## Box

In the box has a mobile phone, charger, USB
line, Headset, instructions for use and etc.
Know your phone

Insert SIM card & SD card

1. Push the holder in the card slots next to the thimble hole it pops out.
2. Place the SIM cards (or SD card) face down and align it with the opening of the holder.

   Notably, slot 2 can only be put in one card, SIM card OR SD card.

About Android

An Android phone can perform many of the same functions as a computer. But you can also adjust it to better suit your needs, to receive the information you want, and have fun at the same time. You can add and delete applications, or enhance them to improve functionality. At Android Market you can download a range of applications and games from a constantly growing collection. You can also integrate applications on your Android phone with your personal data and online accounts. For example, you can back up your track of your appointments, and engage in as much social networking as you like.

Applications

An application is a phone program that helps you perform a task. For example, there are applications to make calls, take photos and download more applications.

Note: The colors and specifications shown/mentioned in the user manual may differ from the actual product. Images shown are for representation purpose only.

The content of the manual is correct when it is released, but we reserve the right to modify the technical specification without additional notification.

Some content in the manual may be different from the mobile phone, as the accessory software, SIM card or service varies by providers.

Getting started

let's get you up and running

Assemble & charge

SIM card in

Please according to the label on the phone. Make sure that the clipped corner of the SIM card is facing the correct direction and the metallic contacts are facing the correct direction.

SD card in

Put SD card into the SD card slot and make sure that the metallic pins facing downwards.

Charge up

To charge the battery, plug in the charger connector at your phone (USB interface) and then plug the other end into an AC power socket.

The battery symbol indicates the charging status. While charging, the charge indicators will scroll. When all the scroll bars are steady, the battery is fully charged. Disconnect the charger from the phone. Disconnect the charger from the AC power socket.

Note: If the battery is powerless, the battery icon will reappear after a few minutes of charging.

Touch screen & keys

a few essentials

Enter a search word to search for a web page, or enter a web page address to load a web page

Connect to Networks and Devices

Your phone can connect to a variety of networks and devices, including WLAN, Bluetooth, and devices, such as headsets. You can also transfer files to/from your PC through the data cable.

Determine the Network You Are Using

1. Touch **Launcher** icon, and from Application menu, touch **Settings**.
2. Touch **More... > Cellular networks > Access point names**. The name of the wireless service provider you are currently registered with is selected in the list.

Edit or Create New Access Points

If you and your wireless service provider determine that you need to change the settings of your current access point name (APN) or to create a new one, you must obtain the APN and detailed settings from your provider.

1. Touch **Launcher** icon, and from Application menu, touch **Settings**.
2. Touch **More... > Cellular networks > Access point names**.
3. Touch an existing APN to edit it, or press ⊕ to create a new one. Enter the APN settings that you obtained from your wireless service provider.
4. When you finished, press ⋮ and then **Save**.
5. If you created a new APN, touch it in the APNs screen to start using it.

WLAN Networks

WLAN is a wireless networking technology that can provide internet access at distance of up to 100 meters. To use WLAN on

your phone, you access a wireless access point, or "hotspot". Some hotspots are open and you can simply connect to them. Others are hidden or implement other security features, so you must configure your phone so it can connect to them.

TIP: Turn off WLAN when you are not using it, to extend your battery life.

• **Connect to Wi-Fi**

1. Touch **Launcher** icon, and from application menu, touch **Settings**. Or you can turn on it directly in notification panel.

2. Touch **Wi-Fi**.

3. Check **Wi-Fi** to turn it on. The phone scans for available **Wi-Fi** and displays the names of those it finds. Secured networks are indicated with a Lock icon.

4. Touch a network to connect to it

If the network is secured, you are prompted to enter a password or other credentials (Ask your network administrator for details)

• **Receive Notifications**

By default, when Wi-Fi is on, you receive notifications in the status bar when your phone detects an open Wi-Fi.

1. Turn on **Wi-Fi**, if it's not already on.

2. In the Wi-Fi list screen, press ⋮ to open Advanced options, check Network notification. You can uncheck this option to stop receiving notifications.

Bluetooth

Bluetooth is a short-range wireless communications technology that devices can use to exchange information over a distance of about 10 meters.

• **Turn Bluetooth On/Off**

1. Touch **Launcher** icon, and from application menu, touch

Settings. Or you can turn on it directly in notification panel.

