SET UP CAMERA AND SMARTPHONE/TABLET

**This Quick Start Guide only shows images for Android devices.
Images for iOS devices are very similar.**

PREREQUISITES
- Your router must support WEP/WPA/WPA2 security and it must be turned on.
- You must have an available WiFi-enabled mobile device (Android or iOS smartphone/tablet).
- The AppCam and your mobile device must connect to the same Wi-Fi router for setup.

1. Download the Uniden® AppCam™ app from the Apple iTunes store (iOS) or Google Play (Android) onto your device.	
2. Connect the antenna to the camera.	
3. Connect the camera to power After about 45 seconds, the green LED begins to flash (3-flash/pause pattern).	

CONNECT CAMERA AND MOBILE DEVICE

1. From your device's Settings, go to *WiFi*. Select the AppCam 26PT to connect your device to it. The camera listing will be HD-XXXXXX where XXXXXX are the last 6 digits on the camera label. Enter the default password, 12345678.	
2. When the device is connected to the camera, launch the app and tap the Add New System icon.	
3. The *System Information* screen displays. Name the camera and tap *Search*..	
4. The *Search in LAN* results box displays. The camera's DID should display. Tap the DID number.	⊙ Search in LAN CGKX-000050-DVVPE Search again Back
5. The *System Information* screen displays again. This time, enter the security code (123456); tap *Save*. Tap *YES*, then *NO* at the next prompts.	
6. The *Globe* screen displays. Tap the Globe to access the AppCam 26PT video.	

CONNECT CAMERA TO WIFI ROUTER

1. Tap the Back icon, the System icon, and then the System Settings icon. The System Information screen displays	
2. Tap *Advanced*. Enter the Admin password (123456).	
3. Scroll to WiFi on the Advanced Settings list. Tap *Manage WiFi Network*. Select your router from the drop-down list and enter your router's password. Tap *Connect*. **Your camera will reboot and reconnect to the router. Wait until the camera's LEDs return to the steady on state to continue.**	
4. The Camera screen indicates that it is disconnected. Tap the System icon and then the Refresh icon. The camera refreshes and reconnects to the router you chose. The LEDs should be both on steady and app displays a photo of the video image.	

Attach the AppCam 26PT Mounting Plate and Camera

1. Hold the mounting plate where you want to mount it and mark the location of the screw holes.
2. Use the included screws and anchors to attach the mounting plate to the wall.
3. Use the enclosed screws to screw the camera to the bracket.

SET TIME ZONE/DAYLIGHT SAVINGS TIME

It is important to set the correct time zone and daylight savings time indication on your camera to ensure correct date/time stamp on the video files.

1. Access the *Advanced Settings* list (see Connect Camera to Internet, described previously.
2. From the *Advancd Settings* list, scroll to *Time Zone*.
3. Select your time zone. The most commonly used time zones are:
   - GMT-05:00 - Eastern Standard
   - GMT-06:00 - Central Standard
   - GMT-07:00 - Mountain Standard
   - GMT-08:00 - Pacific Standard
   - GMT-09:00 - Yukon Standard
   - GMT-10:00 - Alaska-Hawaii Standard
4. Set the Daylight Savings Time indicator.
5. Tap *Back*, and exit the *Advanced Settings* list.
