## USE AND CARE GUIDE

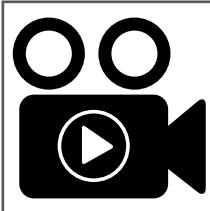

### RILEY 44-INCH CEILING FAN

Questions, problems, missing parts? Before returning to the store,  
call Hampton Bay Customer Service  
8 a.m. - 7 p.m., EST, Monday-Friday, 9 a.m. - 6 p.m., EST, Saturday

1-855-HD-HAMPTON

HAMPTONBAY.COM

To view an instructional video on how to install this product:

1. Go to [www.homedepot.com](http://www.homedepot.com) and enter either the Item or Model number, found in the top right corner of the cover of this instruction manual, in the search field.
2. Click on your product from the list of search results and click on the video link in the "Product Overview" section.

#### THANK YOU

We appreciate the trust and confidence you have placed in Hampton Bay through the purchase of this ceiling fan. We strive to continually create quality products designed to enhance your home. Visit us online to see our full line of products available for your home improvement needs.

Thank you for choosing Hampton Bay!

## Safety Information

### READ AND SAVE THESE INSTRUCTIONS.

1. To reduce the risk of electric shock, ensure the electricity has been turned off at the circuit breaker or fuse box before you begin.
2. All wiring must be in accordance with the National Electrical Code ANSI/NFPA 70 and local electrical codes. Electrical installation should be performed by a qualified licensed electrician.
3. The outlet box and support structure must be securely mounted and capable of reliably supporting 35 lbs (15.9 kg). Use only UL Listed outlet boxes marked "Acceptable for Fan Support of 35 lbs (15.9 kg) or less".
4. The fan must be mounted with a minimum of 7 ft (2.1 m) clearance from the trailing edge of the blades to the floor.
5. Do not operate the reversing switch while the fan blades are in motion. You must turn the fan off and stop the blades before you reverse the blade direction.
6. Do not place objects in the path of the blades.
7. To avoid personal injury or damage to the fan and other items, use caution when working around or cleaning the fan.
8. Electrical diagrams are for reference only. Light kits that are not packed with the fan must be UL-listed and marked suitable for use with the model fan you are installing. Switches must be UL General Use Switches. Refer to the instructions packaged with the light kits and switches for proper assembly.
9. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment-grounding conductor on one side of the outlet box and the ungrounded conductor on the other side of the outlet box..
10. All setscrews must be checked and retightened where necessary before installation.

	<b>WARNING:</b> To reduce the risk of personal injury, do not bend the blade brackets (also referred to as flanges) during assembly or after installation. Do not insert objects in the path of the blades.
	<b>WARNING:</b> To avoid possible electrical shock, turn the electricity off at the main fuse box before wiring. If you feel you do not have enough electrical wiring knowledge or experience, contact a licensed electrician.
	<b>WARNING:</b> Electrical diagrams are for reference only. Optional use of any light kit shall be UL-listed and marked suitable for use with this fan.
	<b>WARNING:</b> To reduce the risk of fire or electric shock, do not use this fan with any Other solid-state speed control device.
	<b>WARNING:</b> To reduce the risk of fire or electric shock, this fan should only be used with fan speed control part no. AP-3RDL manufactured by DawnSun Electronic Technology Co., Ltd. Zhongshan.
	<b>CAUTION:</b> To reduce the risk of personal injury, use only the screws provided with the outlet box.
	<b>CAUTION:</b> Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
	<b>CAUTION:</b> Do NOT use this fan with a dimmer switch or wall control. Using a dimmer switch or wall control will damage the fan.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**CAUTION:**

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

# Warranty

The supplier warrants the fan motor to be free from defects in workmanship and material present at time of shipment from the factory for a lifetime after the date of purchase by the original purchaser. The supplier warrants that the light kit, excluding any glass, to be free from defects in workmanship and material at the time of shipment from the factory for a period of three years after the date of purchase by the original purchaser. The supplier also warrants that other fan parts, excluding any glass or acrylic blades, to be free from defects in workmanship and material at the time of shipment from the factory for a period of one year after the date of purchase by the original purchaser. We agree to correct such defects without charge or at our option replace with a comparable or superior model if the product is returned. To obtain warranty service, you must present a copy of the receipt as proof of purchase. All costs of removing and reinstalling the product are your responsibility. Damage to any part, such as by accident, misuse, improper installation, or by affixing any accessories, is not covered by this warranty. Because of varying climatic conditions this warranty does not cover any changes in brass finish, including rusting, pitting, corroding, tarnishing, or peeling. Brass finishes of this type give their longest useful life when protected from varying weather conditions. A certain amount of "wobble" is normal and should not be considered a defect. Servicing performed by unauthorized persons shall render the warranty invalid. There is no other express warranty. Hampton Bay hereby disclaims any and all warranties, including but not limited to those of merchantability and fitness for a particular purpose to the extent permitted by law. The duration of any implied warranty, which cannot be disclaimed, is limited to the time period as specified in the express warranty. Some states do not allow a limitation on how long an implied warranty lasts, so the above limitation may not apply to you. The retailer shall not be liable for incidental, consequential, or special damages arising out of or in connection with product use or performance except as may otherwise be accorded by law. Some states do not allow the exclusion of incidental or consequential damages, so the above exclusion or limitation may not apply to you. This warranty gives specific legal rights, and you may also have other rights that vary from state to state. This warranty supersedes all prior warranties. Shipping costs for any return of product as part of a claim on the warranty must be paid by the customer.

Contact the Customer Service Team at 1-855-HD-HAMPTON or visit [www.HamptonBay.com](http://www.HamptonBay.com).

## Pre-Installation

### SPECIFICATIONS

Size	Speed	Volts	Watts	Amps	RPM	CFM	Net Weight	Gross Weight	Cubic Feet
44 in.	Low	120	15.12	X.XX	XX	XXXX	XX lbs (X.X kgs)	XX.XX lbs (X.X kgs)	1.53 cu.ft.
	Medium		29.09	X.XX	XXX	XXXX			
	High		51.2	X.XX	XXX	XXXX			

 NOTE: These are approximate measures. They do not include the Amps and Wattage used by the light kit.

