# 1 Preface

## 1.1 Acknowledgements

Dear Customer,

Thank you for purchasing our products, the HD tablet pc in 7 inch. Adopting master chip MT6575, 2\*Cortex-A9 framework and O.S. Android 4.1, CPU speed at 1.0 GHz, the device is easily compatible with third party applications.

With functions like build-in 2G, 3G, WIFI, BT, GPS, FM, Voice call etc, you can achieve wireless communication or use wireless network easily, surfing the internet whenever and wherever possible. And with high-accuracy build-in GPS module (optional), you can achieve navigation function just by installing the mapping software. You can also go through the brand-new entertainment through the functions of build-in multiple sensors, build-in mobile analog television, image pickup etc. So are you ready to embrace the new era of mobile internet entertainment in palm?

This manual will give you a general introduction about all kinds of functions, use skills and notes, please read it before using the device. Thanks.

## 1.2 Notes

### Maintenance

- The device is not waterproof, please keep it dry. In order to avoid the risk of electric shock, do not touch the cable power plug with wet hands.
- Please do not let the device fall onto, rub against or knock against hard objects during use, because this may cause surface scratches on the device, battery damage, data loss or other damage to the hardware.
- Over-voltage, power cable strain and bending or squeezing of the power cable by heavy objects must be avoided to prevent the possibility of overheating or fire.
- Please do not knock, throw or prod on MID. Please avoid dropping, nobbing or curving the device.
- Only qualified maintenance personnel can install or repair the device. Opening the device in any way will invalidate the warranty.

### 1.3 Safety Notices

Please read present section before using the device.

- Please comply with any related restrictions and rules; do not use the device during driving or where blasting operations are in progress.
- Please don't turn on the device on in locations where wireless equipment is forbidden or when the usage of the device will cause interference and possible danger.
- Please comply with any related restrictions and rules, wireless equipment can influence the flight of the plane; please consult the relevant airline company if you intend to use the device on a plane.
- All the wireless equipment is subject to external interference and this can affect its performance.
- Only qualified maintenance personnel can install or repair the device. Opening the device in any way will invalidate the warranty.
- Please keep the device away from strong magnetic fields in order to avoid damage to the product.
- Please don't use the device in a petrol station, or near to fuel or chemicals.
- Please put the device out of reach of children, and please make sure the device used by child only under supervise.
- Some movies, music and pictures are under the protection of copyright, unauthorized usage is deemed as an infringement to the laws of copyright.
  
- When connecting with other devices, please read the user manual for detailed safety instructions. Don't connect the device to incompatible products.
- Never clean the device with any chemicals or detergent, these will damage the product surface and corrode the finish. Never let this product be exposed to a humid environment or rain as the water leaking into the device could disable it to the extent of being beyond repair.

### 1.4 Abbreviation/Term

Abbreviatio	Full name	Explanation
-------------	-----------	-------------

n/ Term		
MID	Mobile Internet Device	Mobile internet terminal
WIFI	Wireless Fidelity	WLAN based on IEEE 802.11b
TF	TransFlash	Micro SD, super mini memory card
HD	High Definition Multimedia Interface	

## **2 MID Introduction**

### **2.1 Ready to use**

#### **Battery Charging**

Charge the battery firstly before initial use.

##### **2.1 Please charge the MID with our original power adapter.**

Note: Please use the original accessories and battery provided with the device, do not use the incompatible products in case of damage unexpected, any damage of problem result from this could be beyond of our range of maintenance.

## 3 Quick Guides

### 3.1 Packing List

Components	Quantity
MID Device	1
Leather Case(optional)	1
Keyboard/Mouse (optional)	1
TF (Micro SD) Card (optional)	1
Power Adaptor	1
Earphone(optional)	1
USB Cable	1
USB HOST tie line (optional)	1
Specification (optional)	1
User Manual (optional)	1
CD-ROM	1
Warranty Card (optional)	1

### 3.2 Product appearance

### 3.3 Instructions on Keys

Symbol	Name	Description
A	Rear Camera	Static and dynamic camera
B	flashlight	Flash lamp (optional, not for all models)
C	Microphones hole	Recording microphone
D	Speaker	For music or movie

E	Front Camera	Static and dynamic camera
F	receiver	Telephone receiver
G	POWER	Short press this button to enter sleeping/wake up mode, press long to switch ON/OFF
H	Volume -	Decrease volume
I	Volume+	Increase volume
J	HD	1080P output jack
K	MIC USB port	MIC_5PIN USB Port
L	Stereo Earphone Jack	Stereo Earphone Jack
N	SIM Card slot 1	SIM Card slot 1
O	SIM Card slot 2	SIM Card slot 2
P	TF card Slot	TF (Micro SD) Card Slot
Q	Television antenna	Signal receiving antenna for analog TV or ISDB-T digital TV (Optional)

### Function Icons

### Icons Description:

Icon	Description	Icon	Description
	Back to main menu		downloading
	Power status		Web search

	Return		Language search
	Recently viewed		Functions menu
	WIFI Status (blue indicates Wi-Fi connected)		Network status (blue indicates 2G/3G network connected)
	New e-mail		New message
	Bluetooth signal		Flight mode
	Under USB connection		Under USB debugging

### 3.4 Switch on/off

#### Switch on and unlocked:

When the device is in powered OFF mode, press and hold the Power key for 3 seconds to enter the Android startup process. The device will take about 100 seconds to enter the system desktop, with the display in locked mode, please press and move the  icon by the white circle, the display will unlock automatically, see the image below:

#### Switch off:

1. When the device is in use, press and hold the POWER key for 3 seconds, the screen will display the power off interface, choose the power off option to confirm your selection and the system will shut down automatically.
2. Note: When the device is running low on battery power, it will sound an alarm and then shut down automatically if it isn't plugged into a power source to start charging. If the device cannot start up please check if the battery power is too low by charging the device

### 3.5 Power Saving Mode and Locked Mode:

#### Display turn off automatically when the device is under no usage status

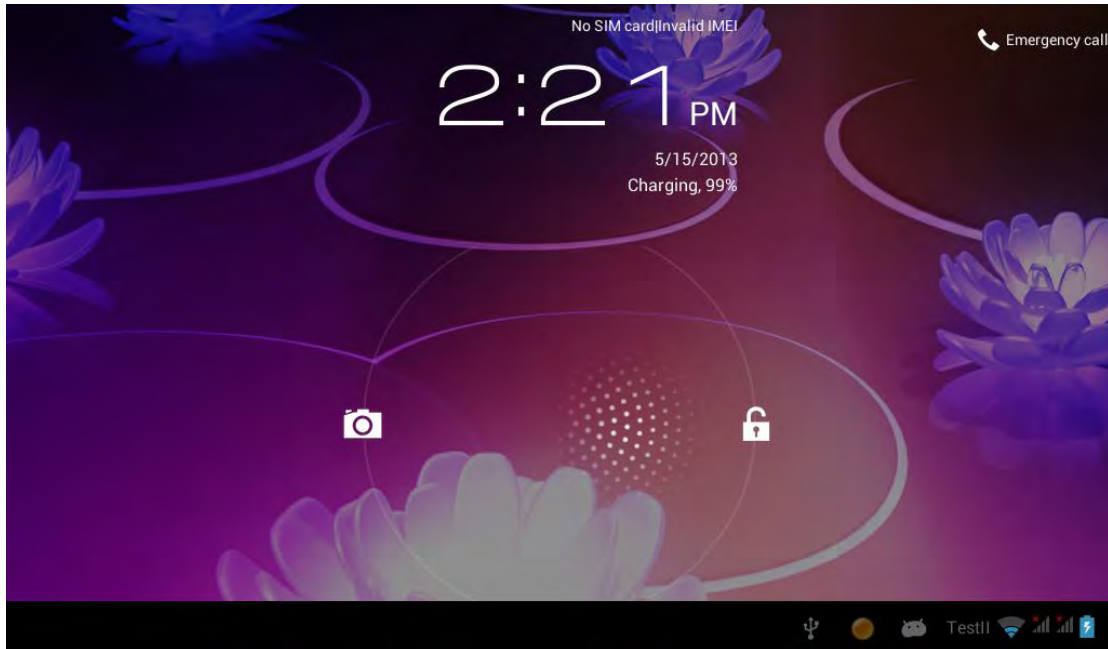

- (1) Starting power saving mode, display will turn off automatically when device not in using.

(2) Short press the “POWER” key when the device is in use will make the system enter SLEEP power save and locked mode.

### Turn on the screen under inactive state

Under the power saving mode, the display is just turned off and showing a black screen. This means that music play, movies play etc. will still continue to run.

Short press the power key, the system will return to locked mode, unlock by pressing and moving the icon as pic show.

Pic. 3.1

## 3.6 Operation of touch panel

### How to operate?

You can browse over the user interface, main menu or applications by kinds of ways:

#### Click:

Just touch and click, when you're going to input or choose applications on the main interface.

#### Press on:

Press on the icons or shortcut icons to open program you'd like, like textbox & linkage.

#### Slide

To move quickly on screen vertically or horizontally with your finger

#### Drug

Press on with certain pressure before drugging, and then keep pressing

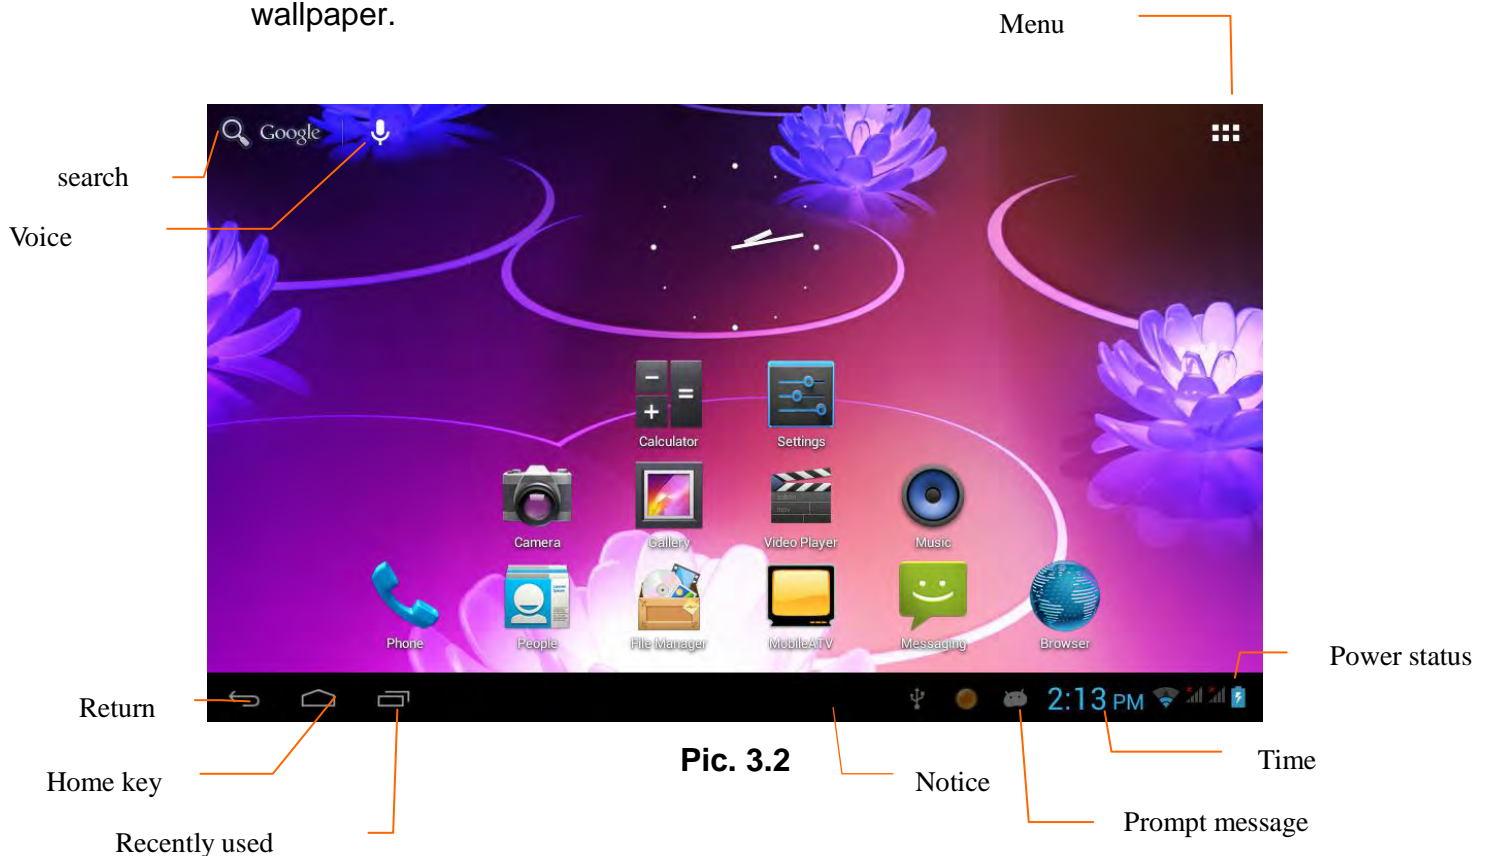

until the icon be drugged to the target place.

### Rotate

To most interfaces, for example, the input text and music interface, the direction can be changed easily just by swaying the device

## 3.7 Main Interface

Main interface as pic.3.2, press blank place for seconds, you can use the interface of applications, shortcut icons or user-defined page as wallpaper.

Pic. 3.2

### Extend out of main interface

Main interface can extend beyond of interface to provide more space for new-added shortcuts or gadgets. Pressing the blank place of interface, slide to left or to right quickly to extend to left or right of outsider interface of screen and there are two extensible interfaces available, see pic.3.3.

