# KeyCard Self-Service

On duty 24 hours a day

PIN assigned at registration

It's 3:00 AM and I've lost my keycard!  
What should I do?

## KeyCard Self-Service

- » Dispenses temporary keycards around the clock
- » Reduces administrative staff involvement and allows for other tasks
- » Eliminates after-hours service calls for replacement keycards
- » Significant cost savings for operations and security management

During initial registration and check in, all residents are assigned an additional personal identification number (PIN) that identifies them within the housing management system. A typical application for the KeyCard Self-Service Kiosk is dispensing temporary keycards to residents during non-staffed operational hours, or at satellite locations where around-the-clock staffing is deemed to be too costly. Residents use the touch screen technology to simply type their name, and then enter their PIN.

Once the system recognizes the person as an authorized member within the housing unit, a temporary keycard is dispensed. The cardholder will then have a specified period of time to use the card and will need to return to Housing Administration for issuance of a new permanent keycard.

The KeyCard Self-Service Kiosk interfaces with System 6000 and ATLAS software with Kaba MT, RT, 760 and 790 electronic series lock systems (magstrip/RFID).

In addition, Kaba Kiosks are able to interface with many other magstripe cardkey locking systems\*.

User-friendly graphics with touch screen technology guide the user through a simple process of identification and data input for the dispensing of a temporary keycard.

\*kiosk interface capability is dependent on certain lock models within these key systems. Call Kaba Tech Support at 1-800-849-8324 for more details.

# System Configuration

## Features and Benefits:

- » Self-service keycard dispensing
- » ADA design
- » Magnetic stripe keycard support
- » Low card indicator alert via e-mail
- » Retract and retain Feature (for cards not taken by resident)
- » Fixed mounting options
- » Multi-language options
- » 3 year warranty
- » RFID keycard support

## Custom Programming Capabilities:

- » Name length
- » PIN code length
- » Duration of temporary keycard
- » Validity/expiry
- » Registration attempts allowed
- » Number of keycards / cycle
- » Tamper features
- » Number of keycards / person
- » Audit trail

## Specifications:

- » 19" Acoustic pulse color touchscreen
- » Durable steel enclosure
- » Low coercivity magstripe encoder
- » Card capacity: 200
- » Smooth-glide rail system
- » Temperature operating range: 32 °F to 104 °F
- » Operating humidity: 20% - 80%
- » Ventilation/cooling system
- » Standard 10/100 Ethernet
- » 120V power

KeyCard Self-Service Kiosks are used for INDOOR applications only. Protected from weather elements and extreme temperatures, housing lobbies, offices, or entry areas are ideal locations.