### TOOLS REQUIRED

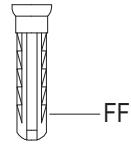

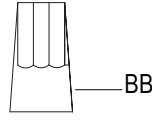

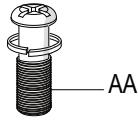

# Pre-Installation (continued)

## HARDWARE INCLUDED

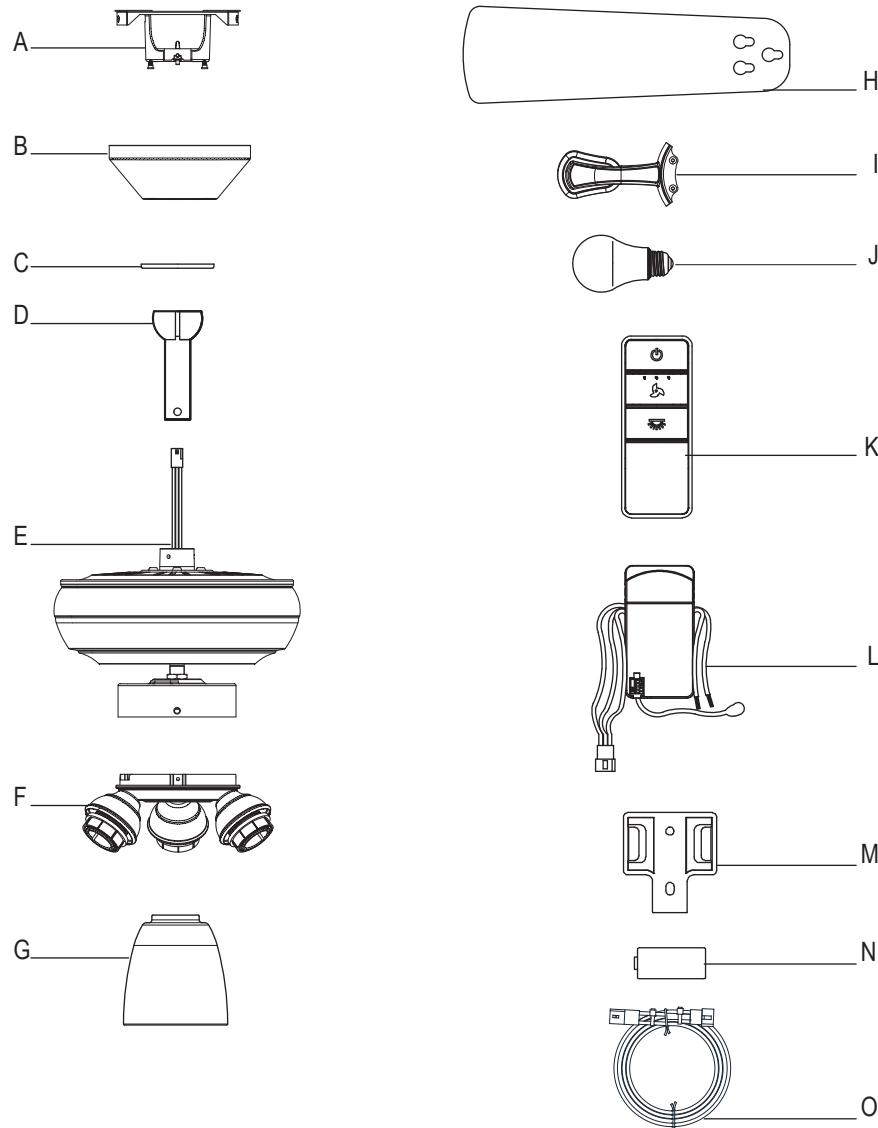

NOTE: Hardware not shown to actual size.

Part	Description	Quantity
AA	Extra blade arm screw	1
BB	Plastic wire connector	3
CC	Hanger pin	1
DD	Locking pin	1
EE	Wall mount screws	2
FF	Wall anchor	2

# Pre-Installation (continued)

## PACKAGE CONTENTS

Part	Description	Quantity
A	Slide-on mounting bracket (inside canopy)	1
B	Canopy	1
C	Canopy bottom cover	1
D	Ball/downrod assembly	1
E	Fan-motor assembly	1
F	Light kit fitter assembly	1
G	Glass shade	3

**IMPORTANT:** This product and/or components are governed by one or more of the following U.S. Patents: 5,947,436; 5,988,580; 6,010,110; 6,046,416; 6,210,117 and other patents pending.

Part	Description	Quantity
H	Blade	5
I	Blade arm	5
J	LED bulb	3
K	Remote control (battery included)	1
L	Receiver	1
M	Wall bracket	1
N	Battery	1
O	Extension lead wire	1

# Installation

## MOUNTING OPTIONS

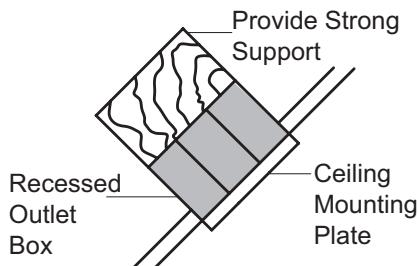

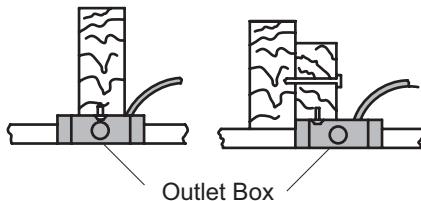

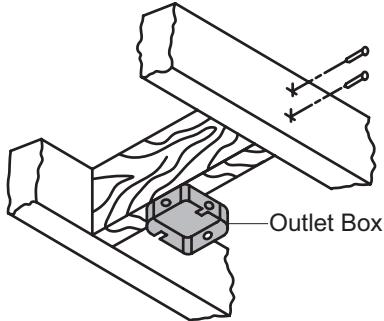

**WARNING:** To reduce the risk of fire, electric shock, or personal injury, mount the fan to an outlet box marked "Acceptable for fan support of 35 lbs (15.9 kg) or less" and use the screws provided with the outlet box. An outlet box commonly used for the support of lighting fixtures may not be acceptable for fan support and may need to be replaced. If in doubt, consult a qualified electrician.

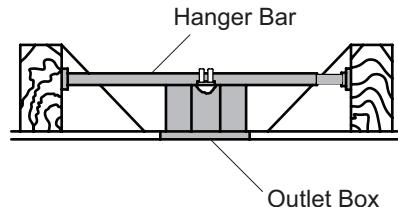

If your ceiling fan does not have an existing UL-listed mounting box, then install one using the following instructions:

- Disconnect the power by removing the fuses or turning off the circuit breakers.
- Secure the outlet box directly to the building structure. Use the appropriate fasteners and materials. The outlet box and its bracing must be able to fully support the weight of the moving fan (at least 35 lbs). Do not use a plastic outlet box.

The illustrations below show three different ways to mount the outlet box.

**NOTE:** You may need a longer downrod to maintain proper blade clearance when installing on a steep, sloped ceiling. The maximum angle allowable is 20° away from horizontal.

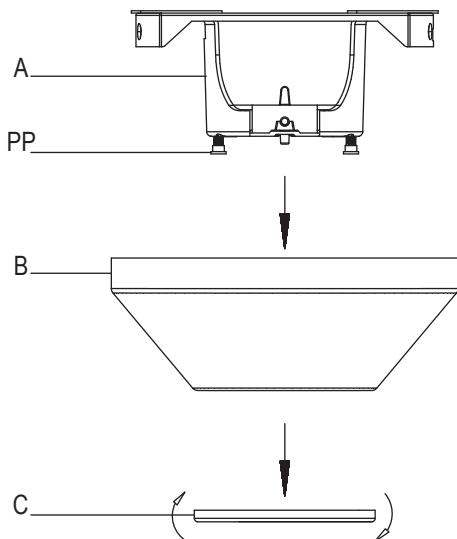

If the canopy (B) touches the ball/downrod assembly (D), then remove the decorative canopy bottom cover (C) and turn the canopy (B) 180° before attaching the canopy (B) to the mounting plate.

