENTIONAL RADIATORS:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- • Reorient or relocate the receiving antenna.
- • Increase the separation between the equipment and receiver.
- • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- • Consult the dealer or an experienced radio/TV technician for help.

# PRECAUTIONS

⚠**WARNING! NEVER** connect the transceiver to an AC outlet. This may pose a fire hazard or result in an electric shock.

⚠ **WARNING! NEVER** connect the transceiver to a power source of more than 16 V DC such as a 24 V battery. This connection will ruin the transceiver.

⚠ **WARNING! NEVER** cut the DC power cable between the DC plug and fuse holder. If an incorrect connection is made after cutting, the transceiver might be damaged.

⚠ **WARNING! NEVER** place the transceiver where normal operation of the vehicle may be hindered or where it could cause bodily injury.

**CAUTION! NEVER** allow children to touch the transceiver.

**CAUTION! NEVER** expose the transceiver to rain, snow or any liquids.

**USE** the specified microphone only. Other microphones have different pin assignments and may damage the transceiver.

**DO NOT** use or place the transceiver in areas with temperatures below –30°C (–22°F) or above +60°C (+140°F), or in areas subject to direct sunlight, such as the dashboard.

**DO NOT** operate the transceiver without running the vehicle's engine. The vehicle's battery will quickly run out when the transceiver transmits while the vehicle's engine is OFF.

**DO NOT** place the transceiver in excessively dusty environments.

**DO NOT** place the transceiver against walls. This will obstruct heat dissipation.

**DO NOT** use chemical agents such as benzine or alcohol when cleaning, as they damage the transceiver surfaces.

**BE CAREFUL!** The transceiver will become hot when operating continuously for long periods.

***For U.S.A. only***
**CAUTION!** Changes or modifications to this transceiver, not expressly approved by Icom Inc., could void your authority to operate this transceiver under FCC regulations.

Approved Icom optional equipment is designed for optimal performance when used with an Icom transceiver.
Icom is not responsible for the destruction or damage to an Icom transceiver in the event the Icom transceiver is used with equipment that is not manufactured or approved by Icom.
# TABLE OF CONTENTS

## ■Front panel

Function LED (p. 2)

### ❶ AF VOLUME CONTROL KNOB
➡Rotate the knob to adjust the audio output level.
  • Minimum audio level is pre-programmed.

### ❷ MICROPHONE CONNECTOR
➡Connect the supplied microphone or optional DTMF microphone.

　🖊 **NEVER** connect non-specified microphones. The pin assignments may be different and the transceiver may be damaged.

### ❸ DEALER-PROGRAMMABLE KEYS [P0] to [P3]
➡Desired functions can be programmed independently by your Dealer.

### ❹ POWER SWITCH [POWER]
➡Push to turn the power ON and OFF.
  • The following functions are available at power ON as options:
    - Automatic scan start
    - Password prompt
    - Set mode

# ■ Function LED

## ❶ CHANNEL INDICATORS
➥ Indicates the operating channel.
➥ Blinks when receiving a signal during scanning operation.
➥ All LEDs blink while entering the power ON password.

## ❷ TX/RX INDICATOR
➥ Lights red: while transmitting
➥ Lights green: while the channel is busy
➥ Blinks orange (green and red blink simultaneously): when the specified 2-tone, 5-tone call is received.
➥ Green and red blink alternately: cloning error

## ❸ ACTIVATED KEY INDICATOR (LP 0/1/2)
➥ Appears when a pre-programmed key function is activated.

**NOTE**: When all function LEDs blink, check the DC battery voltage is not too high.

## ◇ MICROPHONE
➥ The supplied microphone has a PTT switch and a hanger hook.
  • The following functions are available when the microphone is on or off hook:
    - Automatic scan start when hook on.
    - Automatic priority channel selection when hook off.
    - Sets to 'Inaudible' condition (mute condition) when hook on.
    - Sets to 'Audible' condition (unmute condition) when hook off.

