What is SIRIUS Satellite Radio?

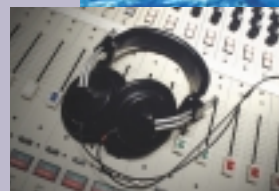

SIRIUS Satellite Radio

Sirius (www.siriusradio.com) is radio the way it was meant to be: 100 channels of digital-quality, 24 hour original programming. This means 50 channels of music with absolutely no commercials and 50 channels of news,

sports, comedy and kids programming from names like CNBC, Bloomberg, Speedvision, Comedy Now, Sci-Fi, Discovery and A&E. Sirius is focused entirely on you, the listener, and it's delivered coast-to-coast via satellite. This is radio like you've never heard before.

Do you like Reggae? How about 50's, 60's, 70's, Classic Rock or New Rock? What about Jazz, Country, Blues, Pop, Rap, R&B, Bluegrass, Alternative, Classical, Heavy Metal or Techno? All of these plus many more will have their own channel and on-air talent dedicated to making them the nation's "station of record" for each music format.

That's why all Kenwood D Mask+ CD receivers are Sirius-ready. Ready to deliver to commercial-free music and entertainment programming on Kenwood's newest mobile audio products.

Color Shock™

Kenwood's Color Shock LCD lets you change the display's backlight color - to match your car's interior, or just to match your mood. The display mixes the levels of 4 colors (white, red, blue, and green) to create 67 different colors that you can scan through.

Then select the one you want, show it off, and add a little spice to your next drive.
