The device provides Guide for operating the device.

a. Tap [icon] to open the function list.
b. And then tap [Guide] to look up more information.

Maintenance

1. Keep it dry. Precipitation, humidity and liquid that contains minerals will corrode electronic circuits.
2. Do not use or store it in dusty, dirty areas as its detachable parts may be damaged.
3. Do not store it in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and melt certain plastics.
4. Do not store it in cold areas. When the device warms up, moisture can form inside it, which may damage electronic circuit boards.
5. Do not attempt to take the device apart. Improper handling may damage the device.
6. Do not drop, knock or shake it. Improper handling may cause damage to the liquid crystal panel.
7. Do not use harsh chemicals, cleaning solvents, or strong deter gents to clean the device.
8. Do not paint it. Paint can clog the device's detachable parts and cause it to malfunction.
9. Do not operate the device below the temperature 0 or over 40 degrees. Excessive heat or cold will cause malfunction and incur damage to the device. To avoid such from happening, please do not use the device for two hours after it has been exposed to

excess heat or cold, because the humidity or moisture formed by the temperature changing will cause damage to the device.

Items

1. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help.
2. Modification, adjustment, and replacement of parts : Besta is not responsible for unauthorized modification, adjustment, and replacement of parts on this product. Any such changes may void the warranty.
3. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions : (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
4. SAR Exposure Statement
This EUT is compliance with SAR for general population/

uncontrolled exposure limits in and had been tested in accordance with the measurement methods and procedures specified in OET 65. This equipment should be installed and operated with minimum distance 0cm between the radiator & your body.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter. The County Code Selection feature is disabled for products marketed in the US.

For product available in the USA markets, only channel 1~11 can be operated. Selection of other channels is not possible.