2. Touch **Bluetooth**.

3. Check or uncheck Bluetooth to turn it on or off.

Important: Go to Bluetooth and check option so that your phone can be detected by other devices.

• **Pair with Bluetooth Devices**

You must pair your phone with a device before you can connect to it. Once you pair your phone with a device, they stay paired unless you cancel pairing them.

1. Touch **Launcher** icon, and from application menu, touch Settings.

2. Touch **Bluetooth**.

3. If Bluetooth is not turned on, check Bluetooth to turn it on. Your phone scans for and displays the IDs of all available Bluetooth devices in range.

4. If the device you want to pair with is not in the list, touch **Refresh**.

5. Touch the ID of the desired device in the list to pair it.

Connect to a computer via USB

You can connect your phone to a computer with a USB cable to transfer music, pictures, and other files between your phone's SD card and the computer.

You can't share your phone's data connection and SD card via USB cable at the same time. If you are using USB tethering, you must turn that off first.

The connection to USB interfaces has to be limited to USB 2.0 version or higher. The connection to so called power USB is prohibited.

Working with Secure Certificates

If your organization's VPN or WLAN Network rely on secure

certificates, you must obtain the certificates and store them in your phone's secure credential storage, before you can configure access to those VPN or WLAN networks on your phone.

If your network administrate instructs you to download the certificates from a website, you are prompted to set a password for the credential storage when you download the certificates.

Install Secure Certificate from SD Card

1. Copy the certificate from your computer to the root of the SD card.

2. Touch **Launcher** icon, and from Application menu, touch **Settings**.

3. Touch **Security**.

4. Touch **Install from SD card**.

5. Touch the file name of the certificate to install. Only the names of certificates that you have not already installed on your phone are displayed.

6. If prompted, enter the certificate's password.

7. From WLAN list, search and select the certificate.

Fingerprint

Fingerprint is a new feature that can recognize you by your fingerprint.

• **Turn Passcode On/Off**

1. Touch **Launcher** icon, and from application menu, touch **Fingerprint**.

2. Touch **Turn Passcode On**. Then set a passcode in 4 digits.

• **Use Fingerprint manager**

1. Touch Fingerprint manager.
2. Touch Add a Fingerprint and do the next steps according to the indicate on the screen.
Then you can unlock the phone when it in sleeping status by your finger print, but not press the power key and drag the screen.

Settings

the settings for various features of the phone

Get to know the settings in your phone so that you can personalize them to your own requirements. Go to Settings to configure how your phone looks, sounds, communication, privacy, and operations in a variety of ways:

Wi-Fi	Turn Wi-Fi on or off, scan available Wi-Fi, or add the WLAN network.
Bluetooth	Turn Bluetooth on or off, search for available Bluetooth devices, and make your phone visible or invisible to other Bluetooth devices.
SIM cards	Set preferences on how you use SIMs inserted in your phone.
Data usage	Turn the mobile data traffic on or off, and keep track of your data usage details over a specified period of time.
More...	Turn Airplane mode on or off, and configure settings for VPN and mobile networks, and enable your phone to share its mobile data connection as a portable WLAN hotspot, or through USB tethering or Bluetooth tethering.
Display	Let you set the screen brightness, select to switch orientation when you rotate your phone, and configure other screen settings.
Sound & notification	Configure how your phone rings, vibrates, or alerts you in other ways when you receive communications, etc.

Apps	Manage downloaded and running applications.
Storage & USB	Let you check out available space on your phone's internal storage, phone storage and on your SD card.
Battery	Check battery status and battery level.
Memory	Check memory status.
Location	Set location mode, view location services, and so on.
Security	Protect your phone by setting up different locks and passwords.
Emergency rescue	When you are in emergency, it helps you by sending your contacts messages with your location.
Accounts	Let you add, and manage supported accounts. Enable your phone synchronize data with the synchronization accounts that you add.
Google	Google services.
Language & input	Let you select the language for the text on your phone and for configuring the onscreen keyboard.
Backup & reset	Reset your phone.
Date & time	Let you choose preferences such as format and time zone.
Schedule power on/off	Schedule automatic powering on/off of the phone.
Accessibility	Enable your installed accessibility services and adjust related settings.

Printing	Helps you to print the file in your phone.
Developer options	Set options for application development. For example, you can show CPU usage on the phone display. You can also set the phone to enter debug mode when USB connections are active.
About phone	View information about your phone, such as status, and legal information.