**Pic. 3.3**

## Shortcut Icons

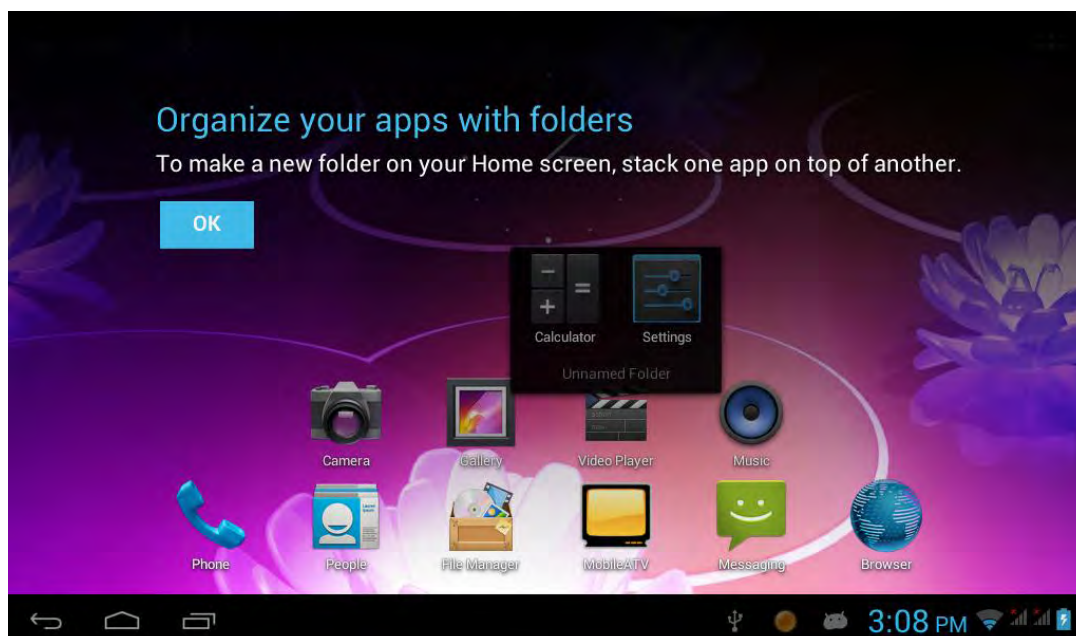

### Build a folder on desktop

- (1) Drag and overlie icons into one, see pic3.4.
- (2) click the overlying icon, you'll find all icons drugged inside it. See pic.3.5.

Click the unnamed folder at lower edge of black pane, hidden keyboard shows up, and then you can rename the folder. You can also change the place of icons inside by long pressing the icons.

**Pic 3.4**

**Pic 3.5**

### **Delete icons on desktop**

- Long pressing the icon to delete, a icon  will show up.
- Drag the icon to right place above  until the drugged icon is in red.,

### **Change desktop wallpaper**

- Long pressing the blank place of main interdace, a window pops up.
- Click gallery or system defaultt wallpaper and choose the pic you want.

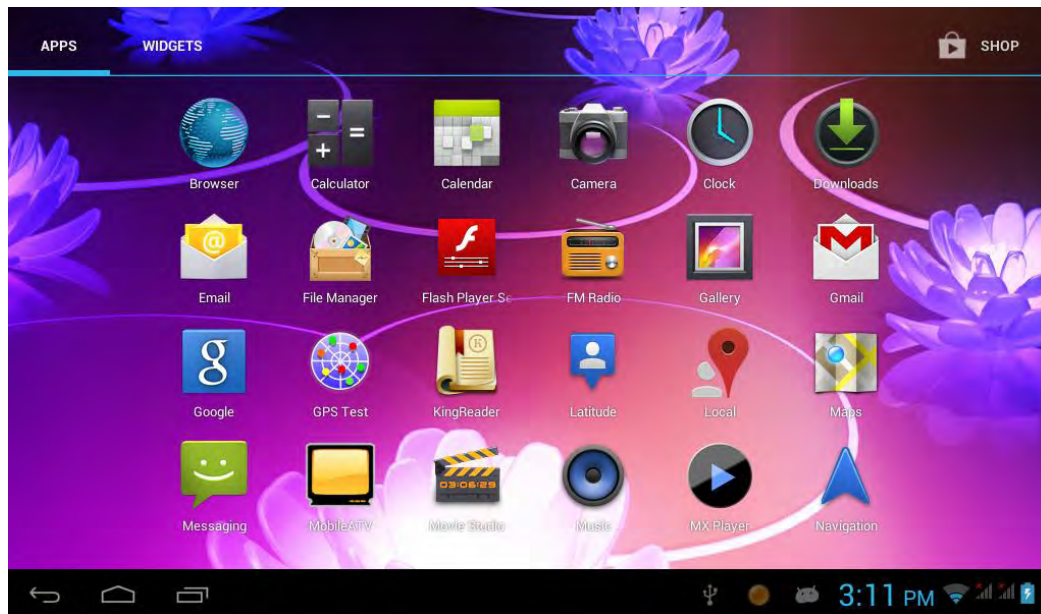

### **Voice search**

- Touch the icon .
- Operate accordingly the goggle options.
- Set up your target languagea according to the prompting of pop-up window, and confirm.
- Speak out towards to the mic. what you need, and result list will show up.

Note: Please make sure your network is connected before search.

## 3.8 Apps

Click  on the top right corner of the screen, see pic 3.2, then choose your target app after entering into the main interface, see pic 3.6.

Pic. 3.6

## 3.9 USB Connect

### Storage setup

Set up the storage mode before transfer files. Connect MID and computer with USB cable.

- Open the notice interface, (refer to chapter 2.3- Condition and Status of MID) .
- Clicking **USB Connected**, open the icon of USB Storage, see pic.3.7.
- USB connected successfully

pic 3.7

### Copy files to memory card

- Connect MID and computer with USB cable.
- Set up storage mode.
- Opening the icon of *my computer*, check *removable disk(x)*.
- Find out the target files and copy them to this removable disk(x).
- Click “close USB Storage device” after copy finishes.

Note: You get no access to the memory card in MID when the MID is under USB Connection, but it is workable once USB Connection be breaking.

## 3.10 Input Text

### Screen Keyboard

When you need to input or edit , android keyboard will show up.

### Choose input method

- Open application setup.
- Click Language and input
- All input installed will list on text setup.
- Choose your target input.

### Input Method use and switch

**Pic 3.8**

1	Capital and small letter
2	Digital input
3	Insert whitespace
4	Execute
5	Delect character on the left of cursor and long press to delect all.

### 3.11 Use Skills

#### Widget interface

Click “widget” or slide on the screen to left to enter into widger interface. Long press the widget to creat a shortcut, and you can enter related app quickly just through the shortcut icon on desktop.

#### Creat a shortcut icon on desktop

After enter into program interface or widget interface, longpress any icons, a shortcut icon will be created on the desktop, or press on and drug the icon to desktop.

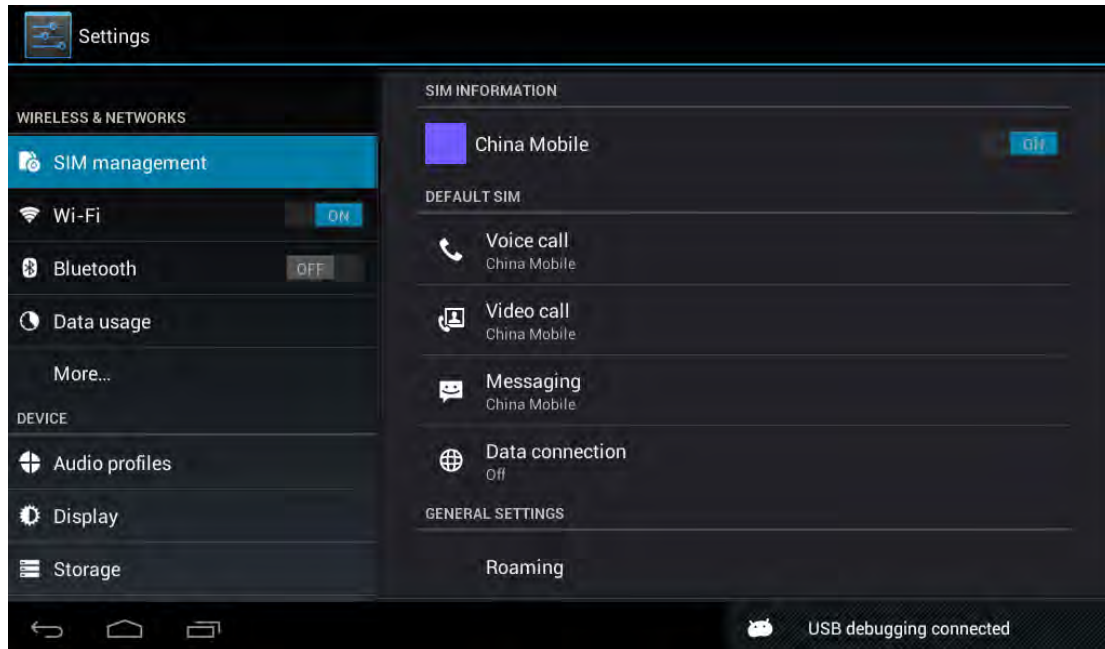

Note: widget shortcut will not be created if there is no enough space left for main interface.

## 4 General Setup

### 4.1 SIM Card management, WIFI & Network

#### SIM Card management

Through SIM management, SIM setup can achieve, for example, turn on/off SIM or turn on/ off data connection. As pic 4.0

Pic 4.0

#### Connect WIFI

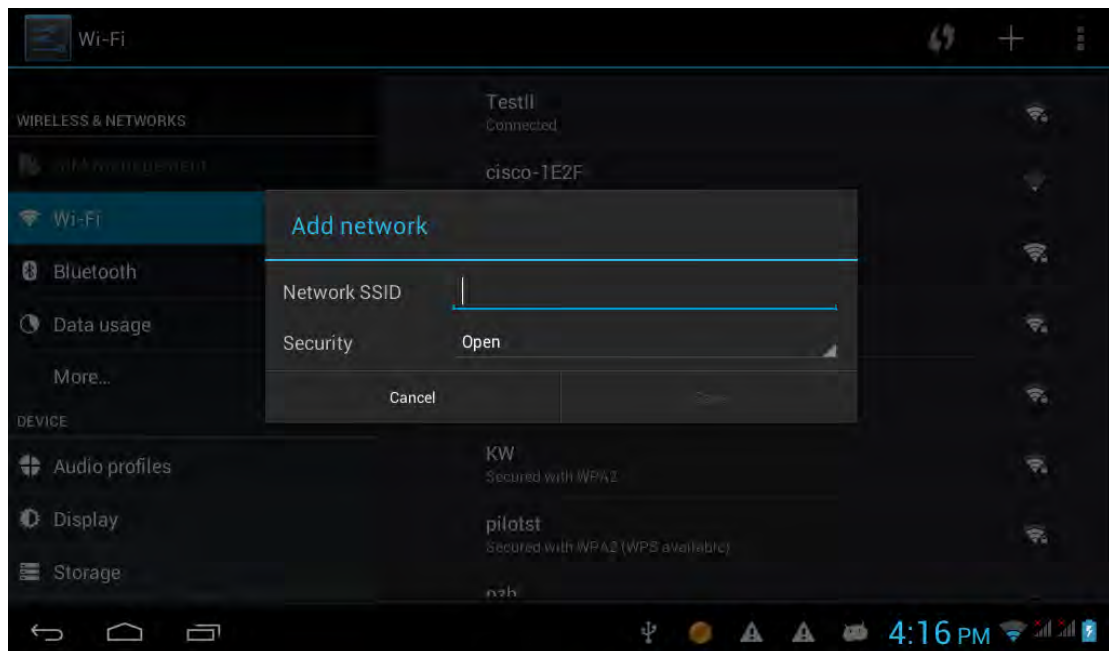

- Choose setup application on main interface.
- Turn on **WLAN**, MID will scan automatically available wifi network. See pic 4.1.
- Choose target wifi network, inputting password if requested, click "connect"

**Pic. 4.1**

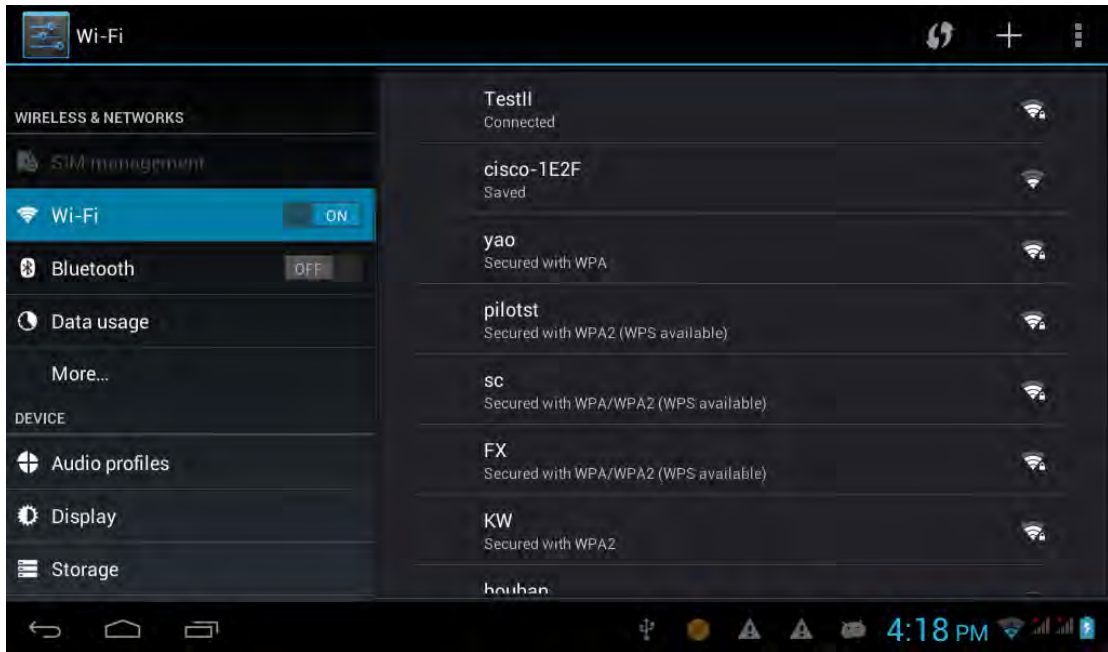

### Add Network

- Click icon  top right at screen, see pic4.2.

