

## User Guide      DT-210/230 Thermal Receipt Printer

## **Important Safety Instructions (English)**

Read the following instructions thoroughly before starting up your printer.

- Never carry out maintenance or repair work yourself. Always contact a qualified service technician.
- Keep this Operator's Manual in a place which is easily accessible at all times.
- Place the printer on a solid and even base so that it cannot fall.
- Never place the printer in the vicinity of inflammable gas or explosive substances.
- Ensure the printer is connected to a socket with the correct mains voltage.
- Always disconnect the printer from the mains before opening the device to perform maintenance work or remedy errors.
- Do not expose the printer to high temperatures, direct sunlight or dust.
- Keep all liquids away from the printer.
- Protect the printer from shock, impact and vibration.
- Make sure that both of the printer and the computer are switched off before connecting the data cable.
- The print head will become very hot during printing; avoid contact with the print head after printing has finished.
- Do not perform any operation or action in any way other than those provided in this manual. When in doubt, contact your dealer or your customer support.

## Wichtige Sicherheitshinweise (German)

Lesen Sie bitte diese Sicherheitshinweise durch, bevor sie den Drucker in Betrieb nehmen.

- Führen Sie Wartungsarbeiten und Reparaturen keinesfalls selbst aus, sondern verständigen Sie immer einen qualifizierten Servicetechniker.
- Bewahren Sie diese Dokumentation an einem jederzeit zugänglichen Ort auf.
- Den Drucker auf stabilem und ebenem Untergrund so aufstellen, dass er nicht zu Boden fallen kann.
- Stellen Sie den Drucker keinesfalls in der Nähe von leicht entzündlichen Gasen oder explosiven Stoffen auf.
- Den Drucker nur an eine Steckdose mit der richtigen Spannung anschließen.
- Wenn Sie den Drucker vom Netz trennen wollen, den Drucker ausschalten und immer den Netzstecker an der Steckdose ziehen.
- Den Drucker weder hohen Temperaturen noch direktem Sonnenlicht und Staub aussetzen.
- Keine Flüssigkeiten mit dem Drucker in Berührung bringen.
- Den Drucker keinen Erschütterungen, Stoßen oder Vibrationen aussetzen.
- Sicherstellen, dass der Drucker und der Computer ausgeschaltet sind, bevor das Datenkabel angeschlossen wird.
- Der Druckkopf wird während des Druckens heiß. Vor dem Berühren deshalb einige Zeit abkühlen lassen.
- Weichen Sie bei der Bedienung des Druckers nicht von den Anweisungen in der Dokumentation ab. Bei Unklarheiten wenden Sie sich bitte an Ihren Händler oder Ihren Kundendienst.

## Consignes importantes de sécurité (French)

Lire attentivement les instructions suivantes avant de mettre l'imprimante en service.

- Ne jamais effectuer soi-même les travaux d'entretien et de réparations. Contacter toujours un dépanneur qualifié.
- Placer l'imprimante sur un support stable de façon à ce qu'elle ne puisse pas tomber.
- Ne jamais placer l'imprimante à proximité de sources de gaz aisément inflammables ou de substances explosives.
- Ne connecter l'imprimante à une prise que lorsque la tension est correcte.
- Pour déconnecter l'imprimante de l'alimentation principale, mettre l'imprimante hors tension et toujours débrancher le connecteur secteur de la prise murale.
- Ne pas exposer l'imprimante à des températures élevées, à la lumière directe du soleil ou à la poussière.
- Ne pas mettre l'imprimante en contact avec des liquides.
- Ne pas exposer l'imprimante à des chocs, impacts ou vibrations.
- S'assurer que l'imprimante et l'ordinateur sont hors tension avant de connecter le câble de données.
- La tête d'impression est brûlante pendant l'impression. C'est pourquoi laissez-la refroidir quelques instants avant d'y toucher.
- N'exécutez aucune opération ni action d'une autre manière que celle indiquée dans ce manuel. En cas de doute, veuillez contacter votre distributeur ou service après-vente.

## Indicazioni di sicurezza importanti (Italian)

Prima di mettere in funzione la stampante, leggere attentamente le seguenti indicazioni.

Non eseguire mai da sé gli interventi di manutenzione e riparazione, ma rivolgersi sempre a un tecnico di assistenza qualificato.

- Conservare le presenti istruzioni per l'uso in un luogo sempre accessibile.
- Collocare la stampante su una superficie stabile, per evitare che cada a terra.
- Non collocare la stampante in prossimità di gas facilmente infiammabili o di sostanze esplosive.
- Collegare la stampante a una presa di corrente con tensione adeguata.
- Per scollegare la stampante dalla rete di alimentazione, spegnere la stampante e disinserire sempre il connettore di rete dalla presa.
- Non esporre la stampante ad elevate temperature né alla luce solare diretta e alla polvere.
- Evitare il contatto della stampante con liquidi.
- Non esporre la stampante a colpi, scosse o vibrazioni.
- Verificare che la stampante e il computer siano spenti prima di collegare il cavo di trasmissione dati.
- Durante la stampa, la testina si surriscalda notevolmente. Prima di toccarla, se necessario opportuno quindi lasciarla raffreddare qualche istante.
- Non eseguire alcuna operazione o azione se non nella maniera descritta nel presente manuale. In caso di dubbio, contattare il rivenditore o dalla società incaricata dell'assistenza.

## Instrucciones de seguridad importantes (Spanish)

Lea las siguientes instrucciones con esmero antes de poner la impresora en servicio.

Nunca lleve a cabo trabajos de mantenimiento o reparación Ud. mismo, sino consulte a un técnico de servicio calificado.

- Guarde las presentes instrucciones de servicio en un lugar de fácil acceso en cualquier momento.
- Ponga la impresora sobre un base estable de manera que no pueda caer al suelo.
- Nunca coloque la impresora en la vecindad de gases de fácil inflamabilidad o substancias explosivas.
- Asegure conectar la impresora sólo a un enchufe con un voltaje correcto.
- Cuando quiera desconectar la impresora de la red, apague la impresora y siempre tire la clavija de alimentación del enchufe.
- No exponga la impresora a temperaturas altas, a la luz solar directa y al polvo.
- No ponga la impresora en contacto con fluidos.
- Nunca exponga la impresora a sacudidas, choques o vibraciones.
- Asegúrese de que la impresora y el ordenador estén apagados antes de conectar el cable de datos.
- La cabeza de impresión se pone muy caliente durante la impresión. Por lo tanto, deje enfriarlo algún tiempo antes de tocarla.
- No permita que se realice cualquier operación o acción de una forma diferente a lo que se señala en el manual. En caso de duda, póngase en contacto con su comerciante o con su servicio post-venta.

## **Правила по технике безопасности. (Russian)**

Прочтайте, пожалуйста, инструкцию по технике безопасности перед включением в работу принтера.

- Не выполняйте технические работы и ремонт техники самостоятельно, но сообщайте о неисправностях квалифицированным сервисным техникам.
- Данная инструкция должна быть всегда доступна каждому пользователю.
- Установите принтер на ровном и стабильном месте так, чтобы он не смог упасть на пол.
- Ни в коем случае не ставьте принтер вблизи легко воспламеняющихся газов и взрывчатых веществ.
- Включайте принтер в розетку только с соответствующим напряжением.
- Если Вы хотите отключить принтер от напряжения, сначала выключите принтер сам и затем выньте штекер из розетки.
- Берегите принтер от нагревания, от попадания на него прямых солнечных лучей и пыли.
- Не допускайте попадания жидкости на принтер.
- Нельзя подвергать принтер тряске, ударам и вибрации.
- Убедитесь, что принтер и компьютер выключены, только после этого соедините принтер с компьютером.
- Печатающая головка нагревается во время работы принтера. Поэтому подождите какое-то время, прежде чем дотронуться до нее.
- Пользуйтесь принтером так, как это написано в документации. Если у Вас возникают неясности, обращайтесь с вопросами к Вашим продавцам или в сервисный центр.

## Instruções Importantes sobre Segurança (Portuguese)

Leia as instruções de segurança antes de usar a impressora.

- Consulte sempre um técnico qualificado para executar uma reparação .
- Coloque a impressora sobre uma base sólida e nivelada, para que ela não sofra quedas.
- Jamais instale a impressora nas proximidades de lugares onde haja gás inflamável ou substâncias explosivas.
- Assegure-se de conectar a impressora à tomada elétrica com a voltagem apropriada.
- Quando desligar a impressora da rede, desligue sempre a impressora e retire o cabo da tomada.
- Não exponha a impressora a temperaturas altas ou luz solar direta.
- Não aproxime substâncias líquidas da impressora.
- Proteja a impressora de choques, impactos e vibrações.
- Desligue a impressora e o computador antes de conectar o cabo da rede.
- A cabeça da impressora pode ficar muito quente . Portanto, espere algum tempo antes de tocá-la.
- Não faça nenhuma operação ou ação além das recomendadas neste manual. Em caso de dúvida, contate seu revendedor ou companhia de serviço.

## Önemli Güvenlik Talimatları (Turkish)

Lütfen, yazıcıyı işletime geçirmeden önce bu güvenlik talimatlarını bütünüyle dikkatle okuyun.

- Bakım ve tamir çalışmalarını kesinlikle ve hiçbir surette kendi başınıza yapmayın; her zaman kalifiye bir uzman servis-teknisyenine haber verin.
- Yazıcıyı, üzerinden yere düşmesi mümkün olmayacak sabit ve düz bir zemine yerleştirin.
- Yazıcıyı kesinlikle ve hiçbir surette kolayca yanabilecek gaz veya patlayıcı maddeler içeren nesnelerin yakınına koymayın.
- Yazıcı akım kablosunu sadece doğru gerilime sahip bir prize takın.
- Yazıcıyı şebeke ağından ayırmak istediğinizde, yazıcıyı kapatın ve ağ-fışını her zaman prizden çıkartın.
- Yazıcıyı ne yüksek ısılı ne de doğrudan güneş ışığına ve toza maruz kalan mekânlarda bulundurun.
- Yazıcı hiçbir sıvı maddeyle temasta olmamalıdır.
- Yazıcı hiçbir sarsıntıya, darbeye veya titreşime maruz kalmamalıdır.
- Veri kablosu bağlanmadan önce hem yazıcının hem de bilgisayarın kapalı olduklarından emin olmalısınız.
- Yazıcının başı basma esnasında yüksek ısına ulaşıyor. Bu yüzden lütfen dokunmadan önce kısa süre soğumasını bekleyin.
- Yazıcının işletimi ve kullanımında bu dokümantasyondaki talimatların hiç dışına çıkmayın. Sorunlu görünen hususlarda lütfen imâlatçınıza veya müşteri hizmetleri servisinize başvurun.

# 1 Printer installation guide

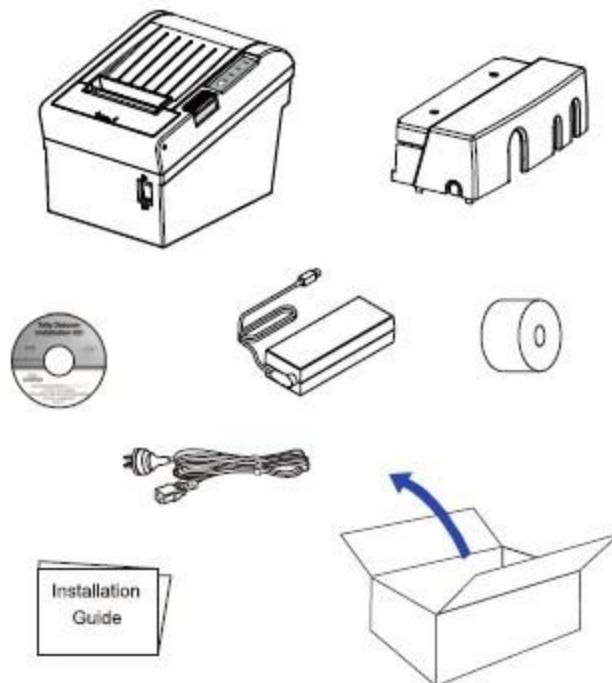

## 1.1 Unpacking the printer

Open the packaging, lift the printer out of the cardboard box and remove the remaining packaging material. Check the printer for any visible transport damage and missing items. If you find any transport damage or any accessories are missing, please contact your dealer for assistance.

