1. Introduction

We hope that you will be fully satisfied with your new terminal MOVE/5000. This terminal is available in different models. Please select by yourself in this documentation items related to your model.

Read this guide to understand and make the best use of your terminal. It presents you the necessary information about use, installation, maintenance, safety and security recommendations.

WARRANTY / SECURITY

Use only the power supply included with the product to ensure best performance and safety. Maintenance should only be provided by Ingenico authorized technician. Failure to comply with these instructions will void the manufacturer’s responsibility.

This symbol indicates an important Warning.

This symbol indicates a piece of advice.
2. Presentation

2.1. Content of the box

2.1.1. Terminal

**WARNING**
The power supply unit provided with your equipment is specially designed for Ingenico terminals. Do not use any other power supply. The use of a power supply with apparently similar voltage/current characteristics may damage your terminal.

**ADVICE**
Keep the packaging. It must be re-used whenever the terminal is shipped.

MOVE/5000 terminal unit equipped with a paper roll

A battery pack disconnected

Power adapter

User guide

MOVE/5000 terminal unit equipped with a paper roll

2.2. Overview of the MOVE/5000

Terminal unit

3"5 LCD Display with touch panel

Backlit keyboard

Smart card reader

Magnetic card reader

Easy loading printer
Compartment where are located:
- the battery pack
- the modules SAM1/SAM2/SIM1/SIM2
- the 2nd Smart card reader (optional)

| Weight (without paper roll nor battery) | 310g |
| Dimensions (L x w x h) | 169 x 78 x 57 mm |
| Electrical mains network | 100-240VAC / 50-60 Hz - Class II equipment |
| Connections on terminal | Micro USB AB serial link, Power connector, Contacts for Cradle |

2.3. Keyboard details and functionality

Some keys can have other functions according to the applications that are in the terminal.

- The functions key accesses the different application menus.
- The red key cancels the procedure in progress.
- The yellow key cancels the last character.
- The green key validates input selections and information. It is also used to switch on the terminal.

Feed paper a few centimeters if pressed for a long time (more than 2 seconds).

2.4. Touch panel

The Move5000 device is equipped with touch panel that allows you capture functions and menus by your finger or using a stylus.
3. Use of the terminal

3.1. Switching off the terminal

If the battery is empty and the terminal in use is removed from its base, the terminal automatically shuts off.

It may also be switch by pressing simultaneously and (yellow key) for one second.

In order to restart the terminal, press on the keyboard.

3.2. Reading card

Magnetic stripe card
The card can be read either from bottom to top or from top to bottom, with the stripe facing the terminal. Use a regular movement in order to ensure a reliable card reading.

Smart card
- Card reader: insert the card horizontally with the chip facing upwards and leave in position throughout the transaction.
- 2nd card reader (Optional): is located under terminal trapdoor (on back of the terminal). Insert the card upside down chip facing the terminal.
4. Installation

4.1. Recommendations

Location of the Move5000
Place the base on a flat surface near an electric socket and according to the base to the telephone or an Ethernet socket. The terminal should be placed far from any very hot zones, protected from vibrations, dust, damp and electromagnetic radiation (computer screen, anti-theft barrier etc.).

Operating conditions

<table>

<tr>
<td>Max relative humidity</td>
<td>85% at +55°C</td>
</tr>
</tbody>
</table>
4.2. USB Terminal connections

4.2.1. USB

- There is an USB connector (microAB) on the left side of the Move/5000 Wireless terminal (see below picture). This connector manages Host and Slave connections.
- The terminal supports USB Keys with FAT16 or FAT32.
- The USB Key has to be used with an USB adapter (refers to accessories section).

*MicroAB connector durability: up to 10,000 mating cycles

4.2.2. MicroSD Memory Card

- Insert the MicroSD Memory Card into the connector slot as shown on the figure.
- MicroSD connector is located on terminal side.
- The terminal supports MicroSD up to 32GB.

4.3. Opening trap door

**CAUTION:**
Switch off the terminal before opening the trapdoor.

- Turn the terminal and unclip the trapdoor by pushing on the clip with as shown with the arrows on the picture.
4.4. SAMs & SIMs

The connector modules security SAM/SIM are located inside the terminal, in a closed compartment.