**Pic. 4.2**

- Input network SSID, name of target network, and click “save”.
- Click user name saved and click “connect”. As pic 4.3

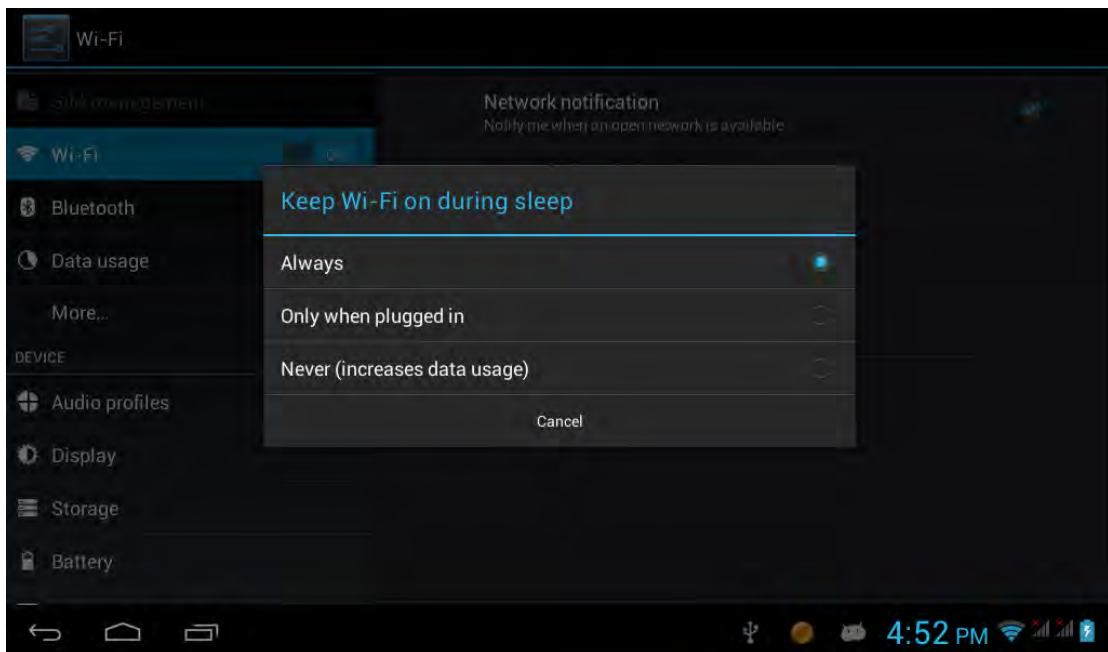

**Pic 4.3**

**WIFI Status.**

Under WIFI Status turned on, user can see the notice at bottom right corner when WLAM network available.

**Connect WLAN during sleep mode.**

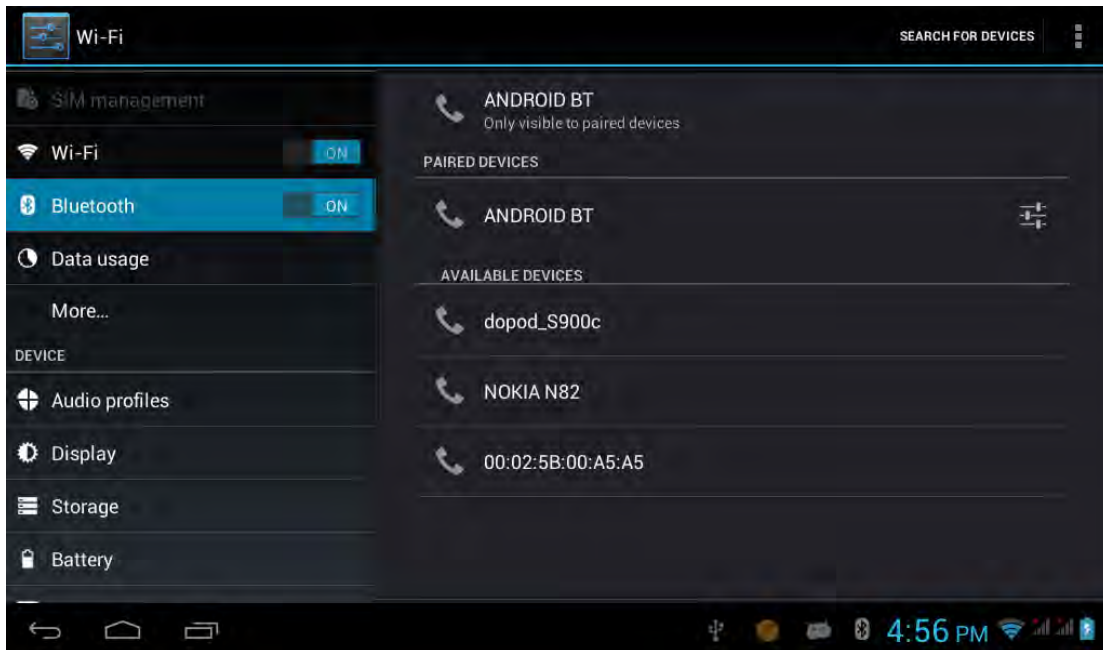

- Click icon  top right at screen, see pic4.3, and choose high class mode.
- Click “keep Wi-Fi on during sleep” and choose accordingly the option prefer to. See pic4.4.

**Pic 4.4**

## 4.2 Bluetooth

- . Choose *settings* application on main interface.
- Turn on Bluetooth as shown below.
- The device will find the nearby device automatically when you click “search for devices”. See pic. 4.5.

pic 4.5

- Click the target device name, input the password and choose “pair” for sure after “Bluetooth pairing request” window pop up.
- Click icon , entering into the interface see pic4.6, and then you can operate accordingly. Target device name can be renamed if need.

pic 4.6

## 4.2.1 Bluetooth setup

### Rename

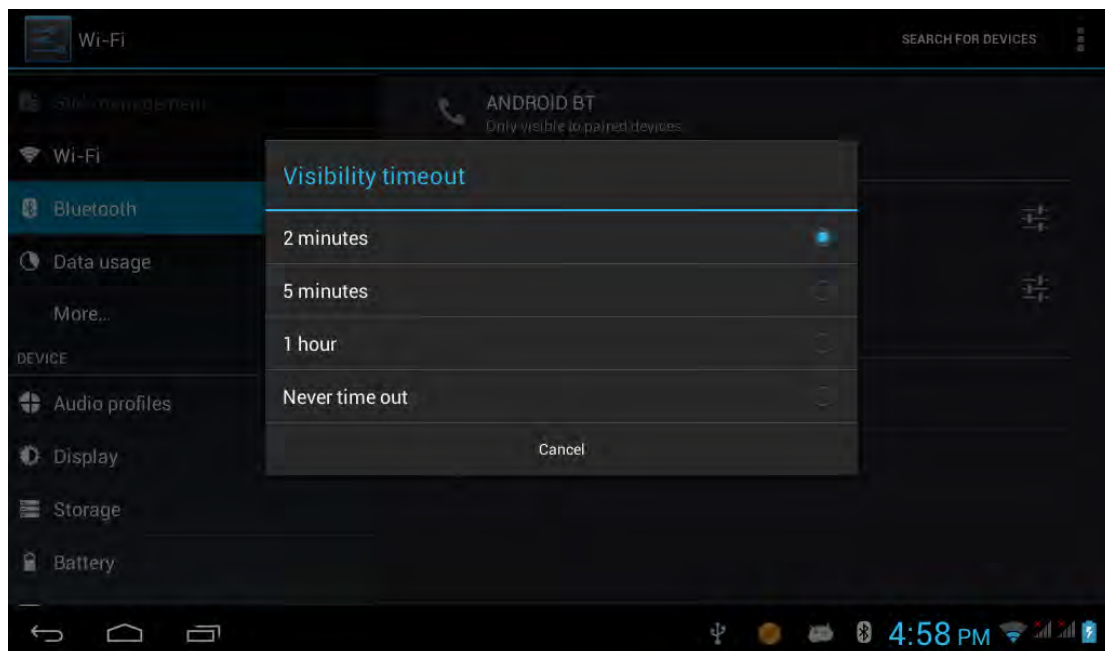

Click icon , as pic. 4.7 shown, choose “rename tablet” and change to the name as what you want.

Pic 4.7

### Visibility Timeout

As pic. 4.7 shown, click “visibility timeout” and choose time options accordingly. See pic4.8. (Note: visibility timeout refers to the time setup of device be visible.

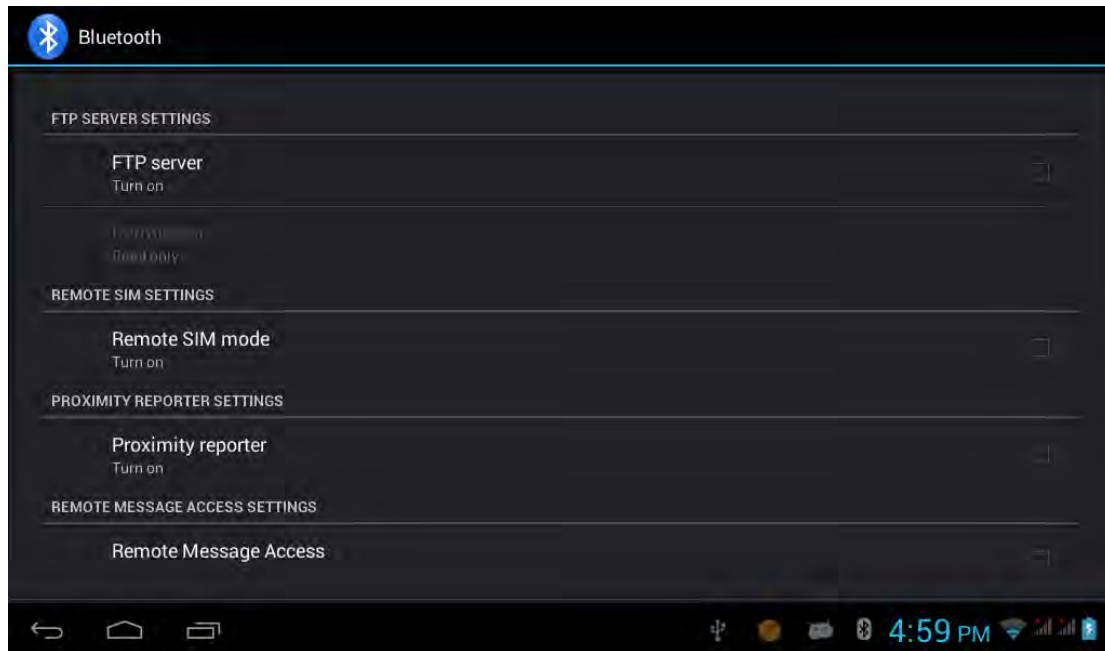

pic4.8

### Show received files

As pic. 4.7 shown, choose “show received files” and you can see all the files download or upload.

## Advanced setting.

As pic. 4.7 shown , choose “Advanced setting” and set up accordingly, as pic4.9.

**Pic 4.9**

- **FTP Server**

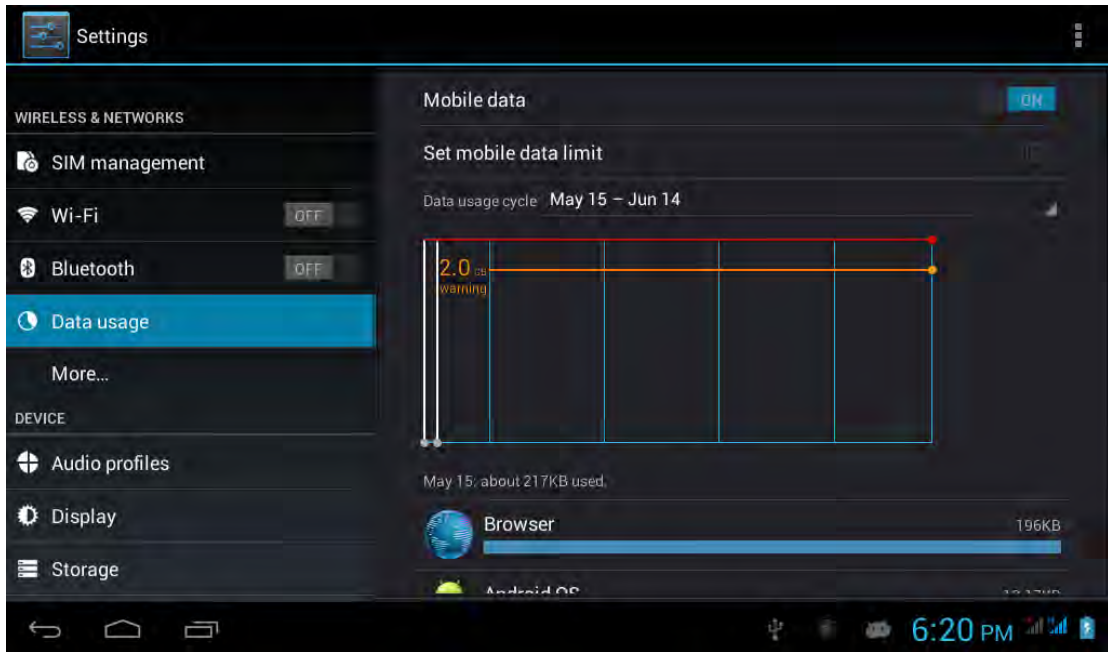

Turn on FTP Server means access to server-side files and operation by client-side is allowed.

- **Proximity reporter**

Under proximity reporter turn on, the device will prompt by make a noise when distance between the two devices is too far away or when disconnect.