Note:

Please keep the packaging material for future transportation.

The shipping list varies with different customized order requirements.

## **1.2 Placing the printer**

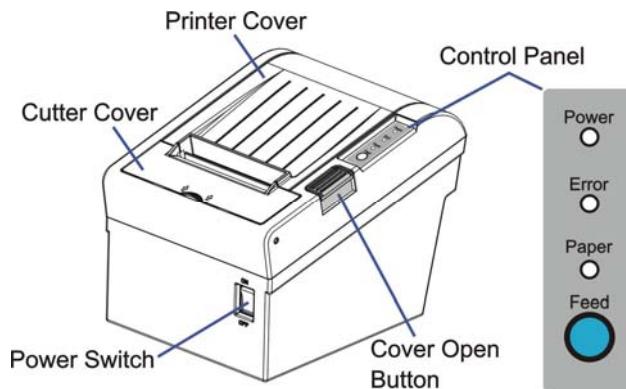

Place the printer on a solid, flat, stable surface; ensuring that the printer is positioned in such a way that it cannot move, and that there is easy access to the control panel and paper input devices. Also ensure that there is enough space for sufficient ventilation and for the printed output.

When selecting the printer location, observe the following additional instructions:

- Never place the printer near to any flammable gas or explosive substances.
- Do not expose the printer to direct sunlight. If you cannot avoid placing the printer near a window, protect it from the sunlight with a curtain.
- When connecting a computer to the printer, make sure the maximum recommended cable length is not exceeded.
- Ensure sufficient distance between the printer and any heating devices or radiators.
- Avoid exposing the printer to extreme temperature or air humidity fluctuations. Avoid exposure to dusty environments.
- It is recommended the printer is installed in a position which reduces noise exposure to the work place during printing.

### 1.3 Printer components

Printer components and functions are shown as below:

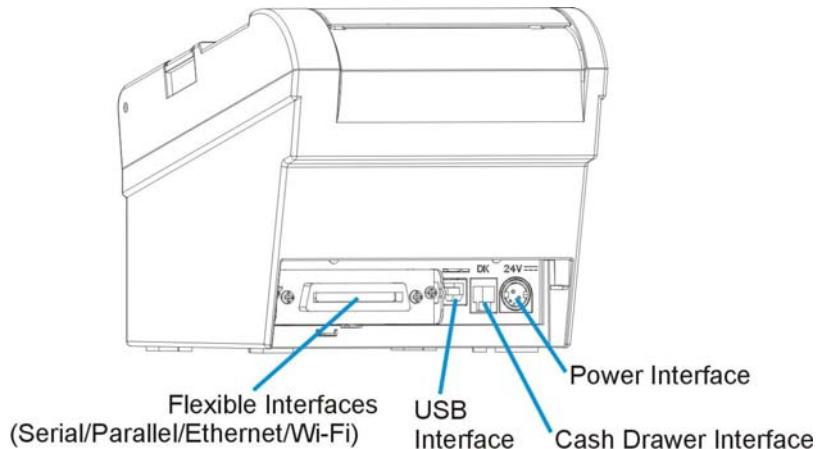

Component	Function
Printer Cover	Open the cover when loading or reloading roll paper.
Control panel	Shows printer status for printer function setup.
Power switch	Powers printer ON or OFF.
Cutter Cover	Protect the auto-cutter and open it when paper jam occurs.
Cover Open Button	Open the Printer Cover.

## 1.4 Connecting the interface cable

The USB, Cash Drawer, Serial/Parallel/Ethernet/Wi-Fi interface ports are located at the rear of the printer. Choose the interface which suits your system.

Note:

Make sure the printer and the computer are switched off before connecting or disconnecting the interface cable to prevent electrical damage to the interface ports.

Component	Function
Power supply Interface	Connects power cord to the printer.
Cash Drawer Interface	Connects Cash Drawer interface cable from the cash drawer.
USB Interface	Connects USB interface cable from the host.
Flexible Interface Board	Connects serial I/F, Parallel I/F, Ethernet I/F or Wi-Fi I/F from the host.

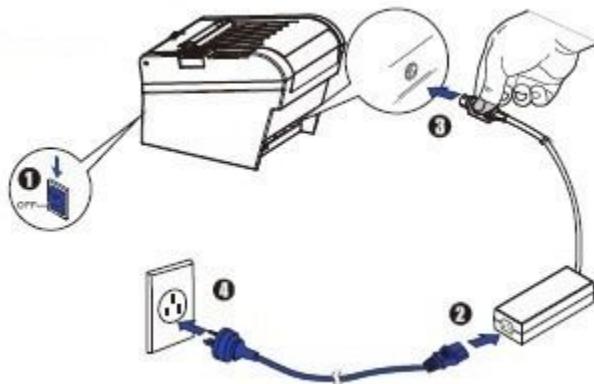

## 1.5 Connecting the mains power

### ■ Checking the printer voltage

Make sure that the device has been set according to your country's power supply voltage. To do this, check the rating plate at the rear of the printer. Contact your dealer if the setting is incorrect.

**⚠ Never switch on the printer if the voltage setting is incorrect; this may result in electrical damage to the printer.**

1. Make sure the printer and the computer are powered off<sup>①</sup>.
2. Connect the power cord to the power adapter<sup>②</sup>, and connect the power adapter to the power supply interface at the rear of the printer<sup>③</sup>. Ensure the power cord is securely connected. Connect the power cord plug to a mains socket on the wall<sup>④</sup>.

### ■ Power on and power off

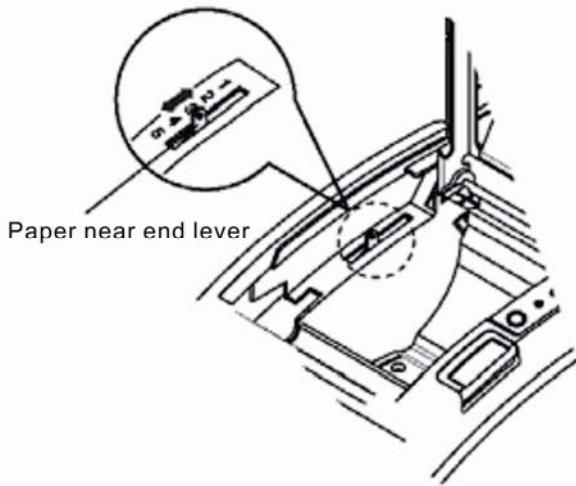

1. Press the power switch to the "I" position to turn on the printer.  
Upon power-on, the Power LED indicator light up.
2. Press the power switch to the "O" position to turn off the printer.

Note:

1. After switching off the printer, wait at least 5 seconds before powering on again. Otherwise, it may cause damage to the printer.
2. Please disconnect the power cord if the printer will not be used for a long time.

## 1.6 Adjusting the near end sensor

Open the printer cover you will see a black lever inside as shown below.

The printer has a paper near-end sensor that provides notice that the paper roll is nearly exhausted. When the paper is running low, the paper LED is lit red.

If you find that there is not enough paper remaining on the roll when the near-end sensor is triggered, you can change the near-end sensor setting.

### Adjustments:

The paper near end lever is continuously adjustable from "1" to "6".

1. Minimum paper remains until paper end. (Paper roll diameter about 26mm)
2. Paper remains until paper end. (Paper roll diameter about 27mm)
3. Paper remains until paper end. (Paper roll diameter about 28mm)
4. Paper remains until paper end. (Paper roll diameter about 30mm)
5. Paper remains until paper end. (Paper roll diameter about 32mm)
6. Maximum paper remains until paper end. (Paper roll diameter about 33mm)

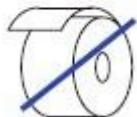

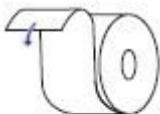

## 1.7 Installing Roll Paper

### 1.7.1 Installing 80mm Roll Paper

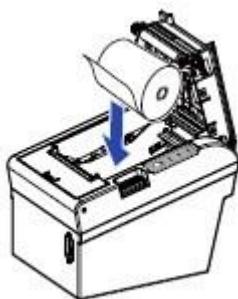

1. Press the cover open button to open the cover.

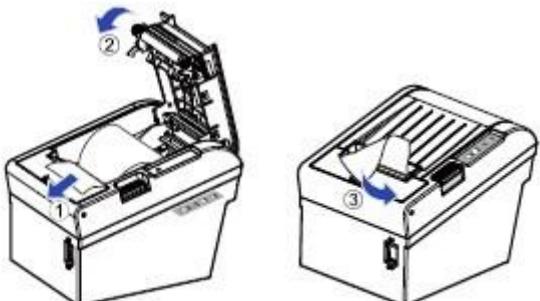

2. The correct installing direction of the roll paper.

3. Remove any used roll paper core, and load the new roll paper.

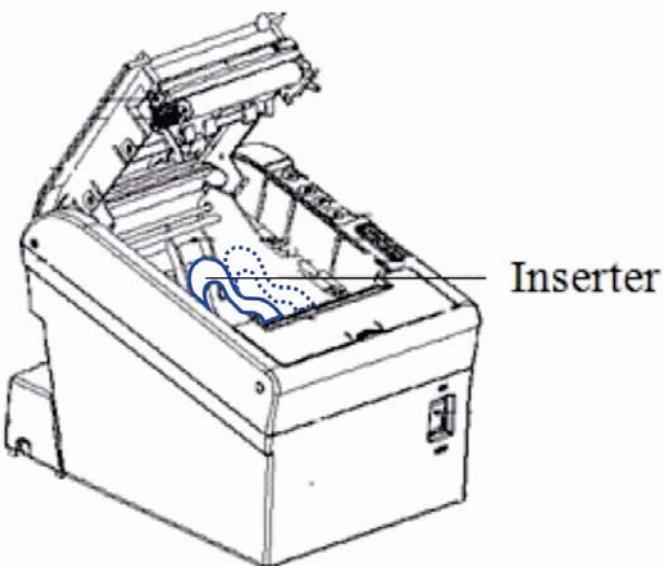

4. Pull out some paper over cutter cover as shown on the left below<sup>①</sup>, then close the cover<sup>②</sup> and tear off the paper as shown on the right below<sup>③</sup>.

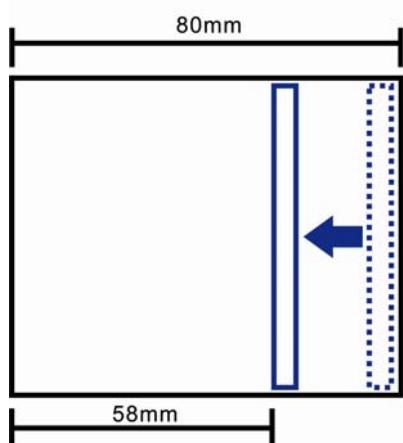

### 1.7.2 Installing 58mm Roll Paper

If you want to install 58mm roll paper, open the printer cover, you will see an inserter on the right side of the paper warehouse. Move this inserter to the specified position on the middle of the warehouse. Then you can install the 58 roll paper as 80mm roll paper installed above.

