## 2.2 Install SIM Card and Memory Card

### 2.2.1 SIM Card

**Before using the phone, you must insert valid SIM (Subscriber Identity Module) card in the phone. SIM card 1s**

**provided by network supplier.**

All the information related to network connection are recorded in the chip of SIM card, also the names, telephone numbers and SMS that storing in the name card holder of SIM card. You can take out SIM card from your phone, and use it in any GSM mobile phone (new mobile phone can read SIM card automatically).

In order to avoid losing or damaging the information saves in SIM card, please don't touch the metal contact surface, and place SIM card in the place that away from electricity and magnetic force. Once SIM card is damaged, you can't use the phone normally.

**Prompt: Please make sure to power off the phone before taking out SIM card. It is absolutely forbidden to insert or take out SIM card with external power supply; otherwise it may damage SIM card and the phone.**

### **2.2.2 Inserting and Taking out SIM Card**

Metal contact surface of SIM card is easily scratched. You must take out SIM card carefully before the assembly.

- Power off the phone, remove the rear cover, battery or other external power supply.

- Make the end of SIM card without cutting angle inside and aim at the card slot of the phone and metal surface of SIM card face downward, then insert SIM card to the card slot of the phone, the other SIM card is also inserted in this way.
- When taking out SIM card, directly pull it outward and then can take out SIM card.

**Prompt: Without special explanation inserting two SIM cards are defaulted in the manual. If you just insert one SIM card, maybe some options of the menu will not be shown.**

### **2.2.3 Memory Card**

Aim at the T card slot and push the T card gently, and the card will be inserted correctly.

**Prompt: If the memory card is failed, please check whether it is correctly placed and good contact of metal point.**

## **2.3 Battery**

### **2.3.1 Install the Battery**

- Take off the rear cover, of the mobile.
- Make one end of battery with metal surface aim at the battery

connector.

- Then gently press the battery downward using the finger, and then press the other end to install the battery.

**Prompt: Please operate correctly to avoid damaging the battery connector.**

**Do not place the battery in fire ; follow local laws and ordinances in Disposing used battery.**

**Check the model number of the charger before using it to charge the mobile.**

**Only use approved battery , charger and accessories applicable to the specific mobile model . Using other types of battery , charger and accessories may violate the certification or warranty terms of the accessories may violate the certification or warranty terms of the equipment and may result in danger .**

**Return waste and used batteries to the supplier or specified recovery site .**

**CAUTION!**

**Risk of explosion if battery is replaced by an incorrect type .**

**Dispose of used batteries according to the instructions .**

### 2.3.2 Charging

Insert the charger on the charging interface at the side end of the phone.

After inserting the charging plug, battery strength icon stripe at the top right corner of the screen is scrolling, which means that the charging is processing; when the stripe is full of the whole icon and stop scrolling, which means that the battery charging is completed; when the charging is completed, please pull out the plug.

When electric quantity is not enough, warning message will be sent; and electric quantity shows empty. When electric quantity is too low, the phone will power off automatically. Please don't make the battery in the status of not enough electric quantity for a long time; otherwise it may damage the battery quality and service life. Please don't charge the battery for a long time.

**Prompt: In order to ensure normal operation of the phone, please make sure to use the designated charger.**

## 2.4 Security Password

### ■ PIN

PIN (Personal Identification Number) is used to prevent your

SIM card from being used illegally. PIN is usually provided with SIM card together. If you input wrong PIN for continuous three times, please input PUK to unlock it. Please contact with network operations company for more details.

■ **PIN 2**

You need to input PIN2 when entering some functions (such as call charge); if you input wrong PIN2 for continuous three times, you need to input PUK2 to unlock it. Please contact with network operations company for more details.

■ **PUK**

When changing the locked PIN, you need to input PUK (Personal Unlock Key). PUK is provided with SIM card together. If it is not provided, please contact with your service provider. If you input wrong PUK for continuous ten times, the SIM card can't be used again. Please contact with your service provider to buy new card. You can't change PUK. If you lose the code, please contact with your service provider.

■ **PUK2**

When changing the locked PIN2, you need to input PUK2. If you input wrong PUK2 for continuous ten times, you can't use the functions that need PIN2. Please contact with your service provider to buy new card. You can't change PUK 2. If you lose the code, please contact with your service provider.

## 3 Quick User Guide

### 3.1 Feature Functions

##### **■ Dual-SIM**

——Standby mode: Only SIM1 enable/ Only SIM2 enable/  
Dual SIM dual standby

——Reply by original SIM: Call/SMS Reply by original

## SIM

——Set SIM name: You can set any name you like as the name of SIM card slot.