## 4.3 Data Usage

**SIM Card data usage, see pic.4.10**

pic4.10

### WIFI data usage

Click icon , Choose "Show Wi-Fi usage", see pic. 4.11.

pic 4.11

## 4.4 More...

### 4.4-1 Airplane Mode

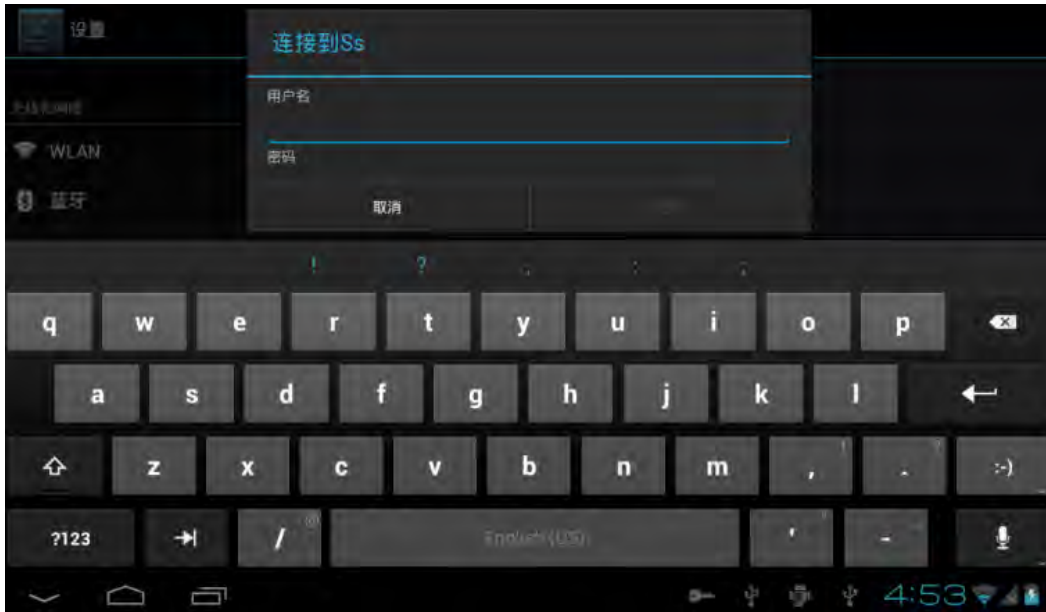

Airplane mode is function for quick turn off of WIFI & SIM Card. WIFI & SIM card are out of reach under airplane mode, but it recovers once airplane mode turn off

#### 4.4-2 VPN

Open VPN and add **VPN network**. Input network name and related server address, and click “save” for sure.

Click VPN created , as pic.4.13 shows. Input VPN Account & password accordingly, and click “connect” to finish.

Pic 4.13

#### 4.4-3 Tethering & portable hotspot

##### Tethering & portable hotspot

- Click the app “settings” on menu interface.
- Make sure the device is under wifi connected. Choose More... and click “Tethering & portable hotspot”.

Pic. 4.14

**Pic 4.15**

- Click “keep Wi-Fi hotspot on” and choose suitable period.
- Click icon “return”, opening portable Wi-Fi hotspot and click “setup Wi-Fi hotspot”.

**Pic 4.16**

- Set up password for network encryption, and password should no less than 8 digit.

#### 4.4-4 Mobile Networks

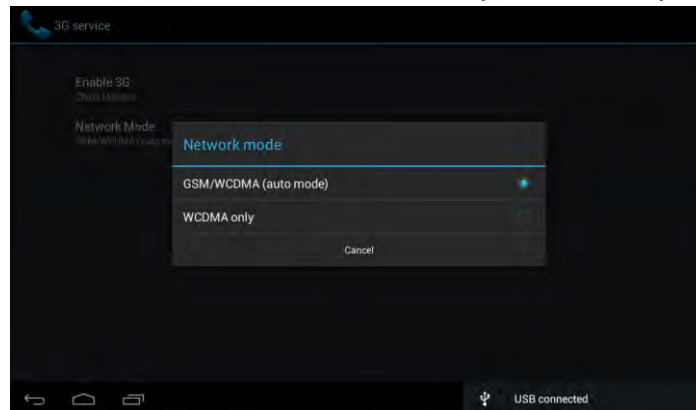

- **Data enabled**  
Under data enabled, you can use 2G/3G network through the SIM card.
- **Data roaming**

Under data roaming, you can surf the internet by SIM card in the situation of roaming.

This data roaming means roaming between operators ,but not areas.

- **Network mode**

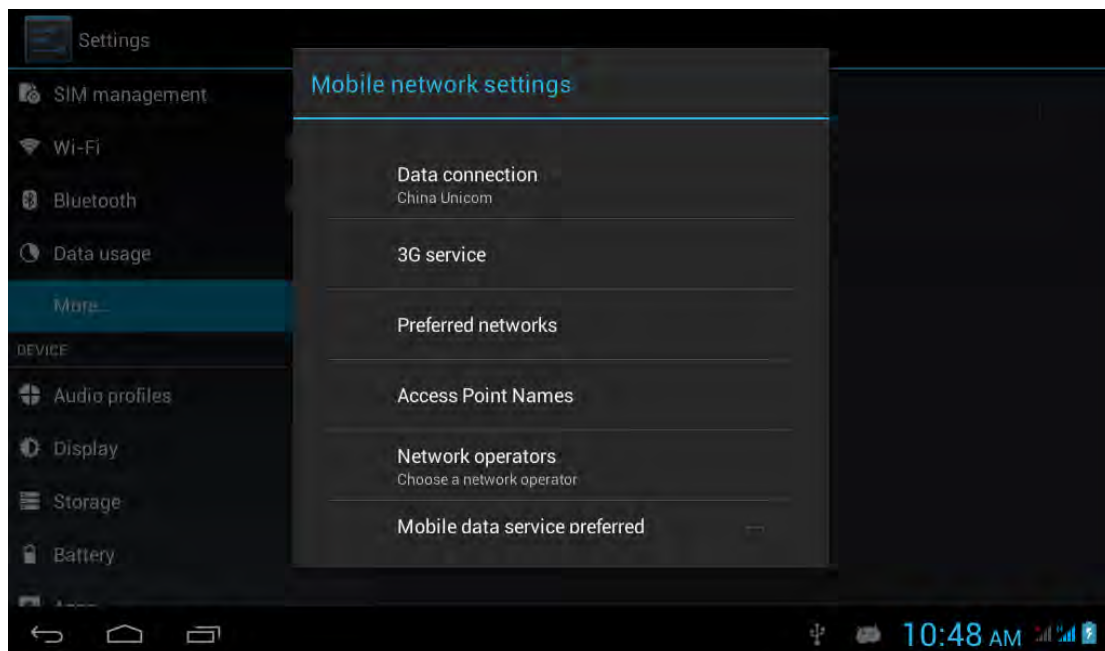

Choose 2G/3G frequency channel. GSM means 2g network, this device support GSM 850/900/1800/1900MHz and 3g WCDMA 2100MHz. 3g frequency channel WCDMA 850MHz/900MHz/1900MHz is optional. See pic 4.17.

Pic 4.17

**(1) Access Point Name(APN)**

Click *Mobile network settings*, see as below picture 4.18:

pic 4.18

**(2) Access point name (APN)**

Choose the corresponding connection method see as below picture 4.19:

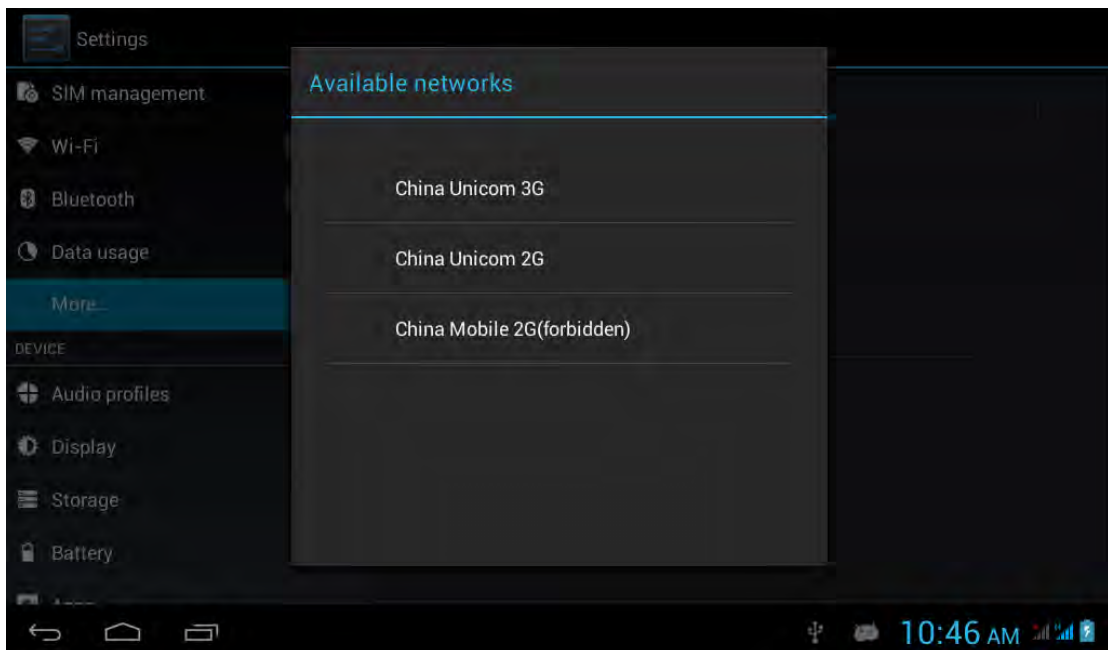

**Pic 4.19**

Notes : (CMWAP transfers the data via GPRS, it can only visit wap webpage, but CMNET supports www browser on mobile internet, it can log in the similar web page the same as we surfing on the computer. Meanwhile, the charges for them are different.)

### (3) Network operator

Click operator, tablet system will automatically search available networks GSM and WCDMA, see as below picture 4.20;

**Pic 4.20**

#### 4.4-5 GPRS data priority mode

When open the GPRS data priority mode, it will give preference to your use of the telephone network.

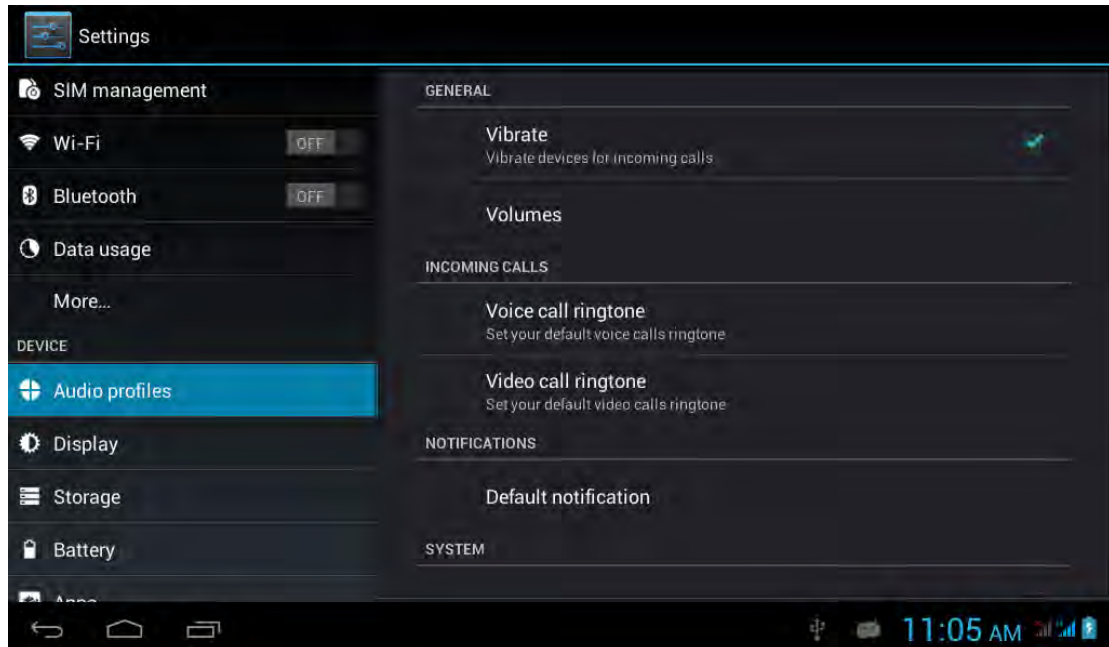

## 4.5 Audio Profiles

Open *setting* and choose *Audio profiles* and you can choose different mode for setting see as below picture 4.21;

**Pic 4.21**

click *General* and access to setting see as below picture 4.22;

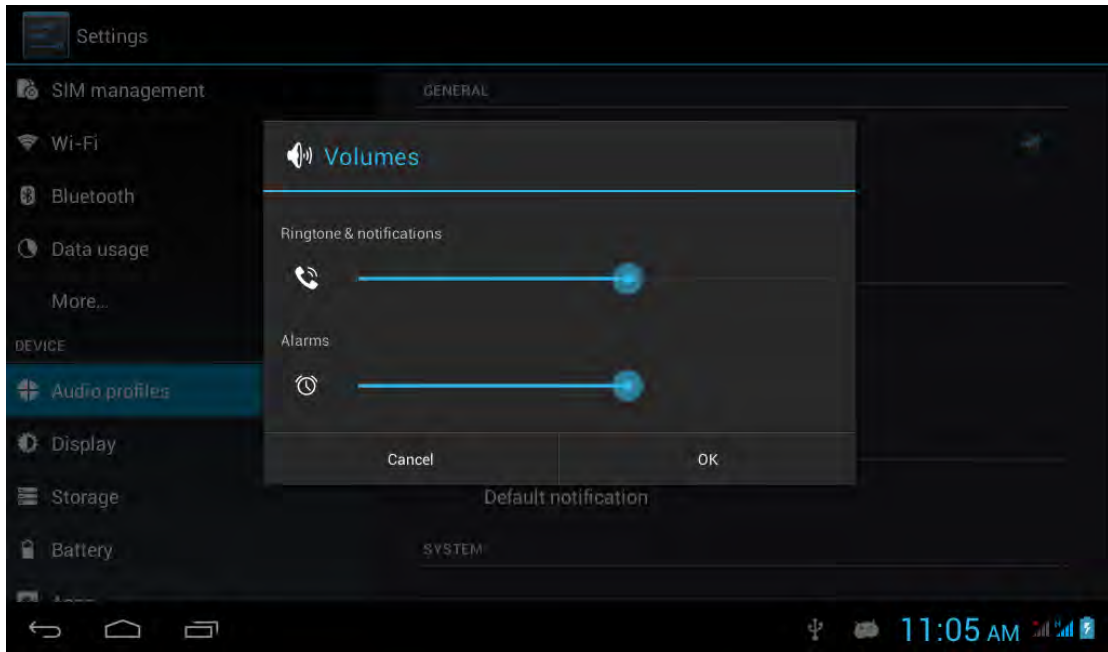

**Pic 4.22**

### **Vibrate**

Click *Vibrate* which can realize the vibration effect on MID when you dial phone call, see as above picture:

