- (3) LED indicator
- (4) Volume +
- (5) Volume -
- (6) Earphone Jack
- (7) Clip
- (8) USB charging port

Basic use

1.Power on

When the device is off, long press the MFB for 3second till you see the blue LED. Then release the button.

2.Power off

When the device is on, press the MFB for about 7 second till you see the red LED. Then release the button.

3. Paring:

Pairing is the process of establishing encrypted link between BSH22 and Bluetooth devices.

Step-1 In the off state, press and hold MFB for about 7 second until the red and blue LED flash alternatively.

Step-2 Follow the operating instruction of your Bluetooth mobile phone to start the pairing process. Typically, this is done by going to a "Connect" or "Setup" menu and then selecting the option to search the BSH22 that is still in the pairing mode

Step-3 The mobile will find BSH22 headset and ask whether you are willing to connect your mobile with the headset. Press "Yes" or "Confirm" to confirm this action.

Step-4 If the mobile is Bluetooth v2.0, the mobile phone's display should then prompt you for a passkey or PIN. Enter 0000 (a sequence of four zeros) and the display should prompt the pairing result. If the mobile is Bluetooth v2.1, no need to enter passkey.

(If the connection is successful, the blue LED of the headset will flash 1 time. Then blue LED will flash one time every 5 seconds. If the pairing is unsuccessful, please turn off the headset and turn it on again. Then, return to Step-1 and do the pairing procedure again.)

3.Make a call

To make a call, use your phone in the normal way when the headset is connected to your phone. The sound will be transmitted to the headset automatically.

4.Answer a call

When there is incoming call, press the MFB, or use the phone keys to answer the call.

5.End a call

After finishing the call, press the MFB, or use the phone keys to end the call.

6.Reject a call

When there is incoming call, press and hold MFB for 3 seconds till there is du sound prompt from speaker. Release the button to reject the call.

7.Voice dialing (dialing a number by saying a name)

It is possible to make a call directly from the headset using voice recognition. To use this voice dialing function, your mobile phone must provide this option and corresponding voice samples must have been recorded.

Step-1 Enable voice recognition function of your mobile and set the mobile to hands free state.

Step-2 When the headset is connected to mobile, press MFB for about 3 second and release, there is du sound prompt from speaker.

Step-3 Speak out the name of the person you wish to call loudly.

8. Last number Redialing

1. When no call is in progress, double press MFB and you can hear beep sound from the speaker. Release the button and the headset will dial the last dialed telephone number.

9.Mute

During a call, press and hold volume + key and volume – at the same time for about 3 second until there is a beep sound from the speaker, and then the other side cannot hear what you say now. The same operation will let you back to normal state.

10. Play music

You can use BSH22 to enjoy the streaming stereo music transmitted from you compatible mobile with Bluetooth function. The mobile needs to support Bluetooth A2DP (Advanced Audio Distribution Profile) and AVRCP (Audio Video Remote Control Profile).

When there is incoming call, the music will pause when you answer the call. After you finished the call, the music will follow to be streamed in a few seconds. Some mobile phones do not release the connection switch function to the headset, which will cause the headset to fail to switch the Bluetooth connection between music and call

11. Play/Pause music

In idle state, press play/pause button one time to play or pause music.

12.Adjust the earphone volume

Short Press the volume + key to increase or volume - to decrease the volume during a call or listening to music. When you reach the max or min level volume, there will be sound prompt from speaker.

13. Previous/Next song

When playing music, press volume + key 3 seconds to play next song or press volume – 3 seconds to play previous song

14.Call waiting

In call state, if there is another incoming call, press volume+ and volume – at the same time to answer the second incoming call. The same operation will let you back to the first incoming call.
