Part description

Configuration

Choose Right or Left Ear Wearing Style

The LG Bluetooth Headset HBM-300 can be worn on either ear.

1. Rotate the earpiece to select your left or right ear.
2. Place the Headset on your ear
3. Place the ear-speaker into your ear.
4. Extend the ear ring then slip it over the top of your ear, manoeuvre the speaker gently into your ear, squeeze the ear ring closed until the Headset is held securely on your ear.

Charging

Before you can use your Headset, you need to charge it fully.

1. Open the DC jack cover on the bottom side of the Headset first.
2. Plug the charger into the DC jack outlet.
3. While charging, the blue LED indicator light on the Headset is lit, and will remain lit, until the Headset is fully charged.
4. Charge the Headset for approximately 2 hours or until the indicator lights go out.

Tip) Low Battery Warning

The Headset needs to be recharged when you hear a short beeping sound through the Headset's speaker at 7 second intervals and when you see the blue LED indicator flash quickly 5 times at 7 second intervals. You have 5 to 7 minutes of talktime remaining once the low battery warning indicators start.

Power On

Press in and hold the CALL Control button for more than 1 second to turn the Headset on.

Power Off

Press in and hold the CALL Control button for more than 4 seconds to turn the Headset off.

How to use

Pairing the Bluetooth Headset with the Handset

Before using your Headset for the first time, you must pair it with another Bluetooth device, such as a mobile phone. Follow the steps below for most devices.

1. **Turn the LG Bluetooth Headset HBM-300 on.**

Turn on the Headset by pressing and holding the CALL Control button for at least 1 second.

2. **Place the LG Bluetooth Headset HBM-300 in pairing mode.**

Press and hold the CALL Control button for at least 5 second while listening for a beeping sound. You should hear a series of beeps followed by a connection signal. The blue LED indicator light begins to flash once every second.

3. **Set your LG Bluetooth Headset HBM-300 to “discover”**

Follow the instruction guide for your phone. This usually involves going to a “setup”, “connect”, or “Bluetooth” menu on your phone and then selecting the option to “discover” or “add” a Bluetooth device.

4. **Your phone will find “HBM-300”**

You will be prompted to accept the pairing by pressing “Yes” or “Ok” on the Handset and to confirm with the passkey or PIN⁴ = 0000 (4 zeros). You will receive confirmation when pairing is complete. If pairing is unsuccessful, repeat steps 1-4.

If pairing is successful, the blue LED indicator light will flash in standby mode every 5 seconds. If pairing fails, the blue LED indicator light will flash once every second. Please repeat these steps.

NOTE) Pairing can be done with up to 3 Handsets maximum

- 1 The LG Bluetooth Headset HBM-300 stores up to 3 different Handset registrations in memory.
- 2 If you add a 4th Handset, the LG Bluetooth Headset HBM-300 will automatically remove the registration information of the least used Handset.
- 3 Priority is given to the Handset most recently paired.
- 4 When you want to change the Handset priority, try to connect manually from the Handset.

Tip)

Once a Handset is registered to the LG Bluetooth Headset HBM-300 , it will be stayed in paired status until deleted.

Basic usage of your LG Bluetooth HBM-300 Headset

1. To answer a call

Press the CALL Control button to capture and transfer the call to the headset.

2. To reject a call

Press the CALL Control button for at least 2 seconds.

3. To end a call

Press the CALL Control button for at least 2 seconds.

4. To make a call

When you are going to make a call with your HBM-300, simply press the CALL Control button and then the handset will dial the number you have dialed latest.

In case you make a call from the Handset, the call will (subject to phone settings) be automatically transferred to the Headset. If not automatically transferred, you can transfer the call manually by pressing the CALL Control button.

5. Last number redialing

Activate last number redial by pressing the CALL Control button on the Headset. (This will initiate voice dialing with some Handsets.)

6. Volume Control

Press the VOLUME UP or DOWN Button to increase or decrease the speaker volume.

- The Speaker volume is programmed for volume levels 0, 3, 6, 9, 12, and 15.

Transferring a call

To transfer a call from the Handset to the Headset, briefly press the Call Control button. You can transfer a call to the Headset without ending the call. In the other case where you want to transfer the call from Headset to Handset, all you do is just pressing the Call Control button shortly.

Holding Key function

To place a call on hold, press the CALL Control button and the VOLUME UP & DOWN button simultaneously for at least 1 second.

To turn Hold off, press the CALL Control button and the VOLUME UP & DOWN button simultaneously again.

Summary of Button Functions