### **Volumes**

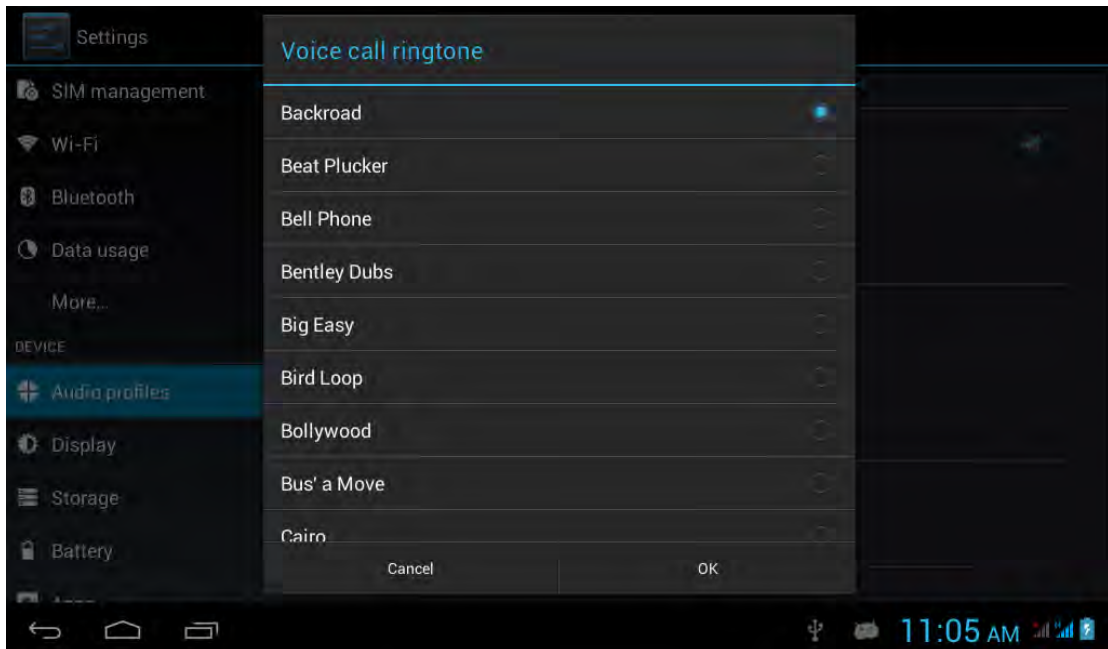

Click *Volumes* which can control the volumes of Ringtone & notifications, alarms, see as below picture 4.23;

**Pic 4.23**

### **Voice call ringtone**

Click *voice call ringtone* and you can choose the different ringtone as you like, see as below picture 4.24;

**Pic 4.24**

### **Video call ringtone**

Click *video call ringtone* and you can choose different mode of ringtons, see as below picture 4.25;

**Pic 4.25**

## **System**

It can be checked by ON/OFF, “Dial pad touch tones”, “Touch sound”, “Screen lock sound”, “Vibrate on touch”.

(Notes: except *standard, silent, meeting, outdoor mode* can only be chosen but not be set.)

## **4.6 Display**

### **4.6-1 Brightness**

- Click *setting Apps*
- Click *Display* → *Brightness*.
- When pop-up brightness Settings panel, you can drag the brightness slider to adjust degree between dark and bright. See as shown picture 4.26;

**Pic 4.26**

- Once you set up the brightness, click *ok*.

#### **4.6-2 Wallpaper**

- Click *Setting Apps*
- Click ***Display*** → ***wallpaper***
- You can choose the wallpaper as you like, such as *live wallpaper - gallery* (custom) - *wallpaper* (system) - *video wallpaper*, as shown in picture 4.27;

**pic4.27**

#### **4.6-3 Automatic rotation**

System as the default open, when closed, the system will not rely on gravity induction to shift MID panel.

#### 4.6-4 Sleep

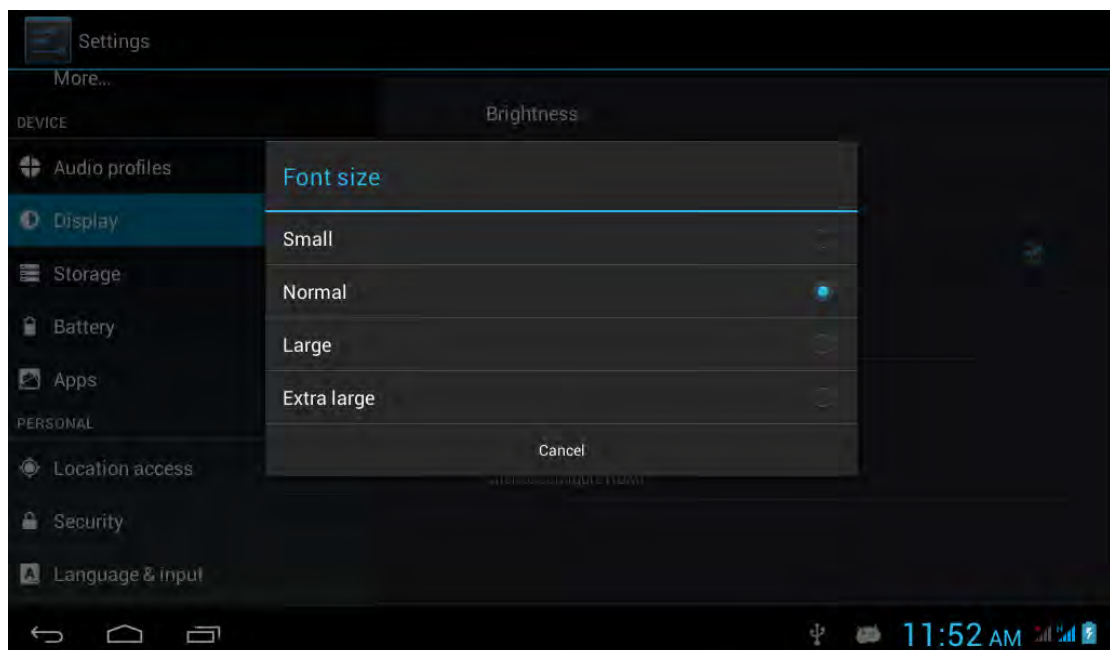

- Click *Setting Apps*
- Click *Display*
- Click *Sleep*
- When pop-up the page of sleep time setting, you can choose the sleep time as you like. See as below picture 4.30;

pic4.30

#### 4.6-5 Font Size

Click *Font Size* which can adjust font size of the MID, see as below picture 4.31;

**Pic 4.31**

**4.6-6 HD Setting**

- When connect the HDMI Cable, in the lower right corner it will show HDMI Cable has accessed in.
- Click HD Setting, you can see below picture 4.32;

**Pic 4.32**

- **. Video**

Once you open video it can make HD audio output.

- **Never**

Click *Never*, MID will not turn into sleep.

- **Video resolution**

Click *Video resolution* which can adjust the resolution of video, see as shown picture 4.33;

**Pic 4.33**

## 4.7 Storage

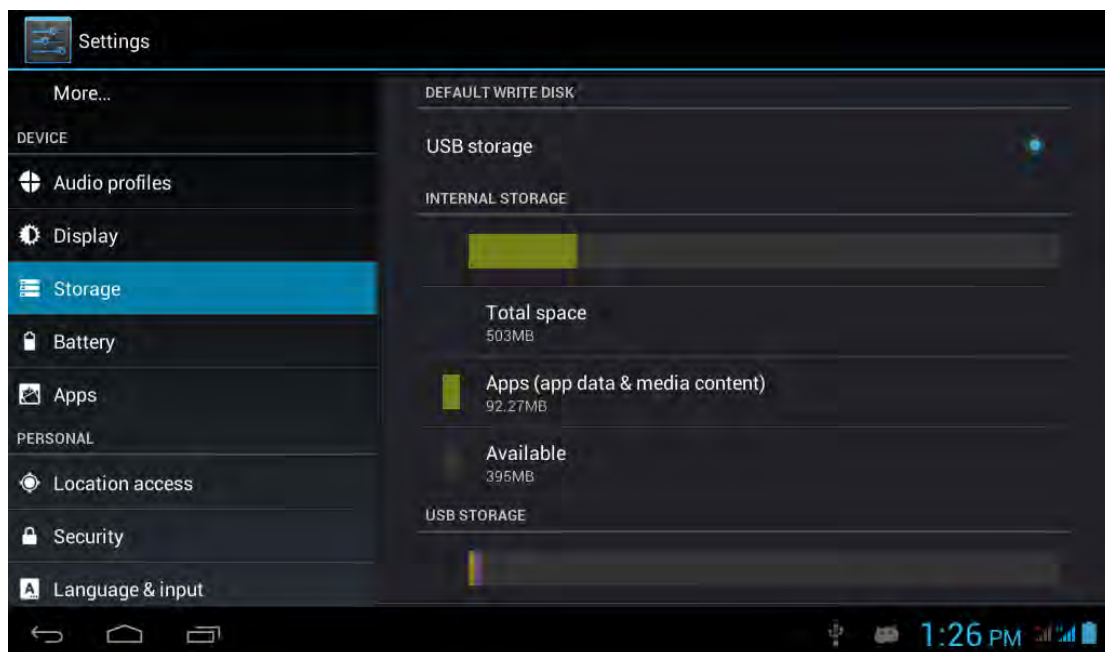

Open *setting* Apps→*Storage*→*DEFAULT WRITE DISK*, you can choose the preferred installation space when you install new applications.

Check available space of SD Card and MID.

- Enter into *setting* Apps
- Click *storage* to check total space.

### Internal storage

Internal storage which is the system files storage space but can not check the content, see as picture 4.35;

Pic 4.35

### USB STORAGE

USB Storage is MID NAND memory. If want to check the storage content you can go to *main menu*→*files managements* for checking.

**Pic 4.36**

### **SD Card**

In the storage you can check the SD Card total space, available, unmount SD Card and Erase SD Card, and see as below picture 4.37;

**Pic 4.37**

### **Remove SD Card safely**

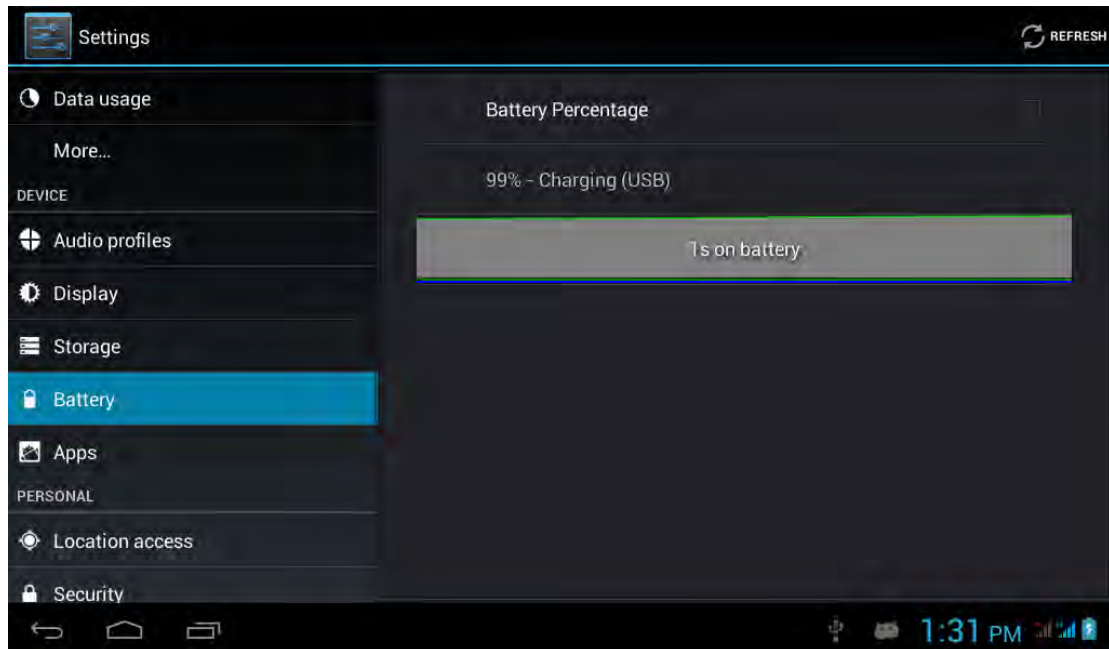

- **Click** *setting* Apps
- **Click** *storage*
- **Click** *uninstall SD Card*

- Now you can remove the SD Card safely.

Notes: If you remove the SD Card correctly, it can effectively protect it and increase the usage life of the SD Card.

