The status light turns solid blue	Active call
The status light is flashing red	There is less than 30 min. talk time left
The status light turns red	The unit is charging
The status light turns off	The unit is fully charged

GETTING STARTED

You should follow three steps before using your in-car speakerphone:

1 Charge your Jabra JOURNEY

2 Turn your Jabra JOURNEY on

3 Pair your Jabra JOURNEY with your mobile phone

The first time you turn your Jabra JOURNEY on you will hear Voice Guidance telling you what to do.

NOTE: Voice Guidance and Voice commands are enabled as a default setting when you turn on your Jabra JOURNEY the first time. You can at any time disable the functions by both pressing the **Voice** button while you slide the power switch into the **ON (I)** position. You will hear "Voice off" and Jabra JOURNEY will no longer talk to you or listen for commands. Repeat the process to enable the voice features again.

CHARGE YOUR JABRA JOURNEY

Make sure that your in-car speakerphone is fully charged before you start using it.

Use the USB cable to connect Jabra JOURNEY to the car charger. Plug the car charger into your car's power outlet. The status light will light up red while charging. When fully charged the status light turns off. Jabra JOURNEY can be charged through your computer by using the USB cable.

Please note: The lifetime of the battery will be significantly reduced if your device is left uncharged for a long period. We therefore recommend that you recharge your device at least once a month. Use only the charger provided in the box - do not use chargers from any other devices as this may damage the in-car speakerphone.

2.5 Hrs

TURNING YOUR JABRA JOURNEY ON AND OFF

Slide the I/O switch to turn the in-car speakerphone on or off.

The first time you turn your in-car speakerphone on, it automatically enters pairing mode.

If the switch is left in the **ON (I)** position the Jabra JOURNEY will turn off automatically after it has been disconnected with your phone for 10 min.. The in-car speakerphone will also automatically turn on and reconnect to your phone when you enter your car (open the car door).

PAIRING YOUR JABRA JOURNEY WITH YOUR PHONE

Jabra JOURNEY is connected to a mobile phone using a procedure called 'pairing'. By following a few simple steps and voice guidance, a phone can be paired with the in-car speakerphone in a matter of seconds.

1 Activate _Bluetooth_® on your mobile phone

Please check the manual for your mobile phone.
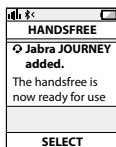

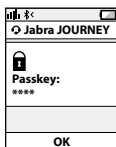

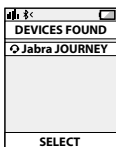

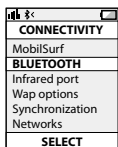

2 Put the in-car speakerphone in pairing mode

When you turn on your Jabra JOURNEY for the first time, the in-car speakerphone will automatically start up in pairing mode – i.e. it can be detected by your phone. When the in-car speakerphone is in pairing mode the status light will flash rapidly blue and a voice will guide you through the pairing process.

3 Set your _Bluetooth_® phone to 'search' for the Jabra JOURNEY

Follow your phone's instruction guide. Then set your phone to search for devices. This usually involves going to a 'setup', 'connect' or '_Bluetooth_®' menu on your phone and selecting the option to 'search' or 'add' a _Bluetooth_® device.*

4 Your phone will find the Jabra JOURNEY

Your phone will find the in-car speakerphone under the name "JABRA JOURNEY". Your phone then asks if you want to pair with the JABRA JOURNEY. Accept by pressing 'Yes' or 'OK' on the phone and/or confirm with the passkey or PIN = 0000 (4 zeros). Your phone will confirm with announcement "Connected" when pairing is complete.

Manual pairing mode

If you wish to use the in-car speakerphone with a different phone, or if the pairing process was interrupted, you can manually set the in-car speakerphone to pairing mode.

Turn the in-car speakerphone on. Press and hold the answer/end button for approximately 5 seconds until the status light stars blinking rapidly blue. Then repeat steps 2 and 3 in the above pairing guide.

