

KE2-EM35

Edge Manager

Q.5.56 - March 2018

Hardware:

- EM-35 Router
- Micro USB Power Cable

Restart/Factory Reset:

- Press & hold for **3 seconds**, then release to **Restart** the KE2-EM35.
- Press & hold for **10 seconds** to **Reset to Factory Defaults**.

Specifications:

CPU	650 MHz
Memory Storage	16MB Nor + 128MB Nand Dual Flash
Frequency	2.4 GHz
Transmission Rate	144 Mbps
Max Tx Power	18 dBm
Protocol	802.11 b/g/n
WAN/LAN	10/100
Power Input	5V / 1A
Power Consumption	<2W
Dimension	3.15 x 2.5 x 1.5 Inches/80 x 64 x 25 mm
Working Temperature	32°F - 122°F / 0°C - 50°C

Connect:

1 Plug in the power cable & the Internet cable.

- When powered up, your KE2-EM35 will broadcast a WiFi signal with the SSID: **KE2EDGE-xxxxxx**
- Plug the **Internet cable** (data only) into **WAN**.

2 Connect via WiFi. - or -

- The default WiFi password is printed on the bottom of the KE2-EM35

WiFi: **KE2EDGE-xxxxxx**

- Search the SSID and connect to it.

WiFi PW: ●●●●●●

2 Connect via LAN.

- Plug the cable connecting your computer into LAN.

3 Setting up the KE2-EM35.

- Visit <http://192.168.50.1> in your browser, to set up your KE2-EM35.

Internet Connection:

- After you have plugged in your KE2-EM35 to the WAN, you will see the main web interface.

• DHCP/Static

The default protocol is DHCP. If your network needs a static setting, you can change it to Static later, via the System Console.

Access the Local Dashboard:

- To access the KE2-EM35, connect to the same network as the device. Since it is an Ethernet device, speaking TCP/IP, users can connect to it by simply launching their preferred web browser, and typing in the address bar: `http://em35` -or- `http://192.168.50.1`. This brings the user to their local dashboard.

The Local Dashboard:

- Once connected to the dashboard, the user will immediately see up to 35 devices displayed.
- Device Access**
For controllers on the network, simply click the IP address of the controller, to immediately connect to that controller's home page.
- Access the Management Console**
To access the Management Console, select the Manage button in the upper right corner of the dashboard screen.

The screenshot shows a 'Devices' table with columns for 'Address' and 'Published to KE2 portal'. The table lists several devices, with the last one highlighted in green. Annotations explain the status icons: a green bar indicates the device is published to the KE2 portal, and icons for Alarm Notifications and Data Logging indicate their status (Enabled or NOT Enabled).

Address	Published to KE2 portal	Alarm Notifications	Data Logging
AC: 23:3F:...	Yes	Enabled	Enabled
AC: 23:3F:...	Yes	Enabled	Enabled
D1: C1:54:...	No	NOT Enabled	NOT Enabled
D7: CF:BE:...	No	NOT Enabled	NOT Enabled
AC: 23:3F:...	No	NOT Enabled	NOT Enabled
F7: 9B:5A:...	No	NOT Enabled	NOT Enabled
EF: 4B:2F:...	No	NOT Enabled	NOT Enabled
10.1.0.4	Yes	Enabled	Enabled

Green shaded bar indicates the device is published to the KE2 portal

Management Console will display all* of the KE2 devices connected to the Network directly or through the KE2-EM35s.

**While theoretically unlimited, performance speed will vary based on the number of connections / devices.*

Tested to 50 devices without noticeable loss of speed

Management Console Features:

- Devices → Discovered KE2 devices
- Access → Setup or change the Portal Site name and Password
- Alerts → Enter e-mail or text addresses for notifications & preferred "Subject" line
(If multiple addresses are entered, use a comma to separate each address)
- Logs → Establish the frequency that data points are logged
- System → Updates & advanced configurations

- This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

- Changes or modifications not expressly approved by KE2 Connect could void the user's authority to operate the equipment.

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help
