If it’s worth doing, it’s worth saving

250MB Zip® drive

Like the Original but bigger and faster

The Zip 250MB drive is the highest capacity device of its kind, satisfying the need to store growing file sizes. As well as handling the equivalent of 170 floppies worth of information on 1 Zip 250MB disk, the Zip 250MB drive is compatible with over 150 million Zip 100MB disks sold.

Convenient connections for your computer

The Zip 250MB Parallel Port drive connects to all Windows 95/98 and NT enabled PC’s. Complete with pass-through feature, you can connect both your Zip 250MB Parallel Port drive and printer to the same Parallel Port interface. The Zip 250 family also includes a USB & PCMCIA drive and an internal (ATAPI) drive.

Save, transport, share and secure valuable files

Zip disks provide affordable and safe storage for your important files. Use them to secure data whenever you want. Take hundreds of megabytes of data home, on the road, to the next office. Or, you can overnight large files to remote co-workers and outside business partners.

What can you do with Zip® drives and disks?
If you need more disk space, carry lots of data, like to work at home or on the road, or share files with partners, a Zip drive is an essential tool. 250MB Zip disks are big enough to handle just about anything. Here are just a few of the things you can do with your Zip disks:

capture
- Internet downloads
- 300 to 1200 digital images
- Up to 250 minutes of MP3 audio on a single 250MB Zip disk†

create
- An automatic backup of your important files using Iomega® QuikSync software
- Copies of your best work
- An archive for all your files (e-mail, client files, pictures, audio and video clips)

connect
- And share information with co-workers, clients, and service bureaus
- To 30 million Zip® drives sold worldwide

QuikSync Besides creating new files, always back up your work using Zip. Iomega QuikSync is the easiest to make an automatic and simultaneous back up of your important files.