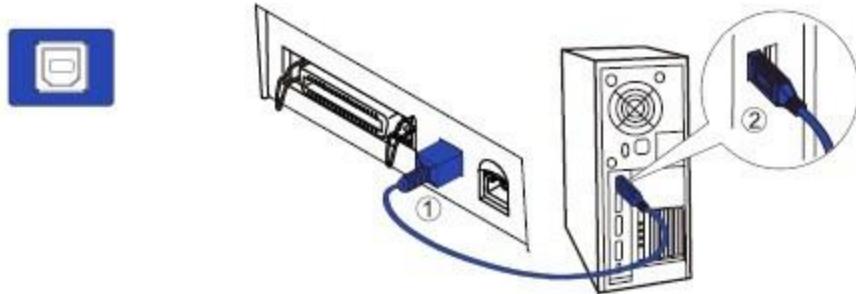

Paper Tray

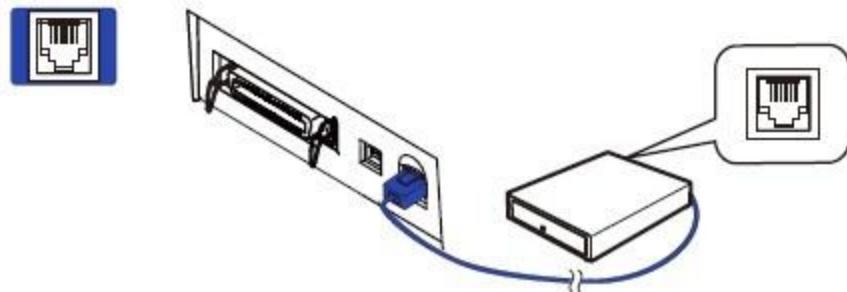

## 1.8 Installing the interfaces

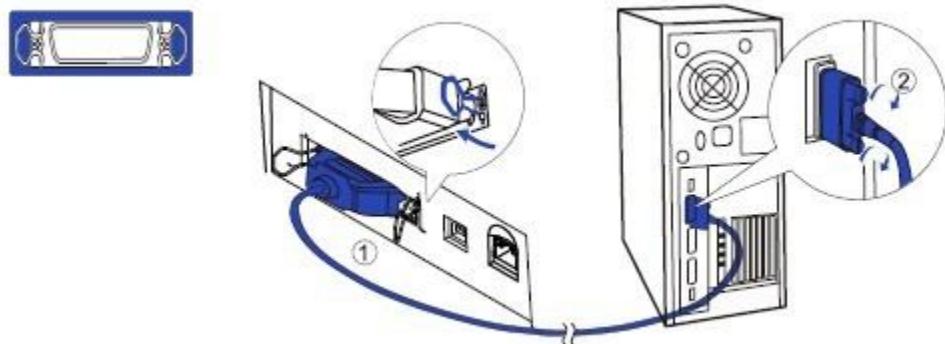

### ■ USB interface

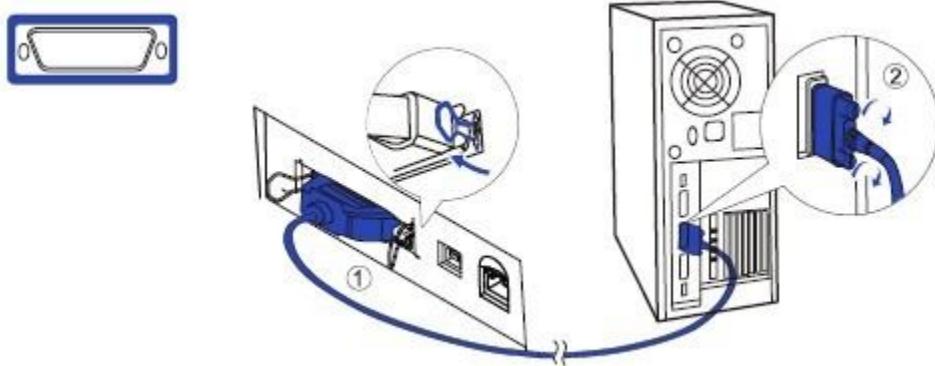

### ■ Cash Drawer interface

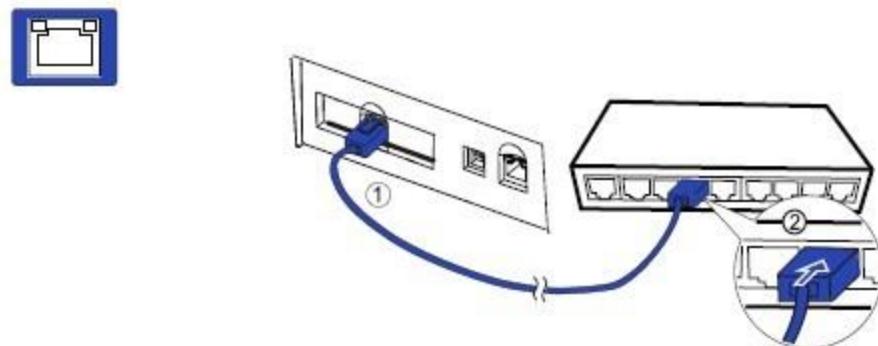

### ■ Parallel interface

■ Serial interface

■ Ethernet interface

## 1.9 Installing the standard option and optional kits

### ■ Interface Cover (Standard Option)

Adjust the relative positions between interface cover and printer as shown below, and push the interface cover as arrow shown below.

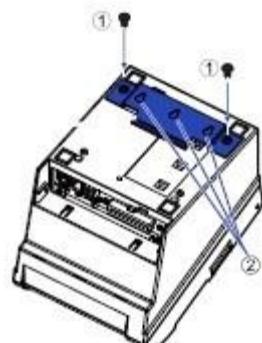

### ■ Splash Cover (Optional Kit)

Slip the fixed hooks on both sides of splash cover into the relative installing hole position on the printer, and close the splash cover.

### ■ Hanging Plate (Optional Kit)

1. Lock the hanging plate on the lower case of the printer with screws<sup>①</sup>;
2. Align the positioning holes of the hanging plate and plug into the fixed screws on the wall<sup>②</sup>.

## **1.10 Installing the printer driver**

Installing the Windows Driver (Compatible with Windows XP/7)

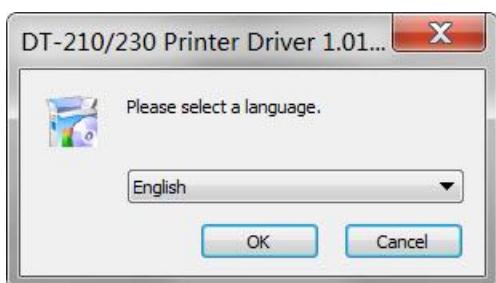

Note:

Power off the printer before running the printer driver setup.

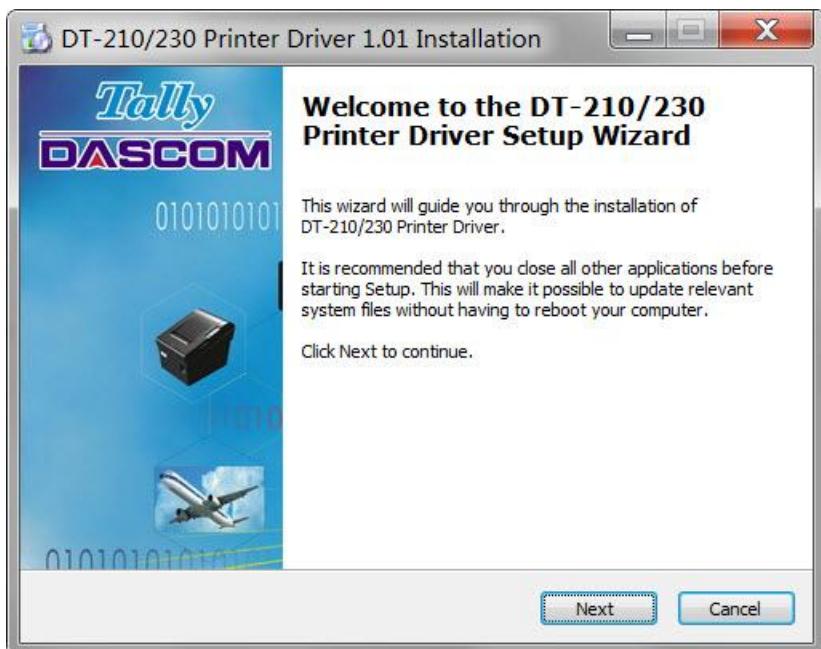

Your printer CD-ROM comes with Windows drivers. Go to the Drivers folder and run the installer “DriverSetup.exe”.

### **Installation guide for USB, serial and parallel driver program**

1. Double click the “DriverSetup”. You will see the screen as below. Choose “English” and then click “OK” to continue.

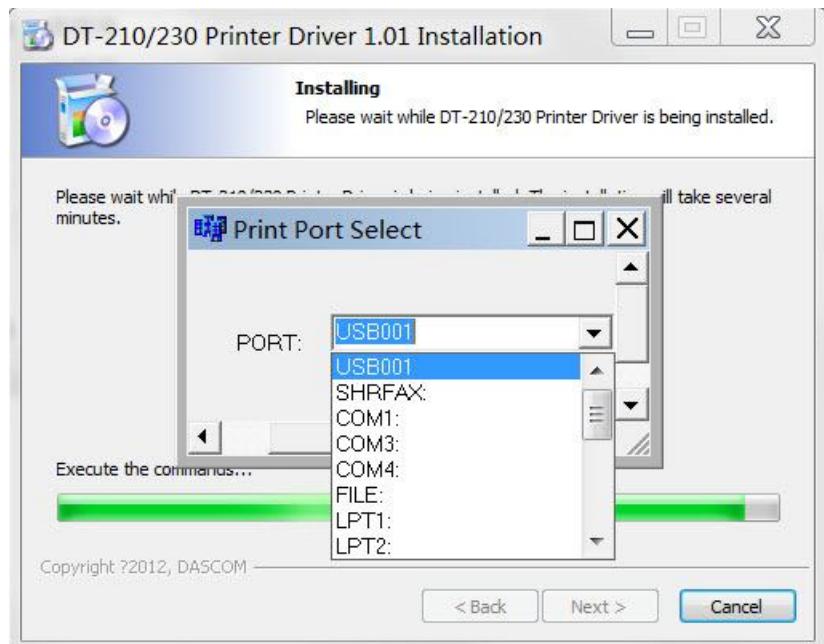

2. You might see the screen as below. Please click “Next” to continue.

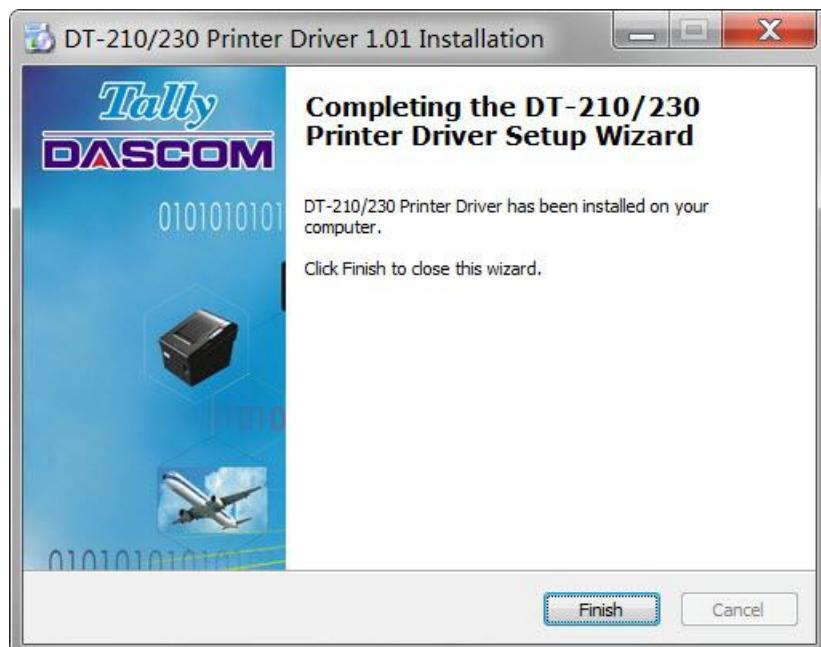

## Tally Dascom DT-210/230

---

3. Choose the desired port to use, after selecting the “Port” option (USB001 for USB port, com1 for serial port and LPT1 for parallel port), click “Next” to continue.

