█KE800 █USER GUIDE

WE SHOULD INFORM USER THAT THIS MANUAL CAN HAVE SOME DIFFERENCES FROM PHONE DEPENDING ON PHONE S/W AND SERVICE PROVIDER.

Disposal of your old appliance

1. When this crossed-out wheeled bin symbol is attached to a product it means the product is covered by the European Directive 2002/96/EC.

2. All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

3. The correct disposal of your old appliance will help prevent potential negative consequences for the environment and human health.

4. For more detailed information about disposal of your old appliance, please contact your city office, waste disposal service or the shop where you purchased the product.

Introduction

Congratulations on your purchase of the advanced and compact KE800 mobile phone, designed to operate with the latest digital mobile communication technology.

This user's guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user's guide could void your warranty for this equipment.

For Your Safety

Important Information

This user guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment.

Before You Start

Safety Instructions

WARNING! To reduce the possibility of electric shock, do not expose your phone to high humidity areas, such as the bathroom, swimming pool, etc.

Always store your phone away from heat. Never store your phone in settings that may expose it to temperatures less than 32°F or greater than 104°F, such as outside during extreme weather conditions or in your car on a hot day. Exposure to excessive cold or heat will result in malfunction, damage and/or catastrophic failure.

Be careful when using your phone near other electronic devices. RF emissions from your mobile phone may affect nearby in adequately shielded electronic equipment. You should consult with manufacturers of any personal medical devices such as pacemakers and hearing aides to determine if they are susceptible to interference from your mobile phone.

Turn off your phone in a medical facility or at a gas station. Never place your phone in a microwave oven as this will cause the battery to explode.

IMPORTANT! Please read the TIA SAFETY INFORMATION on page 78 before using your phone.

Safety Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

▶ Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.

▶ Never place your phone in a microwave oven as it will cause the battery to explode.

▶ Do not dispose of your battery by fire or with hazardous or flammable materials.

▶ Make sure that no sharp-edged items come into contact with the battery. There is a risk of this causing a fire.

▶ Store the battery in a place out of reach of children.

▶ Be careful that children do not swallow any parts such as rubber plugs (earphone, connection parts of the phone, etc.). This could cause asphyxiation or suffocation.

▶ Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

▶ When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is activated, you may be seriously injured.

▶ Do not use a hand-held phone while driving.

▶ Do not use the phone in areas where its use is prohibited. (For example: aircraft).

▶ Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.

▶ Never store your phone in temperatures less than- 4°F or greater than 122°F.

▶ Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of this causing a fire.

▶ Do not drop, strike, or shake your phone severely. Such actions may harm the internal circuit boards of the phone.

▶ Do not use your phone in high explosive areas as the phone may generate sparks.

▶ Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause a fire or electric shock.

▶ Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause fire or electric shock.

▶ Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.

▶ Do not disassemble the phone.

▶ Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

▶ Only use the batteries, antennas, and chargers provided by LG. The warranty will not be applied to products provided by other suppliers.

▶ Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.

▶ Do not hold or let the antenna come in contact with your body during a call.

▶ An emergency call can be made only within a service area. For an emergency call, make sure that you are within a service area and that the phone is turned on.

FCC RF Exposure Information

WARNING! Read this information before operating the phone.

In August 1996, the Federal Communications (FCC) of he United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.

The design of this phone complies with the FCC guidelines and these international standards.

CAUTION

Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations with the back of the phone kept 0.6 inches (1.5cm) between the user's body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.6 inches(1.5cm) must be maintained between the user's body and the back of the phone. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.6 inches(1.5cm) separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

Vehicle Mounted External Antenna (optional, if available)

A minimum separation distance of 8 inches (20cm) must be maintained between the user/bystander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements. For more information about RF exposure, visit the FCC website at www.fcc.gov

FCC Part 15 Class B Compliance

This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

Cautions for Battery

▶ Do not disassemble.

▶ Do not short-circuit.

▶ Do not expose to high temperature: 60°C (140°F).]

▶ Do not incinerate.

Battery Disposal

▷ Please dispose of your battery properly or bring to your local wireless carrier for recycling.

▷ Do not dispose in fire or with hazardous or flammable materials.

Adapter (Charger) Cautions

▷ Using the wrong battery charger could damage your phone and void your warranty.

▷ The adapter or battery charger is intended for indoor use only.

Do not expose the adapter or battery charger to direct sunlight or use it in places with high humidity, such as the bathroom.

"Changes or Modifications that are not expressly approved by
the manufacturer could void the user's authority to operate the equipment."

