1. SYSTEM INTRODUCTION

1) SYSTEM SUMMARY

LEETEK's Tablecall Paging System was designed specifically to help guests immediately page their servers or managers when they need anything, so they can be served whenever they want. With this solution, it is needless guest's are waiting for their turns for served and servers are more convenient because it is needless to visit guest's table twice and it will keep servers from duplicating with each other. It will help reduce the number of servers and also reduce the noise as well. Your restaurant will be more quiet and high-quality. It'll help you provide "Always Customers First" Services.

2. INSTALLATION

1) EQUIPMENT SETUP

(1) Transmitter

Unwrap all sending unit components. Plug the power supply with the large tip into a standard outlet and plug it into charger base for transmitter. Stack the transmitters on the charger base. The red indicator will be lighted on and it means the transmitters are charged properly. We recommend some type of surge suppressor on the power supply for protection. Power surges are not covered under system warranty.

(2) Pager

Locate the charger base in a sturdy, out of the way location. Connect the charger base with TX charger base using included jump wires. Be sure to plug the jump wires & power supply jack in all the way.

Insert the pagers on the charger base. The pager number will always face top and the red charging indicator will be lighted.

You should check a charging indicator appear on each pagers. This light indicates proper charging is taking place.

On the top of each pager is your pager number.

2) PLACEMENT

(1) Transmitter

Place the tablecall transmitter on the proper location of table. Be sure that transmitter will not be dropped by mistaken and check the transmitter number is match with the table number.

(2) Pager

Attach the pager on the waiter(manager)'s belt using its belt clip. Be sure that the message "READY" is displayed on the screen. If the message is not displayed, then the pager is now turned off. So please press and hold the side button until it is turned on.

3. OPERATION

1) To page Waiter

- When you press WAITER button shortly, it transmits and displays "TABLE – Number" to the waiter pager.
- After transmitting is finished, red LED blinks once.

2) To page Manager

- When you press MANAGER button shortly, it transmits and displays "TABLE – Number" to the manager pager

- After transmitting is finished, red LED blinks once.

3) To cancel page

- When you press CANCEL button, it transmits and erases the previous page(Table No.).

4. HOW TO USE

1) Restaurant, Hotel, Café

(1) Direction for Use

- For calling staffs

(2) Process

- A guest can page to waiters by pressing the "WAITER" button on the transmitter, when the guest needs some help to request such as receipts or menu order.
- If the guest is not satisfied by the services from waiters, he/she can page to Manager by pressing the "MANAGER" button on the transmitter.
- After serving the services, the waiter can press the "CANCEL" button to complete the guest's requests.

(3) Merits

- This new premium paging system is not compared to the existed call bell systems. In addition, it helps you to provide the high-quality services to your customers.
- It eliminates the noise from the bells, and makes customers feel more comfortable.
- It will also help reduce the number of servers.

2) Hospital, Silver Town

(1) Direction for Use

- For calling Nurses

(2) Process

- A patient can page to Nurse by pressing the "NURSE or EMERGENCY" button, when a patient needs some help.
- A nurse can come to the patient room and serving the patients. After serving the services, the nurse can press the "CANCEL" button to complete the patient's requests.

(3) Merits
