E-mail

You can use the E-mail application to read emails from services like Gmail. The E-mail application supports the following account types: POP3, IMAP and Exchange.

Your service provider or system administrator can provide you with the account settings you need.

Managing an email account

The first time you open the **E-mail** application, a set-up wizard opens to help you to set up an email account. After the initial set-up, E-mail displays the contents of your inbox.

To add another email account:

• Tap ⌂ > ▦ > **Apps** tab > **E-mail** >tap 🔲 > **Settings** > ➕ **Add account**.

To change an email account's settings:

• Tap ⌂ > ▦ > **Apps** tab > **E-mail** > tap 🔲 > **Settings** > **General settings**.

To delete an email account:

• Tap ⌂ > ▦ > **Apps** tab > **E-mail** > tap 🔲 > **Settings** > tap 🔲 > **Remove account** > Select the account to delete > **Remove** > select **Yes**.

Working with account folders

Tap ⌂ > ▦ > **Apps** tab > **E-mail** > tap 🔲 and select **Folders**.

Each account has an Inbox, Outbox, Sent and Drafts folder. Depending on the features supported by your account's service provider, you may have additional folders.

Composing and sending email

To compose and send a message

1 While in the **E-mail** application, tap the 📝.

2 Enter an address for the message's intended recipient. As you enter text, matching addresses will be proposed from your Contacts. Separate multiple addresses using semicolons.

3 Tap the 🔲 to add a Cc/Bcc and tap 📎 to attach files, if required.

4 Enter the text of the message.

5 Tap 📤.

> **TIP!** When a new email arrives in your Inbox, you will be notified by a sound or vibration.

Camera

To open the Camera application, tap ⬜ > ▦ > **Apps** tab > 📷.

Getting to know the viewfinder

1. **Flash** – Choose from **Off** 🚫, **On** ⚡, **Auto** ⚡ᴬ.
2. **Swap camera** – Switch between the rear–facing camera lens and the front–facing camera lens.
3. **Shot mode** – Choose from **Normal, Panorama**, **Continuous shot** or **Sports**.
4. **Settings** – Tap this icon to open the settings menu.
5. **Video mode** – Tap and slide down this icon to switch to video mode.
6. **Capture button**
7. **Gallery** – Tap to view the last photo you captured. This enables you to access your gallery and view saved photos while in camera mode.

NOTE: Please ensure the camera lens is clean before taking pictures.

Camera

Using the advanced settings

In the viewfinder, tap ![icon] to open the advanced options. You can change the camera settings by scrolling through the list. After selecting the option, tap ![icon].

![icon]	To take a photo, say one of the following words: Cheese, Smile, Whisky, Kimchi or LG.
![icon]	Defines and controls the amount of sunlight entering the photo.
![icon]	Tap to select the focus mode.
W3M	Selects photo resolution. If you choose high resolution, file size will increase, which means you will be able to store fewer photos in the memory.
![icon]	The ISO rating determines the sensitivity of the camera's light sensor. The higher the ISO, the more sensitive the camera. This is useful in darker conditions when you cannot use the flash.
AWB	Improves color quality in various lighting conditions.
![icon]	Applies artistic effects to your pictures.
![icon]	Sets a delay after the capture button is pressed. This is ideal if you want to be in the photo.
![icon]	Activate this to use your phone's location-based services. **NOTE:** This function is available when the GPS function is active or connected network.
![icon]	Selects a shutter sound.
![icon]	Set the Volume Key whether to use for the capture or zoom.
![icon]	Select storage to save images.
![icon]	Opens the help guide to know how a function operates.
![icon]	Restores all camera default settings.

TIP!
- When you exit the camera, some settings return to their defaults, such as white balance, color effect, timer and shot mode. Check these before you take your next photo.
- The setting menu is superimposed over the viewfinder, so when you change photo color or quality elements, you will see a preview of the changed image behind the Settings menu.

Taking a quick photo

1 Open the **Camera** application and point the lens toward the subject your want to photograph.

2 Focus boxes will appear in the center of the viewfinder screen. You can also tap anywhere on the screen to focus on that spot.

3 When the focus box turns green, the camera has focused on your subject.

4 Tap to capture the photo.

Camera

Once you've taken a photo

Tap the image thumbnail at the bottom of the Camera screen to view the last photo you took.

📷	Tap to take another photo immediately.
⤴	Tap to send your photo to others or share it via social network services.
🗑	Tap to delete the photo.

TIP! If you have an SNS account set up on your phone, you can share your photo with your SNS community.

NOTE: Additional charges may apply when MMS messages are downloaded while roaming.

Tap 🔲 to open all advanced options.

Set image as – Tap to use the photo as a **Contact photo, Home screen wallpaper, Lock screen wallpaper, Wallpaper.**

Move – Tap to move the photo to another place.
