

USER MANUAL

The USB driver is used to store information. The controller is the most important component that controls the transmission of information between PC and the storage medium of USB2.0 flash disk. There is also a crystal connecting to the controller, supplying the clock frequency. The power supplies by the PC.

Federal Communications Commission(FCC) Statement

You are cautioned that changes or modifications not expressly approved by the part responsible for compliance could void the use's authority to operate the equipment

FCC-Class B
