Kaba Launches Oracode Live Expands Locking Technology for Real-Time Data Exchange and Remote Management Capabilities

Montreal, Quebec, Canada – (April 9, 2015)

For more than 10 years, the Kaba Oracode system has standardized remote access control to vacation rental, resort, timeshare, and corporate housing properties. Kaba further expands Oracode by offering the Oracode Live solution. Oracode Live combines all the features and benefits of the original Oracode system, such as no keys or cards, centralized access control management, on demand code generation, and PMS system integration, with real-time data exchange and remote capabilities.

With Oracode Live, keyless locks include an antenna in the lock that communicates wirelessly with an in-unit hub. Lock activity transmits via the Oracode Live website to a property manager's mobile device. The two-way communication between a manager and locks provides instant information, such as when a guest arrives or checks out early. In addition, the new E-Code Mobile Site sends access codes via a tablet or smartphone, enabling a property manager to immediately assist a guest or vendor who needs access into the unit.

“Oracode Live takes keyless entry to the next level,” says Rory Griffin, Kaba product manager. “Kaba’s wireless technology helps property managers streamline access control functions. Managers no longer have to visit a door lock to perform the initial lock programming. This allows managers to focus their attention on caring for a property, which is key when creating a positive guest experience. Oracode Live further enhances operations by allowing property managers to generate, cancel, or extend access codes remotely as well as program and audit locks when they are off the property.”

According to Griffin, “The Oracode system is very flexible; for those who want a simple, basic keyless system, standalone locks are practical choices, and for those needing further convenience and greater efficiencies, Oracode Live with online, wireless capabilities is a more effective solution.” The Oracode system also integrates with the BeHome247 Enterprise Property Control™ system, providing a comprehensive energy and access control management solution. From the front door, the pool, and everything in between, Oracode and BeHome247 streamlines operations and saves property managers time and money.

See Oracode Live at the Kaba ADS Booth #40, VRMA Western Seminar, April 13 – 14, 2015, Portland, Oregon and Booth #14, VRMA Eastern Seminar, April 27-28, 2015, Norfolk, Virginia.

About KABA Access and Data Systems Americas

With offices in Lexington, Kentucky, Winston-Salem, North Carolina, Montreal, Quebec Canada, and Madison Heights, Michigan, KABA ADS Americas is a subsidiary of the Kaba Group (SWX-KABN). The Kaba Group is headquartered in Rumläng, Switzerland with over 7,500 employees in nearly 60 countries.