4. Click “Finish” to finish the installation process successfully.

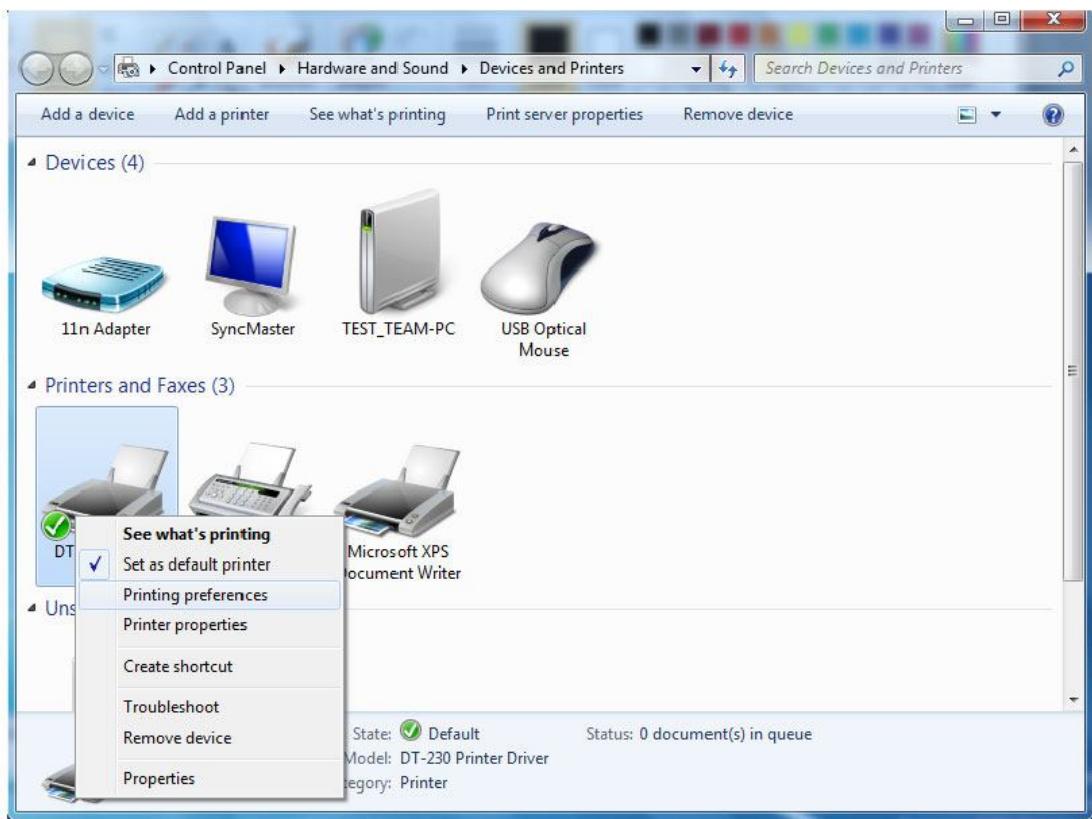

# Tally Dascom DT-210/230

---

## Installation guide for Ethernet and Wi-Fi driver program

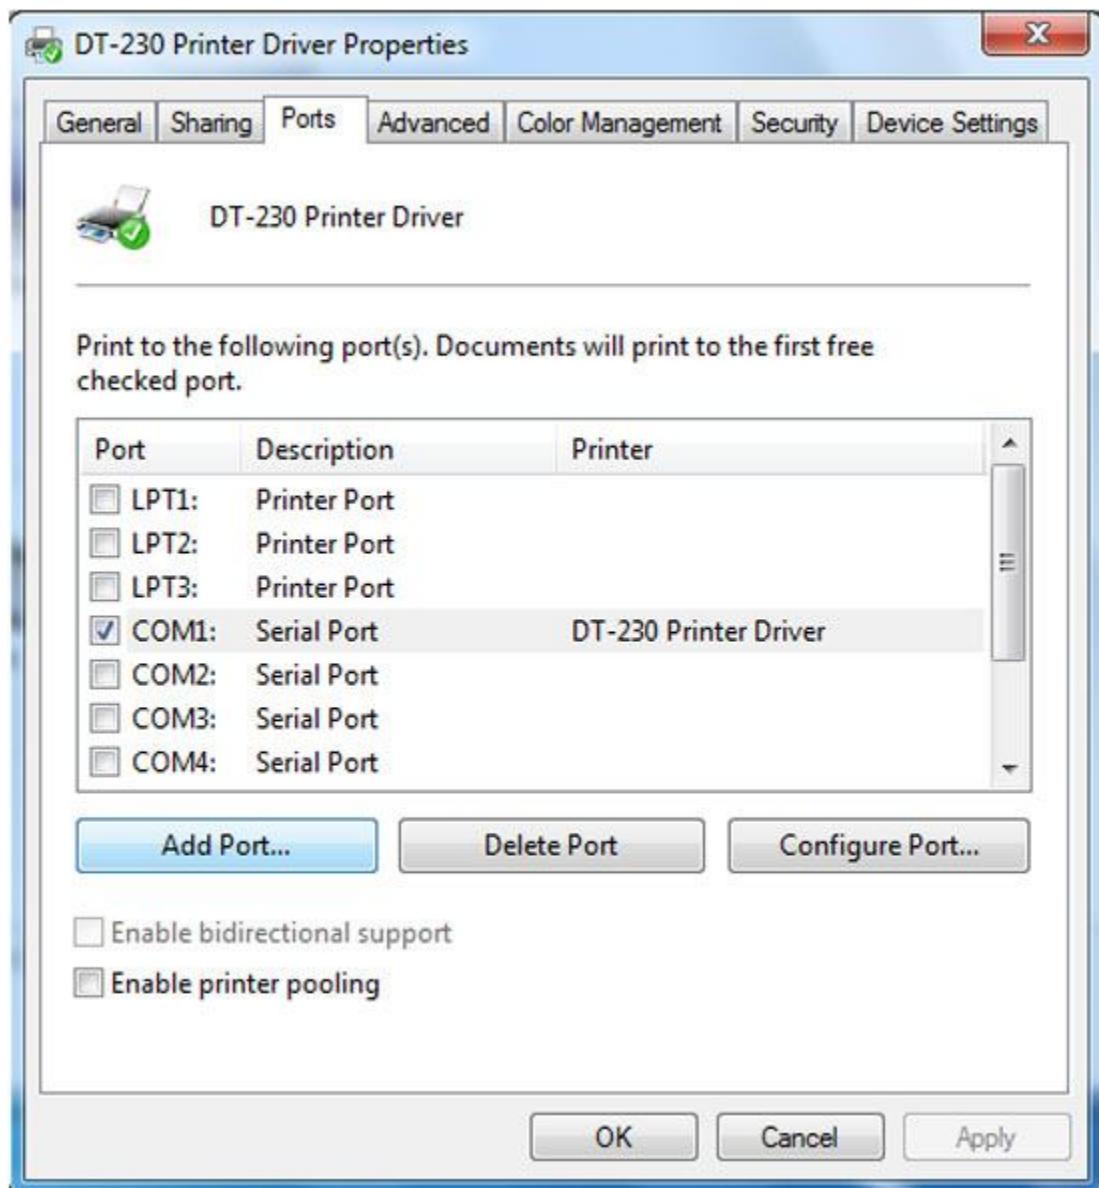

1. Install the printer driver as USB installation.
2. Click "Start" → "Control Panel" → "Hardware and Sound" → "Devices and Printers", right click on the DT-230 Printer Driver, and then click "Printer Properties".

