1 Introduction

1.1 Acknowledgement

Thanks for your purchase of the Key Ingredient Recipe Reader HD+ (KIRR). In addition to being useful as a fully functional kitchen recipe reader device, your new Key Ingredient Recipe Reader HD+ is also a 9.7 inch Retina screen Android tablet, using an octo-core (8-core) MTK8752 chipset, based on Android 4.4.4.

Your new recipe reader has built in 4G, 3G, WIFI, Bluetooth, GPS, FM, and more. It is easy to enable wireless communication and wireless internet, giving you access to surf the internet anytime and anywhere. The KIRR is also built with a high accuracy GPS module, so that it can be used with navigation and mapping software. The built-in camera and other sensors allow for endless entertainment and productivity – all while serving as the center of your kitchen, offering recipes, cookbooks, kitchen timers, kitchen conversions and more.

This manual systemically introduces the functions, use techniques and announcements, of the KIRR.   Please read this manual carefully before operation.

1.2 Announcements

Preventive maintainance

1. Please always keep the KIRR dry. In order to avoid device failure, corrosion fault and electric short, please prevent the device, battery and charger from ANY EXPOSURE to water and moisture, and do not operate the device or charger with a wet hand.
2. To avoid failure of the device, battery and charger, please prevent the device, battery, charger from violent shock or shake.
3. To avoid failure of the device, battery and charger, please prevent the device, battery, charger of excessive heating or prolonged exposure to cold.
4. Never shock, throw, prod the KIRR, or drop, extrude, or bend the KIRR.
5. Never disassemble the device or accessories, doing so will void any and all manufacturer and third party warranties, including extended warranties.

1.3 Safety Instructions

Before the operation of the KIRR, please read this chapter and teach your children

and anyone else who may use the KIRR about these safety rules. For further details, please refer to the safety instructions and announcement.

● Never use the KIRR when driving car, in order to ensure safe driving.

● In a hospital or medical area, please abide by related rules and regulations. Please shut down the KIRR when it is near a hospital or medical area.

● To avoid the wireless signal to interrupt of the an airplane, please shut down the KIRR or use airplane mode when you are on an airplane.

● To avoid electronic equipment failure, please shut down the KIRR in the vicinage of high-accuracy electronic equipment.

● Please don't disassemble the KIRR and accessories. Only use an authorized agent to access or service the KIRR.

● Please keep the KIRR far away from magnetic equipments, the radiation of KIRR may erase the data stored in the magnetic equipments.

● Never use the KIRR in the vicinity of high temperature, or flammable gas (gas station).

● Keep the KIRR and accessories away from children, and avoid child use of the KIRR without parents' supervision.

● Please comply with related rules and regulations, and respect others' privacy and legal rights while using the KIRR.

● Please strictly observe this manual and instruction when using a USB cable, as this may damage your KIRR or personal computer.

● Do not use the KIRR in wet environments like bathrooms, and avoid the KIRR from getting soaked or exposed to any liquids.   DO NOT CLEAN IN A DISHWASHER or SINK.   Clean only with a dry soft towel safe for use on glass.

1.4 QUICKSTART GUIDE

Get started in just 5 easy steps.

1.   First, remove the **Key Ingredient Recipe Reader HD+** from the packaging and remove the plastic screen cover. Plug in your new tablet and allow at least 2 hours to charge.

2. Power on the device by holding the power button on the side of the device for 3-5 seconds.

3. Press the Icon to open the Settings menu. Press "Wi-Fi" to connect to your wifi network. Select your wifi access point and touch it, type in your Wi-Fi password and press the connect button.

4. Press the Icon to go back to home screen.

5. Press the Icon to launch the Key Ingredient Recipe App, with access to over 2,000,000 recipes, your own cookbooks and more!   Login or Register, for free, to make best use of your device.

For support, please visit: http://www.keyingredient.com/ and press "Support"

1.5 Abbreviations/term

Abbreviations /term	Full name	Description
KIRR	Key Ingredient Recipe Reader HD+	Key Ingredient Recipe Reader HD+, a Mobile Internet Capable device, also known as an Android Tablet.
WIFI	Wireless Fidelity	Based on the IEEE 802.11b standard wireless local area network
T F	TransFlash	Also known as Micro SD, ultra-small memory card

2 KIRR Introduction

2.1 KIRR Accessories Introduction

Packing list

Your KIRR packing box includes the following items:

- KIRR device
- Adapter
- USB cable
- User manual

## 2.2 KIRR Use and preparation

Battery charging

Before using KIRR, charge the battery first.

1. Use only the included adapter to charger the KIRR.
2. Charge for at least 30-minutes before first use.
3. Device will NOT power on if it is too low on charge… please let it charge for at least 30-minutes any time the battery may be drained before trying to turn on.

2.3 KIRR Status and notifications

Notification icon

When the prompted information appears on your notification panel, please click on the column frame and slide on the screen to open the notification details. Click the option you want to view to see detailed information. You can then click on the message box and slide up to close the message window. The following is a status bar icon Illustration:

	New email		Airplane mode
	USB connected		Connected USB debuging

9.3 Update applications

Update Android applications

◆ Download the latest application from the website you found it.

◆ Install the new APK, and it will replace the old APK automatically.

10 FAQ

1. **KIRR boots slowly on first power on**

    After KIRR is factory reset or firmware upgraded, it needs to install all the applications during first boot.   It can take around 2-3 minutes, after which, subsequent power-ons, the speed will be faster.

2. **KIRR cannot connect to WIFI**

    ● Check if wireless router is working correctly.

    ● Check the distance between KIRR and wireless router, and ensure it is not separated by a wall or other obstacles.

    ● Check if the user name and password are correct.

3. **KIRR is hot**

    KIRR may feel hot when using more than one application, when the display is on high brightness for long periods, or if KIRR is being charged. This is normal.

4. **Cannot configure E-mail or register applications**

    ● Check if the network is working and you are connected

    ● Check if E-mail settings correct.

    ● Check if system time is correct and the same as local time.

5. **System hanging or not working properly (SYSTEM RESET)**

    Sometimes, when you install a third-party application, it may cause system to fail to boot, or simply not work properly. You can press (and hold) the reset button (beside charging port) to reset the system to factory default.

6. **Cannot open website**

    ● Check if KIRR is within valid distance of router.

    ● Restart WIFI on the device and router and try again.

7. **KIRR running slower than normal**

    ● This is normal. Please stop some unused applications from advanced task management and/or uninstall some third-party applications to free up more system resources.

FCC Warning:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

—Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate (SAR) information

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body)as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the handset a minimum of 0 cm from the body. Non compliance

with the above restrictions may result in violation of RF exposure guidelines.