## 4.8 Battery

Click *settings*→ *battery* and then to check the battery using status as shown below:

Pic 4.38

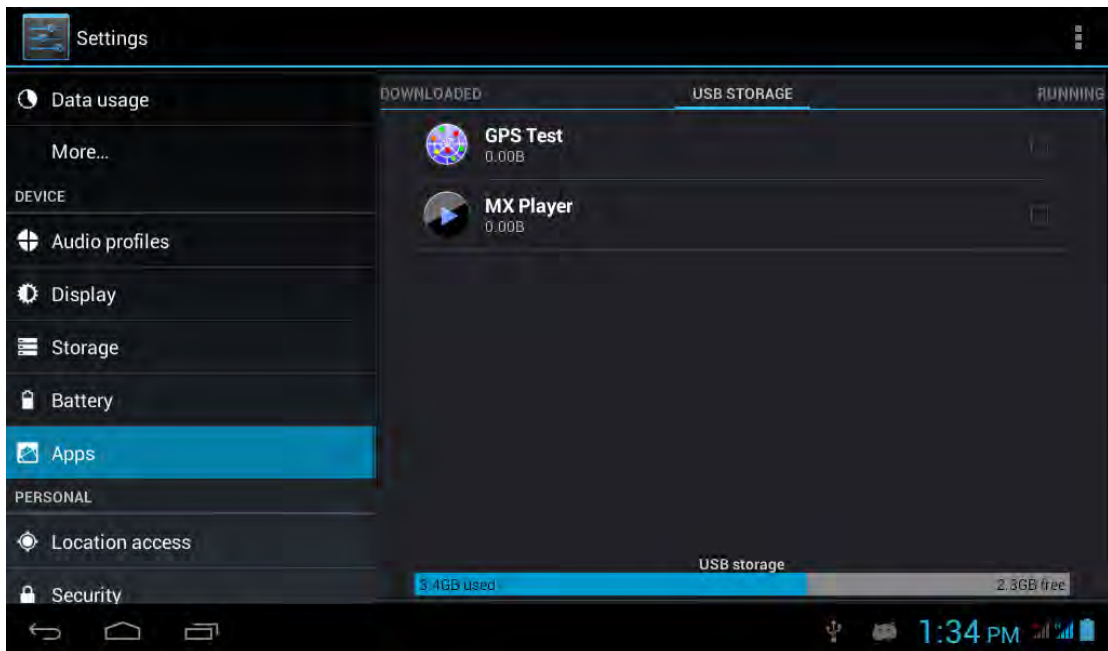

## 4.9 Apps

- Please select setting in the application list.
- Choose application and enter and then you can manage and delete the installed applications. In the lower left corner you can check the system storage space, see as below picture 4.39;

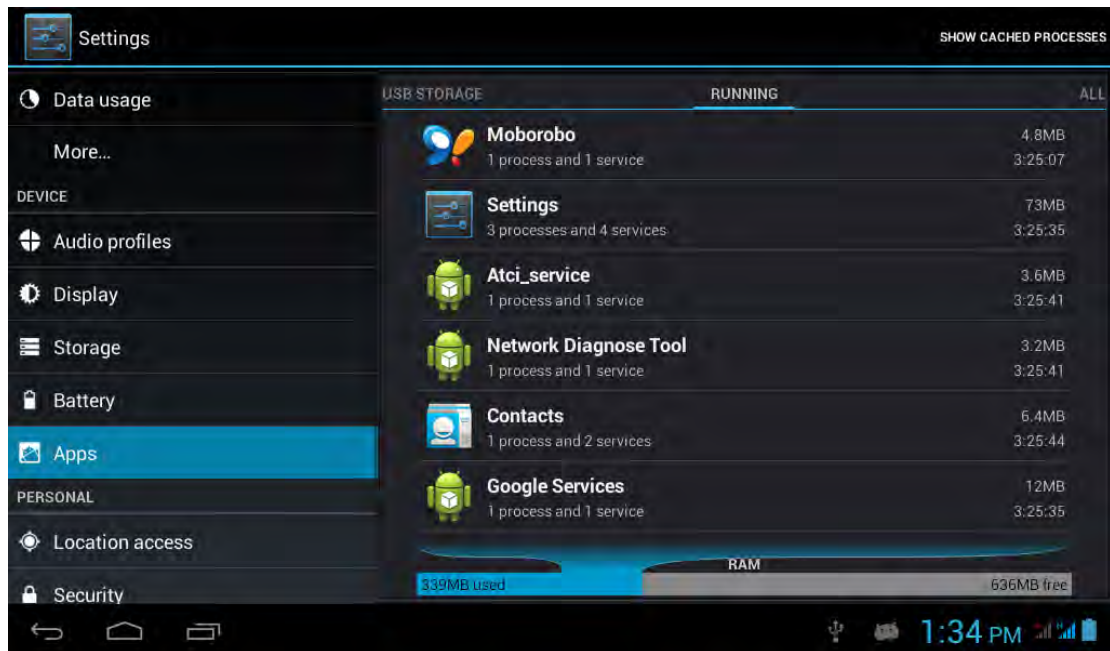

**Pic 4.39**

- Check *internal storage space*; see as below picture 4.40;

**Pic 4.40**

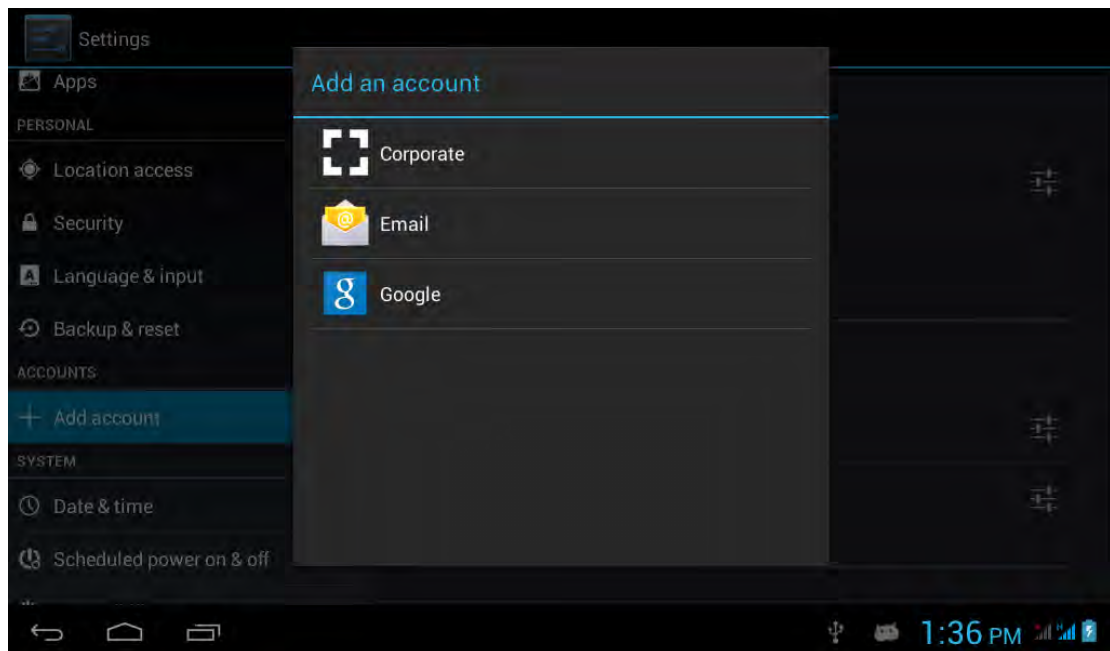

- Check the running applications of their usage and available space see as below picture 4.41;

Pic 4.41

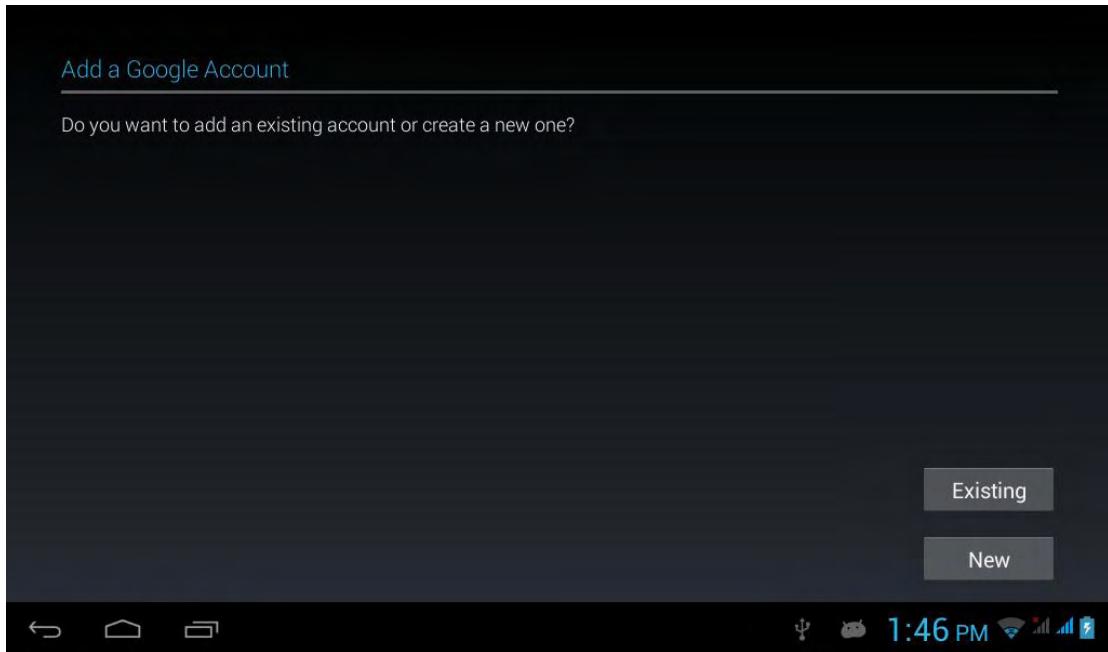

## 4.10 Account

- Click *setting*
- Click *Add account*, see as picture 4.42;

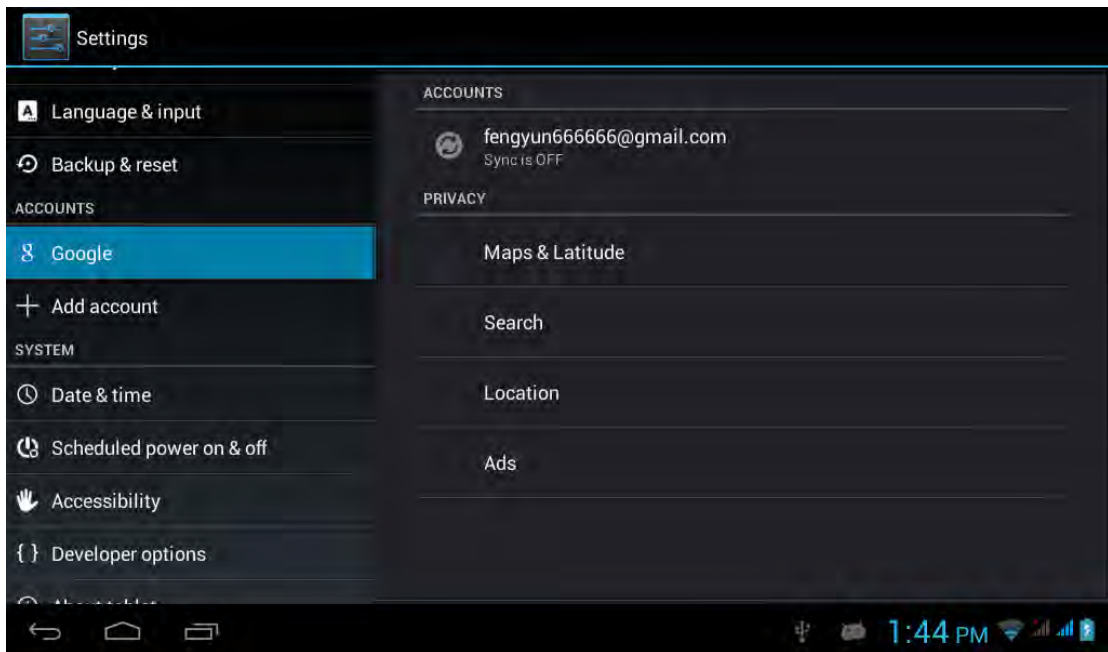

Pic 4.42

- For example tap *Google*, see as picture 4.43;

**Pic 4.43**

- Once login successfully you can open synchronization function, see as picture 4.44;

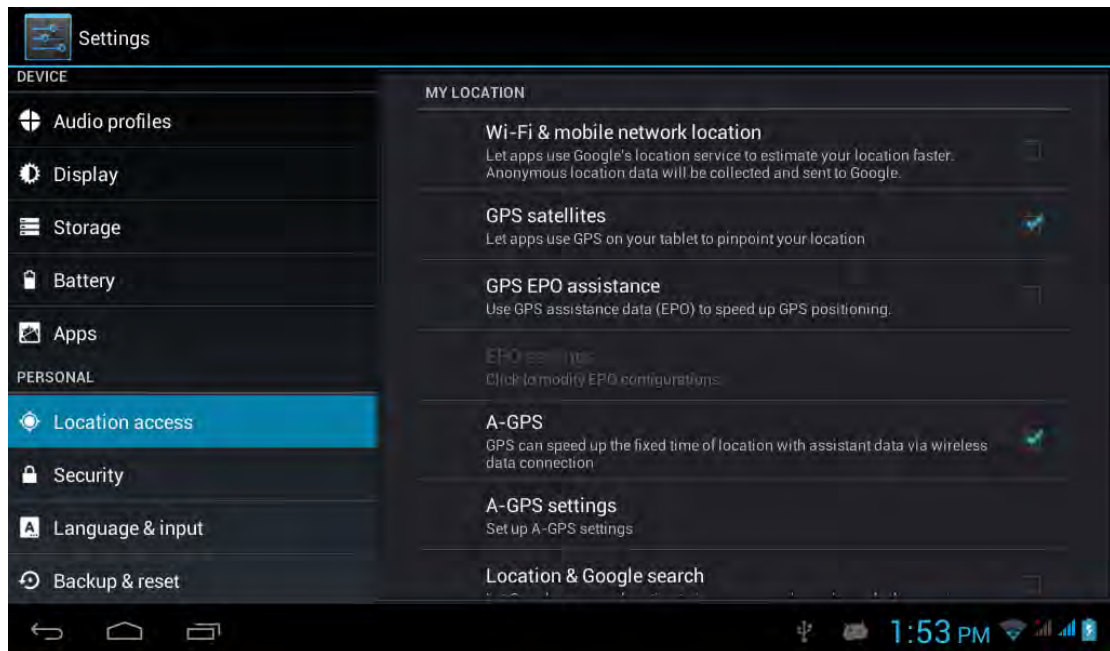

**Pic 4.44**

## 4.11 Location access

Click *setting* and choose *location access*, see as picture 4.45;

**Pic 4.45**

- **Google Location**  
When you open Google location, you can fix MID position via WIFI
- **GPS satellites**  
Use GPS on your MID which can pinpoint your location
- **GPS EPO assistance**  
Use GPS assistance date (EPO) to speed up GPS positioning, but it need insert SIM Card and generate lots of traffic.
- **EPO Setting**  
Tap EPO Setting to check EPO position date and whether it automatically downloads.

**Pic 4.46**

- **GPS**  
GPS can speed up the fixed time of location via internet when used

- **A GPS.**

Tap A-GPS settings and you can see below picture 4.47;

**Pic 4.47**

- **Disable after Reboot**

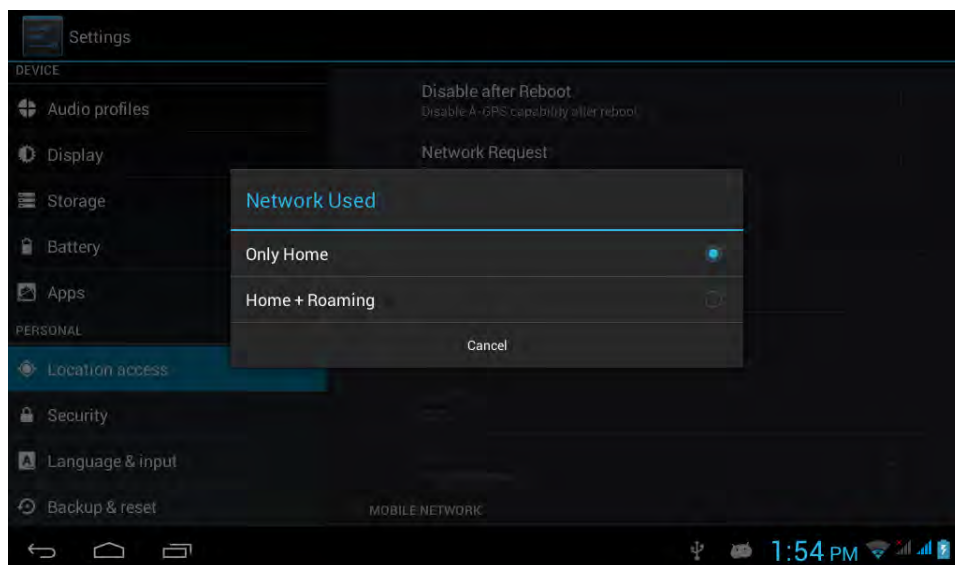

Choose disable after reboot the A-GPS will automatically closed when you reboot MID.