## Tally Dascom DT-210/230

---

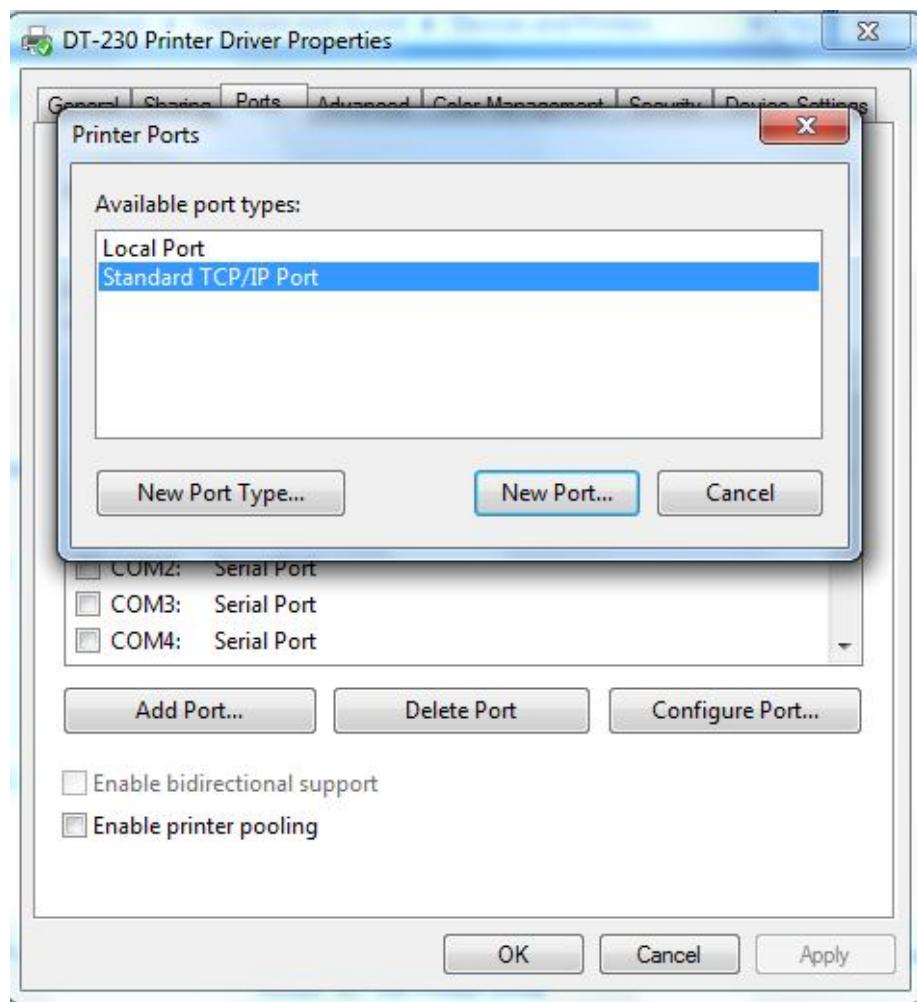

3. Then you will see the screen as below. Click “Ports” → “Add Port”.

## Tally Dascom DT-210/230

---

4. Select "Standard TCP/IP Port", and click "New Port".

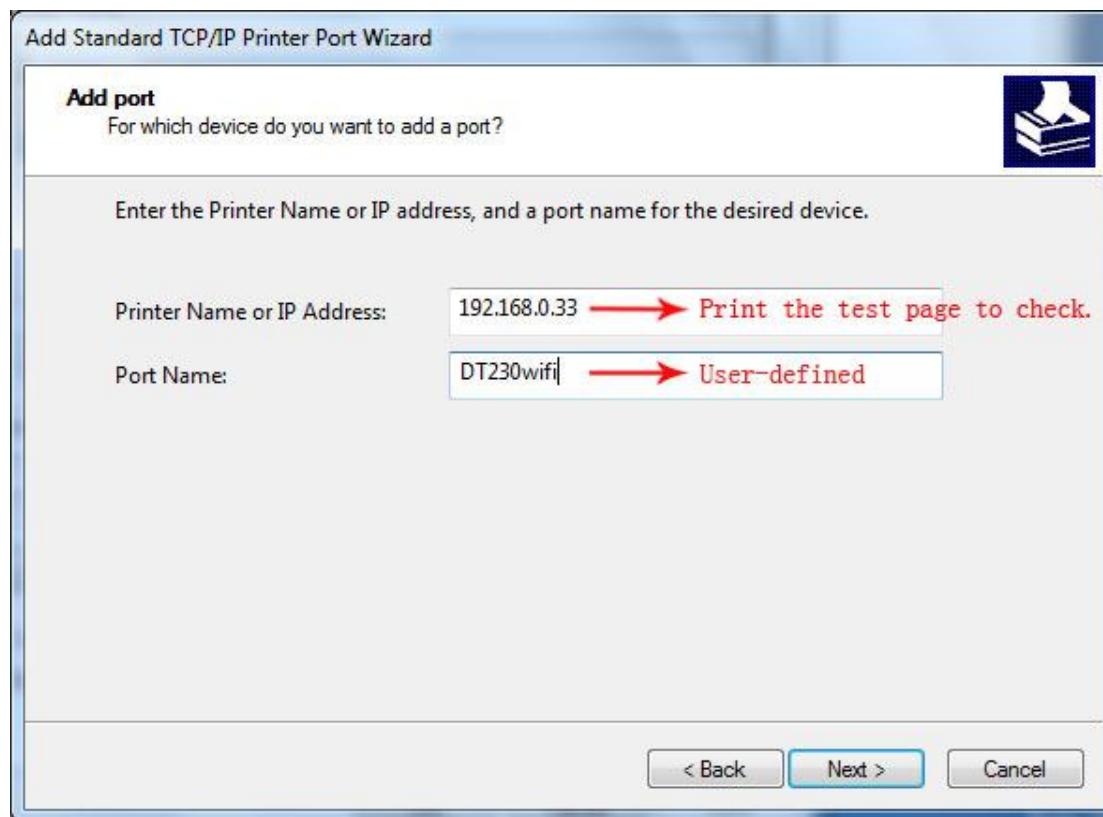

5. You will see the screen as below, click "Next" to continue.

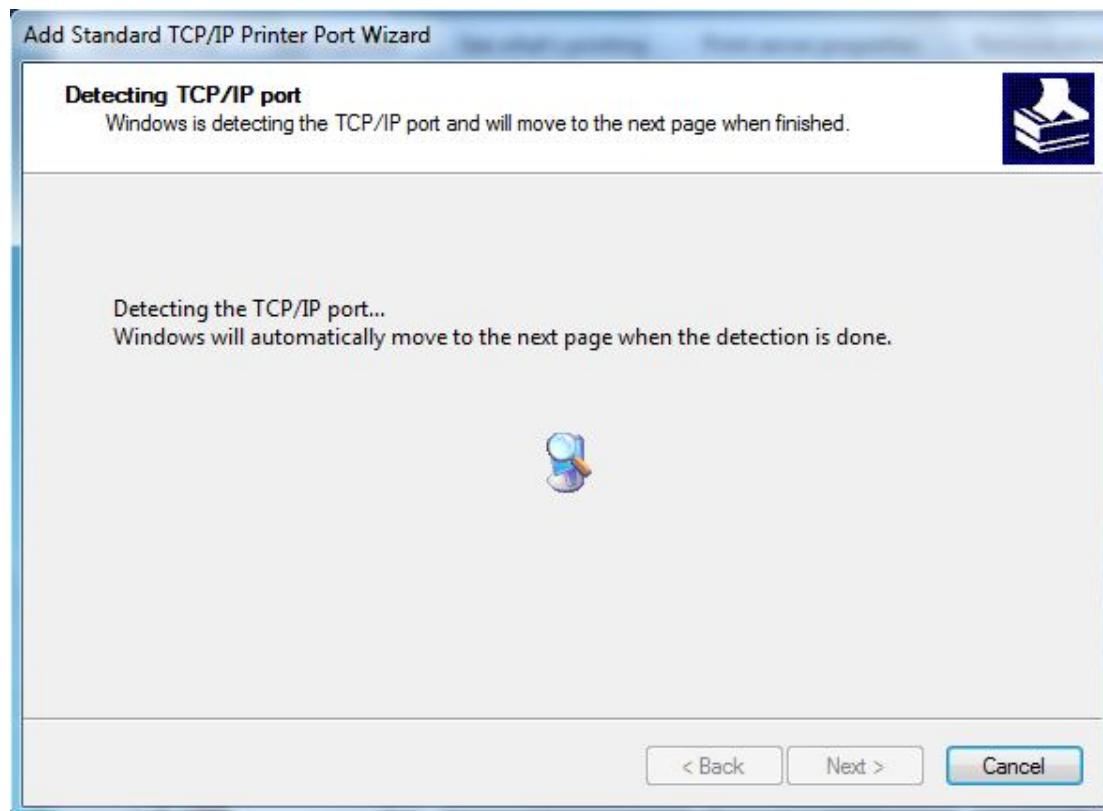

## Tally Dascom DT-210/230

---

6. Complete the “Printer Name or IP Address” and “Port Name”.

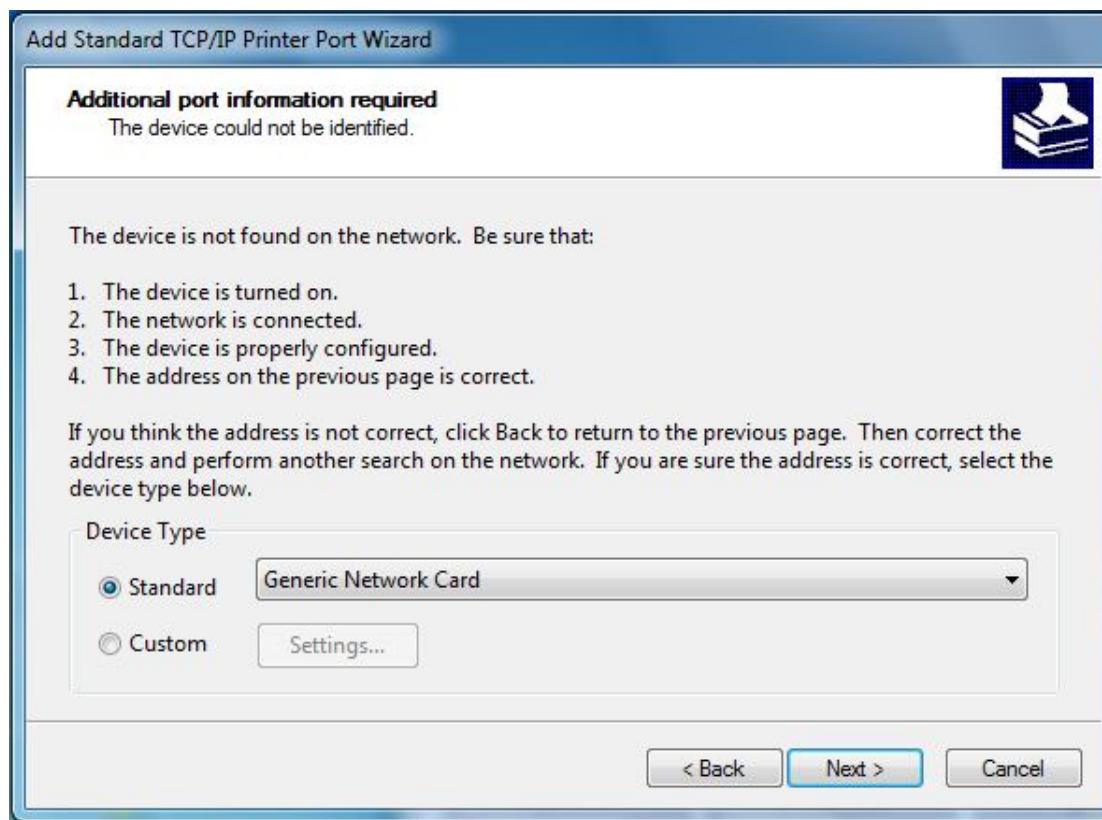

7. Click “Next” to access the screen as below.

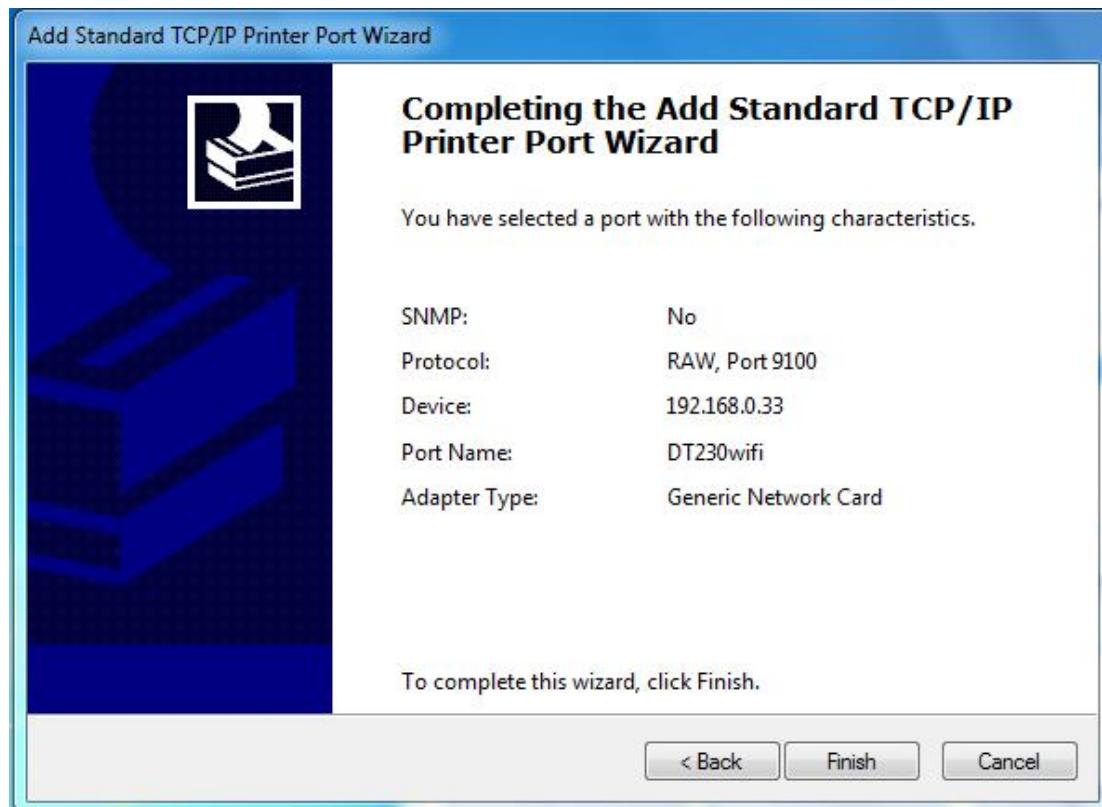

## Tally Dascom DT-210/230

---

8. And then you will see the screen as below, click "Next" to continue.

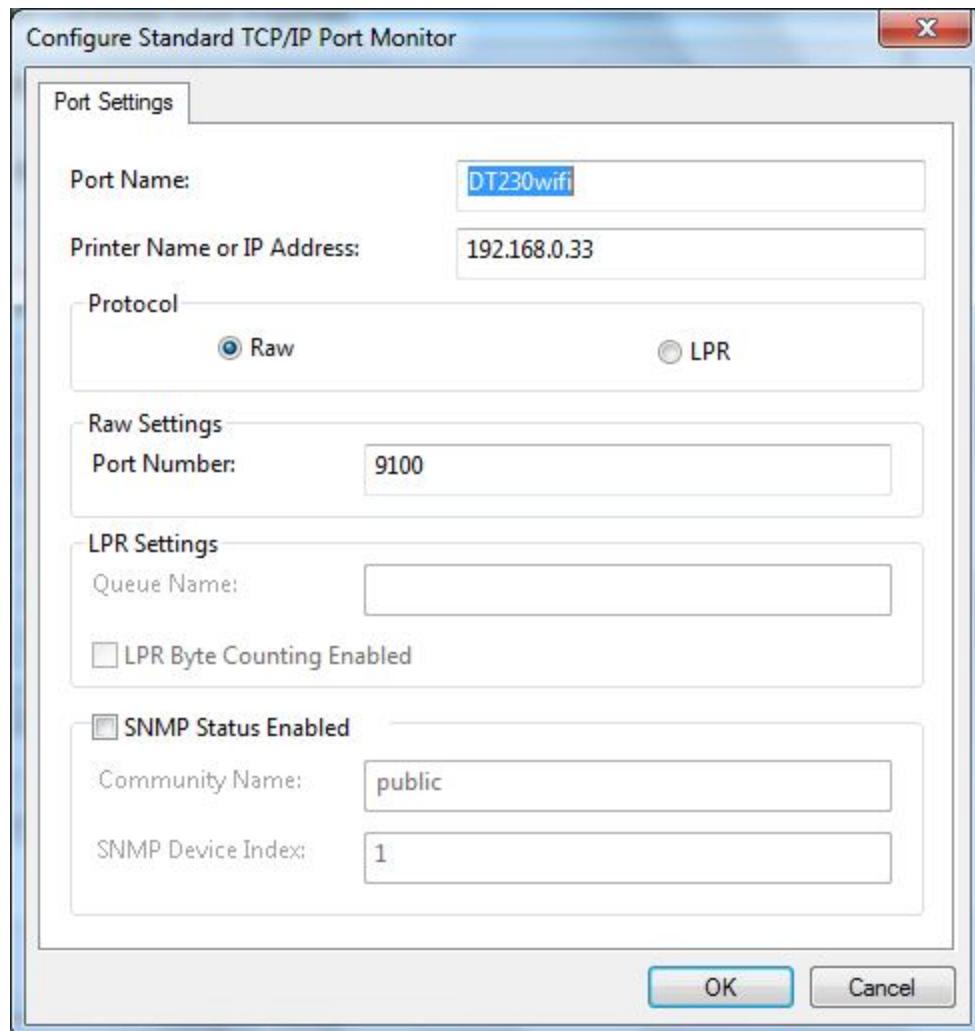

9. Click "Finish" to complete the printer driver installation.

## Tally Dascom DT-210/230

---

10. Click “Start” → “Control Panel” → “Hardware and Sound” → “Devices and Printers”, right click on the DT-230 Printer Driver, and then click “Printer Properties”. Then click “Ports” → “Configure Port”, finish the setup parameter in the screen as below. Click “OK” to finish the setup.