# ■ Programmable function keys

The following functions can be assigned to **[P0]**, **[P1]**, **[P2]** and **[P3]** programmable function keys.
Consult your Icom Dealer or System operator for details concerning your transceiver's programming.
In the following explanations, programmable function names are bracketed. The specific switch used to activate the function depends on programming.

● *CH UP AND DOWN KEYS*
Select an operating channel.

● *BANK KEY*
Select and determine a bank number.

● *SCAN A START/STOP KEY*
➥ This key's operation depends on the Power ON Scan setting.
   **When the power ON scan function is turned OFF;**
   Push to start and cancel scanning operation.
   **When the power ON scan function is turned ON;**
   Push to pause scanning, then resumes scanning after a specified time period has passed.
➥ Push and hold this key for 1 sec. to indicate the scan group, then select the desired group using **[CH Up]**/**[CH Down]**.

● *SCAN B START/STOP KEY*
➥ Push to start and cancel scanning operation. Scan resumes after a specified time period has passed when scan is cancelled except for this key.
➥ Push and hold this key for 1 sec. to indicate the scan group, then select the desired group using **[CH Up]**/**[CH Down]**.

**NOTE:** Place the microphone on hook to start scanning. Take the microphone off hook to stop scanning.

● *SCAN TAG KEY*
Adds or deletes the selected channel to the scan group.

● *PRIORITY CHANNEL KEYS*
Push these keys to select priority A or priority B channel, respectively.

● *OPERATING CHANNEL KEYS*
Select an operating channel directly.

● *LOCK KEY*
Push this key for 1 sec. to lock all programmable keys except the following:
• **[CALL]** (incl. **[CAL A]** and **[CAL B]**), **[MONI]** and **[EMER]** keys.

● *MONITOR KEY*

Activates one of (or two of) the following functions on each channel independently:

• Push and hold the key to unmute the channel (audio is emitted; 'Audible' condition).

• Push the key to toggle the mute and unmute conditions (toggles 'Audible' and 'Inaudible').

• Push the key to mute the channel (sets to 'Inaudible' only).

• Push the key to unmute the channel (sets to 'Audible' only).

• Push the key after communication is finished to send a 'reset code'.

**NOTE:** The unmute condition ('Audible' condition) may automatically return to the mute condition ('Inaudible' condition) after a specified period depending on the pre-setting.

● *OUTPUT POWER SELECTION KEYS*

Select the transmit output power temporarily, or permanently, depending on the pre-setting.

• Ask your Dealer or System Operator for the output power level for each selection.

● *TALK AROUND KEY*

Turns the talk around function ON and OFF.

• The talk around function equalizes the transmit frequency to the receive frequency for mobile-to-mobile communication.

● *WIDE/NARROW KEY*

Push this key to toggle the bandwidth between wide or narrow.

● *DTMF AUTODIAL KEY*

Push this key to transmit a specified DTMF code.

● *CALL KEY*

Transmit a 2-tone, 5-tone code.

• Call transmission is necessary before you call another station depending on your signaling system.

• The **[CAL A]** and/or **[CAL B]** keys may be available when your system employs selective 'Individual/Group' calls. Ask your Dealer which call is assigned to each key.

# 1 PANEL DESCRIPTION

● **EMERGENCY KEY**

Push and hold the key to transmit an emergency call.

• If you want to cancel the emergency call, push and hold (or push) the key again before transmitting the call.

• Depending on the pre-setting, the emergency call is transmitted one time only, or repeatedly, until receiving a control code.

● **Hook Scan**

Several functions are available for the hanger function when taking the microphone from its hanger (hanger-off) and/or returning it to the hanger (hanger-on).

● **USER SET MODE KEY**

Changes the contents of the items in the User Set mode. Please refer to p. 8.

• Push and hold this key for 1 sec. to enter set mode. Push this key again momentarily to select the desired item. Push **[P2]** and **[P3]** to set the desired level/condition.

    Push and hold this key again to exit set mode.

• User set mode also available via the 'Power ON function'.

● **SCRAMBLER KEY**

• Push and hold to turn the voice scrambler function ON.