To hang your fan where there is an existing fixture but no ceiling joist, you may need an installation hanger bar as shown above (available at any Home Depot store).

# Assembly - Standard Ceiling Mount

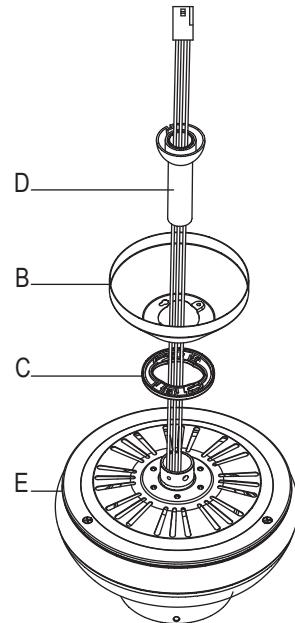

## 1 Preparation for standard mounting

- Remove the canopy bottom cover (C) from the canopy (B) by turning the bottom cover counterclockwise until it unlocks.
- Loosen the two canopy screws (PP) located in the bottom of the mounting bracket (A), and turn the canopy counterclockwise to remove the mounting bracket (A) from the canopy (B).

## 2 Routing the wires

- Route the wires exiting the top of the fan motor assembly (E) through the center of the canopy bottom cover (C).
- Make sure the opening of the canopy (B) is on top and insert the ball/downrod (D) through the canopy (B).
- Route the wires exiting the top of the fan motor assembly (E) through the downrod (D) as shown.

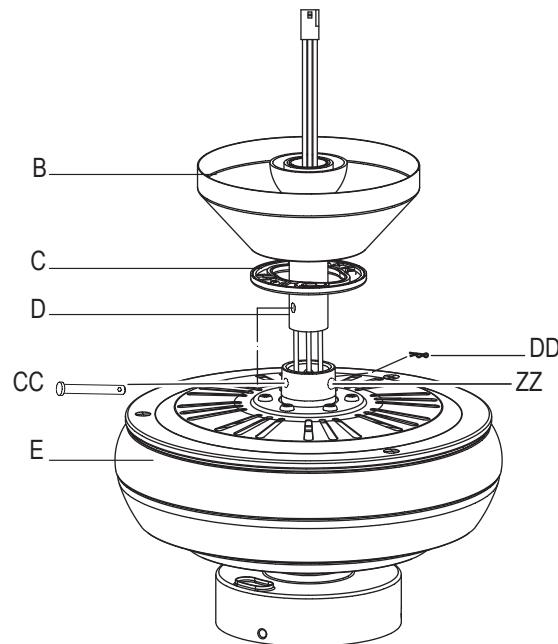

## 3 Assembling the fan

**WARNING:** Failure to properly install the locking pin could result in the fan becoming loose and possibly falling.

- Loosen, but do not remove, the two setscrews (ZZ) on the collar on top of the motor housing (E).
- Align the holes at the bottom of the downrod (D) with the holes in the collar on top of the motor housing (E).
- Carefully insert the hanger pin (CC) through the holes in the collar and downrod (D). Be careful not to jam the hanger pin (CC) against the wiring inside the downrod (D).
- Insert the locking pin (DD) through the hole near the end of the hanger pin (CC) until it snaps into its locked position.
- Re-tighten the two setscrews (ZZ) on the collar on top of the motor housing (E).

# Assembly - Hanging the Fan

## 1 Attaching the fan to the electrical box

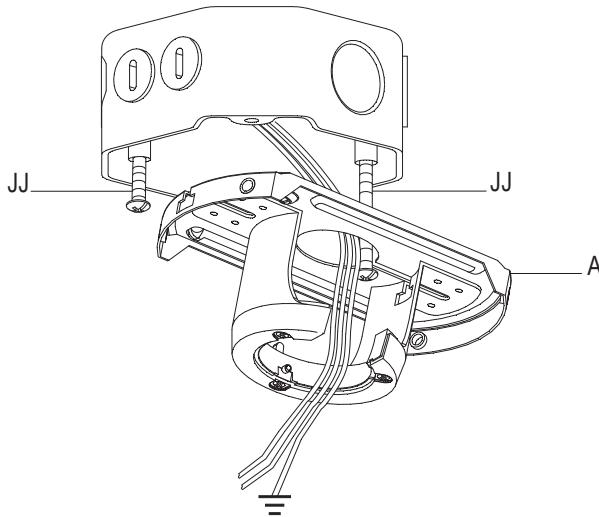

**WARNING:** To reduce the risk of fire, electric shock, or other personal injury, mount the fan to an outlet box marked "Acceptable for fan support of 35 lbs (15.9 kg) or less" and use the mounting screws provided with the outlet box.

**NOTE:** The mounting bracket (A) is designed to slide into place on an outlet box with the outlet box screws (JJ).

- Pass the 120-Volt supply wires through the center hole in the slide-on mounting bracket (A).
- Install the ceiling slide-on mounting bracket (A) on the outlet box by sliding the slide-on mounting bracket (A) over the two screws (JJ) provided with the outlet box. If necessary, use leveling washers (not included) between the slide-on mounting bracket (A) and the outlet box. Note that the flat side of the slide-on mounting bracket (A) is toward the outlet box.
- Securely tighten the two outlet box screws (JJ).

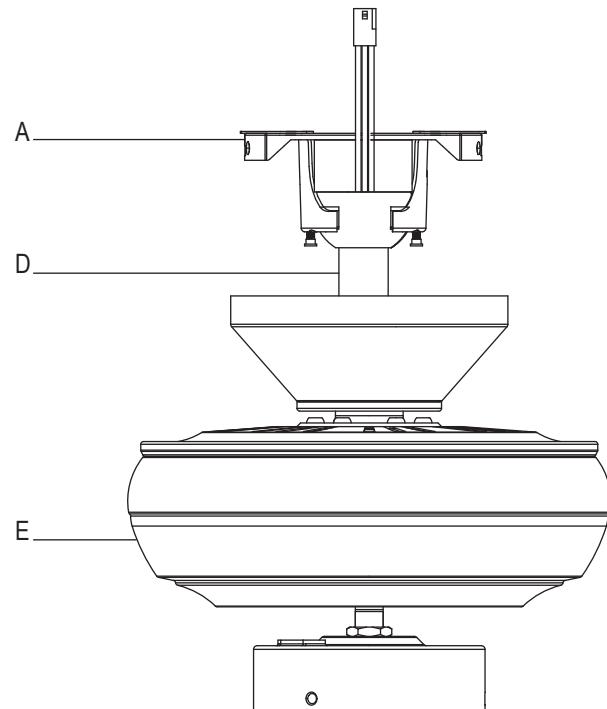

## 2 Hanging the fan

**WARNING:** When using the standard ball/downrod mounting, the tab in the ring at the bottom of the mounting bracket must rest in the groove of the hanger ball. Failure to properly seat the tab in the groove may result in fan wobble issues and potentially damage the wiring.

- Carefully lift the fan-motor assembly (E) up to the slide-on mounting bracket (A).
- Seat the hanger ball portion of the ball/downrod assembly (D) in the mounting bracket socket. Ensure that the tab on the slide-on mounting bracket (A) socket is properly seated in the groove in the hanger ball.