- SAMs and SIMs are indentified by the engraved marks on the lower housing
- When introducing a SAM/SIM in its slot, be sure to put the cut corner as indicated on the engraved marks

4.5. Battery

4.5.1. Main characteristics

<table>
<thead>
<tr>
<th>Characteristics</th>
<th>Li-ion 2900 mAh</th>
</tr>
</thead>
<tbody>
<tr>
<td>Charge (power supply-1.5A)</td>
<td>50% capacity in 1.5h; full capacity in 4 hours</td>
</tr>
</tbody>
</table>
| Battery life | • 450 transactions in GPRS with fully charged battery, printing and backlit activated.  
• Can remain powered ON up to 150 hours with connected GPRS link and terminal in sleeping state starting with fully charged battery and without energy consumption related to backlit or radio link |

* The battery capacity depends on the model of terminal and its use

4.5.2. Installing the battery

WARNING
Check that the terminal is not connected to the main electric network.

- Turn your terminal and unclip the battery trapdoor by pushing on the button as shown on the picture
- Disengage the trapdoor
- Take the battery pack included in the box
- Locate the battery pack connector beside the battery compartment
- Plug the battery pack connector **according to the connector locating system and** (as shown on picture). Verify that it locks.
- Place the battery pack in its compartment.
- Close the battery compartment trapdoor.
4.5.3. Charging the battery

➢ When does the battery need to be charged?
   • On initial start up, charge the battery for 16 hours under the environmental conditions stated above
   • When used daily, the terminal recharges its batteries each time it is placed on its base. Charging is automatic
   • When used with a terminal power supply, connect the power supply to Move5000 power connector.

➢ How does the battery need to be charged?
   • The environment in which the charge takes place influences battery lifetime and autonomy (number of transactions)
     The optimal conditions are as follows:
     • Charging away from any external heat source (radiator, sun, enclosed area...)
     • The optimal temperature is between +15°C and +25°C

➢ How can the battery be charged?
   Using the base
   • Place the terminal on its base
   • Check if the battery symbol is flashing or moving (=battery charging).

   Using the terminal power supply (the terminal is out of its base)
   • Connect the terminal power supply unit to the terminal microAB connector located on the left side of the terminal.
   • Connect the power supply unit to the power supply mains network
   • Check to see if the battery symbol is flashing or moving (=battery charging)

4.5.4. Changing the battery

It is imperative to use a battery authorized by Ingenico. There is danger of explosion if battery used is not approved by Ingenico.

➢ Remove the terminal from its base
➢ Turn it off by pressing simultaneously [ ] and [ ] (yellow key) for about one second
➢ Remove the battery trapdoor (see section 4.5.2 “Installing battery”)

➢ Lift the battery and remove it from its compartment

➢ Carefully disconnect battery, following the instructions below.
   a) Unlock the connector by pressing the locking mechanism as indicated by F1 arrow while pulling this connector (F2 arrow). Release traction on it as soon as the connector comes unclipped
   b) Finish extracting connector by tilting it slightly (F3 arrow) to bring it away from the terminal housing

➢ Inform the terminal that battery will be replaced (*). Do so start the terminal without battery by fitting it on its base, or connecting terminal power supply.
➢ Remove terminal from base or disconnect terminal power supply
➢ Connect and install the new battery by following the instructions in section 4.5.2 “Installing battery”
➢ Close the battery trapdoor and charge the new battery. See section "a “Charging the Battery”
➢ In order to preserve the environment, dispose used battery in compliance with current country recycling legislation.