• Push this key to turn the voice scrambler function OFF.

**NOTE:**

• The optional UT-109 (#02) or UT-110 (#02) VOICE SCRAMBLER UNIT is required.

  – UT-109: Non-rolling type. 32 codes are available.

  – UT-110: Rolling type. Provides higher communication security. 1020 (4 groups × 255) codes are available.

• This transceiver requires version #02 of these units. Do not install version #01, as they are not compatible.

• Some PC board modifications are required when installing UT-109 and UT-110. Please refer to 'Optional UT-109/UT-110 installation'. (p.12)

• Please contact your Dealer for details.

# ■Turning power ON

① Push [ ⏻ ] to turn the power ON.

② If the transceiver is programmed for a start up passcode, input the digit codes as directed by your Dealer.
   • The keys in the table below can be used for password input:
   • The transceiver detects numbers in the same block as identical. Therefore "01234" and "56789" are same.

③ When all channel indicator LEDs still blink after inputting 4 digits, the input code number is incorrect. Turn the power off and start over in this case.

| KEY | P0 | P1 | P2 | P3 | ⏻ |
|---|---|---|---|---|---|
| NUMBER | 0 5 | 1 6 | 2 7 | 3 8 | 4 9 |

# ■Channel selection

Several types of channel selection are available. The methods may differ according to your system setup.

**NON-BANK TYPE:**
Push **[CH UP]**/**[CH DN]** to select the desired operating channel, in sequence; or, push one of the **[CH 1]** to **[CH 4]** keys to select a channel directly.

**BANK-TYPE:**
Push **[BANK]** to toggle between bank 1 and 2.

**AUTOMATIC SCAN TYPE:**
Channel setting is not necessary for this type. When turning the power ON, the transceiver automatically starts scanning. Scanning stops when receiving a call or when taking the microphone off hook.

# ■ Receiving and transmitting

### RECEIVING:

① Push [POWER] to turn the power ON.
② Push **[CH UP]** or **[CH DN]** to select a channel.
③ When receiving a call, adjust the audio output level to a comfortable listening level.

### TRANSMITTING:

④ Take the microphone off hook.
  • The channel is busy when TX/RX indicator turns green.
  - According to the trasceiver's setting;
  • 2-tone, 5-tone mute may be released. (The 'audible' condition is selected)
  • A priority channel may be selected automatically.
⑤ Wait for the channel to become clear.
⑥ Push the **[CALL]** key when initiating a call from your side.
  - According to the trasceiver's setting;
  • Coded audio may be heard from the transceiver, then TX/RX indicator turns green.
  • This operation may not be necessary depending on your signaling system. Ask your Dealer.
⑦ While pushing and holding [PTT], speak into the microphone at your normal voice level.
⑧ Release [PTT] to receive.

**IMPORTANT:** To maximize the readability of your signal:
(1) Pause briefly after pushing [PTT]
(2) Hold the microphone 2 to 5 cm from your mouth, then speak into the microphone at a normal voice level.

### ◇ Transmitting notes

• **Transmit inhibit function**
The transceiver has several inhibit functions which restrict transmission under the following conditions:
  • The channel is in mute condition.
  • Channel is busy.
  • A matched/non-matched CTCSS code is received.
  • The selected channel is a 'receive only' channel.

• **Time-out timer**
After continuous transmission for a pre-programmed period, the time-out timer is activated causing the transceiver to stop transmitting and automatically select receive.

• **Penalty timer**
Once the time-out timer is activated, transmission is further inhibited for a period determined by the penalty timer.

• **PTTID call**
The transceiver sends the ID code (5-tone, DTMF or digital ANI) automatically when **[PTT]** is pushed (beginning of transmission) and released (end of transmission) depends on the setting.

## ◇ Scrambler function

The UT-109 (#02) or UT-110 (#02) optional voice scrambler unit provides high performance private communication between stations with the same scrambler codes.
① Push and hold **[SCRM]** to turn the scrambler function ON.
② Push **[SCRM]** to turn the function OFF.