Other popular features

Some of the popular features that appear on the phone's Application menu are:

Downloads	Provides quick access to tabs containing a list of your current downloaded files.
File manager	Lets you view and manage files on both your phone storage and SD card. Organize and store data, music files, images, and more in your own personal file folders.
Search	Allows you to search something such as web, apps, contacts.
SIM toolkit	STK features are provided by your service provider. If your SIM card supports STK feature, you will see the STK menu. Different STK has different STK main menu. Please contact your service provider if the STK does not work. **Note:** The submenus of this feature depend on the operator and different operators may provide different services.

Accessing Password

The cell phone and SIM card use several accessing passwords. These passwords help to prevent the cell phone from being embezzled.

You can use the function options in the security settings of

settings menu to change accessing password (except for PUK and PUK2).

PIN Code

PIN code (Personal Identification Number) can prevent the SIM card from being embezzled. The PIN code is provided along with the SIM card. If the PIN code checking is activated, it is necessary to input the PIN code when the cell phone powers on every time.

If a wrong PIN code has been input for 3 times straight, it is needed to input the PUK code, then input a new PIN code and input it again for confirmation.

PIN2 Code

Some SIM cards may provide PIN2 code, while PIN2 code needs to be used in some functions like Call Cost. These functions can be used only if the SIM card supports them.

If a wrong PIN2 code has been input for 3 times straight, it is needed to input the PUK2 code, then input a new PIN2 code and input it again for confirmation.

PUK Code

PUK code (Personal Unlock Key) is used to change locked PIN code. PUK code is provided along with the SIM card. If not provided, please contact your local service provider for PUK code.

• If wrong PUK code has been input for 10 times straight, the SIM card can not be used any more. Please contact your service provider for a new SIM card.

• PUK code can not be changed. If the PUK code is lost, please contact your service provider.

PUK2 Code

PUK2 code is provided along with some SIM cards for changing locked PIN2 code.

• If wrong PUK2 code has been input for 10 times straight, the SIM card can not be used any more. Please contact your service provider for a new SIM card.

• The PUK2 code can not be changed. If it is lost, please contact your service provider.

Precautions

	Please carefully read and observe the terms below: Safe power on Do not use your mobile phone where it is forbidden to use or you might cause a disturbance or danger.
	Safe transportation first Please observe all related local laws and regulations. Do not use your mobile phone while driving. Safe transportation should be considered first when driving.
	Disturbance All mobile phone performances might be disturbed.
	Turn off when in the hospital Please follow related limitations. Please switch your mobile phone off when near a medical instrument.

	Turn off on an airplane Please follow related limitations. Do not use your mobile phone on an airplane.
	Turn off when at a gasoline station Do not use your mobile phone at a filling station or around fuels or chemicals.
	Turn off around exposure Area Please observe related limitations and do not use your mobile phone near an area where explosions can occur.
	Proper use As described in this manual, your mobile phone can be used only in the correct location. If possible, please do not touch the antenna area of your phone.
	Use qualified after sales service Only a qualified technician can install or repair your mobile phone. Please contact the authorized service center in case of phone failure.
	Accessories and batteries Only use the authorized accessories and batteries and do not connect to incompatible manufacturers or products.
	Waterproof Your mobile phone is not waterproof. Please keep it away from water.

	Backup Remember to make a backup or keep a written record of all important information saved in your mobile phone.
	Connect to other devices Please read the user manual of the device to get more detailed security instructions before connecting to other devices and do not connect to an incompatible product.
	SOS emergency calls Make sure your mobile phone is switched on and in a service area. In idle mode, input the SOS number, then press the Dial Key. Advise where you are and do not hang up without permission.

