**AI Floodlight Cam** is an outdoor security camera integrating surveillance and lighting with WiFi connection.

- Camera with built-in AI suspicious intrusion detection algorithm; avoiding false alarms.
- Protection zone and lighting trigger can be set up on the APP.
- Combine outdoor security surveillance with lighting.
- 1080P full HD.

## 1 AI Floodlight Cam

①	Lens	⑤	Reset
②	Indicator light	⑥	Speaker
③	PIR infrared body sensor	⑦	TF card slot
④	Mic		

## 2 Indicator Light Status

Indicator Light Status	Status statement
Red indicator is on	Camera starts up, continue for 15 seconds
Red indicator blinks	Red indicator blinks (every 1 sec): WiFi configuration standby
Blue indicator blinks	Blue indicator blinks: connecting WiFi
Blue indicator is on	Connect WiFi successfully
Red and blue indicator blinks alternately	2 indicators blink alternately (every 1 sec): Device upgrading Please keep charging

## 3 Mounting Position And Protection Zone

### 3.1 Check Wi-Fi availability

The AI Floodlight Cam needs a stable and sufficient strong Wi-fi connection.

	✗
	✗
	✓
	✓

Please choose the location where you would like to position your AI Floodlight Cam and check the strength of the Wi-fi signal HSNVR\*\*\*\* using your smart phone.

The table above indicates whether the WiFi signal is strong enough for use in combination with the AI Floodlight Cam.

### 3.2 Ideal installation height of motion detection

## 4 Installation Illustration

**i** M820 AI Floodlight Cam needs (US)100-110VAC (EU)220-240VAC power supply (with live, neutral and ground connections).

**!** Before you start the installation please ensure the power is switched off at the main power switch.

### 4.1 Safety instructions:

- Prior to installation or maintenance, the electricity supply must be turned off.
- Please use the supply leads that must be at least 22AWG pvc coated wire.
- Be sure to connect ground lead.

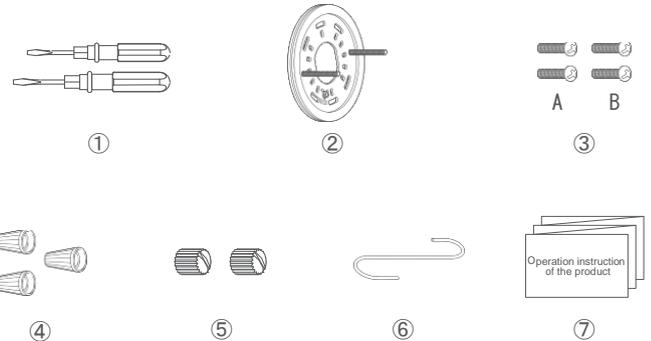

### 4.2 Installation notes:

- Height of installation from the ground is suggested around 9 feet.(3 meters)
- Motion sensor (Factory settings)has an horizontal range of 24 feet (8 Meters). Default setting of sensibility as “Middle”.
- Mounting bracket mounts to recessed or surface standard junction box. Junction box must be at least 1-1/2 inch in depth for proper installation.

### 4.3 NOTED

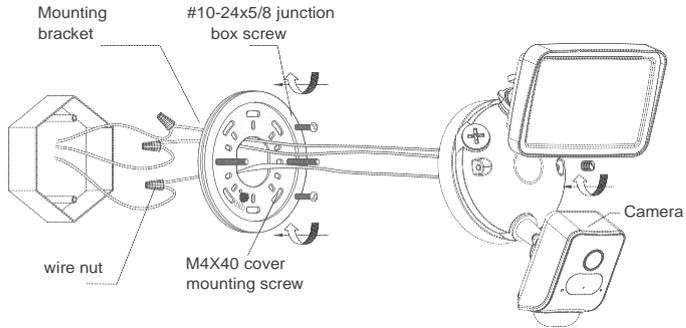

These instructions assume you're replacing an existing floodlight and /or have a junction box where Floodlight Cam can be mounted. If you don't have a junction box, then you'll need to hire a licensed electrician to install one.

### 4.4 Accessories and installation guide

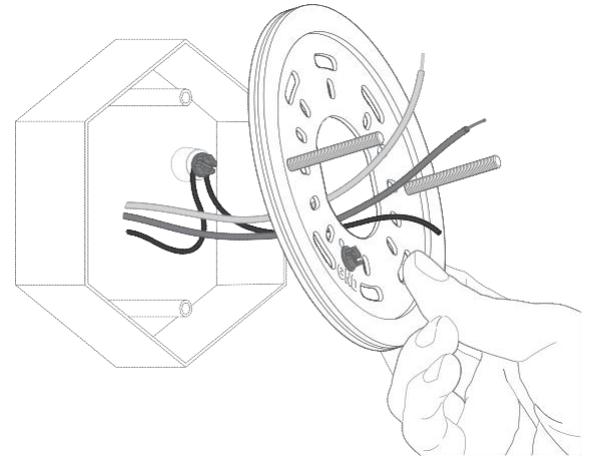

①	Screwdriver(2)	④	Wire Nuts (3)	⑦	Manual (3)
②	Mounting Bracket	⑤	Cap Nuts (2)		
③	A.Inch thread (2) B.Metric thread (2)	⑥	Hook		

## Installation instruction

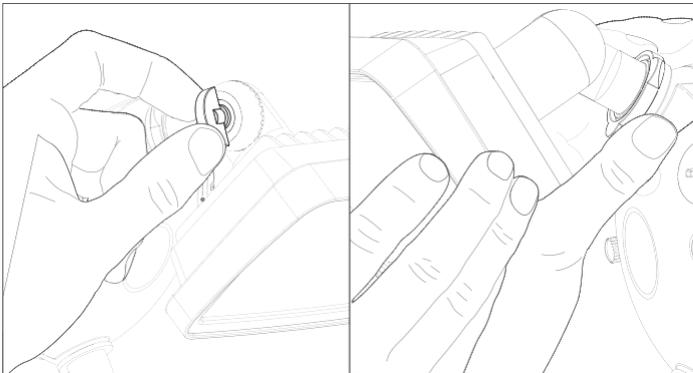

C. Install the mounting bracket with the two posts level with the ground or level with your wall if mounting vertically on an overhand.