# Assembly - Hanging the Fan (continued)

## 3 Setting the code on the remote control and receiver

**NOTE:** The frequencies on your receiver and hand unit have been preset at the factory. Before installing the receiver, make sure the dip switches on the receiver and hand unit are set to the same frequency. The dip switches on the hand unit are located inside the battery compartment.

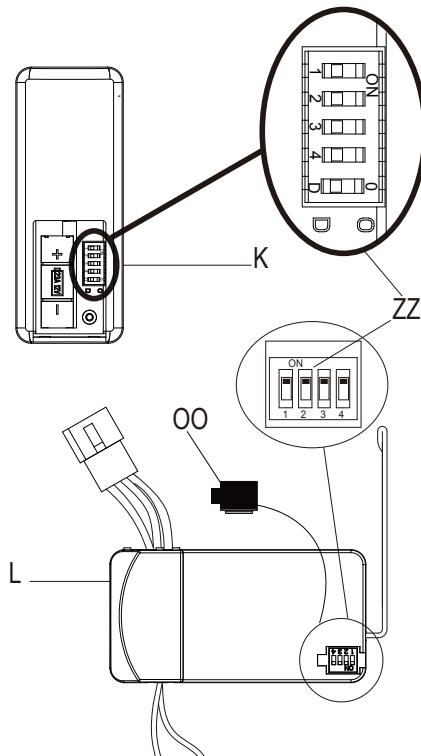

**NOTE:** The switch marked "O/D" controls the dimming function of the lights. If you are using non-dimmable bulbs, use a ballpoint pen or small screwdriver to set the switch to "O" to disable the dimming function. If you are using dimmable bulbs, set the switch to "D" to enable the dimming function.

**NOTE:** The battery will weaken with age and should be replaced before leaking takes place, as battery leakage damages the hand unit. Dispose of the used battery properly and keep the battery out of the reach of children.

- Remove the remote control (K) battery cover by pressing firmly on the arrow and sliding the cover off.
- Slide the dip switches (ZZ) to your choice of either up or down. The factory setting is up.
- Slide the dip switches (ZZ) on the receiver (L) to the same position as set on the remote control (K).
- Install the 23A 12V battery (included).
- Replace the battery cover on the remote control (K).
- Insert the silicone rubber stopper (OO) into the hole on the receiver (L) to cover the dip switches.

## 4 Installing the receiver

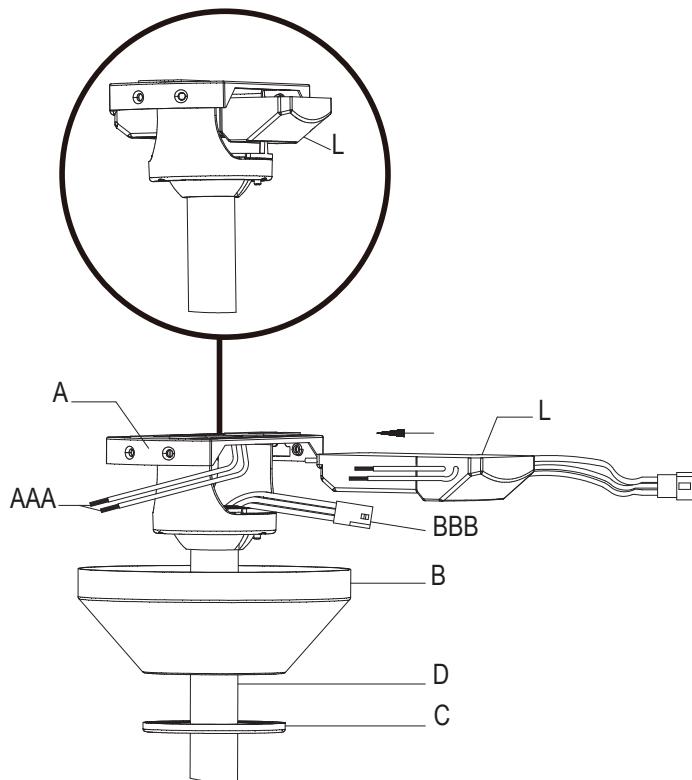

**WARNING:** To reduce the risk of fire or electric shock, remember to disconnect power. The electrical wiring must meet all local and national electrical code requirements. The electrical source and fan must be 110/120 volt, 60Hz. Do not use this product in conjunction with any variable wall control. Incorrect wire connection can damage this receiver.

**CAUTION:** Do not immerse in water. Do not pull on or cut the receiver leads shorter. Do not drop or bump the unit.

- Position the house supply wires (AAA) to one side of the slide-on mounting bracket (A); position the fan wires (BBB) to the opposite side.
- Insert the narrow end of the receiver (L) (as shown, flat side towards the ceiling) into the slide-on mounting bracket (A) until it rests on top of the ball/downrod assembly (D).

# Assembly - Hanging the Fan (continued)

## 5 Wiring the receiver to the household wiring

**WARNING:** To avoid possible electrical shock, turn the electricity off at the main fuse box before wiring. If you feel you do not have enough electrical wiring knowledge or experience, contact a licensed electrician.

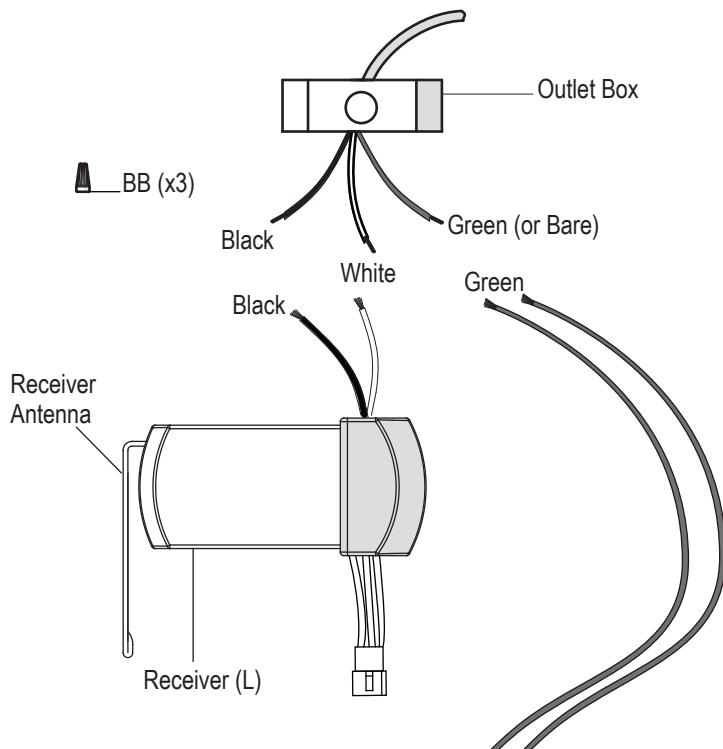

**WARNING:** Each wire nut supplied with this fan is designed to accept up to one 12-gauge house wire and two wires from the fan. If you have larger than 12-gauge house wiring or more than one house wire to connect to the fan wiring, consult an electrician for the proper size wire nuts to use.

