USB INTERNET PHONE

Call around the world for free with the USRobotics USB Internet Phone. Designed to integrate seamlessly with the powerful Skype Internet voice application, the USB Internet Phone simply plugs into a USB 1.1 or 2.0 port to provide easy voice communications to any Skype user worldwide. The bright, high-resolution, blue back-lit LCD screen provides convenient access to call status and supports Skype Caller ID, while the keypad allows you to place calls from your Skype phone book or to telephones anywhere in the world with the SkypeOut subscription service.

USRobotics®

Call the world for free!

|	
Free Calls to Anywhere	Now you can call anywhere for FREE! Simply install Skype software, plug in the USRobotics USB Internet Phone and dial/connect to any other Skype user in the world.
Compatible with Skype Voice Services	• Auto interfacing with existing Skype accounts • Makes Internet calling as simple and comfortable as standard telephone calling
Excellent Voice Quality	• Integrated echo cancellation and noise reduction technology delivers life-like conversation quality • Full-duplex operation eliminates call clipping
Full-Featured LCD Screen	• Blue, high-resolution, back-lit, graphical LCD capable of displaying any language characters • LCD status indication for online/offline and missed calls • Supports Caller ID – Displays caller and telephone number • Current date and time displayed (as read from host computer)
Easy to Install and Use	• Simple to install – Supports Plug-and-Play so when it is attached to a computer's USB port it automatically installs (requires CD for Skype) • Answer, hang up, and dial calls with the touch of a button • Portable – Easy to carry around, perfect for traveling • Classic hand-set styling for comfortable use, even on long calls
Broad Compatibility	• Supports Windows 2000 & XP operating systems • Compatible with USB 1.1 and USB 2.0 ports