Frequently Asked Questions and Troubleshooting

Frequently Asked Questions	Cause and Solution
Fail to turn on	Press the power on key for over 1 second; Check if the battery is properly connected; Please remove and install it again, retry to turn it on; Check if battery is appropriately charged.
Fail to connect network	Weak signal. Please try and move to a location with strong signal and try connecting to the network again; Please ensure that you are not beyond the network coverage of service providers; Please ensure you have a valid SIM card; Please contact your network provider for

	further information.
Display information while turning on	Check if the SIM card is installed correctly; Handset lock password: If the handset lock is activated, you have to input handset password. **Input PIN:** Inputting PIN while turning on each time is activated, you have to input the PIN code. **Input PUK code:** When you've input wrong PIN code for 3 times will lock the SIM card. You need to input the PUK code provided by your network provider.
Poor quality of calling	Please check if the sound volume is tuned improperly ; In an area with poor receiving condition, for example: basement, the signal might be weak. Try searching a location with stronger signal reception and call again; While using the mobile phone in the peak period of communication, like commute time, you may be unable to call because of line congestion.
Standby duration shortened	The standby duration is relative to the system setting of network. While the mobile phone is in an area with poor signal strength and can not receive the signal, the handset will continuously search for a base station. This will significantly reduce battery charge. It is recommended that you turn off your mobile in area with no signal reception to save battery. Need replacing the battery. Please change a new battery.
SIM Card	Dirt on the metal surface of an SIM card: Use

Error	clean cloth to wipe the metal touch point on an SIM card; The SIM card is not installed: The SIM card is damaged. Please contact your network service provider.
Fail to dial out	Please check if you press the dial key after dialing; Please check if calling is forbidden because of defaulting; Please check if the SIM is valid; Please check if the call barring is set; Please check if the fixed dial function is set.
Callers can not contact you	Please check if the mobile phone is on and connected with the network; Please check if the Call barring or call divert is activated; Please check if the SIM card is valid.
Fail to charge	Poor contact: Please check if the plug is connected well; Please confirm if the environment temperature is within the range of 0°C ~40°C while charging; The battery or charger is damaged: You need to replace it.
Fail to set some functions	Wrong operation; The network provider does not support the function, or you have not applied for it.

Note: If the instruction above can not help you solve problems, please record Mobile phone model and serial number, Specific content of warranty, Clear statement of problems, Then contact your local dealer or the authorized service center in your area.

Safety Information and Notices

Using the Mobile Phone and Charger

Danger:

Only use authorized battery and charger. Using other brands may cause battery leakage, overheating, explosion or even fire.

Caution:

Keep the phone away from dust, water and damp areas. Dust, water or other liquids may cause overheating, electrical leakage, and/or phone failure.

The phone, battery, charger and AC adapter are not waterproof. Keep them away from rain and liquid.

Warning:

Do not bump, shake or tamper with the phone or charger. This may cause battery leakage, overheating, explosion or even fire.

Do not place the battery, phone or charger near a microwave or high-voltage device. This may cause battery leakage, explosion, overheating or even fire; also prevent the phone and AC adapter from overheating, smoking or short circuiting.

Do not use the phone around volatile oil. This may cause fire, breakdown or damage.

To avoid any damage or breakdown, do not disassemble the phone, battery, charger or internal components by yourself.

Location:

The socket-outlet shall be installed near the equipment and shall be easily accessible.

Using the Mobile Phone

Warning:

Please confirm if the environment temperature is within the range of 0°C ~40°C while charging.

Do not use the phone while you are driving. Pull over and stop your automobile to dial or listen to a phone call.

Usage of mobile phones in aircrafts or hospitals is prohibited. Switch the phone off to prevent interference with electronic medical devices. Follow any rules or regulations in such places. Do not use the phone at a gas station, near fuel or near chemicals.

Do not use the phone near electronic medical devices such as hearing aids, pacemakers and auto-control devices such as fire detectors and automatic doors.

If you have to use your mobile phone near an electronic medical device such as a pacemaker, please contact your manufacturer or dealer for information about preventing interference.

Caution:

Electronic systems in automobiles such as anti-lock brakes, speed control, or fuel spraying systems, are usually not influenced by wireless devices. Manufacturers of these systems will tell you whether they are provided with good screening functions. If you suspect that an automobile failure is caused by a wireless wave, please contact your automobile dealer.

Avoid using your phone in crowded places.

Do not store your mobile phone near or with a credit card, disk or other magnetic materials. This may effect information stored on your phone.

Keep your phone away from pins. Pins can be absorbed by the phone's receiver magnet, which may cause harm.

If you intend not to use your mobile phone for a long period of time, please remove the battery from the phone. Leaving the battery inside the mobile phone for a long period of time may cause moisture to the battery, and it can damage the mobile

phone or the battery.

Battery& Chargers Safety：

Do not place the battery in fire; follow local laws and ordinances in disposing used battery.