- **Network Request**

Use network request to get your location via internet

- **Network Used**

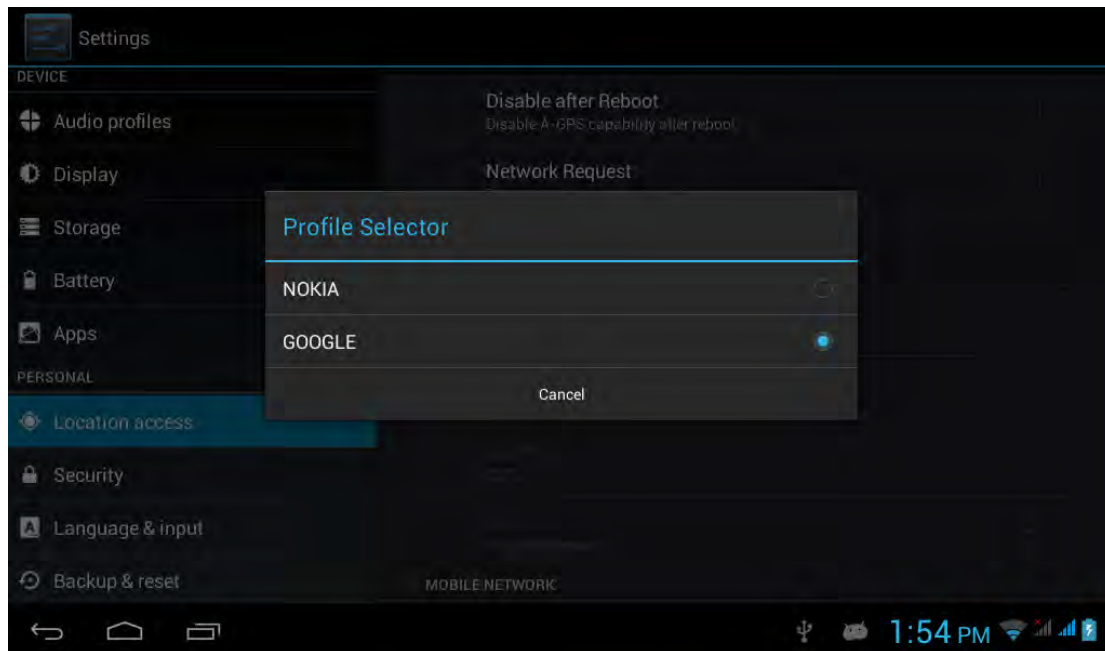

Open network used you can choose the different mode of network, see as picture 4.48;

**Pic 4.48**

- **Profile selector**

Choose profile selector you can shift them as you like, see as below picture 4.49;

**Pic 4.49**

- **Location and Google search**

Use Location access and Google search, you can use your location information to improve search result and other services.

## 4.12 Security

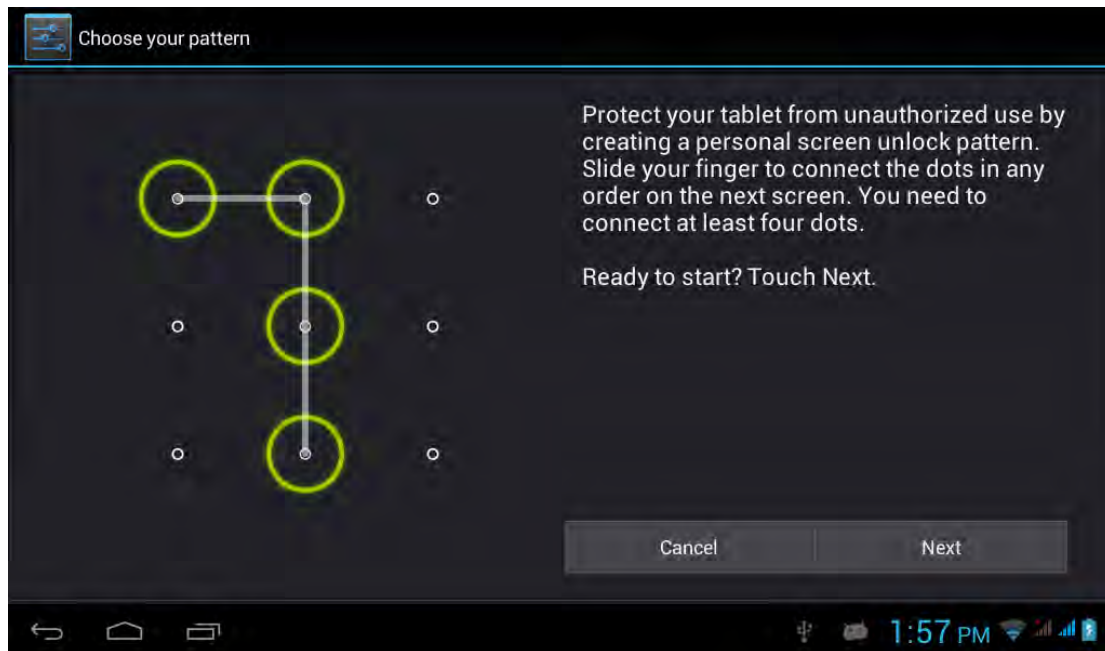

### Set up screen lock

You can use password and unlock pattern to lock the touch panel and protect your MID.

Notes: Once you have set up the screen lock, every time when you reboot and unlock the touch screen will request to enter your password.

### Set up unlock pattern

1. In the main menu page please click *setting* Application.
2. Click the *security*
3. Click the *Screen lock*
4. In the pop-up text setting area, choose *pattern*.
5. Click *Next step* as it mentioned.
6. It will pop up unlock pattern screen which has 9 dots. Slide your finger to connect the dots in any order on the next screen for creating a personal screen unlock pattern. You need to connect at least 4 dots. See as picture 4.50;
7. Click *Next*
8. When you see the notice and type again the *unlock pattern* and click OK.

pic4.50

### **Set up unlock PIN password**

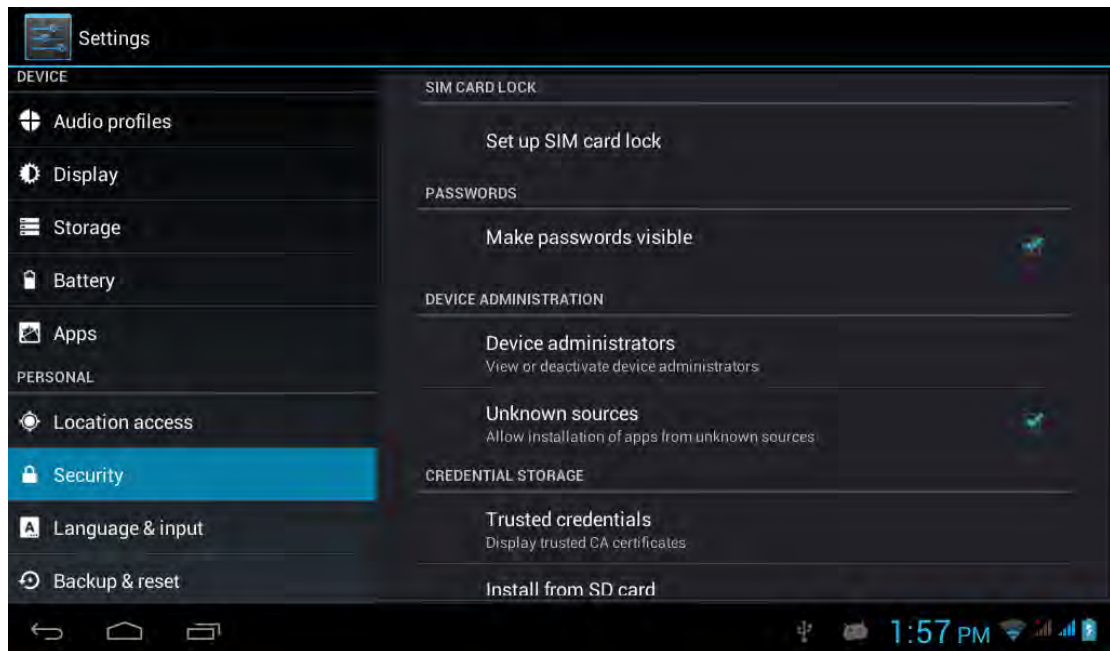

In main menu please tap settings→Security→Lock screen→in the pop up text set area choose PIN→type new PIN password(finger) and tap Next→type again new PIN password and tap OK.

### **Set up password**

In main menu please tap settings→Security→Lock screen→in the pop up text set area choose Password→type new Password(alphanumeric) and tap Next→type again new Password and tap OK.

### **Unknown sources**

In main menu tap Settings→ Security→Unknown sources, see as shown picture 4.51;

**Pic4.51**

Notes: Click *unknown sources* and then you can install APK files by hand successfully.

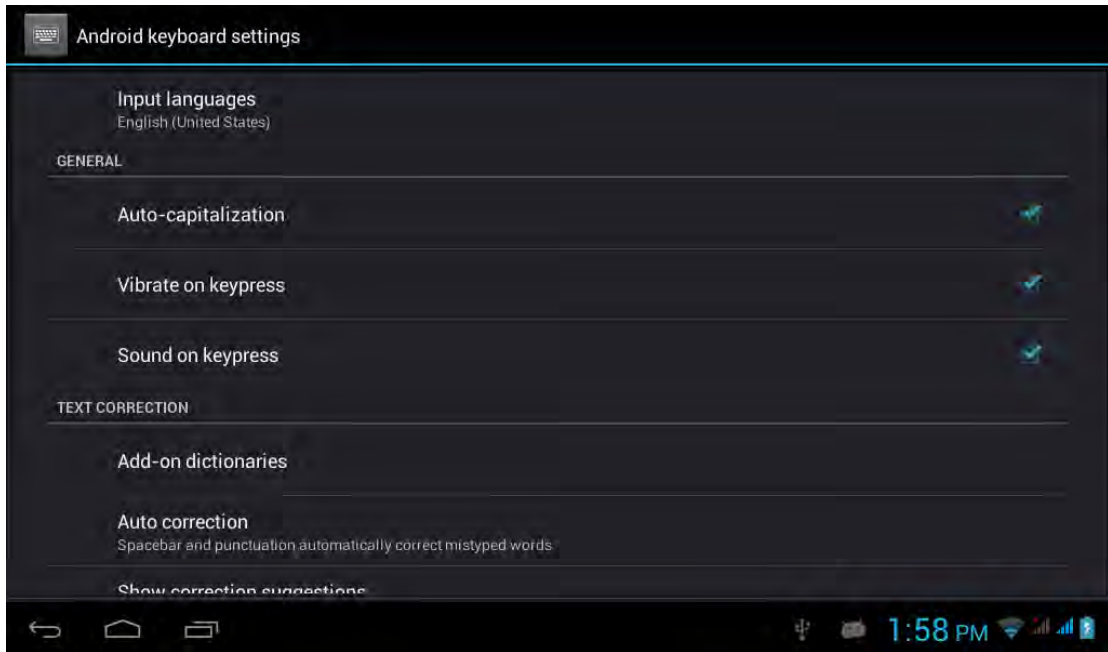

### 4.13 Language & input

Tap setting→Language & input. You can choose the language as you need. See as below picture 4.52;

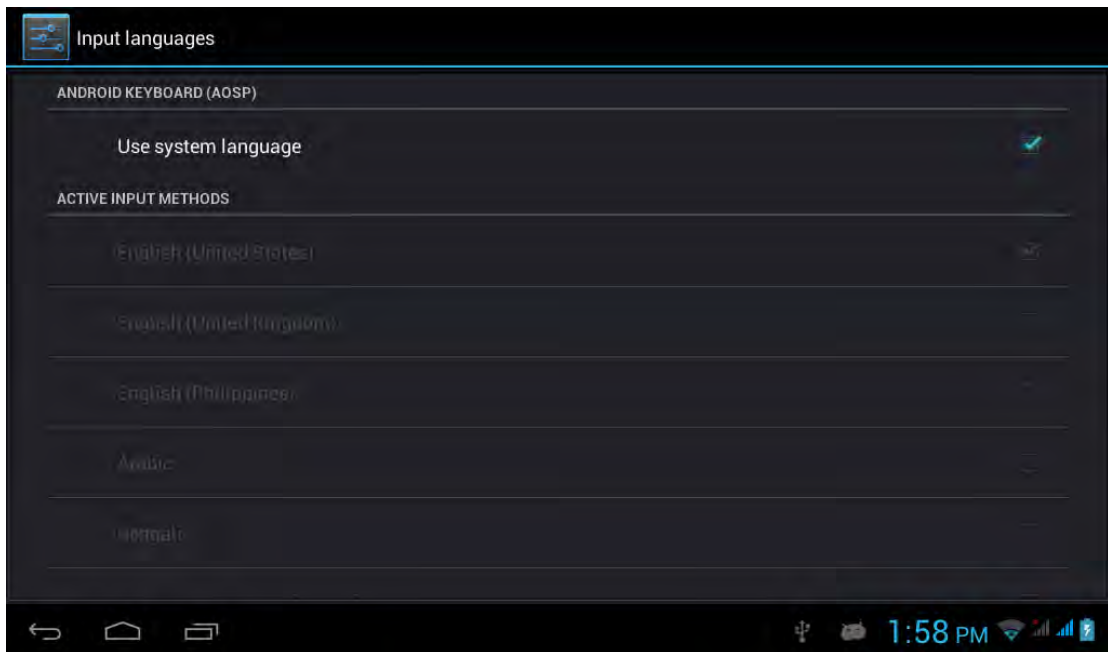

**Pic 4.52**

Tap *settings*→*Language & input*→*Android keyboard settings*→*input language*, see as below picture 5.34;