**IMPORTANT:** Use the wire connecting nuts (BB) supplied with your fan. Secure the connectors with electrical tape and ensure there are no loose strands or connections.

- Spread the wires apart so that the green and white wires are on one side of the outlet box and the black wire is on the other side.
- Connect the green fan wires to the household ground wire (this may be a green or bare wire) using a wire connecting nut (BB).
- Connect the receiver (L) black wire to the household black (hot) wire using a wire connecting nut (BB).
- Connect the receiver (L) white wire to the household white wire (neutral) using a wire connecting nut (BB).
- Secure each wire connecting nut using electrical tape.

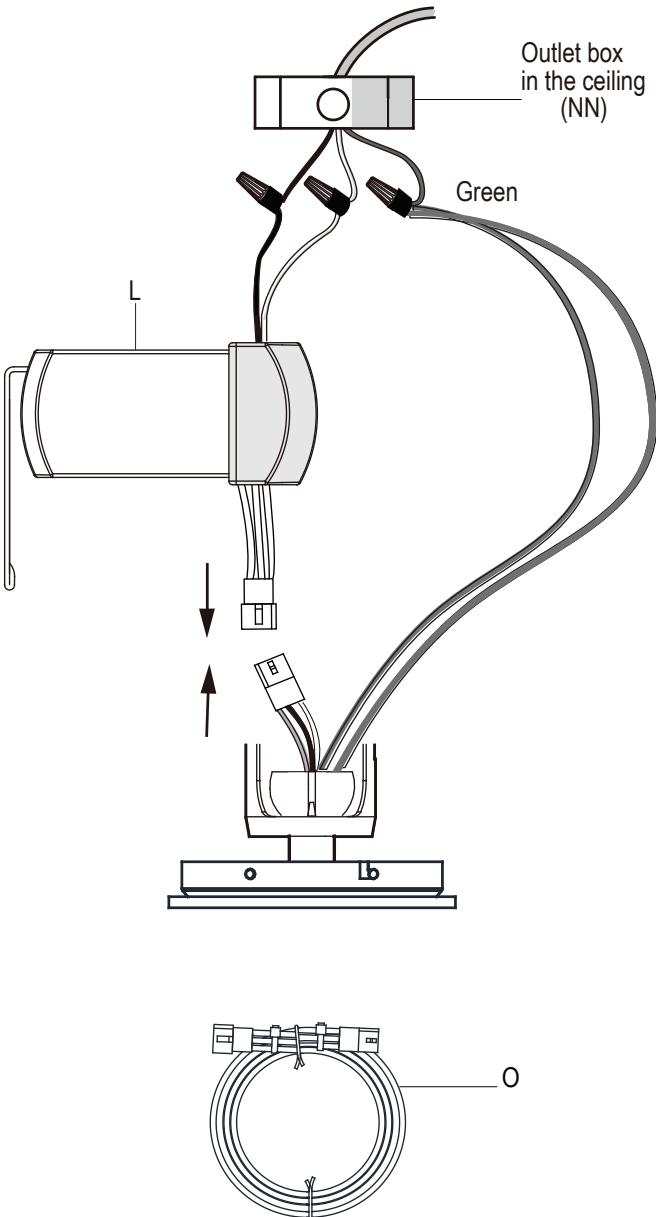

## 6 Wiring the fan to the receiver

**NOTE:** The fan comes with 12 in. lead wires for use with the provided 4.5 in. ball downrod assembly (D), if you wish to use longer downrod, you can use the extension lead wire (18 in.) (O) provided.

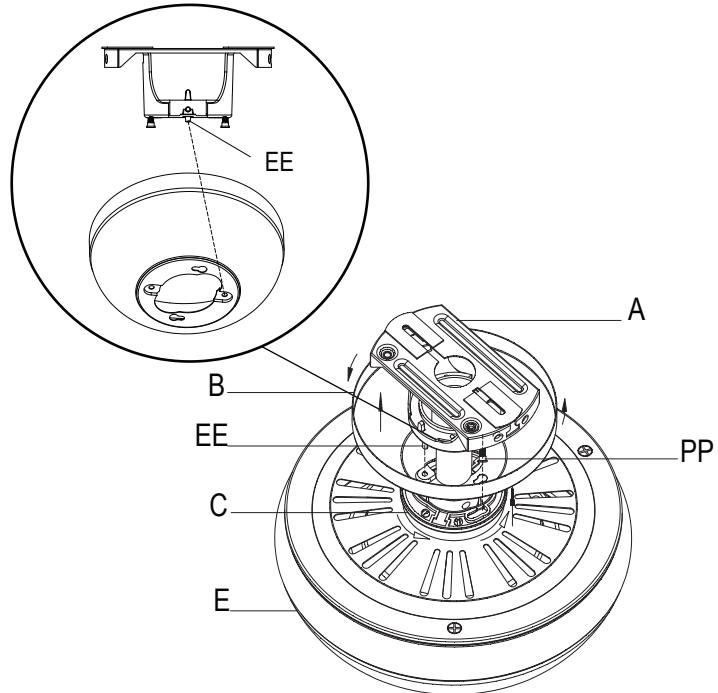

- If using the 4.5 in. ball downrod assembly (D) provided, wire the receiver to the fan wires by connecting the molded adaptor plug from the receiver (L) with the molded adaptor of the fan motor assembly (E) together.
- If you wish to use longer downrod, you can use the extension lead wire (18 in.) (O) provided by connecting the molded adaptor together.

# Assembly - Hanging the Fan (continued)

## 7 Attaching the canopy

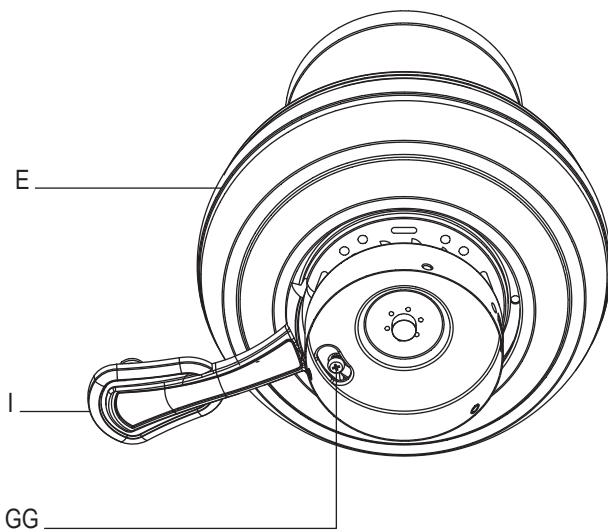

- Align the locking slots of the canopy (B) with the two screws (PP) and alignment post (EE) in the mounting bracket (A).
- Push up the canopy (B) and turn clockwise until the alignment post (EE) engages to the round hole and the screws (PP) engage to the key slots.
- Firmly tighten the two mounting screws (PP) using a short screwdriver.
- Install the decorative bottom cover (C) by aligning the cover slots with screws in the bottom of the canopy (B). Rotate the bottom cover (C) clockwise to lock in place.