## 2 Control panel operation

### ■ LED indicators and key

#### **Feed key**

Press Feed key to feed paper.

#### **Power LED**

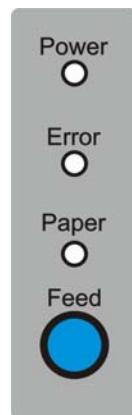

Power LED turns on while printer is powering on.

#### **Error LED**

Error LED turns on means error occurs.

#### **Paper LED**

Paper LED turns on means paper near end or paper end.

### ■ Self-test

Turn off the power after roll paper loaded, hold down the Feed key while printer is powering on, then the self-test page is printed out. "If you want to continue SELF-TEST printing, please press Feed key." would be printed out after the current printer status is printed, also Paper LED would be turned on; Press Feed key to continue the character printing. After a number of lines are printed, the printer indicates the end of the self-test by printing "\*\*\*\* completed \*\*\*".

### ■ Hexadecimal Dumping

Open the Printer Cover, load roll paper and turn the power on while holding down Feed key, and then close the Printer Cover, the printer would run Hexadecimal Dumping printing mode.

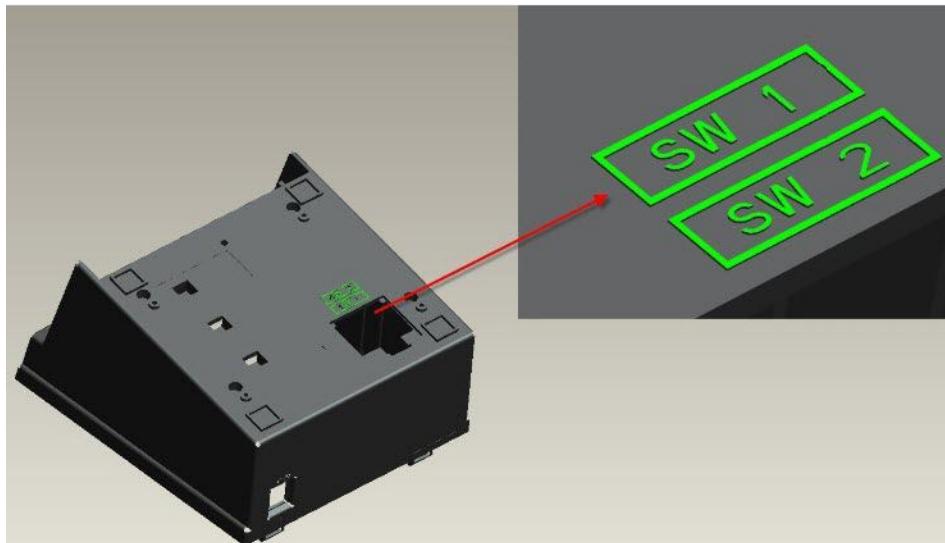

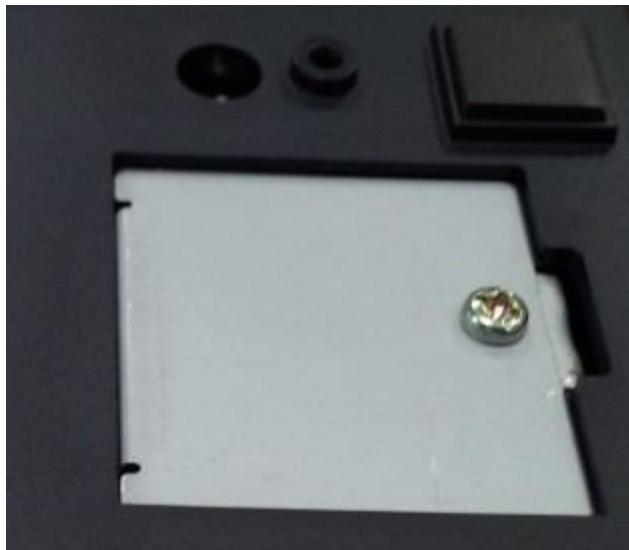

Press Feed key for three times to exit Hexadecimal Dumping printing mode.

### ■ LED indicators

Description	POWER	ERROR	PAPER	BEEPER
<b>Printer Cover is open</b>	On	On	On	Short beep for twice and long beep for once
<b>Roll paper is sufficient</b>	On	Off	Off	No beep
<b>Roll paper end</b>	On	On	On	Short beep for three times
<b>Roll paper near end</b>	On	Off	On	No beep

## 3 Setting DIP Switches

You will see a metal plate on the bottom of the printer. Remove the metal plate with a screwdriver you will find two DIP switches on the main control board as shown below.

DIP Switch 1

DIP Switch 2

There are two DIP switch banks on the main controller board (SW1 and SW2), eight DIP switches for each bank. These DIP switches can be set on/off, using the tip of a tool, such as a small screwdriver.

The printer parameter such as printer density, baud rate, and auto-cutter enable/disable etc. can be set via these two DIP switches as follows.

Note: New DIP switch settings are enabled after the printer is turned on!

## ■ Serial Interface (RS-232C)

- DIP Switches 1

SW	Function	ON	OFF	Default
1-1	Auto Line Feed	Enable	Disable	OFF
1-2	Handshaking	XON/XOFF	DTR/DSR	OFF
1-3	Data Length	7bits	8bits	OFF
1-4	Parity Check	Yes	No	OFF
1-5	Parity Selection	EVEN	ODD	OFF
1-6	Baud Rate Selection			OFF
1-7				ON
1-8	(bps)	Refer to the following table 1		

- DIP Switches 2

SW	Function	ON	OFF	Default
2-1	Reserved	-	-	OFF
2-2	Internal bell control	Internal bell disable	Internal bell enable	OFF
2-3	Auto Cutter	Disable	Enable	OFF
2-4	BUSY Condition	Receive Buffer Full	* Receive Buffer Full	OFF
2-5				OFF
2-6				OFF
2-7	Print Density	Refer to the following table 2		
2-8	Near-End Sensor Status	Disable	Enable	OFF

## ■ Parallel and USB2.0 Interface

- DIP Switches 1

SW	Function	ON	OFF	Default
1-1	Auto Line Feed	Enable	Disable	OFF
1-2				
~	Reserved	-	-	OFF
1-8				

## Tally Dascom DT-210/230

---

- DIP Switches 2

SW	Function	ON	OFF	Default
2-1	Reserved	-	-	OFF
2-2	Internal bell control	Internal bell disable	Internal bell enable	OFF
2-3	Auto Cutter	Disable	Enable	OFF
2-4	BUSY Condition	Receive Buffer Full	* Receive Buffer Full	OFF
2-5				OFF
2-6				OFF
2-7	Print Density	Refer to the following Table 2		
2-8	Near-End Sensor Status	Disable	Enable	OFF

- Table 1 – Baud rate (bps) Selection

Transmission Speed	1-6	1-7	1-8	Default
2400	ON	OFF	OFF	19200
4800	ON	OFF	ON	
9600	OFF	ON	OFF	
19200	OFF	OFF	OFF	
38400	OFF	ON	ON	
57600	OFF	OFF	ON	
115200	ON	ON	ON	

- Table 2 – Print Density Selection

2-5	2-6	2-7	Print Density (Mono color)	Default
ON	ON	Reserved	1(Light)	2
OFF	OFF	Reserved	2	
ON	OFF	Reserved	3	
OFF	ON	Reserved	4(Dark)	

### ■ Auto Cutter Enable / Disable selection

Dip Switch Set 2		
SW 2-3	ON	Auto Cutter Disabled
	OFF	Auto Cutter Enabled
Application		Ignores Auto Cutter error for continuous printing.

## 4 Troubleshooting

Your printer is extremely reliable, but occasionally problems may occur. This chapter provides information on some of the common problems you may encounter and how you may solve them. If you encounter problems that you can not resolve, contact your dealer for assistance.

Read the following instructions before maintenance and avoid operating beyond your capacity, so as to prevent injury to you and damage to the printer.

### 4.1 Troubleshooting

#### ■ LED indicator on the control panel and beeper alarm

Trouble	Potential Problem	Solution
No LEDs on	Incorrect power supply cable connections and power outlet	Check the power supply cable connections and the power outlet and correct them
	The printer does not switch on	Switch on the printer
	PCB damaged	Contact your dealer for assistance
Paper LED always on	Paper near end	The roll paper is near end, the printer can work normally
Error LED always on and beeper alarms	Printer Cover open	Close the Printer Cover
Paper and Error LEDs always on and beeper alarms	Paper end	Reload the roll paper
Error LED blinks and beeper alarms	Thermal Print Head overheated	Turn the printer off and resume when it cools
	Ovvoltage	Print with specified voltage
	Low-voltage	Print with specified voltage

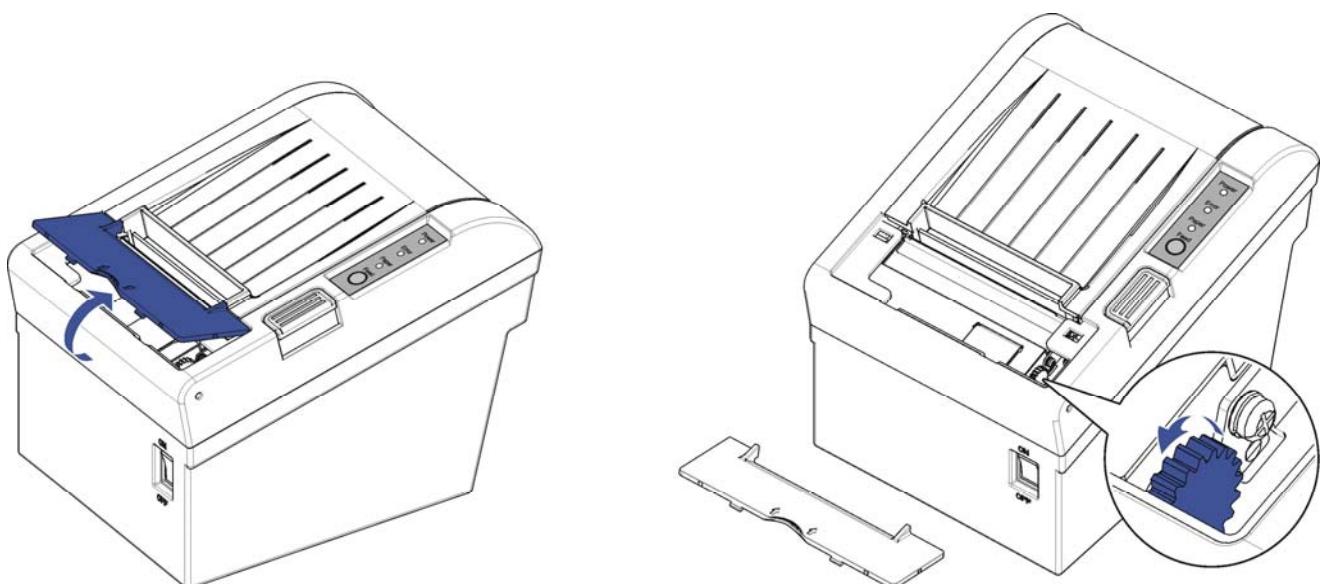

## ■ Troubles occur during printing

Trouble	Potential Problem	Solution
Coloured stripe in the paper	Paper near end	Reinstall the roll paper
Blurred printing or spot	Incorrect roll paper installation	Check if the roll paper is installed
	Unqualified roll paper	Use recommended thermal roll paper
	Dirty thermal head or print rooler	Clean the thermal head or print rooler
	Low Print density	Increase the print density level
Paper Jam	Paper stucked	Open the printer cover, check the paper path and remove jammed paper
Vertical print words missing	Dirty thermal head or print	Clean the thermal head or print rooler
	Thermal head damaged	Contact your dealer for assistance

## 4.2 Removing Jammed Paper

**!** *Do not touch the thermal print head because it becomes very hot after printing.*

- Turn the printer off and press the cover open button.
- Remove jammed paper, reinstall the roll, and close the cover.
- If paper is caught in the cutter and you cannot open the printer cover, open the cutter cover as shown on the left below.
- Turn the knob until the cutter blade returns to the normal position, as shown on the right below. There is a label to assist you.
- Close the cutter cover.
- Open the printer cover and remove the jammed paper.