CONNECTING WITH YOUR PHONE AUTOMATICALLY

Pairing is only needed the first time an in-car speakerphone and phone are used together. When the in-car speakerphone and phone have been paired once they will automatically connect when the in-car speakerphone is on and *Bluetooth®* is activated on the phone. The in-car speakerphone can be used when it is "connected" to the phone. If the device is paired, but does not immediately connect, tap the answer/end button.

PLACING JABRA JOURNEY IN YOUR VEHICLE

The Jabra JOURNEY sits discreetly and conveniently on the sun visor using the integrated metal clip. The product can be easily taken on and off the sun visor. *For optimal sound quality place the Jabra JOURNEY right in front of you and speak directly into the in-car speakerphone.*
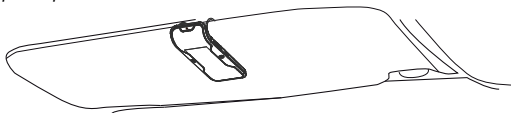

ADDITIONAL FEATURES

Voice control button*

If you phone supports voice control, the voice control button on Jabra JOURNEY allows you to control your phone with your voice. The button can also be used to mute/un-mute your microphone during an active call.

"Answer/Ignore" Voice Commands**

You can also take calls with your voice. Just say "Answer" or "Ignore".

Motion Sensor and Auto ON

Jabra JOURNEY has a built-in motion sensor that registers a movement in a car and sends a signal to the device to power on. Auto ON is possible if your unit has been turned off automatically and the On/Off slider is placed in the position "I".

On/Off
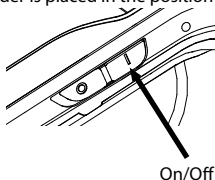

Sleep mode and Auto OFF

When not connected to a phone, the in-car speakerphone turns off automatically after 10 minutes. The phone will turn on automatically with help of a motion sensor. You can also turn it on again by typing the answer/end button.

Caller ID and name announcement*

During an incoming call Jabra JOURNEY will access the phonebook on your mobile phone and announce the name of the caller. If the name is not stored in your phonebook and your phone supports PBAP it will announce the number of the caller instead.

* Phone dependent
** Available ONLY in English

Play music and GPS directions*

Make sure that the in-car speakerphone and mobile phone are connected. When you play music or GPS directions from your mobile phone, it will automatically transfer them to your in-car speakerphone. If your phone does not allow this feature, press the answer/end button to transfer the music to the in-car speakerphone. Music or GPS directions will automatically be paused when you have an incoming call. When the call is ended it will start playing again.

Advanced Multiuse™

Jabra JOURNEY can be connected to two mobile devices at the same time. To learn more about Advanced Multiuse™ please go to the HOW TO HANDLE CALLS FROM TWO MOBILE PHONES section.

HOW TO HANDLE CALLS FROM A SINGLE PHONE

Function	How to perform
Single call	
Answer or end a call	Tap the answer/end button on your in-car speakerphone to answer or end a call. You can also answer/end calls by using your voice. Just say "Answer" or "Ignore"
Make a call	The call will automatically transfer to your in-car speakerphone*. If not tap the answer/end button
Reject a call*	Double tap the answer/end button to reject the incoming call
Redial last number*	Double tap the answer/end button when the in-car speakerphone is on and not in use

*Phone dependent

Mute	Tap the voice button to mute an active call. A sound will indicate that the in-car speakerphone is on mute every 10 seconds until the in-car speakerphone is un-muted
Un-mute	To un-mute an active call, tap the voice button again
Adjust volume	Tap volume + or volume- to adjust the volume level. A short sound will indicate when the volume level is at its highest or lowest limit
Hold active call	Press the answer/end button
Transfer an active call from your phone to the in-car speakerphone	Tap the answer/end button or press it for a long time
Three way call (Another incoming call)

Three way call (The other call is on hold)	
Release active/activate held	Tap the answer/end button
Hold active and activate held call	Press the answer/end button
Release held call	Double tap the answer/end button

HOW TO HANDLE CALLS FROM TWO MOBILE PHONES

Function	How to perform
Calls on two phones (One active call – the other phone is ringing)	
Release active/accept incoming call	Tap the answer/end button
Reject incoming call	Double tap the answer/end button
Hold active/accept incoming	Press the answer/end button

Active calls on the two connected phones – other phone's call is on hold

Function	How to perform
Release active/activate held	Tap the answer/end button
Hold active and activate held call	Press the answer/end button
Release held call	Double tap the answer/end button

TROUBLESHOOTING & FAQ

I press the voice button and nothing happens

Not all mobile phones support voice control function. Please, verify if you mobile phone has a voice control mode by checking its user manual.