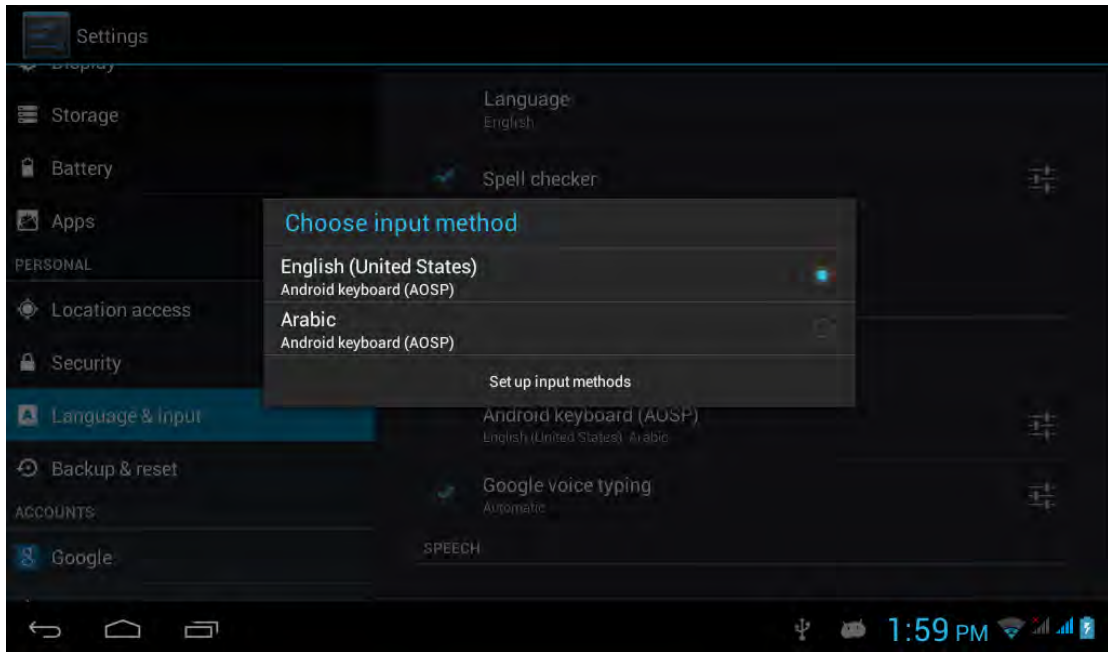

**pic4.53**

In the effective input method you can change the default language as you need. See as picture 4.54;

**pic4.54**

Return to *Language & input*, tap *default* to choose *input method* as you need. See shown picture 4.55;

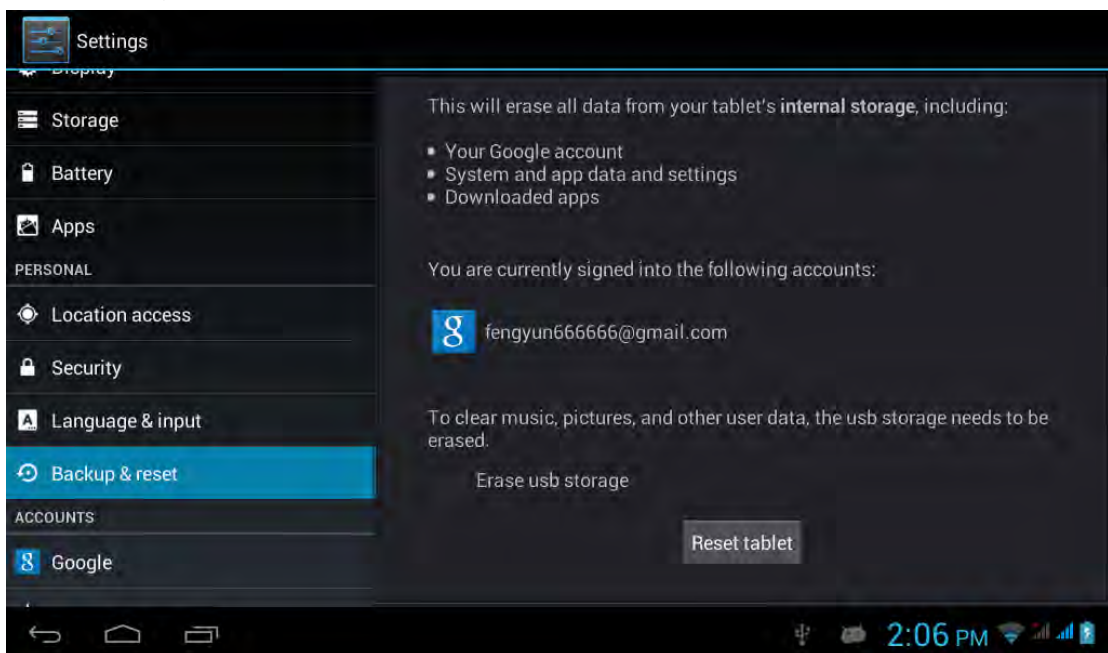

**Pic 4.55**

## 4.14 Backup and reset

Tap *Backup my data* after you have logged in Google account and connected WiFi the system will automatically backup your data to Google server.

For some reasons you have to restore the factory settings, please tap restore the factory settings.; If you want to format MID NAND, please click on Erase USB Storage and tap reset tablet is ok. See as picture 4.56;

**Pic 4.56**

## 4.15 Date and Time

As default setting, system will set the date and time automatically by using network-provided values.

Set the date and time zone by hand

1. Click *settings*
2. scroll down the screen and click *date and time*.
3. Close *Automatic date & time*
4. Close *Automatic time zone*

Click *Select time zone*, and then choose *time zone* in the list. Scroll down the screen you can check more time zones.

5 Click *set date* and tap up and down button to select *Day, Month and Year*, thne tap “set” to finish the setting.

6 Tap *set time*, and tap up and down button to select hours , minutes, choose AM and PM to set morning or afternoon(it will not support 24-hour format), and then tap “set” to finish the setting.

7 Click *Use 24-hour format*, you can shift between 12-hour and 24-hour format. And the time format will applied in the alarm clock.

8 Click *choose date format* and choose the date format which will show in your MID.

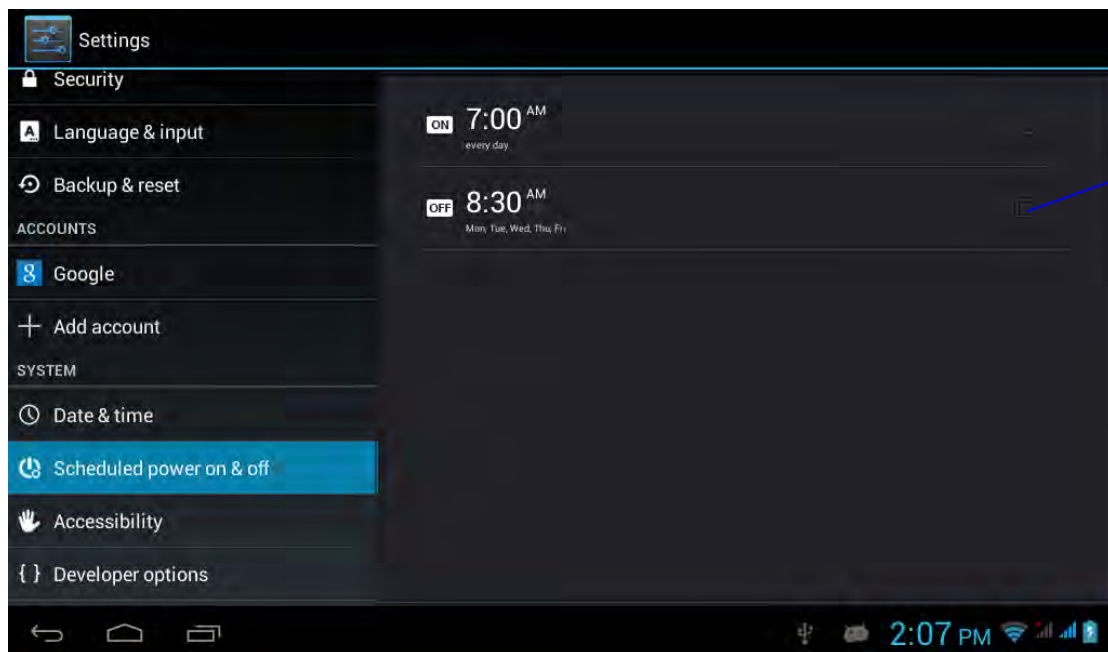

**Pic 4.57**

Notes: If you use the time which network provided automatically, you are unable to set the date and time zone.

## 4.16 Scheduled power on&off

Tap settings→Scheduled power on & off, see as below picture 4.58;

Pic 4.58

## 4.17 Accessibility

### 4.17-1. Large text

Click **Large text** can make the system font become larger

### 4.17-2. Press **Power button** to end call

With this function, when you make a call and press “power” button, you phone call will automatically hang up but will not turn to sleep

### 4.17-3. Touch & hold delay

Click **Touch & hold** delay can adjust the delay time, see as shown picture 4.59;

**Pic 4.59**

#### **4.17-4. Install web scripts**

When you open it system will allow you install web scripts, but it will increase the security risk when you browser website.

### **4.18 Developer options**

#### **4.18-1 USB Debugging**

Once you open USB debugging, it can read the MID with some software. But when it opened the USB storage need to manually bring up before us.

#### **4.18-2 Stay awake**

When you open stay awake, MID screen will never sleep while charging.

#### **4.18-3 Cursor position**

When you open Cursor position, you can read the touching point operation's transverse and longitudinal axis coordinates of your MID

#### **4.18-4 Display touching operation**

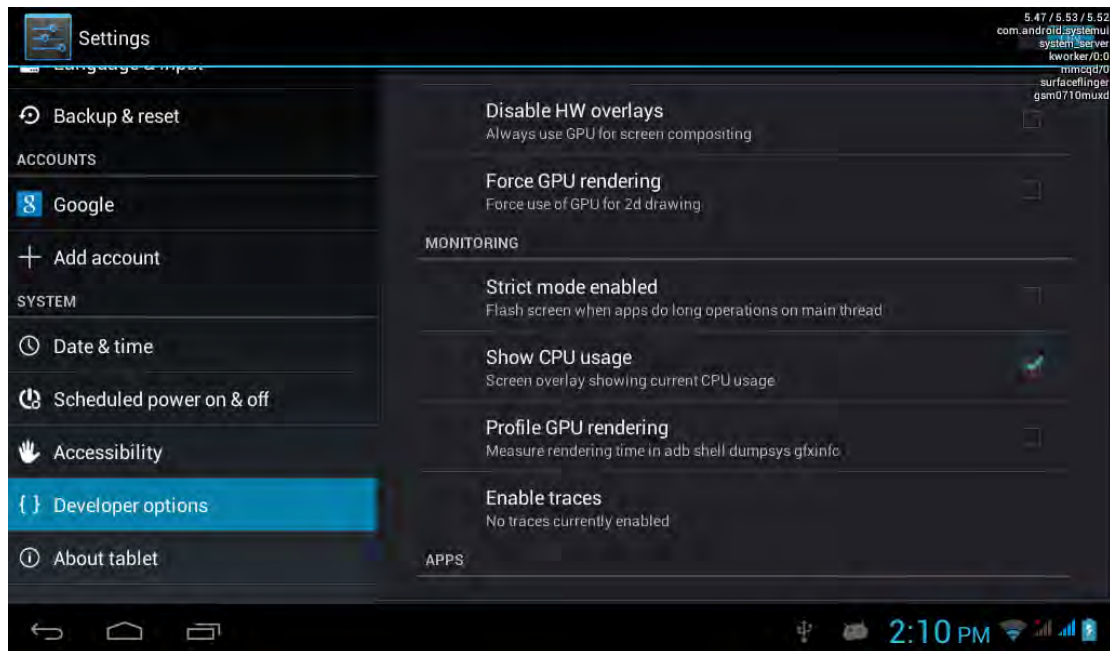

When you open display touching operation, it will display your touching area of MID. And it will more accurate and clear when used with cursor position

#### **4.18-5 Display update**

When display updates, it will flash in the corresponding place.

#### **4.18-6 Display CPU usage**

# 11 Troubleshooting

## 1. Turn on MID slowly for the first time

- After MID system upgrading, the first time turn on the MID need to install the pre-installed applications, time in about 2-3 minutes. But it will faster later.

## 2. Device can not connect to Wi-Fi

- Ensure the router works well.
- Ensure the device and the wireless router is within the range of the wireless network to be connected too. Walls or other obstructions will reduce the possible distances between wireless devices
- Ensure the security password being used is correct

## 3. Heat Issues

When running multiple applications, using the screen on its brightest setting, or when being charged, this device can get quite hot. This is normal and should not cause any inconvenience when in use

## 4. Cannot set E-mail Account or registration application

- Ensure that the tablet is connected to a Wi-Fi network and can connect to the Internet
- Ensure your E-mail settings have been entered correctly for the account being accessed
- Make sure your system time and local time is the same.

## 5. System has anomalies and doesn't work correctly

Installing some third-party applications may cause the system to operate incorrectly. Press the RESET button and perform a system reset to resolve this issue

## 6. Unable to open the webpage

- Ensure the wireless router and MID device is within the range of the wireless network
- Please restart WIFI and try again

## 7. MID runs slowly

This is normal, Please close some applications which temporarily do not need to use the in Advanced Task Manager, Uninstall some third-party applications to free up more system resources.

## **FCC statement**

This device complies with Part 15 of the FCC Rules: Operation is subject to the following two conditions:

1. This device may not cause harmful interference and
2. This device must accept any interference that is received, including any interference that may cause undesired operation.

\*RF warning for Portable device: The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This device is acting as host and operating in the 2.4 GHz (2412 ~2462 MHz) band.

Ad Hoc function is supported but not able to operate on non-US frequencies. Do not use the device with the environment which below minimum -10 °C or maximum over 50°C .

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