## ◇ Emergency Call

The emergency call can be performed using the **[Emergency Single]** or **[Emergency Repeat]** key (p. 5). The transceiver will send an emergency command (5-tone, DTMF or MDC 1200) once or repeatedly until receiving the control code.
The emergency transmission is performed on the emergency channel, however, when no emergency channel is specified, the signal is transmitted on the previously selected channel. Ask your dealer for details.

## ◇ User set mode

User set mode is accessed at power ON and allows you to set seldom-changed settings. In this case you can "customize" transceiver operation to suit your preferences and operating style.

***Entering the user set mode:***
①While pushing and holding **[P1]** and **[P2]**, push [POWER] to enter user set mode at power ON.
②Push and hold **[P0]** to enter user set mode. Push **[P0]** again momentarily to select the item. The channel indicator lights respectively to indicate the function is selected.
Available set mode functions;
  • Backlight (① lights)       : OFF, Dim, Auto or ON
  • Beep (② lights)            : OFF or ON
  • SQL Level (③ lights)      : 0 to 255
  • AF Min level (④ lights)   : 0 to 255
③Then push **[P2]** and **[P3]** to set the desired level/condition.
④Push [POWER] (or push and hold **[P0]**) again to exit set mode.

User set mode is also available via a programmable key. Please refer to p. 5 **[SET]** section.

## ■ Rear panel connection

**Antenna**

**❶ ANTENNA CONNECTOR**
Connects to an antenna. Contact your dealer about antenna selection and placement.

**❷ EXTERNAL SPEAKER JACK**
Connect a 4–8 Ω external speaker.

**❸ MICROPHONE HANGER**
Connect the supplied microphone hanger to the vehicle's ground for microphone on/off hook functions. (See p. 1)

Optional speaker

**❶**

**❷**

**❸**

⚠ **WARNING! NEVER** remove the fuse-holders from the DC power cable. (Depending on version, the fuse holder may not be attached to the black cable.)

Red ⊕

**❺**

Black ⊖

**❹**

12V Battery

**NOTE:** Use the terminals as shown below for the cable connections.

Crimp

Solder

**❹ OPTIONAL CABLE (OPC-1939)**
Connect an external modem, dimmer control, etc.

**❺ DC POWER RECEPTACLE**
Connects to a 12 V DC battery. Pay attention to polarities.

⚠ **WARNING! NEVER** connect to a 24 V battery. This could damage the transceiver.

**❶ ANTENNA CONNECTOR**
Connects to an antenna. Ask your Dealer about antenna selection and placement.

**❷ MICROPHONE HANGER**
Connect the supplied microphone hanger to the vehicle's ground for microphone on/off hook functions. (See p. 1)

**❸ DC POWER RECEPTACLE**
Connects to a **12 V DC** battery. Pay attention to polarities. **NEVER** connect to a **24 V** battery. This could damage the transceiver.
**❹ OPTIONAL CABLE** (OPC-617)
Connect an external modem unit, Dimmer control, etc.

**❺ EXTERNAL SPEAKER JACK**
Connect a 4–8 Ω external speaker, if desired.

# ■Supplied Accessories

① Microphone ...................... 1
② Microphone hanger and screw set ..................... 1 set
③ Microphone hanger cable . 1
④ DC power cable (OPC-1132) ...........................................1
⑤ Function name stickers* (KEY STICKER) ...................1
⑥ Mounting bracket .............. 1
⑦ Bracket bolts ..................... 4
⑧ Mounting screws (M5×12) . 4
⑨ Self-tapping screws (M5×20) ........................................... 4
⑩ Flat washers ...................... 4
⑪ Spring washers ................. 4
⑫ Nuts .................................. 4

**\*Function name stickers**
There are no names on the programmable function keys since the functions can be freely assigned to these keys.
Attach the supplied function name stickers above the appropriate keys for easy recognition of that key's assigned function.

# ■ Mounting the transceiver

The universal mounting bracket supplied with your transceiver allows overhead mounting.

