

USER MANUAL

Please read this manual carefully before use!

For this item wireless mobile phone monopod. We already use the best bluetooth chip now on the market(From Broadcom,USA),and integration of superhigh speed integrated circuit. The response times less than 1/60 of a second.

USAGE INSTRUCTION:

1/ Power on and Enter Pairing:

Pressing the <Press> button for 4 seconds to power on the monopod. The LED will flash 1 time once powering on, the monopod will connect the last connected Iphone or Android automatically. If they cannot connect within 6seconds,the monopod will enter pairing mode and the green LED will flash quickly.

2/ Power off the monopod:

Pressing the <Press> button more than 4 seconds, the LED will flash 3 times means the monopod is power off.

3/ Connect to Mobile phone:

Firstly, let the monopod enter pairing mode. Secondly, turn on Iphone or Android's Bluetooth, searching pairing device (Iphone will search it automatically) until <D18> device appears. In the mobile screen, press <D18> to connect it. Now the monopod is ready for taking photo and video .

4/ Device sleep mode:

To save battery power, the monopod will be in sleep mode if not using in 10 minutes. Pressing <Press> button 1 time, it will wake up and reconnect the phone. If exceed 5 minutes in sleep mode, the monopod will be powered off automatically.

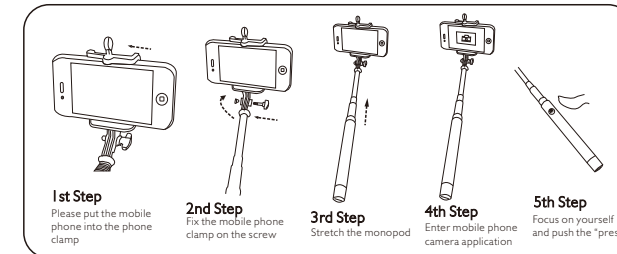

5/ Low battery Indication:

The monopod LED will flash 1 time per 1.5seconds if the battery is low. Means you should change the battery at once.

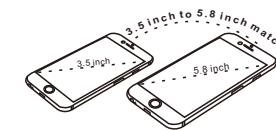

size: 9x14cm
