Part 15.21 statement

" Change or Modifications that are not expressly approved by the manufacturer could void

the user's authority to operate the equipment. "

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to

Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference

in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed

and used in accordance with the instructions, may cause harmful interference to radio communications. However, there

is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful

interference or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Part 15 Class B Compliance

This device and its accessories comply with part15 of FCC rules.

Operation is subject to the following two conditions:

(1) This device & its accessories may not cause harmful interference.

(2) This device & its accessories must accept any interference received,

    including interference that may cause undesired operation.

Body-worn Operation

This USB modem has been tested for typical body-worn operations

with the distance of 0.79inches (2.0cm) from the user's body.

To comply with FCC RF exposure requirements, a minimum separation distance

of 0.79inches(2.05cm) must be maintained from the user's body.

Before you can start exploring your new phone, you'll need to set It up.

To insert the SIM card and battery:

1. With the back of the phone facing you, remove the back cover. To remove the back cover, firmly press your thumbs on either side of the back cover, and slide the cover below the camera lens.

2. Slide the SIM card into the SIM card holder. Make sure the gold contact area on the card is facing downwards.

3. Insert the battery into place by aligning the gold contacts on the phone and the battery, then gently press the battery until it snaps into space.

4. Replace the back cover of the phone and slide it down into place until the latch clicks.

NOTE!
If your phone does not connect to a network when you insert a SIM card and turn it on, please contact your service carrier to obtain the details of its access point name.

To store additional multimedia files such as captured images by using a built-in camera, you must insert a memory card to your phone. To insert a memory card:

1. Turn the phone off before inserting or removing the memory card .
   Remove the back cover.

2. Open the slot protection and insert the memory card into the slot. Make sure the gold contact area is facing downwards.

WARNING!
Do not insert or remove the memory card when the phone is on. Otherwise, it may damage the memory card as well as your phone, and the data stored on the memory card may be corrupted.

3. Close the slot protection.

You can protect your SIM card from unauthorized use by assigning a PIN (Personal Identification Number). To enable the SIM card PIN:
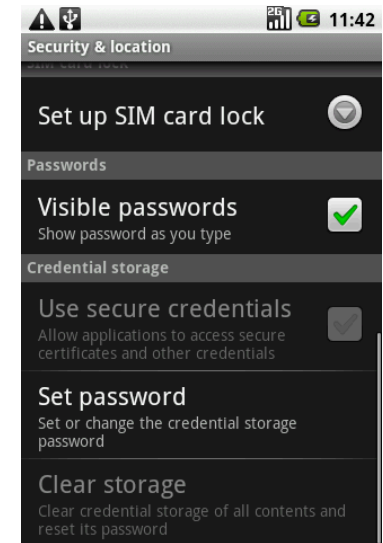

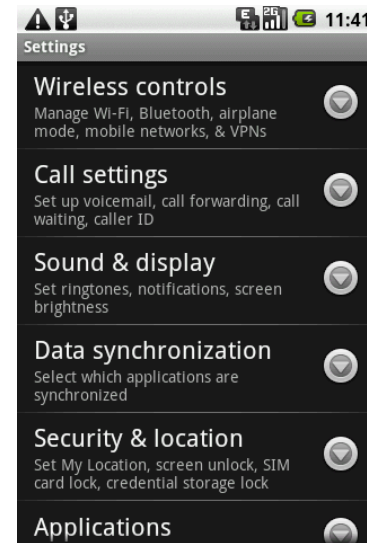

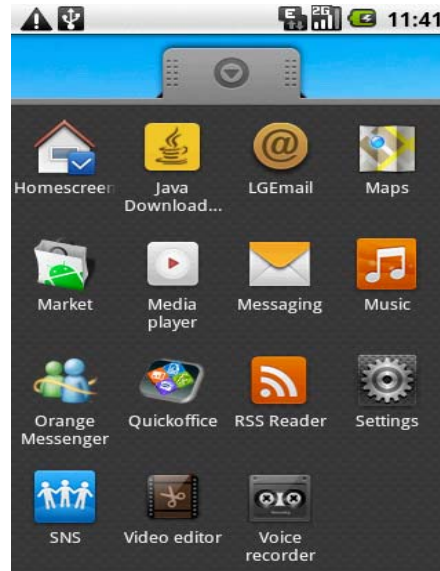

1. On the home screen, touch **Applications** tab to open the applications menu.

2. Scroll and touch **Settings**.

3. Tap **Security & Location**, then scroll and choose **Set up SIM card lock**.
4. Touch **Lock SIM card** and enter the default SIM card PIN using the touch keyboard, then tap **OK**.

TIP!
- If you want to change your SIM card PIN, tap **Change SIM PIN**.
- Emergency calls can be placed at any time, without requiring a PIN.
NOTE!
If you enter the wrong PIN more times than the maximum number of attempts allowed, your SIM card will become "PUK-locked." You need a new PUK code to restore access to the device. This code may have been provided by your operator when you received your SIM card.

Your home screen has 3 panels. Simply swipe your finger to the left or right to view.
You can also customise each panel with widgets, shortcuts to your favorite applications
and folders.