• Mount the transceiver securely with the 4 supplied screws to a thick surface which can support more than 1.5 kg.

Flat washer

Spring washer

When using
self-tapping screws

# ■ Optional UT-108 installation

Install the optional UT-108 DTMF decoder unit as follows:

① Turn the power OFF, then disconnect the DC power cable.
② Unscrew the 4 screws, then remove the bottom cover.
③ Install the unit as shown in the diagram below.
④ Replace the bottom cover and screws, then re-connect the DC power cable.

UT-108

Front panel

# ■ Optional UT-109 /UT-110 installation

① Turn the power OFF, then disconnect the DC power cable.
② Unscrew the 4 screws, then remove the bottom cover.
③ Cut the pattern on the PCB at the TX mic circuit (MIC) and RX AF circuit (DISC) as shown below.
④ Install the scrambler unit as described in optional UT-108 installation in the page at left.
⑤ Return the bottom cover and screws to the original position.

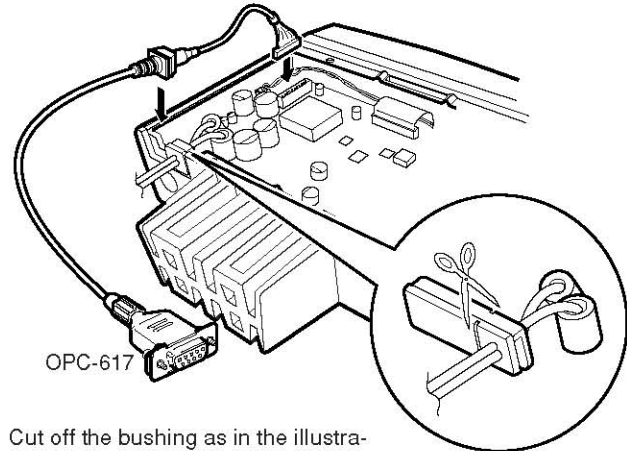

Front panel

DISC    MIC

**NOTE:** Be sure to re-solder the above disconnected points when you remove the scrambler units. Otherwise no TX modulation or AF output is available.
# ■ Optional OPC-617 installation

Install the OPC-617 as shown below.

OPC-617

Cut off the bushing as in the illustration, when you install the optional OPC-617.

OPTIONAL CABLE PIN ASSIGNMENT

⑤ ④ ③ ② ①

⑨ ⑧ ⑦ ⑥

① Dimmer cont. IN or IGSW cont. IN
② AF OUT
③ Det. AF OUT
④ Mod. IN
⑤ PTT control IN or FTSW control IN
⑥ Horn drive cont. OUT
⑦ AF GND
⑧ Det. AF GND
⑨ Mod. GND

# ■ Antenna

A key element in the performance of any communication systems is an antenna. Contact your dealer for more information regarding antennas and how to install them.
# ■ Fuse replacement

A fuse is installed in each fuse holder of the supplied DC power cable*. If a fuse blows or the transceiver stops functioning, track down the source of the problem if possible, and then replace the damaged fuse with a new rated one.

*Depending on version, only 1 fuse holder may be attached.
❑ Fuse rating: 10 A (for 1 fuse holder)/20 A (for 2 fuse holders)
   **USE** the applicable fuse only.

# ■ Cleaning

If the transceiver becomes dusty or dirty, wipe it clean with a soft, dry cloth.

**AVOID** the use of solvents such as benzene or alcohol, as they may damage the transceiver surfaces.

# ■ Options

• **OPC-1132A/OPC-347** DC POWER CABLE
  2 fuse holders are attached. **USE** the 20 A fuse only.
  OPC-1132A: 3 m (9.8 ft)
  OPC-347: 7 m (23 ft)

• **OPC-1939** ACC CABLE
  Allows you to connect to an external terminal.

• **HM-152/HM-152T/HM-148G/HM-148T** HAND MICROPHONE
  HM-152    : Hand microphone
  HM-152T   : DTMF microphone
  HM-148G   : Self ground heavy duty microphone
  HM-148T   : Self ground heavy duty DTMF microphone
             The 10-keypad of this microphone can be used for the DTMF code transmission only.