# Assembly - Attaching the Blades

## 1 Attaching the blade bracket

- Fasten the blade bracket (I) to the motor (E) by inserting the alignment post into the slot on the bottom of the fan-motor assembly (E) and tightening the motor screws (GG) that are pre-assembled to the blade bracket (I).
- Repeat for the remaining four blade brackets (I).

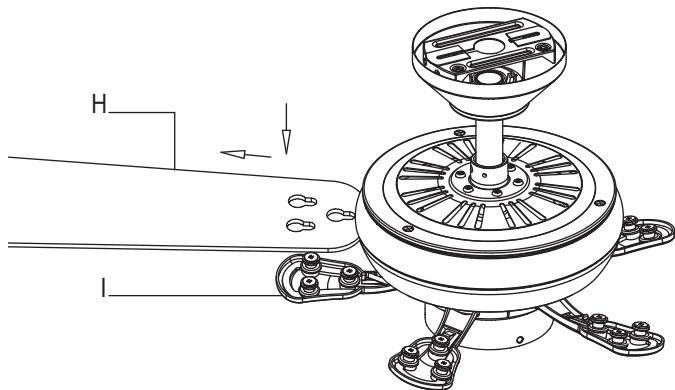

# Assembly - Attaching the Blades (continued)

## 2 Attaching the fan blades

**NOTE:** This fan features Quick Install™ blades for fast and easy blade installation.

- Mount the fan blade (H) to the blade bracket (I) by aligning the three key-slot holes in the blade (H) with the three posts on the top of the blade brackets (I).
- Hold the blade (H) close to the blade bracket (I) and press the blade (H) down firmly. Ensure the key-slot holes are properly seated on the blade arm posts.
- While still holding the blade (H) down, firmly slide the blade (H) away from the bracket (I) side until the blade (H) engages in the locking mechanism.
- Make sure the locking mechanism at the rear of the blade bracket (I) springs upward and butts against the edge of the blade (H) indicating a secure connection.
- Visually inspect the top of the blade bracket (I) to ensure the locking mechanism is securely in place.
- Repeat for the remaining blades (H).

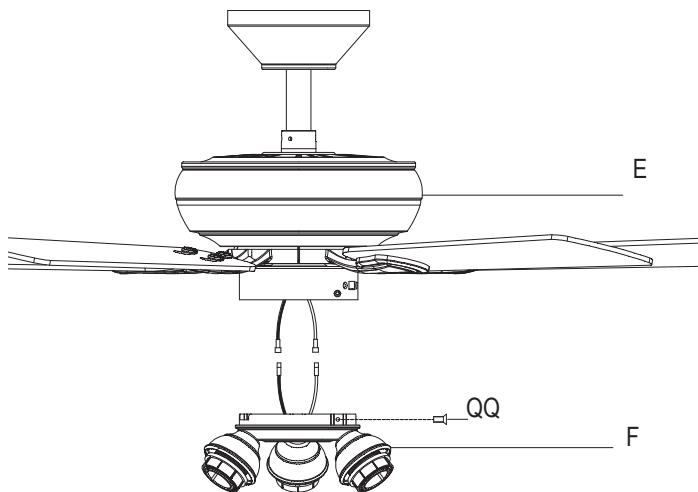

# Assembly - Attaching the Light Kit

## 1 Attaching the light kit

**CAUTION:** To reduce the risk of electric shock, disconnect the electrical supply circuit to the fan before installing.

- Remove and save the three screws (QQ) from the light kit fitter assembly (F).
- Connect the wires exiting the bottom of the motor assembly (E) by connecting the molded adaptor plugs together (blue to blue, white to white).
- Slide the light kit (F) into the switch housing and secure it using the three screws (QQ) that were removed in the first step.

# Assembly - Attaching the Light Kit (continued)

## 2 Installing the glass bowl

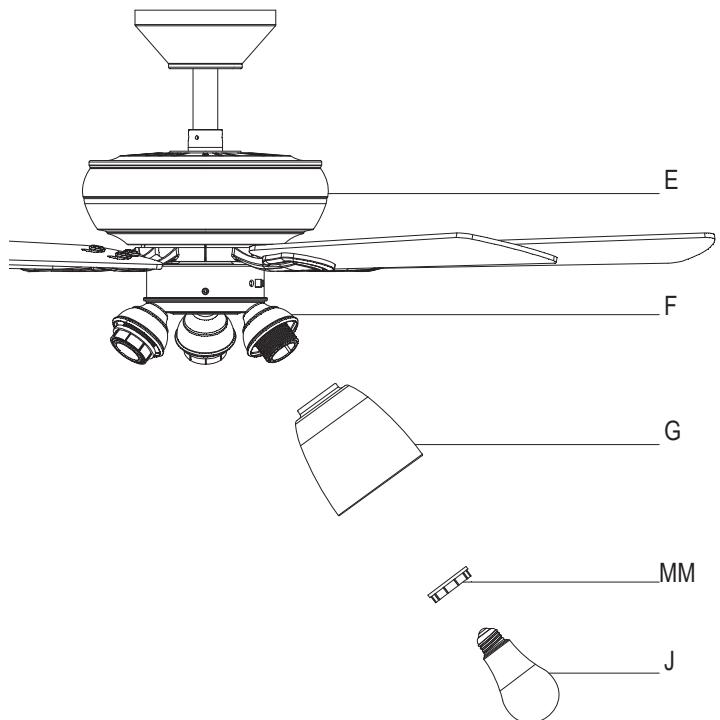

**CAUTION:** Make sure the power is off before attaching or removing the glass bowl.

**WARNING:** Allow the glass bowl to cool completely before removing.

- Remove the glass bowl holder (MM) from the threaded nipple of the light kit fitter assembly (F).
- With the power off, install the three LED bulbs (J) by screwing them into the light bulb sockets.
- Position the glass bowl (G) over the threaded nipple.
- Install glass bowl holder (MM) to the threaded nipple to secure the glass bowl (G) properly.

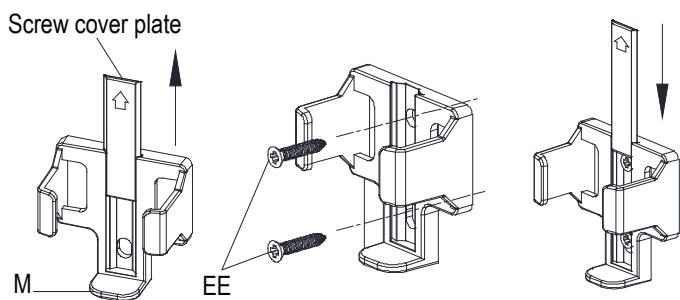

# Assembly - Attaching the Wall Bracket (Optional)

## Mounting the remote control holder

**NOTE:** Screw wall anchors (FF) are included for extra support. The included screws are designed to screw easily into the wall. If you would like a more permanent or secure hold, install the wall anchors (FF) prior to attaching the wall cradle (M) to the wall.

- Slide the screw cover plate up to remove it from the wall cradle (M).
- Position the wall cradle (M) in the desired position and attach it to the wall using the included wall mount screws (EE).
- Slide the screw cover plate back onto the wall cradle (M) to conceal the screws.