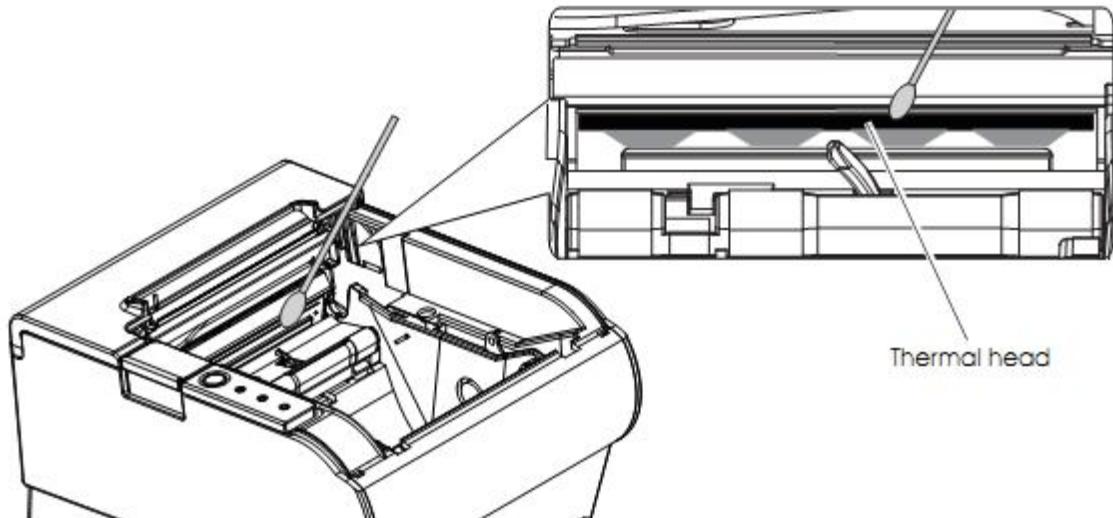

#### 4.3 Cleaning Thermal Print Head

*After printing, the thermal print head becomes very hot. Be careful not to touch it and to let it cool before you clean it. Do not damage the thermal print head by touching it with your fingers or any hard object.*

- Turn off the printer, open the printer cover, and clean the thermal elements of the print head with a cotton swab moistened with an alcohol solvent (ethanol, methanol, or IPA).
- TallyDASCOM recommends cleaning the thermal head periodically (generally every 3 months) to maintain receipt print quality.

#### 4.4 Logo Storage and NVRAM

Support varied density bitmaps and download bitmap printing.

Max. Size of each bitmap is 64K; the total size of bitmaps is 256K.

# 5 Specification

## 5.1 Printer specification

<b>Print Parameter</b>	Print method	Direct thermal line printing
	Resolution	203DPI, 8dots/mm
	Print speed	DT-230: 260mm/s Default; 240-270mm/s adjustable via EDS. DT-210: 220mm/s Default; 210-230mm/s adjustable via EDS.
	Print width	72mm (576dots)
	Interface	USB (On-board) + Cash Drawer (On-board) + one optional interface (daughter board): Serial, Parallel, Ethernet, Wi-Fi or fiscal interface.
	Print density	DT-230: Adjustable from level 1 to level 4 DT-210: Adjustable from level 1 to level 3
<b>Power consumption</b>		51.6W(Normal) 7W(Standby)
<b>Memory</b>	RAM	1Mbytes
	Flash	4Mbytes
<b>Fonts</b>	Characters per line	Font A, Special Font A: 48 cpl Font B, Special Font B: 64 cpl
	User-defined	Support
	Code page	21 code pages (PC437、Katakana、PC850、PC860、PC863、PC865、PC737、ISO8859-7、WPC1252、PC866、PC852、PC858、KU42、TIS11、TIS18、PC720、WPC775、PC855、PC862、PC864、ISO8859-15)(TBD)
<b>Barcodes</b>	1D	UPC-A, UPC-E, EAN8, EAN13, CODE39, ITF, CODEBAR, CODE128, CODE93
	2D	PDR417, QR code
<b>Graphics</b>		Support varied density bitmaps and download bitmap printing (Max. size of each bitmap is 64K; the total size of bitmaps is 256K.)
<b>Detect Function</b>	Sensors	Paper End, Paper Near End, Paper Jam and Cover Open sensors.
<b>Power Supply</b>		External power adapter
	Input	AC 100V-240V 50-60Hz
	Output	DC 24V±5%, 2.1A, A-1009-3P interface
<b>Paper Handle</b>	Paper type	Standard Thermal Paper (The specific thermal roll paper type: Wangzi Paper PD160R is used.)
	Paper width	79.5±0.5mm/57.5±0.5mm
	Paper thickness	0.056~0.1mm (TBD)
	Paper roll diameter	Max. OD φ83mm Min. ID φ13mm
	Paper load	Upward cover open and Easy paper loading
	Paper cut	Manual tear; Auto-cutter (hay cutter type), full cut and partial cut.
<b>Emulation</b>		ESC/POS Compatible command set
<b>Noise</b>		The noise level should be less than 50 dBA at 260mm/s printing speed (to be measured in accordance with ISO 7779).
<b>Physical Spec.</b>	Operating condition	5~45°C/10~95%RH
	Storage condition	-10~50°C/10~95%RH
	Dimensions	147×198×146 (L×W×H mm)

## Tally Dascom DT-210/230

---

	Color	Black
	Weight	Approx. 1.8kg
<b>Optional Kits</b>		splash cover and Hanging plate
<b>Standard Option</b>		Interface cable cover
	TPH lifetime	150km
<b>Reliability</b>	MTBF	360, 000 hours
	Cutter lifetime	2,000,000 cuts
	MCBF	15,000,000 lines
<b>Software Function</b>	Driver program	32bit: Windows (Win 7/Vista/XP/2000) 64bit: Windows (Win 7/Vista/XP/2000)
	Utilities	Support
<b>Certification</b>		CCC,CE,UL,FCC,Energy Star

## 5.2 Interfaces

Power Supply interface, USB interface and cash drawer interface are standard interfaces for the printer. Serial interface, Parallel interface, Ethernet interface and Wi-Fi interface are optional interfaces for the printer.

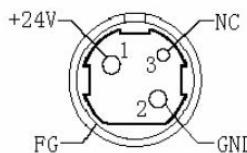

The interface pin assignment is listed below.

### 5.2.1 Power Supply interface

#### Power Supply interface pin assignment

Pin Number	Signal Name
1	+24 V
2	GND
3	N.C
SHELL	F.G.

#### Power Supply connector diagram

#### Power Supply interface type

Printer end - Unetop DC-002 or similar products  
User end - Unetop DP-002 or similar products

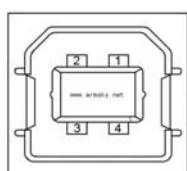

NOTE: Be sure to ground the metal of the interface using the locking screw for the frame ground (FG).

### 5.2.2 USB interface

#### USB interface pin assignment

PIN No.	Description	Classic wire color
1	VBUS	Red
2	D-	White
3	D+	Green
4	GND	Black

#### USB interface connector diagram

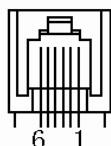

### 5.2.3 Cash Drawer interface

#### Cash Drawer interface pin assignment

Cash drawer interface with DC24V, 1A, RJ-11 6P type socket.

Pin. No.	Description	Direction
1	Frame Ground	-
2	Drawer kick-out drive signal 1	Output
3	Drawer open/close signal	Input
4	+24V	-
5	Drawer kick-out drive signal 2	Output
6	GND	-

#### Cash Drawer interface connector diagram

### 5.2.4 Serial interface

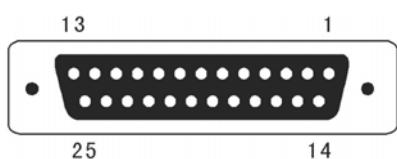

#### Serial interface pin assignment

Serial interface compatible with RS-232 standard, with 25 pin (D hole type) socket.

PIN No.	Description
PIN 1	Frame Ground
PIN 2	TXD
PIN 3	RXD
PIN 4	RTS
PIN 5	Unconnected
PIN 6	DSR
PIN 7	Signal Ground
PIN 8~19	Unconnected
PIN 20	DTR
PIN 21~25	Unconnected

Note: User can gain the setting of interface via printing configuration sample; the default setting of serial interface is as follow, 384000 bps (baud rates), 8 bit (data bit), 1 bit (stop bit), no parity, support RTS/CTS handshaking protocol.

#### Serial interface connector diagram

### 5.2.5 Parallel interface

#### Parallel interface pin assignment

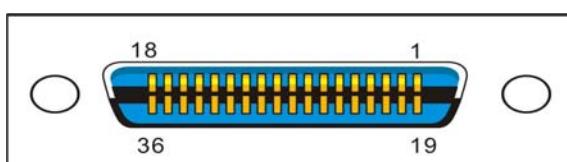

Parallel interface with 36 pin CENTRONICS socket.

Pin No.	Signal From	Description
1	H	STB Signal; Data latch pulse, latch the data to the printer at the rising edge of the negative pulse.
2	H	Data 0 (The lowest bit)
3	H	Data 1
4	H	Data 2
5	H	Data 3
6	H	Data 4
7	H	Data 5
8	H	Data 6
9	H	Data 7 (The highest bit)
10	P	ACK Signal; Printer response signal, indicates that the printer has received the last byte of data; A negative pulse of about 1us.
11	P	Busy Signal; The printer is busy; High level indicates that the printer can't receive data.
12	P	PE Signal; Paper end signal; High level indicates that the printer is paper end.
13	—	Unconnected
14	—	Unconnected
15	—	Unconnected
16	—	Logic Ground
17	—	Frame Ground, separated from logic ground.
18	—	Unconnected
19~30	—	Logic Ground
31	—	Unconnected
32	P	Printer error signal, low level indicates that error occurs in the printer; The error signal will output along with paper end signal.
33	—	Logic Ground
34~35	—	Unconnected
36	—	Unconnected

Note:

H indicates that signal comes from Host computer; P indicates that signal comes from Printer.