• **SM-25** DESKTOP MICROPHONE

• **SP-5/SP-10/SP-22** EXTERNAL SPEAKER
  Input impedance     : 4 Ω
  Max. input power     : 5 W
  SP-5      : Large speaker for good audio quality.
  SP-10     : For all-round mobile operation.
  SP-22     : Compact and easy-to-install.

• **UT-108R** DTMF DECODER UNIT
  Provides pager and code squelch capabilities.

• **UT-109R/UT-110R** SCRAMBLER UNITS
  Non-rolling type (UT-109R)/Rolling type (UT-110R) voice scrambler unit provides higher communication security.

**WARNING**

**Your Icom radio generates RF electromagnetic energy during transmit mode. This radio is designed for and classified as "Occupational Use Only", meaning it must be used only during the course of employment by individuals aware of the hazards, and the ways to minimize such hazards. This radio is NOT intended for use by the "General Population" in an uncontrolled environment.**

- For compliance with FCC and Industry Canada RF Exposure Requirements, the transmitter antenna installation shall comply with the following two conditions:

1. The transmitter antenna gain shall not exceed 0 dBi.

2. IC-F5011:

   The antenna is required to be located outside of a vehicle and kept at a distance of 45 centimeters or more between the transmitting antenna of this device and any persons during operation. For small vehicle as worst case, the antenna shall be located on the roof top at any place on the centre line along the vehicle in order to achieve 45 centimeters separation distance. In order to ensure this distance is met, the installation of the antenna must be mounted at least 45 centimeters away from the nearest edge of the vehicle in order to protect against exposure to bystanders.

2. IC-F6011:

   The antenna is required to be located outside of a vehicle and kept at a distance of 37 centimeters or more between the transmitting antenna of this device and any persons during operation. For small vehicle as worst case, the antenna shall be located on the roof top at any place on the centre line along the vehicle in order to achieve 37 centimeters separation distance. In order to ensure this distance is met, the installation of the antenna must be mounted at least 37 centimeters away from the nearest edge of the vehicle in order to protect against exposure to bystanders.

3. IC-F5011:

   Transmit only when people outside the vehicle are at least the recommended minimum distance of 100 centimeters away from the properly installed antenna. This separation distance will ensure that there is sufficient distance from a properly installed externally-mounted antenna to satisfy the RF exposure requirements in the applicable RF exposure compliance standards.

3. IC-F6011:

   Transmit only when people outside the vehicle are at least the recommended minimum distance of 82 centimeters away from the properly installed antenna. This separation distance will ensure that there is sufficient distance from a properly installed externally-mounted antenna to satisfy the RF exposure requirements in the applicable RF exposure compliance standards.

# 4 SAFETY TRAINING INFORMATION

**CAUTION**

**To ensure that your exposure to RF electromagnetic energy is within the FCC allowable limits for occupational use, always adhere to the following guidelines:**

- **DO NOT** operate the radio without a proper antenna attached, as this may damage the radio and may also cause you to exceed FCC RF exposure limits. A proper antenna is the antenna supplied with this radio by the manufacturer or an antenna specifically authorized by the manufacturer for use with this radio.
- **DO NOT** transmit for more than 50% of total radio use time ("50% duty cycle"). Transmitting more than 50% of the time can cause FCC RF exposure compliance requirements to be exceeded. The radio is transmitting when the "transmit indicator" appears on the LCD. You can cause the radio to transmit by pressing the "PTT" switch.

## Electromagnetic Interference/Compatibility

During transmissions, your Icom radio generates RF energy that can possibly cause interference with other devices or systems. To avoid such interference, turn off the radio in areas where signs are posted to do so. **DO NOT** operate the transmitter in areas that are sensitive to electromagnetic radiation such as hospitals, aircraft, and blasting sites.

**Count on us!**

**Icom Inc.** \
1-1-32 Kamiminami, Hirano-ku, Osaka 547-0003, Japan