# Operating Your Fan

Your fan is equipped with a remote control to operate the fan speed and lights of your new ceiling fan.

The appropriate speed settings for warm or cool weather depends on factors such as the room size, ceiling height, and number of fans.

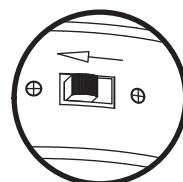

The fan is shipped from the factory with the reversing switch positioned to circulate air downward. If airflow is desired in the opposite direction, turn your fan off and wait for the blades to stop turning, then slide the reversing switch (XX) (located in switch cup) to the opposite position, and turn the fan on again. The fan blades will turn in the opposite direction and reverse airflow.

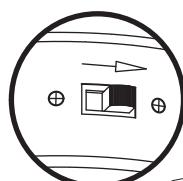

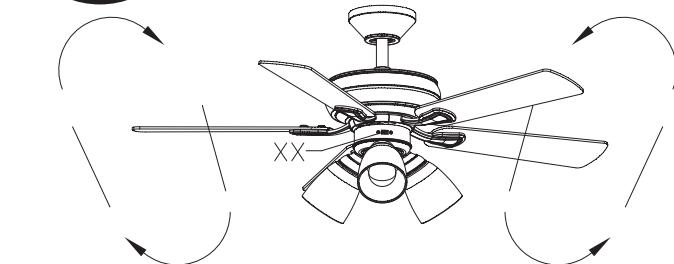

**NOTE:** Wait for the fan to stop before reversing the direction of the blade rotation.

**Warm weather - (Forward)** A downward airflow creates a cooling effect. This allows you to set your air conditioner on a warmer setting without affecting your comfort.

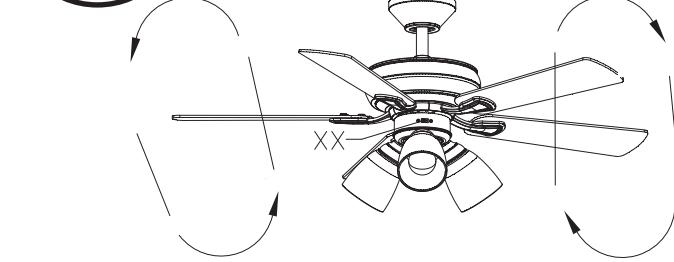

**Cool weather - (Reverse)** An upward airflow moves warm air off of the ceiling. This allows you to set your heating unit on a lower setting without affecting your comfort.

A. Warm weather

B. Cool weather

## USING THE REMOTE CONTROL

1. **Power ON/OFF.** - Press and release the button to turn the fan and light on or off.

Press and hold the button for 5 seconds to use the "walk away time delay"; this will activate the light for 30 seconds.

2. **Fan Speed** - LEDs on the fan speed button will illuminate to the corresponding speed.

- Press and release 1 time - turns the fan on high speed.

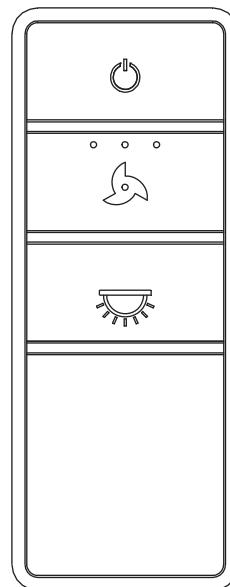

- Press and release 2 times - turns the fan on medium speed.

- Press and release 3 times - turns the fan on low speed.

3. **Light ON/OFF**

Press and release the button to turn the light on or off.

Press and hold the button to activate the dimmer function (as long as you have NOT previously set O/D dip switch in your remote to the "ON" position).

Power ON/OFF

Fan speed

Light ON/OFF

& dimmer function

K

# Care and Cleaning

**WARNING:** Make sure the power is off before cleaning your fan.

- Because of the fan's natural movement, some connections may become loose. Check the support connections, brackets, and blade attachments twice a year. Make sure they are secure. It is not necessary to remove the fan from the ceiling.
- Clean your fan periodically to help maintain its new appearance over the years. Do not use water when cleaning, as this could damage the motor, or the wood, or possibly cause an electrical shock. Use only a soft brush or lint-free cloth to avoid scratching the finish. The plating is sealed with a lacquer to minimize discoloration or tarnishing.
- You can apply a light coat of furniture polish to the wood for additional protection and enhanced beauty. Cover small scratches with a light application of shoe polish.
- You do not need to oil your fan. The motor has permanently-lubricated sealed ball bearings.

# Troubleshooting

Problem	Solution
The fan will not start.	<ul style="list-style-type: none"><li><input type="checkbox"/> Check the main and branch circuit fuses or breakers.</li><li><input type="checkbox"/> Check to make sure the wall switch is in the on position if applicable.</li><li><input type="checkbox"/> Check the line wire connections to the fan and switch wire connections in the switch housing.</li><li><input type="checkbox"/> Check the battery in the transmitter.</li><li><input type="checkbox"/> Ensure you are in the normal range of 10-20 feet.</li></ul>
The fan is noisy.	<ul style="list-style-type: none"><li><input type="checkbox"/> Ensure all motor housing screws are snug.</li><li><input type="checkbox"/> Ensure the screws that attach the fan blade bracket to the motor hub are tight.</li><li><input type="checkbox"/> Ensure the wire nut connections are not rattling against each other or the interior wall of the switch housing.</li><li><input type="checkbox"/> Allow a 24-hour "breaking in" period. Most noises associated with a new fan disappear during this time.</li><li><input type="checkbox"/> If you are using the ceiling fan light kit, ensure the screws securing the glassware are tight. Check that the light bulbs are also secure.</li><li><input type="checkbox"/> Ensure the canopy is a short distance from the ceiling. It should not touch the ceiling.</li></ul>
The fan wobbles.	<ul style="list-style-type: none"><li><input type="checkbox"/> Check that all blade and blade arm screws are secure.</li><li><input type="checkbox"/> Most fan wobble problems are caused when blade levels are unequal. Check this level by selecting a point on the ceiling above the tip of one of the blades. Measure from a point on the center of each blade to the point on the ceiling. Rotate the fan until the next blade is positioned for measurement. Repeat for each blade. Any measurement deviation should be within 1/8 in. Run the fan for ten minutes. If the fan continues to wobble please contact Customer Service and a balancing kit will be sent to you at no charge.</li></ul>

