1.2 IMPORTANT SAFETY INFORMATION

	WARNING: These installation instructions are for use by a licensed electrician only. To avoid electrical shock, do not perform any servicing other than what is contained in this User Guide unless you are a licensed electrician and qualified to do so.
	Read, understand, and follow all instructions in the User Guide including all warnings, cautions, and precautions before installing and using the product

The following precautions should be taken when using this product:

- Read all instructions before installing and operating this product.
- Jetlun recommends that a licensed electrician install the Panel Meter.
- Jetlun recommends that the Panel Meter be installed either in an electrical enclosure (panel or junction box) or in a limited access electrical room.
- Verify that circuit voltages and currents are within the proper range for the Panel Meter.
- Jetlun recommends using only current transformers (CTs) from Jetlun, which has been calibrated to work with the Panel Meter. Using off-the-shelf UL CTs from third parties will affect the accuracy of the measurements.
- Before turning on power to the Panel Meter, ensure that all the wires are securely installed by tugging on each wire.
- Equipment must be disconnected from the HAZARDOUS LIVE voltage before access.
- Do not place more than one line voltage wire in a screw terminal.
- Do not install the Panel Meter where it may be exposed to temperatures below □30°C or above 55°C, excessive moisture, dust, salt spray, or other contamination.
- Do not drill mounting holes using the Panel Meter as a guide; the drill chuck can damage the Panel Meter housing or screw terminals.
- If the Panel Meter is installed incorrectly, the safety protections may be impaired.

2.0 PRODUCT OVERVIEW

Thank you for choosing the Jetlun Panel Meter (RD77724). The Panel Meter is an integrated Zigbee enabled metering device that provides phase-based energy measurement. Removing the guesswork, the Jetlun Panel Meter provides a detailed breakdown of your entire home's energy usage in real-time helping you understand where your energy is being used and if you have renewable energy sources, the Panel Meter calculates how much energy you are adding back to the grid in real-time so you know where your money is going. It measures energy usage from within existing electric service panels avoiding the costly installation of subpanels and associated wiring. The Panel Meter is designed for use in demand side management (DSM), sub-metering, and energy monitoring applications.

The Jetlun Panel Meter works with 0.333 VAC solid-core and split-core current transformers (CTs). Split-core CTs offer greater ease of installation, because they can be installed without disconnecting the circuit being measured. Solid-core CTs are more compact, generally more accurate, and less expensive, but installation requires that the measured circuit be disconnected. Although you can source and use off-the-shelf CTs with the Jetlun Panel Meter, it is highly recommended to use CTs from Jetlun because those CTs have been calibrated and tested to work with the Jetlun Panel Meter. Using third-party CTs will affect the accuracy of the measurements.

3.0 INSTALLING THE PANEL METER

3.1 Install Hardware

Follow these quick steps to install your Panel Meter. There are two ways to install your panel meter.

1. The power supply for panel meter is direct to transformer box (Figure 6)
2. The power supply for panel meter is plugged to socket. (Figure 7)

Figure 6: Installation picture

Figure 7: Install Picture

- ➲ STEP 1: Mount the Panel Meter.
- ➲ STEP 2: Turn off power before installing the CTs or making voltage connections.
- ➲ STEP 3: Mount the CTs around the line wires being measured. Take care to orient the CTs facing the source.

	<p>NOTE: Split-core CTs can be opened for installation by pulling the removable section straight away from the rest of the CT; this may require a strong pull. The removable section only fits one way, so match up the steel core pieces when closing the CT. If the CT seems to jam and will not close, the steel core pieces are probably not aligned correctly; DO NOT FORCE together. Instead, reposition or rock the removable portion until the CT closes without excessive force.</p>
---	--

- ➲ STEP 4: Plug the other end of the CT to a port on the Left Side of the Panel Meter.
- ➲ STEP 5: Repeat steps 3 through 4 for another line you want to measure.

	<p>NOTE: If you want measure one line, you can leave port 1 or port 2 alone.</p>
---	---

- ➲ STEP 6: Plug the Panel Meter Power Supply into a power outlet.

	<p>NOTE: You may choose to cut off the plug to the power supply and wire the power supply directly into an empty breaker.</p>
	<p>NOTE: To minimize current measurement noise, avoid extending the CT wires, especially in noisy environments. If it is necessary to extend the wires, use stranded twisted pair wire 18 AWG, rated for 600V.</p>
	<p>NOTE: You may shorten the CT wires to the desired length.</p>

- ➲ STEP 7: Check the LED indicators on the Panel Meter.

3.2 Join/Leave the Zigbee network

3.2.1 To Join the Network

- ➲ STEP 1: Press and hold the Zigbee network button for 3-5 seconds. The Zigbee Link LED should be blinking.
- ➲ STEP 2: The panel meter will join the network within 1 minute. The Zigbee link LED should be solid green.

	<p>NOTE: If the panel mter fails to join the ZigBee network, please enter the Gateway utility web interface and check the following items:</p> <ol style="list-style-type: none"> 1. The Zigbee network is formed. 2. The Zigbee network allows the Zigbee device to join the network. 3. Retry Step 1
---	--

3.2.2 To Leave the network

- ➲ **STEP 1:** Press and hold the Zigbee network button for 7-10 seconds and then release the button. The Link LED is blinking for about 3 seconds and then it is off.
- ➲ **STEP 2:** The panel meter has left the network successfully when the Link LED is off.

3.3 Additional Instructions

For additional information on how to add the Panel Meter to the JIM network and monitor the energy usage collected on the Panel Meter, please refer to the Jetlun Gateway RD75606 User Guide.