I press the voice button and but cannot check battery status of Jabra JOURNEY

Some in-car speakerphones have a voice control system driven by the speakerphone itself. Each mobile phone has its own voice control set up. If your phone supports the voice control function, its user manual should list the words that you can use to control

your mobile phone. Some phones when turned into the voice control mode suggest what words you can use to control your phone. The words are usually written on the mobile phone screen.

I hear crackling noises

Bluetooth is a radio technology, which means it is sensitive to objects between the in-car speakerphone and the connected device. It is designed for the in-car speakerphone and the connected device to be used within 33 feet (10 meters) of each other, with no major objects in the way (walls, etc.).

I cannot hear anything in my in-car speakerphone

- Increase the volume in the in-car speakerphone.
- Ensure that the in-car speakerphone is paired to a device that is playing.
- Make sure your phone is connected to the in-car speakerphone by tapping the answer/end button.

I am having pairing problems

You may have deleted the in-car speakerphone pairing connection in your mobile phone. Follow the pairing instructions.

I want to reset the pairing list in my in-car speakerphone

The in-car speakerphone registers a list of up to 7 mobile phones. To remove the list:

1) Put your Jabra JOURNEY in the pairing mode by long press on the answer/end button;
2) The press Volume down button while holding your finger on the answer/end button.

A beep and a purple flash of the status light indicate the list was removed from the in-car speakerphone memory. The next time you power on, the in-car speakerphone will go into pairing mode as the first time you powered your new Jabra JOURNEY on.

Will the Jabra JOURNEY work with other Bluetooth equipment?

The Jabra JOURNEY is designed to work with Bluetooth mobile phones. It can also work with other Bluetooth devices that are compliant with Bluetooth version 1.1 or higher and support a headset, hands-free and/or advance audio distribution profile.

I cannot use Reject call, call on hold, Redial or voice dialing

These features are dependent on the ability of your phone to support a hands-free profile. Even if the hands free profile is implemented reject call, call hold and voice dialing are optional features which are not supported by all devices. Please consult your device manual for details.

Please note that some features can only be operated from the primary device e.g. voice dial using Jabra JOURNEY with 2 mobile phones.

TAKING CARE OF YOUR JABRA JOURNEY

- Always store the Jabra JOURNEY with the power off and safely protected.
- Avoid storage at extreme temperatures (above 45°C/113°F – including direct sunlight – or below -10°C/14°F). This can shorten battery life and may affect operation. High temperatures may also degrade performance.
- Do not expose the Jabra JOURNEY to rain or other liquids.

GLOSSARY

1. **Bluetooth** is a radio technology that connects devices, such as mobile phones and headsets, without wires or cords over a short distance approx. 33 feet (10 meters). Get more information at www.bluetooth.com.
2. **Bluetooth profiles** are the different ways that Bluetooth devices communicate with other devices. Bluetooth phones support the headset profile, the hands-free profile or both. In order to support a certain profile, a phone manufacturer must implement certain mandatory features within the phone's software.
3. **Pairing** creates a unique and encrypted link between two Bluetooth devices and lets them communicate with each other. Bluetooth devices will not work if the devices have not been paired.

4. **Passkey or PIN** is a code that you enter on your mobile phone to pair it with your Jabra JOURNEY. This makes your phone and the Jabra JOURNEY recognize each other and automatically work together. The passkey for all Jabra products is 0000.

5. **Standby mode** is when the Jabra JOURNEY is passively waiting for a call. When you 'end' a call on your mobile phone, the in-car speakerphone goes into standby mode.

Dispose of the product according to local standards and regulations.