■ Call divert: When “call divert” function is started up, you can transfer the incoming call to voice inbox or other phone number according to the scheduled “ call divert” conditions.

——Call forwarding unconditional: All incoming calls will be transferred to voice inbox or other phone number according to the setup.

——Call forwarding on busy: When your number is busy, the incoming calls will be transferred to voice inbox or other phone number according to the setup.

——Call forwarding on no reply: When there are missed calls in your phone, they will be transferred to voice inbox or other phone number according to the setup.

——Divert If Unreachable: When your phone is power off or out of the service area, the incoming calls will be transferred to

voice inbox or other phone number according to the setup.

——Cancel All Diverts: You can delete all settings of call divert.

- Call barring: All outgoing calls, incoming calls, roaming incoming calls, international outgoing calls, roaming international outgoing calls are available.

——All outgoing calls: Activate/Deactivate/Check Status

——All incoming calls: Activate/Deactivate/Check Status

——Incoming calls when roaming: Activate/Deactivate/Check Status

——ISD calling: Activate/Deactivate/Check Status

——Dial when INTL roaming: Activate/Deactivate/Check Status

——Cancel all barring : Cancel all restrictions on the call.

——Change Password: You can consult your network operator about the call barring password.

**Prompt: The above-mentioned function will have to need network support. To use the function, please contact**

**your network service provider.**

- Call waiting: You can start up or shut down the function. When it is started up, even when you are making a call, you can also receive another income call.
- Hide ID: This function must be supported by network.  
Select SIM1/SIM2
  - Hide ID
  - Display own ID
  - Display ID by Network
  - Line 2
  - Select When Power On
- Others:
  - —IP shortcut key: In this function, you can set IP call to enter the number.
  - —Call time minute reminder: off/50/55/60/customize secs
  - —Vibration when connected: Activated/Off
  - —Reply SMS after reject: SMS reply after reject/ anykey answer
  - —Auto redial: Activate/ Deactivate

## **5 Text Input**

The device provides several text input modes so that you can write text or input data in your “contacts”, edit “contacts” record, search English names and write SMS .

In “text input” mode, if you want to change the input way, you can press “ alt” key. The selected input way will appear on the top left of the screen.

## **6 Care and Maintenance**

Maintenance of battery

- Your device is powered by a rechargeable battery. It is necessary to have the battery charged when it is going to wear out. The full performance of a new battery is achieved only when it is fully wore out.
- Unplug the charger from the electrical plug and the device when not in use. Do not leave fully a charged battery connected to a charger over a week, since overcharging may shorten its lifetime.
- Temperature tends to affect the limit of battery to be charged.

Therefore, it is necessary for the battery to be cooled or warmed before it is charged. If the temperature of batter exceeds 40°C ,the battery cannot be charged.

- Use the battery only for its intended purpose and avoid short-circuiting. Accidental short-circuiting can occur when a metallic object causes direct connection of the positive (+) and negative (-) terminals of the battery.
- Do not use damaged battery.
- Leave the battery in hot or cold places will reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily, even when the battery is fully charged.
- Do not dispose of batteries in a fire as they may explode. Dispose of batteries according to local regulations.

#### Care of maintenance of your device

The suggestions below will help you protect your warranty coverage.

- Keep the device and accessories out of the reach of small children.
- Keep the device dry. All types of liquids or moisture will corrode electronic circuits.
- Do not store the device in hot areas. High temperatures can shorten the life of electronic devices and warp or melt certain plastics.
- Do not attempt to open the device other than as instructed in this

- guide. Non-professional handling may damage the device.
- Do not use harsh chemicals or strong detergents to clean the device.
  - Use only the supplied or an approved replacement attachments, for the unauthorized ones could invalidate the warranty of maintenance.

## **FCC Caution.**

### **§ 15.19 Labelling requirements.**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

### **§ 15.21 Information to user.**

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**§ 15.105 Information to the user.**

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### **Specific Absorption Rate (SAR) information:**

This **GSM Mobile Phone** meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: **PAN** (FCC ID: **PQ4IPROPAN**) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the **ear is 0.46W/kg** and when properly worn on the body is **0.50W/kg**. This device was tested for typical body-worn operations with the back of the handset kept **1.5cm** from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a **1.5cm** separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should

not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

### **Body-worn Operation**

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of **1.5 cm** must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