(*) The terminal memorizes that there is no battery simply by powering up. It will then correctly perform full recharge with the next battery.
4.6. Paper roll

4.6.1. Mains characteristics of INGENICO paper roll

Depending on IWL model two paper roll can be used:

<table>
<thead>
<tr>
<th>R40 paper roll Characteristics</th>
<th>Precisions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Colour</td>
<td>White</td>
</tr>
<tr>
<td>Width</td>
<td>58 mm</td>
</tr>
<tr>
<td>Diameter</td>
<td>40 mm</td>
</tr>
<tr>
<td>Length</td>
<td>About 18 metres</td>
</tr>
</tbody>
</table>

- The thermal paper can be deteriorated by poor storage conditions, so we recommend you to avoid:
  - storage in hot wet places (near air-conditioner, humidity higher than 85%)
  - exposure to sunlight or ultraviolet for long periods
  - contact with organic solvents (solvent type adhesive)
  - direct contact with materials containing plasticizers (PVC transparent folders or envelopes)
  - direct contact with «diazox» papers
  - direct contact with water
  - Rubbing or pressing the paper too strongly

**WARNING**

For best product performance, only use heat sensitized paper approved by Ingenico.

**WARNING**

Switch off the terminal prior to installing a paper roll.
Use only paper approved by Ingenico.
The use of non approved paper is likely to damage the printer of your terminal.

**ADVICE**

If you insert a new R40 paper roll, tear off the first length (one complete turn to avoid printing on adhesive tape footprint).

4.6.2. Installing paper roll

- Open the paper compartment by lifting the catch located at the rear of the terminal and pull the cover to the rear of the terminal.

- Insert the paper roll in the compartment following the directions shown on the below picture

- Pull the paper up to the top of the terminal

- Maintain the paper and close the lid

- Press simultaneously on both upper corners of the paper flap, as shown by arrows on picture, until it clips into position
5. Recommendations

5.1. Safety

Powering down the Move/5000:

Disconnect the Move/5000 power supply block adapter from the electrical mains network.

Lithium cell

The Move/5000 is fitted with an internal lithium cell which can only be accessed by a qualified technician.

Battery

Move5000 is fitted with battery specially designed for this terminal.

- Only use the appropriate chargers and batteries listed in the Ingenico’s catalogue.
- Do not short-circuit the battery.
- Do not attempt to open the battery container.
- Used batteries must be disposed of at the appropriate sites.

**Warning**

There is a risk of explosion if the battery is incorrectly replaced or is placed in a fire.

Electrical power outlet

The electrical outlet must meet the following criteria:

- Must be installed near the equipment and easily accessible;
- Must meet standards and regulations in the country where used;
- For type A plug, the protection of the installation must be set to 20 A.

SAM1/SAM2/SIM1/(SAM3/SIM2) readers compartment

The trapdoor for battery, SAM1/SAM2/SIM1/(SAM3/SIM2), readers located underneath the terminal, must be in place during the normal operation of the terminal. See sections "Removal of SAM1/SAM2/SIM, modules" as well as "Connecting the battery".

On airplanes

Your handset must be switched off by removing the battery pack. Remove the battery from the terminal when on an airplane.

Non-compliance with these safety rules may result in legal action and/or a ban on later access to cellular network services.

Explosion areas

Certain regulations restrict the use of radio equipment in chemical plants, fuel depots and any site where blasting is carried out. You are urged to comply with these regulations. The terminal shall be protected by a specially fitted and certified cover enabling use in proximity to a fuel pump.

Electronic health appliances

Your handset is a radio transmitter which may interfere with health appliances, such as hearing aids, pacemaker, hospital equipment, etc.

Your doctor or the equipment manufacturer will be able to provide you with appropriate advice.

5.2. Security of your terminal

Your device fulfills current applicable PCI PTS security requirements. Upon receipt of your terminal you should check for signs of tampering of the equipment. It is strongly advised that these checks are performed regularly after receipt. You should check, for example; that the keypad is firmly in place; that there is no evidence of unusual wires that have been connected to any ports on your terminal or associated equipment, the chip card reader or any other part of your terminal. Such checks would provide warning of any unauthorised modifications to your terminal, and other suspicious behaviour of individuals that have access to your terminal. Your terminal detects any “tampered state”. In this state the terminal will repeatedly flash the message “Alert Irruption!” and further use of the terminal will not be possible. If you observe the “Alert Irruption!” message, you should contact the terminal helpdesk immediately.

You are strongly advised to ensure that privileged access to your terminal is only granted to staff that have been independently verified as being trustworthy.

The terminal must never be put in or left at a location where it could be stolen or replaced by another device.

