Weee Statement

To protect the global environment and as an environmentalist, Bluemate must remind you that.....

Under the European union ("EU") Directive on Waste Electrical and Electronic Equipment, Directive 2002/69/EC, which takes effect on August 13,2005, products of "electrical and electronic equipment" cannot be discarded as municipal waste anymore and manufacturers of covered electronic equipment will be obligated to take back such products at the end of their useful life. Bluemate will comply with the products that are sold into the EU. You can return these products to local collection points.

FCC Safety Statements

The device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1)This device may not cause harmful interference.
- (2)This device must accept any interference received, including interference that may cause undesired operation.

The radiated output power is far below the FCC radio frequency exposure limits. Nevertheless, this device should be used in such a manner that the potential for human contact during normal operation is minimized.

1. Overview

Thank you for purchasing BT6000 Bluetooth Headset. Before starting to use the product; please ensure the content of the product package; and read the User Manual carefully, to understand all the function of the product. BT6000 adopts the latest Bluetooth technology to connect all the Bluetooth devices with Audio Gateway function like mobile phone, desktop, notebook etc. Before you use the headset, please to make sure the device you're going to use with is compatible with Bluetooth specification V2.0 and supports Bluetooth Headset of Handsfree Profile.

2. Introduction of the product

3. Charging the Headset

There is a lithium polymer battery inside the headset; please fully charge the battery before you use it.

- 1.Plug the portable charger to the electricity source.
- 2.Plug the portable charger into the Charging Port in the end part of the headset.
- 3.when charging, there will be the red indicator light flashing, after the battery fully charged; the indicator light will be off.

Notice

- Only when the system activates the charging is allowed; the whole charging time is about 90-120 minutes.
- When first time charging the headset please charging it at least for 4 hours.
- Don't use the headset when it is recharging; the headset will switch off itself when it is recharging.
- Please use the provided charger only.
- When the LED indicator flashes red light, it means the battery level is low and should be recharged soon.
- Only when the temperature is within the range -10 (+14F) to +45 (+113F); the headset can be charged.

4.Power on/off

- 1.Press the Power key for about 3 Sec ; after the green indicator light flashing 3 times to activate the power.
- 2.When switching off the headset , press the Power Key for about 3 Sec; after the red indicator light flashing 3 times the power will switch off.

Notice:

- When switching on your headset, you will hear one " Do" sounds from it ; by the time the green indicator light will flash 3 times then flashing 2 times . The process will repeat 5 times then it will flash once every 3 Sec, now the headset is under the " **stand-by**" mode.
- While the headset is activating, it will detect the paired device automatically (only if the paired device is activated and within 10 meters of the headset) then turn into the connecting mode directly. When the green indicator light flashing two times non-stop; it means the headset is in the "**connecting mode**".
- When switching off the headset; you will hear one " Beep" sounds from the headset , indicator light will turn off.

5.Pairing with your mobile phone (or any other Bluetooth devices).

Before using the headset for the first time; you need to pair with your Bluetooth device first.

- 1.Before pairing, make sure your headset is off.
- 2.Press the power key for at least 5 sec; when you see the blue and red indicator light flashing alternately it means the headset is in the pairing mode.
- 3.Please ensure that your mobile phone is provided the Bluetooth Function, and activate the function. Each brand of mobile phone might have different ways to operate it; please check up with your mobile phone user's manual.
- 4.You will find the words string " **BT6000** " show on certain items in your mobile phone.
- 5.Choose " **BT6000** " and do the pairing.
- 6.Key in the pairing pin code "**1234**" then press " **yes**" , the indicator light will turn from the green/red flashing status into green flashing, it means the pairing has been successful.
- 7.Now the headset has been in the "stand-by"mode, you may receive or dial the phone call.

Notice:

- If the pairing can't be done within 90 Sec, the headset will be in the "stand-by" mode automatically (green/red flashing every 3 Sec). You will not be able to use your headset; you will have to repeat the procedure from step 1-6 pairing again.
- When pairing; the distance between the headset and the mobile phone within 10 cm-1 meter is preferred; and ensure there isn't any metal obstacle.
- Each Bluetooth headset has a setting pin "1234". According to each brand of mobile phone has their own way for setting, the detail you may refer to your user's manual of the mobile phone.

- Once two devices are paired it will be kept; even if the following situations have been happened.

- One device is off.
- One of the device has stopped the service.
- One of the device has been reactivated.