#### Parallel interface connector diagram

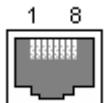

### 5.2.6 Ethernet interface

#### Ethernet interface pin assignment

Pin. No.	Name	Description
1	TX+	Tranceive Data+
2	TX-	Tranceive Data-
3	RX+	Receive Data+
4	n/c	Not connected
5	n/c	Not connected
6	RX-	Receive Data-
7	n/c	Not connected
8	n/c	Not connected

#### Ethernet interface connector diagram

### 5.2.7 Wi-Fi interface

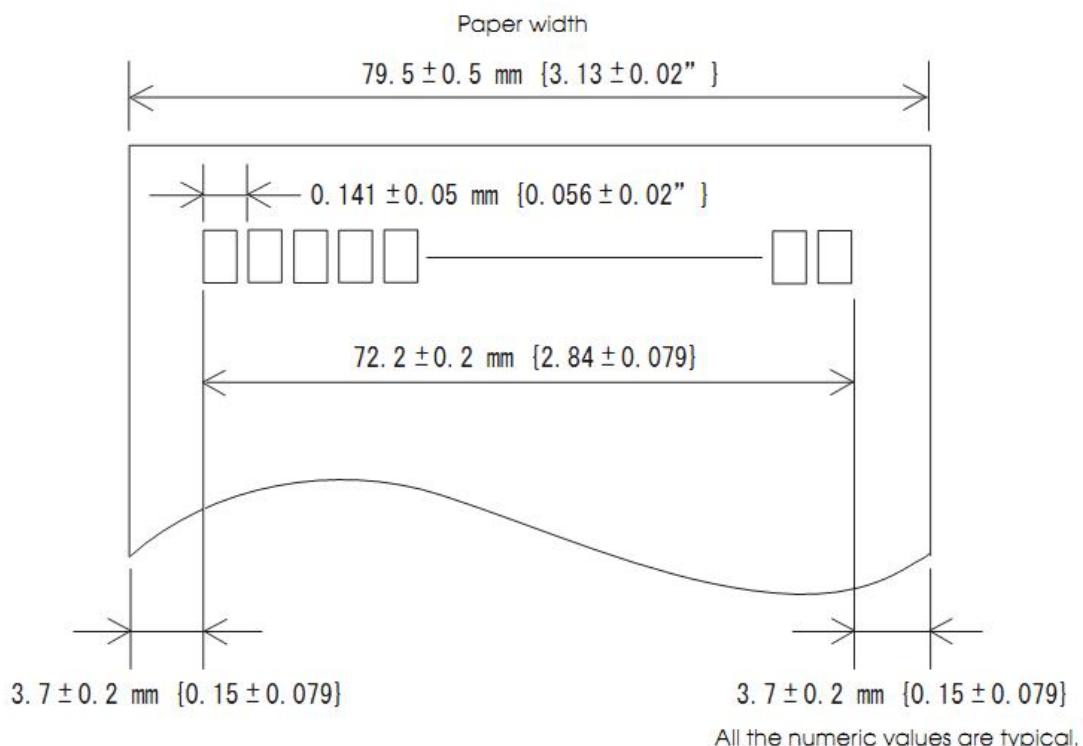

Wi-Fi interface accords with 2.4 GHz, IEEE Std. 802.11b™ standard.

### 5.3 Paper specification

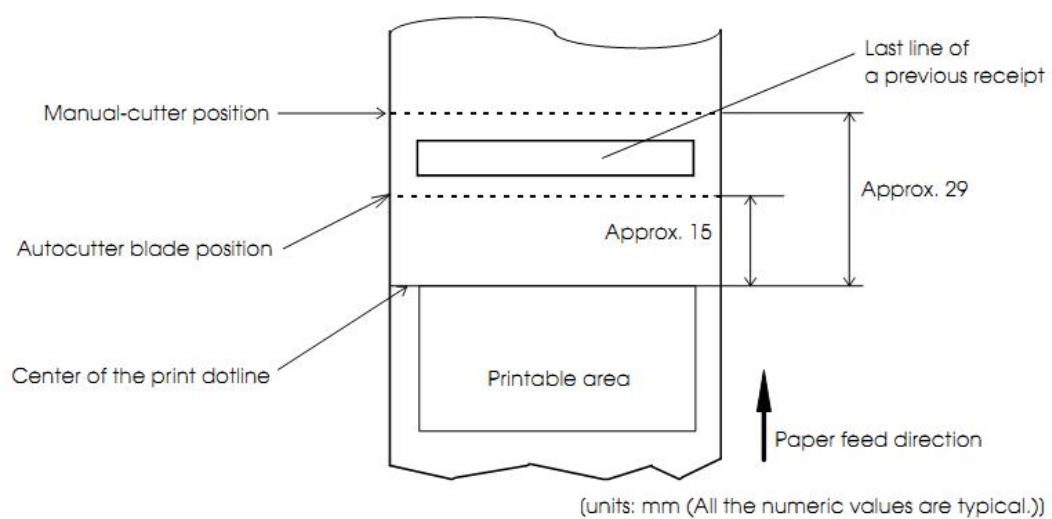

Paper type	Specified thermal paper
Form	Roll paper
Size	Roll paper diameter 83 mm {3.27"} maximum Min. core diameter 13mm Take-up roll paper width $80 + 0.5/-1.0$ mm Paper width $79.5 \pm 0.5$ mm
CAUTION	
<ul style="list-style-type: none"> <li>• Paper must not be pasted to the roll paper spool.</li> <li>• The remaining amount of the roll paper when a roll paper near-end is detected differs depending on the spool type.</li> </ul>	

#### Printable Area

The printable area of a paper with width of  $79.5 \pm 0.5$  mm { $3.13 \pm 0.02$ "} is  $72.2 \pm 0.2$  mm { $2.84 \pm 0.008$ "} (576 dots) and the space on the right and left sides are approximately  $3.7 \pm 0.2$  mm { $0.15 \pm 0.079$ "}.

## 7 Printing Control Command Sets

- Be compatible with EPSON TM-T88IV command sets;
- Support NV image and page mode printing.

### List of Commands

Command	Name
<b>HT</b>	Horizontal tab
<b>LF</b>	Print and line feed
<b>FF</b>	Print and return to standard mode (in page mode)
<b>CR</b>	Print and carriage return
<b>CAN</b>	Cancel print data in page mode
<b>DLE EOT</b>	Transmit real-time status
<b>DLE ENQ</b>	Send real-time request to printer
<b>DLE DC4</b>	Generate pulse in real-time ( <i>fn</i> = 1) Execute power-off sequence ( <i>fn</i> = 2) Clear buffer(s) ( <i>fn</i> = 8)
<b>ESC FF</b>	Print data in page mode
<b>ESC SP</b>	Set right-side character spacing
<b>ESC !</b>	Select print mode(s)
<b>ESC \$</b>	Set absolute print position
<b>ESC %</b>	Select/cancel user-defined character set
<b>ESC &amp;</b>	Define user-defined characters
<b>ESC *</b>	Select bit-image mode
<b>ESC –</b>	Turn underline mode on/off
<b>ESC 2</b>	Select default line spacing
<b>ESC 3</b>	Set line spacing
<b>ESC =</b>	Select peripheral device
<b>ESC ?</b>	Cancel user-defined characters
<b>ESC @</b>	Initialize printer
<b>ESC D</b>	Set horizontal tab positions
<b>ESC E</b>	Turn emphasized mode on/off
<b>ESC G</b>	Turn double-strike mode on/off
<b>ESC J</b>	Print and feed paper
<b>ESC L</b>	Select page mode
<b>ESC M</b>	Select character font
<b>ESC R</b>	Select an international character set
<b>ESC S</b>	Select standard mode
<b>ESC T</b>	Select print direction in page mode
<b>ESC V</b>	Turn 90° clockwise rotation mode on/off
<b>ESC W</b>	Set print area in page mode
<b>ESC \</b>	Set relative print position

Command	Name
<b>ESC a</b>	Select justification
<b>ESC c 3</b>	Select paper sensor(s) to output paper-end signals
<b>ESC c 4</b>	Select paper sensor(s) to stop printing
<b>ESC c 5</b>	Enable/disable panel buttons
<b>ESC d</b>	Print and feed <i>n</i> lines
<b>ESC p</b>	Generate pulse
<b>ESC t</b>	Select character code table
<b>ESC {</b>	Turn upside-down print mode on/off
<b>FS g 1</b>	Write to NV user memory
<b>FS g 2</b>	Read from NV user memory
<b>GS !</b>	Select character size
<b>GS \$</b>	Set absolute vertical print position in page mode
<b>GS ( A</b>	Execute test print
<b>GS ( D</b>	Enable/disable real-time command
<b>GS ( E</b>	<p>Set user setup commands</p> <p>&lt;Function 1&gt; Change into the user setting mode.      &lt;Function 2&gt; End the user setting mode session.      &lt;Function 5&gt; Set the customized setting values.      &lt;Function 6&gt; Transmit the customized setting values.      &lt;Function 11&gt; Set the configuration item for the serial interface.      &lt;Function 12&gt; Transmit the configuration item for the serial interface.</p>
<b>GS ( H</b>	<p>Request transmission of response or status</p> <p>&lt;Function 48&gt; Set the process ID response.</p>
<b>GS ( K</b>	<p>Select print control method(s)</p> <p>&lt;Function 50&gt; Select the print speed.</p>
<b>GS ( L / GS 8 L</b>	<p>Set graphics data</p> <p>&lt;Function 48&gt; Transmit the NV graphics memory capacity.      &lt;Function 50&gt; Print the graphics data in the print buffer.      &lt;Function 51&gt; Transmit the remaining capacity of the NV graphics memory.      &lt;Function 64&gt; Transmit the key code list for defined NV graphics.      &lt;Function 65&gt; Delete all NV graphics data.      &lt;Function 66&gt; Delete the specified NV graphics data.      &lt;Function 67&gt; Define the NV graphics data (raster format).      &lt;Function 69&gt; Print the specified NV graphics data.      &lt;Function 112&gt; Store the graphics data in the print buffer (raster format).</p>

Command	Name
<b>GS ( k</b>	Set up and print symbol  <Function 065> PDF417: Set the number of columns in the data region. <Function 066> PDF417: Set the number of rows. <Function 067> PDF417: Set the width of the module. <Function 068> PDF417: Set the row height. <Function 069> PDF417: Set the error correction level. <Function 070> PDF417: Select the options. <Function 080> PDF417: Store the data in the symbol storage area. <Function 081> PDF417: Print the symbol data in the symbol storage area. <Function 082> PDF417: Transmit the size information of the symbol data in the symbol storage area. <Function 167> QR Code: Set the size of module. <Function 169> QR Code: Select the error correction level. <Function 180> QR Code: Store the data in the symbol storage area. <Function 181> QR Code: Print the symbol data in the symbol storage area. <Function 182> QR Code: Transmit the size information of the symbol data in the symbol storage area.
<b>GS *</b>	Define downloaded bit image
<b>GS /</b>	Print downloaded bit image
<b>GS :</b>	Start/end macro definition
<b>GS B</b>	Turn white/black reverse print mode on/off
<b>GS H</b>	Select print position of HRI characters
<b>GS I</b>	Transmit printer ID
<b>GS L</b>	Set left margin
<b>GS P</b>	Set horizontal and vertical motion units
<b>GS V</b>	Select cut mode and cut paper
<b>GS W</b>	Set print area width
<b>GS \</b>	Set relative vertical print position in page mode
<b>GS ^</b>	Execute macro
<b>GS a</b>	Enable/disable Automatic Status Back (ASB)
<b>GS f</b>	Select font for HRI characters
<b>GS g 0</b>	Initialize maintenance counter
<b>GS g 2</b>	Transmit maintenance counter
<b>GS h</b>	Set bar code height
<b>GS k</b>	Print bar code
<b>GS r</b>	Transmit status
<b>GS w</b>	Set bar code width
<b>FS p</b>	Print NV bit image
<b>FS q</b>	Define NV bit image
<b>GS v 0</b>	Print raster bit image

The commands listed below in the first column are defined as "obsolete commands" in the ESC/POS command system.

This printer supports both upward-compatible commands and obsolete commands. However, the upward-compatible commands are recommended to use.

Obsolete command	Upward-compatible command
<b>ESC i</b>	Partial cut (one point left uncut)
<b>ESC m</b>	Partial cut (three points left uncut)
<b>ESC u</b>	Transmit peripheral device status
<b>ESC v</b>	Transmit paper sensor status
<b>FS p</b>	Print NV bit image
<b>FS q</b>	Define NV bit image
<b>GS v 0</b>	Print raster bit image
	<b>GS V</b>
	<b>GS V</b>
	<b>GS r</b>
	<b>GS r</b>
	<b>GS ( L &lt;Function 69&gt;</b>
	<b>GS ( L &lt;Function 67&gt;</b>
	<b>GS ( L &lt;Function 112 + 50&gt;</b>

NOTE: "Obsolete commands" are commands that are supported by legacy models; however it is recommended to replace them with upward-compatible commands, because they will not be supported in the future products.

## **FCC STATEMENT**

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 6 This device may not cause harmful interference.
- 7 This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orientate or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