## Información de seguridad

### LEE Y GUARDA ESTAS INSTRUCCIONES.

1. Para disminuir el riesgo de descarga eléctrica hay que garantizar el corte de electricidad en el cortacircuitos o en la caja de fusibles antes de comenzar.
2. Todo el cableado tiene que cumplir con el Código Nacional de Electricidad ANSI/NFPA 70 y con los códigos eléctricos locales. La instalación eléctrica debe hacerse por un electricista calificado con licencia.
3. La caja eléctrica y estructura de soporte tienen que montarse de forma segura para poder sostener con confianza 35 lb (15.9 kg). Usa solo cajas eléctricas aprobadas por UL y marcadas como "Apropiada para sostener ventiladores de 35 lb (15.9 kg) o menos".
4. El ventilador tiene que montarse con separación mínima de 7 pies (2.1 m) entre los bordes traseros de las aspas y el piso.
5. No uses el interruptor de reversa mientras las aspas del ventilador estén en movimiento. Tienes que apagar el ventilador y detener las aspas antes de invertir su dirección de giro.
6. No coloques objetos en la trayectoria de las aspas.
7. Para evitar lesiones personales o daños al ventilador y a otros objetos, ten cuidado al limpiarlo o al trabajar cerca de él.
8. Los diagramas eléctricos son solo para referencia. Los kits de luces que no vienen en la caja del ventilador tienen que estar aprobados por UL y marcados como apropiados para usar con el modelo de ventilador que estás instalando. Los interruptores deben ser interruptores UL de uso general. Para ensamblar bien, consulta las instrucciones adjuntas a los kits de luces e interruptores.
9. Después de concluir las conexiones eléctricas, debes voltear los conductores empalmados hacia arriba y meterlos con cuidado en la caja eléctrica. Los cables deben estar separados, con el cable a tierra y el conductor a tierra del equipo hacia uno de los lados de la caja eléctrica y el conductor sin conexión a tierra hacia el lado opuesto.
10. Antes de la instalación, todos los tornillos de fijación tienen que comprobarse y reajustarse donde sea necesario.

 **ADVERTENCIA:** Para reducir el riesgo de lesiones personales, no dobles los soportes de las aspas (también llamados "bridas") durante ni después de la instalación. No colocar objetos en la trayectoria de las aspas.

 **ADVERTENCIA:** Para evitar posible descarga eléctrica, desconecta la electricidad en la caja principal de fusibles antes de cablear. Si crees que no tienes suficiente experiencia o conocimientos sobre cableado eléctrico, contacta a un electricista con licencia.

 **ADVERTENCIA:** Los diagramas eléctricos son solo para referencia. Cualquier juego de luces opcional debe estar aprobado por UL y debe estar aprobado por UL y marcado como adecuado para usar con este ventilador.

 **ADVERTENCIA:** Para reducir el riesgo de incendio o descarga eléctrica, no utilices este ventilador con ningún otro dispositivo de estado sólido para control de velocidad.

 **ADVERTENCIA:** Para disminuir el riesgo de incendio o descarga eléctrica este ventilador sólo debe ser usado con un control de velocidad con el núm. de pieza AP-3RDL, fabricado por DawnSun Electronic Technology Co., Ltd. Zhongshan.

 **PRECAUCIÓN:** Para reducir el riesgo de lesiones personales hay que usar sólo los tornillos incluidos con la caja eléctrica.

 **PRECAUCIÓN:** Los cambios o modificaciones sin previa aprobación expresa de la parte responsable de su cumplimiento podrían anular el derecho del usuario a operar el equipo.

 **PRECAUCIÓN:** NO usar este ventilador con control de pared o interruptor con regulador de intensidad. Usar un interruptor o control de pared con regulador de intensidad dañará este ventilador.

Este equipo ha sido probado y se determinó que cumple con los límites establecidos para un dispositivo digital Clase B, de acuerdo con la Parte 15 de las Normas de la FCC. Estos límites fueron establecidos para dar protección razonable contra la interferencia dañina en uso residencial. Este equipo genera, consume y puede irradiar energía de radiofrecuencia; si no se instala y usa de acuerdo con las instrucciones, puede causar interferencia nociva a comunicaciones radiales. Sin embargo, no hay garantía de que no ocurrirá interferencia en cierta instalación particular. Si este equipo causa interferencia perjudicial a la recepción de radio o televisión, que puede determinarse encendiéndolo y apagando el equipo, se recomienda al usuario tratar de corregir la interferencia con una o más de las siguientes medidas:

- Reorientar o reubicar la antena receptora.
- Incrementar la distancia entre los equipos y el receptor.
- Conectar el equipo a un tomacorriente en circuito distinto del receptor.
- Pedir asistencia al concesionario o a un técnico de radio/TV con experiencia.

#### PRECAUCIÓN:

Los cambios o modificaciones sin aprobación expresa del responsable de este dispositivo podrían anular el derecho del usuario a operar el equipo.

Este dispositivo cumple con la Parte 15 de las Normas FCC. Su operación está sujeta a las dos condiciones siguientes: (1) Este dispositivo no debe causar interferencia dañina y (2) tiene que aceptar cualquier interferencia que reciba, incluyendo aquella que pudiera afectar su funcionamiento.

# Garantía

El proveedor garantiza de por vida, a partir de la fecha de adquisición por el comprador original, que el motor del ventilador no presenta defectos de fabricación ni de materiales al momento del envío desde la fábrica. El proveedor garantiza que el kit de luces, excluyendo cualquier vidrio, no tendrá defectos de fabricación ni de material en el momento del envío desde la fábrica por un período de tres años después de la fecha de compra por parte del comprador original. El proveedor también garantiza, por un año a partir de la fecha de adquisición por el comprador original, que ninguna de las demás piezas del ventilador, excluyendo las aspas de vidrio o acrílico, presenta defectos de fabricación ni de materiales al momento del envío desde la fábrica. Si el producto es devuelto, aceptamos reparar sus defectos sin cargo alguno o, a nuestra discreción, reemplazarlo por modelo similar o superior. Para obtener servicio de garantía tiene que presentar una copia del recibo como comprobante de compra. Todos los costos de retiro y reinstalación del producto correrán por cuenta del cliente. Los daños a cualquier pieza por accidente, instalación o uso inadecuado, o por montar cualquier accesorio, no están cubiertos por esta garantía. Puesto que las condiciones climáticas pueden variar, esta garantía no cubre ningún cambio del acabado en latón, como óxido, perforación, corrosión, manchas o descascaramiento. Este tipo de acabados en latón tiene una la vida útil prolongada si se lo protege contra las condiciones climáticas cambiantes. Cierta "oscilación" es normal y no debe considerarse un defecto. Cualquier servicio prestado por personal no autorizado invalidará la garantía. No hay ninguna otra garantía expresa. Por este medio y en el alcance permitido por la ley, Hampton Bay queda exonerado de toda garantía, incluso, pero sin limitarse a ellas, aquellas de comercialización e idoneidad para un fin determinado. La duración de cualquier garantía implícita que no pueda exonerarse se limita al plazo especificado en la garantía explícita. Algunos estados no permiten limitaciones sobre la duración de las garantías implícitas, así que es posible que la limitación anterior no se aplique en su caso. El minorista no será responsable por daños incidentales, emergentes ni especiales derivados del uso o funcionamiento del producto, excepto en los casos en los que la ley así lo disponga. Algunos estados no permiten excluir ni limitar daños directos o indirectos, así que es posible que la limitación o exclusión anterior no se aplique en este caso. Esta garantía le otorga derechos legales específicos y es posible que también goce de otros derechos que varían de un estado a otro. Esta garantía sustituye a todas las garantías anteriores. Los costos de envío en cualquier devolución de productos como parte de un reclamo de garantía corren por cuenta del cliente.
