LAMP GROUP
CONTROL PART

THE ADVANTAGES

- **SYNCHRONIZATION :** perfect coordination between the modules

- **PAIRING :** creation of links between the lamps.

- **CONTROL BY AREA :** creation of a lamp group to control the various areas. *(example : a group for the basic room, a group of the VIP corner, etc…)*

- **COMMUNICATION BETWEEN THE MODULES :** each lamp gives the order to the next one, without any limit in distance.

SEE EACH LAMP'S STATUS

cliiiiic
5 seconds

GROUP PART

=

LONG PRESS (about 5 sec) the button to return to the group mode.

If the lamp lights **RED** **it means that it is in another group.**

If the lamp lights **GREEN** **it means that it is already grouped.**

If the lamp lights **BLUE** **it means that it is available.**

13

CREATE A LINK

Once in the group mode, pressing the button briefly links the nearest **10 blue bulbs**
(as long as the operation is in progress the indicator lamp flashes green)
Redo the same operation with the lamps that you want to integrate in this group.

clic

The remote control luminous indicator flashes green.
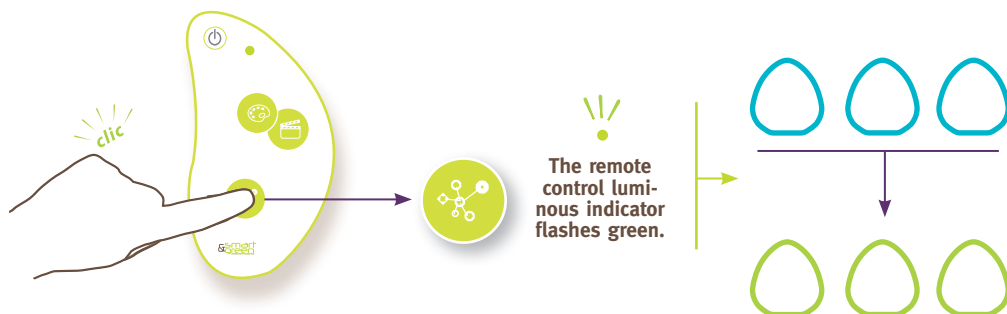

BREAK A RED LINK

If you have two remote controls, use the remote control which allowed connecting them.
Same procedure as for the green link, but using the appropriate remote control.

**This operation can be performed directly on
the K BULB or K BULBLITE module..**
When you press one of these 2 buttons, the light that you will
control goes on in **RED** and then goes off.

cliiiic
10 seconds

DEGROUP A COMPLETE GROUP

10 seconds
cliiiiic
LONG PRESS

and then 5 seconds

Your lamps go on then in **BLUE**
(not associated with a group)

14

cliiiiic

5 seconds
LONG PRESS

CONTROL THE HOLD MODULES

This function is to be enabled directly on the module   OR

cliiiiic
3 seconds
