NOTES:

1. Base must be capable of supporting: 30" – 375 pounds, 27" – 300 pounds
 2. Cutout depth is critical to the proper installation of the built-in oven.
If the oven decorative trim does not butt against the cabinet, or if noise is heard on convection models, verify the dimension to assure it is the required depth.
 3. For a cutout height greater than 49 1/4" for 27" and 30" models, add one 2" wide wood shim of appropriate height to each side of the opening under the appliance rails.
- *For cutout height between 51 13/16" and 51 15/16" for 30" models, use the larger interior trim supplied with the wall oven.