**CAUTION**

Positioning of the terminal on check stand must be in such a way to make cardholder PIN (Personal Identification Number) spying infeasible.

Installing device on an adjustable stand must be in such a way that consumers can swivel the terminal sideways and/or tilt it forwards/backwards to a position that makes visual observation of the PIN-entry process difficult.

Positioning of in-store security cameras such that the PIN-entry keypad is not visible.

NEVER ask the customer to divulge their PIN Code. Customers should be advised to ensure that they are not being overlooked when entering their PIN Code.
6. Standards

CE Marking

The CE marking indicates Move5000 complies with the requirements of European Directive 1999/5/EC of 9 March 1999 on Radio and Telecommunications Terminal Equipment for:

- the protection of the health and the safety of the user and any other person.
- the protection requirements with respect to electromagnetic compatibility.

and complies with harmonised standards.

Depending Move5000 model involved standards are:

<table>
<thead>
<tr>
<th>EU Directives:</th>
<th>According to harmonised EU standards:</th>
<th>Issue date</th>
</tr>
</thead>
<tbody>
<tr>
<td>1999/5/EC (R&amp;TTE Directive)</td>

FCC/IC Compliance (2G/3G model)

The FCC ID for MOVE/5000 2G/3G Terminal model is: XKB-MOV and IC number is 2586D-MOV

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  (1) This device may not cause harmful interference, and
  (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct interference by one or more of the following measures:

  - Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help

- In order to meet FCC and Industry Canada RF radiation exposure limits for general population, this device must only be operated when held in the hand or in desktop position with a minimum separation distance of at least 20cm from the user's body and it must not be collocated or operated in conjunction with any other antenna or transmitter. Use of this device with an accessory in order to be worn and operated on user's body is strictly prohibited and will invalidate the certifications obtained for FCC and Industry Canada.

- Afin de respecter les directives de la FCC et d'Industrie Canada concernant les expositions radiofréquence, cet appareil ne doit fonctionner que tenu dans la main ou sur station d'accueil avec une distance minimale d'au moins 20cm du corps de l'utilisateur et il ne doit pas être en colocation ou coopération avec une autre antenne ou émetteur. L'utilisation de cet appareil avec un accessoire dans le but d'être porté et fonctionné sur le corps de l'utilisateur est strictement prohibé et invalidera les certifications FCC et Industrie Canada obtenues

- This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:
  (1) This device may not cause harmful interference, and
  (2) This device must accept any interference received, including interference that may cause undesired operation.

- Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:
Environment (WEEE, Batteries and Packaging)

This product is labeled in accordance with European Directives 2002/96/EC concerning Waste Electrical and Electronic Equipment (WEEE) and 2006/66/EC concerning Batteries and Accumulators. Those provisions are requiring producers and manufacturers to become liable for take-back, treatment and recycling upon end of life of equipment and batteries.

The associated symbol means that WEEE and waste batteries must not be thrown away but collected separately and recycled.

Ingenico ensures that efficient collection and recycling schemes are set-up for WEEE and batteries according to the local regulation of your country. Please contact your retailers for more detailed information about the compliance solution in place for disposing of your old product and used batteries.

Packaging waste must also be collected separately to assure a proper disposal and recycling.

Please note that proper recycling of the electrical and electronic equipment and waste batteries will ensure safety of human health and environment.
7. Troubleshooting

The terminal does not turn on
• Check the battery (is it discharged?, is it connected?)
  A full discharged battery can take long charging time to recover
• Connect terminal to terminal power supply or put it on powered base

Cards are not read
• Check that the magnetic card is swiped correctly (with magnetic band on terminal side).
• Swipe again the card with the magnetic stripe movement constant and rapid
• Verify that the magnetic strip is not damaged, grooved or cracked
• Make sure you have inserted correctly the smart card into the smart card reader and removed the card only after the transaction is performed.

The ticket is not printed
• Check the presence and proper positioning of the paper roll.
  Possibly adjust the paper roll following the instructions in this manual (section 0 “installing the paper roll”)
• Check the type of paper used (thermal paper must be used)
• Verify thermal paper sensitive side.
