ADJUST DISPLAY BRIGHTNESS

Press and hold DIMMER for 2 seconds repeatedly to select high or low brightness levels.

Plug the unit into the USB port on your computer or into a USB power adaptor (not included) using the included USB cable.

BATTERY BACK-UP

(For Temporary Time Storage Only)

Install 2 x LR06, AA or EU-3 battery (not included) according to polarity shown inside the battery compartment. In the event of a power interruption, your set will not work normally from the mains supply but there is now the advantage that your clock will continue to work. The clock display will not light up, as the clock time will be held in the memory. This also enables you to move the set from place to place without re-setting the clock every time. The battery back-up system is only meant to be used from short temporary power interruption. For longer durations, the battery may become exhausted or there may be some deviation in accuracy. When the battery is exhausted, it should be removed from the set to prevent leakage. If you do not wish to take advantage of the battery back-up system, your set will work normally without a battery. However, if disconnected from the mains, the clock figures will flash when the mains are re-connected and you must re-set the clock as described in the Electronic Clock Operation paragraph.

Attention should be drawn to the environmental aspects of battery disposal. Don't throw used batteries in dustbin. Please contact your retailer in order to protect the environment.

Attention should be drawn to the environmental aspects of battery disposal.

Electrical products should not be disposal of with household waste. Please recycle where facilities exist. Check with your Local Authority of retailer for recycling device.

(Batteries pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

SPECIFICATION

Power Source : 100-240V ~50/60Hz

Tuner Range :FM 87.5-108.0MHz

USB Charging : DC 5V, 1A X 1

Power Consumption : 5W

Product information is subject to change without prior notice.

FCC Cautions:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
