

1 BEFORE INSTALLATION

This is the brief installation and operation user guide for the Wireless EZCam. Please kindly make sure your read this document through first before installing/using your device. Thank you.

1.1 Check Your Package Contents

Your package should include following items. If any of the below items are missing, please contact your retailer. (Photos of EZ Cam and Accessories shall be added later.)

- Wireless EZCam with integrated AC Power Adapter
- Installation CD (Software, Quick Installation Guide)
- Light-bulb Adapter
- Power-center Wall-mountable Adapter
- Three Screws and One Plastic Bolt
- Three Robber Pads

1.2 Before Installation

Before you begin, please check the requirements below.

1.2.1 System Requirements

Minimum System Requirement:

- Wireless Access Point (802.11b/g compatible) with DHCP enabled
- PC with Ethernet or Wireless (802.11b/g compatible) capability
- PC with Windows XP or 2000 operation system
- PC with Xvid or DivX Codec installed (Please refer to the Section 2.2.1 for more information.)

1.2.2 Environment Requirements

To minimize any possible negative impact, please check your network environment:

- Make sure the **WEP** on your Wireless Access Point is **DISABLED** (you can turn the WEP on later after installation)
- Suggest your wireless network has less Wireless Access Point to avoid unnecessary interference
- Make sure your Firewall on your PC is OFF

2 EZ CAM INSTALLATION PROCESS

Please make sure you follow the installation process step by step below to ensure the device and application running properly.

2.1 EZ Cam Hardware Installation

There's no need to do any hardware install before software installation. Please follow the below software application installation first.

2.2 EZ Cam Software Application Installation

2.2.1 XviD or DivX Codec Installation

Please check your computer where you installed XviD or DivX codec or not. The XviD or DivX is a must to display the video in EZ Cam Manager Program. If the XviD or DivX does not exist in your system, you can download and install the XviD or DivX codec from below websites.

XviD: <u>http://www.XviD.org/</u> DivX: <u>http://www.DivX.com/</u>

2.2.2 EZ Cam Manager Program Application Installation

Please install the EZ Cam Program from the CD-ROM under the folder "EZCam" (Yet to final devcide).

2.2.2.1 Initiate the Setup Wizard

Double click the SETUP.EXE from the CD-ROM to start the Setup Wizard.

The following dialog window will show up. Please confirm the installation process by press "Next." (Note: The display language may vary depends on your OS language version.)

2.2.2.2 Select the Proper Decoder

Please select the proper decoder according (XviD or DivX) which installed in your PC. And then press "Next."

2.2.2.3 Select Installation Folder & Option

Please select the folder you would like the EZ Cam Manager program be installed. If you do not have any preference, you can just keep the default value and press "Next."

🕲 EZ CAM	
Select Installation Folder	
The installer will install EZ CAM to the following folder.	
To install in this folder, click "Next". To install to a differe	nt folder, enter it below or click "Browse".
<u>F</u> older:	
C:\Program Files\EZ CAM\	Browse
	Disk Cost
Install EZ CAM for yourself, or for anyone who uses th	s computer:
O Everyone	
⊙ Just me	
Cancel	<pre></pre>

2.2.2.4 Confirm Installation

Please confirm the installation by pressing "Next."

2.2.2.5 Installing EZ Cam

Please wait the installation process until the bar completed.

🔀 EZ CAM			
Installing EZ CAM			
EZ CAM is being installed.			
Please wait			
	Cancel	< Back	Next >

2.2.2.6 Installation Complete

After installation process completed, please press the "Close" button to close the Setup Wizard.

Please follow each step shown in the install/setup program to finish installation. After you followed the installation process, you will be able to run the EZ Cam program.

2.3 EZ Cam Device Installation

Before your EZ Cam device can be operated properly, you have to establish the connection between your EZ Cam device and your EZ Cam software application on your PC by doing following steps.

2.3.1 Start EZ Cam Program

Click the EZ Cam icon on your desktop (as below) or from the Windows Start Menu to start EZ Cam software application.

2.3.2 Add the new EZ Cam Device into Network

2.3.2.1 Initiate the "Setup New Camera" Process

Click the search button (with flashlight image) on the very right of the tool bar shown as below to initiate the searching process.

lanager ⊻lew ⊆amera				alaaa E7	CAM
ମ ଏକ ଏକା ର ରା			0.9.16	eless EZ	GAIN
Camera list					
	<				

Then, the "Waiting" dialog window will pop out.

🛃 Wait		
	Wait for camera response	
	Cancel	

Once the "Waiting" dialog window appeared, you shall be ready to power the EZ Cam device on for the following setup. Strongly suggest DO NOT power on your EZ Cam device before the above steps done.

2.3.2.2 Power on the EZ Cam Device

Power on your EZ Cam device by plugging the EZ Cam into the AC outlet. You can also plug your EZ Cam through Light-bulb Adapter or Power-center Adapter. The EZ Cam will try to communicate with your EZ Cam Manager Program automatically. In the process of initialization, the Orange LED on the EZ Cam will constantly flash until the connection established. Once the connection been established, the follow message will show up.

The above message indicates that a new EZ Cam was added in the local wireless network. Press the "OK" button, and close the "Waiting" dialog window by press the "Cancel" button.

2.3.2.3 What If No Responding from Device

It is possible that there will be no response on your screen due to no communication settled. If this does happen, please try to **Power Off** and **Power On** again for the EZ Cam Device.

2.3.3 Add existing EZ Cam Device to your EZ Cam Manager Program

After the your EZ Cam been connected into your wireless network, you have to add the EZ Cam you just established by pressing the "Add Camera" button.

For your own privacy, it is strongly suggested that you should change your password immediately. Please refer to following section for changing Administrator Password and other property settings.

3.2 EZ Cam Property Setting

You can enter the property setting by press (screwdriver-like) icon. If you already connected to the EZ Cam device as previous section indicated, then the program will prompt "Camera Property Setting" dialog as below. If you are not connected or lost connection, please have your EZ Cam device connected with the program first.

3.2.1 Property -- Camera Name & Administrator Password

After you see the "Camera Property Setting," you shall be able to change the Camera Name and Administrator Password. For your own privacy, it is strongly suggested that you should change your administrator password immediately.

Q Q C V		II 🖩 🖸 💛 🛤	s v v v	Wireless E	z cam 🦉

	<				

In this page, you can also change the Camera Name and the description, if you like to.

3.2.1.1 Back to Factory Setting If Forgot Administrator Password

In case you forget the administrator password, you can backup the EZ Cam to default value by using thin stick such as paper clip to press the switch (inside the hole shown below) for 5 seconds while EZ Cam is attached to AC Outlet (powered on.)

3.2.2 Property -- IP Address Distribution

You can also modify the setting of the Wireless IP Address in the property setting. The default setting for the wireless IP is "DHCP"; unless you have substantially knowledge of setting up wireless network, it is strongly suggested to kept the default setting "DHCP."

4 FEDERAL COMMUNICATIONS COMMISSION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