Check the model number of the charger before using it to charge the mobile.

Only use **original** battery, charger and accessories applicable to the specific mobile model. Using other types of battery, charger and accessories may violate the certification or warranty terms of the equipment and may result in danger.

Return waste and used batteries to the supplier or specified recovery site.

CAUTION

There are risks of explosion if battery is replaced by a non-original one.

Dispose of used batteries according to the instructions.

Note: The socket-outlet shall be installed near the equipment and shall be easily accessible.

Using the Battery

Danger:

·Do not dispose of the battery into a fire. Doing so may cause battery explosion or even fire.

·If you have difficulties installing the battery, do not force the installation. This may cause battery leakage, overheating, explosion or even fire.

·Keep metal objects away so they do not come in contact with the battery or its connectors as it may cause the battery to short circuit, overheat or explode.

·Do not weld the polarities of the battery directly together. This

may cause battery leakage, overheating, explosion or even fire. Battery liquid is severely harmful for your eyes. If battery liquid gets in your eyes, do not rub them.   Instead, wash your eyes with water first and then go directly to a doctor for help.

·Do not use or store your phone in high temperature areas. This may cause battery leakage, overheating, explosion or even fire.

Warning:

·Replace the battery when the normal usage time begins to decrease or if you notice the battery is overheated or has changed shape or color.

·If battery liquid leaks onto your skin or clothes, immediately wash the affected parts with water.

·If the battery begins to leak or emits a strange odor, properly dispose of the battery according to local regulations. Do not throw it into a fire.

Caution:

Do not leave the product or its battery inside a vehicle. This may damage the product, overheat the battery, or pose a risk to the vehicle.

Warnings on Battery:

(a)   Please use appointed battery in case of explosion risk.

(b)   Please dispose of lifeless battery under guidance.

Using the Charger

Danger:

·Only use the charger that came with the phone. Using a different charger may cause the phone to breakdown or explode.

·If the charger short circuits, a fire may occur.

·Do not use a damaged, worn or broken charger. This may cause a fire.

• Clean dust away from the power socket to avoid the possibility of a fire.

• Do not store the charger near any liquids. If liquids spill onto the charger it may cause it to overheat or breakdown.

• If liquid does spill onto the charger, immediately unplug the power cable to prevent overheating, fire or another type of breakdown.

• Do not use the charger in places with high humidity like a bathroom. This may cause a fire or other breakdown.

•Do not touch the charger, power cable or socket with wet hands. This may cause an electric shock.

Requirements for Mobile Phone

• Avoid using your mobile phone in extremely high or low temperatures.

• It is recommended that you do not use your mobile phone near a telephone, TV set, radio or other radio frequency sensitive devices.

Requirements for the Battery

• When not in use, store the battery in a cool, well-ventilated place with sunshine.

• If you will not be using the mobile phone for an extended period of time, charge the battery on a regular basis to avoid battery breakdown.

• The phone battery wears out fast. If charging the battery does not improve its performance, it is time to replace the battery.

• Properly dispose of the battery according to local regulations. Do not throw it into a fire.

Caution: Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

Requirements for the Charger and AC Adapter

Please confirm if the environment temperature is within the range of -10°C ~55°C while charging.

Cleaning and Maintenance

• The mobile phone, the battery and the charger are not waterproof.

• Do not use them in places with high humidity like a bathroom and also avoid spilling any liquids on them.

• Use a soft cloth to clean the mobile phone, the battery and the charger.

• Do not use alcohol, diluted liquid or benzene to clean the mobile phone.

• If dust gets in the sockets the phone can be damaged, short-circuit or even the lose the ability to be re-charged. Be sure to clean the socket regularly.

Warning：

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one

or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help.

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Information:

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. DeviceTypes(FCC ID: 2AIZN-X521) has also been tested against this SAR limit.

The highest SAR value reported under this standard during product certification foruse when properly worn on the body is

0.88W/kg and for head is 0.98 W /kg.Simultaneous RF exposure is 1.28 W/Kg .

This device was tested for typical body☐worn operations with the back of thehandset kept 10mm from the body.To maintain

compliance with FCC RF exposure requirements, use accessori es thatmaintain a 10mm separation distance between the use r's body and the back of the   handset.

The use of belt clips, holsters and similar accessories should n ot contain metallic components in its assembly.

The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirem ents, and should be avoided.
