

FCC ID: 2AB8ZND5

IC: 1000X-ND5

OEM Integration procedure:

To insure compliance with FCC and Canada IC, the following steps should be followed for integration of Intel BT BLE module to the host:

- 1) FCC ID should be visible to the user after integration of module into bracelet.
- 2) IC number should be visible to the user after integration of module into bracelet.
- 3) Use in other bracelets may require submission of a C2PC filing for FCC and either reassessment or model addition for Industry Canada. Please work with Intel to determine the appropriate procedures.
- 4) User documentation with the regulatory statements required by FCC and Canada, as described in the sample manual provided to Intel, must be provided to the end user.