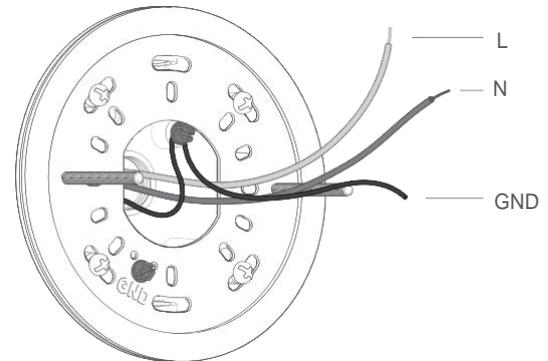

### 4.5 Installation instructions:

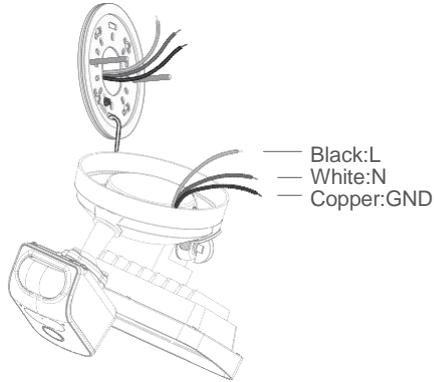

- Turn OFF power at the circuit breaker box.
- Loosen the knobs on the light fixtures to rotate them out of the way and allow access to the mounting screws.

D. Make sure your existing wires come through the middle of the bracket. Attach the bracket to your junction box using at least two screws.

E. Use the provided hook to hang floodlight cam from the bracket while connecting the wires.

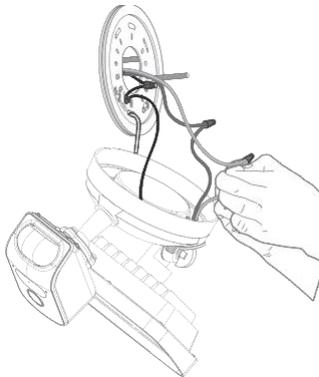

F. Use a wire nut to connect the white wire to the neutral wire coming out of your junction box.

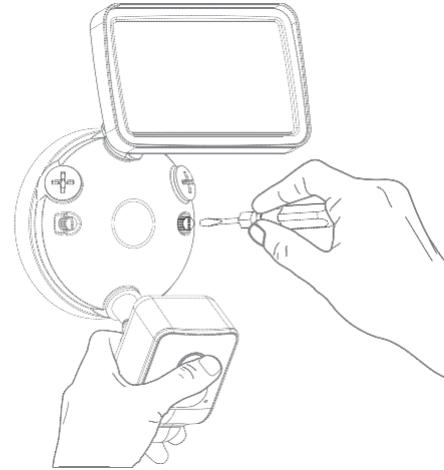

The black wire from the floodlight cam is a hot wire. Connect this wire to the hot wire coming out of your junction box using another wire nut.

Connect the ground wire to the green ground screw on the bracket and the existing ground wire inside your junction box. Use one of the supplied wire nuts if necessary.

(Black:L White:N Copper:GND)

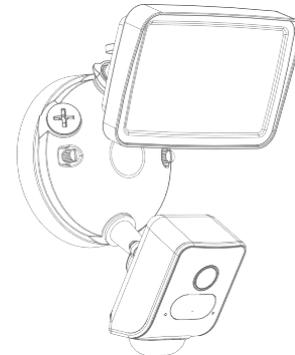

G. Carefully push all the wires through the large opening in the bracket. Align the mounting posts with the holes on floodlight cam and press together, securing the screw cap nuts with the screwdriver.

H. After finished floodlight mounting

Refer to the AI Floodlight Cam user manual to set up.

## 5 Technical Parameters

Item	AI Floodlight Cam
Voltage input	(US)100-110VAC (EU)220-240VAC
Frequency input	50HZ /60HZ
Color temperature	5000K
Light Output(Lumens)	2150 (5000K)
Power	24W
Power for the camera	5V±5%@Max.500mA
Operation environment and protection	-20-50°C/IP55
WiFi	802.11 b/g/n
Box dimension	(L)205mm×(W)163mm×(H)200mm
Weight	1050g

## 6 FAQ

### - Can I install a junction box myself?

If you do not have a junction box, you need to install one, we highly recommend that you engage a licensed electrician for installation. You'll need a 4-inch round waterproof junction box for use with this Floodlight Cam.

### FCC ID:2AJPAL820

#### FCC Warning

(1) This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(2) (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device must be installed to provide a separation distance of at least 20cm from all persons and must not be collocated or operating in conjunction with any other antenna or transmitter