This equipment has been tested and
found to comply with the limits for a Class
B digital device, pursuant to part 15 of the
FCC Rules. These limits are designed to provide
reasonable protection against harmful
interference in a residential installation.
This equipment generates, uses and can radiate
radio frequency energy and, if not installed
and used in accordance with the instructions,
may cause harmful interference
to radio communications. However, there is
no guarantee that interference will not occur
in a particular installation. If this equipment
does cause harmful interference to
radio or television reception, which can be
determined by turning the equipment off and
on, the user is encouraged to try to correct
the interference by one or more of the following
measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment
and receiver.
-Connect the equipment into an outlet on a
circuit different from that to which the receiver
is connected.
-Consult the dealer or an experienced radio/
TV technician for help.
KE800 features

Parts of the phone

1. Earpiece

2. Main LCD

▶ **Top**: Signal strength, battery level and various function

▶ **Bottom**: Soft key indications

3. Alpha numeric keys

▶ **In standby mode:** Input numbers to dial

Hold down

`0±` – International calls

`1∞` – Activate Voice mail centre menu

`2abc` to `9wxyz` – Speed dials

▶ **In editing mode**: Enter numbers & characters

4. Side keys

▶ **In standby mode (opened):** Volume of key tone

▶ **In standby mode (closed):**
Short press – The sub LCD light on.
Long press – Only display a wallpaper.

▶ **In menu:** scroll up & down

▶ **During a call:** volume of the earpiece

5. Headset jack

6. End key

▶ **Switch on/off (hold down)**

▶ **End or reject a call.**

7. Side camera key
Short press – Camera and MP3 menu access
Long press – Photo camera activation

8. MP3 key

Note
▶ To protect the sense of hearing while slide open, maximum volume level is 3.

Display Information

Icon area

Text and graphic area

Menu   **Contacts**

Soft key indications
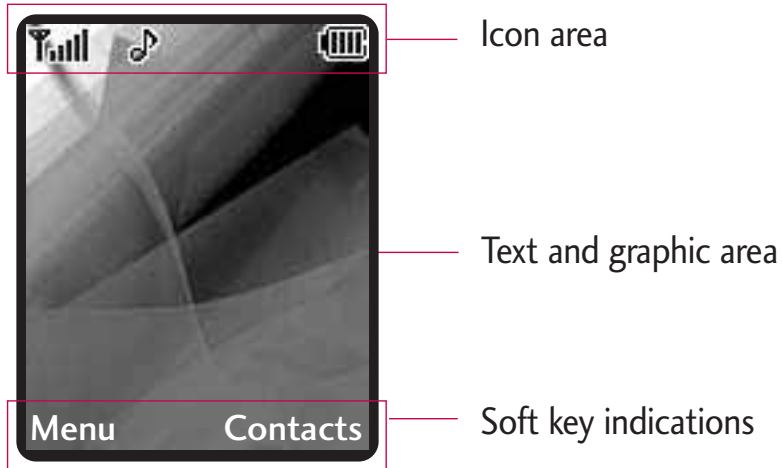

Area	Description
First line	Displays various icons.
Middle lines	Display messages, instructions and any information that you enter, such as number to be dialled.
Last line	Shows the functions currently assigned to the two soft keys.

The screen displays several icons. They are described below.

On-Screen Icons

Icon	Description
Y.ull	Tells you the strength of the network signal. ✱
↖	Call is connected.
G.ull	You can use GPRS service.
R	Shows that you are using a roaming service.

Note
▶ ✱The quality of the conversation may change depending on network coverage. When the signal strength is below 2 bars, you may experience muting, call drop and bad audio. Please take the network bars as indicator for your calls. When there are no bars, that means that there is no network coverage: in this case, you won't be able to access the network for any service (call, messages and so on).

Icon	Description
	The alarm has been set and is on.
	Tells you the status of the battery.
	You have received a text message.
	You have received a voice mail.
	Vibrate only menu in profile.
	General menu in profile.
	Loud menu in profile.
	Silent menu in profile.
	Headset menu in profile.
	You can divert a call.
	Indicates that the phone is accessing the WAP.
	Indicates that you are using GPRS.
	Bluetooth activated.

Installation

Installing the SIM card and the handset battery

Make sure the power is off before you remove the battery.

1. Remove the battery.

Press and hold down the battery release button and slide the battery down.

2. Install the SIM card

Insert the SIM card into the holder. Slide the SIM card into the SIM card holder. Make sure that the SIM card is inserted properly and that the gold contact area on the card is facing downwards. To remove the SIM card, press down lightly and pull it in the reverse direction.

Caution
▶ The metal contact of the SIM card can be easily damaged by scratches. Pay special attention to the SIM card while handling. Follow the instructions supplied with the SIM card.

3. Install the battery.

Slide the battery upwards until it snaps back into place.

Charging the Battery

Before connecting the travel adapter to the phone you must first install the battery.
1. Ensure the battery is fully charged before   using the phone for the first time.

2. With the arrow facing you as shown in the diagram push the plug on the battery adapter into the socket on the side of the phone until it clicks into place.

3. Connect the other end of the travel adapter to the mains socket. Use only the charger included in the box.

4. The moving bars of battery icon will stop after charging is complete.

Caution!
- If the battery is completely discharged, the charging display will appear on the LCD approximately 1 to 1.5 minutes after connecting TA.
- Do not force the connector as this may damage the phone and/or the travel adapter.
- Insert the battery pack charger vertically to wall power outlet.
- If you use the battery pack charger out of your own country, use an attachment plug adaptor for the proper configuration.
- Do not remove your battery or the SIM card while charging.

Warning!

▶ Unplug the power cord and charger during lightning storms to avoid electric shock or fire.

▶ Make sure that no sharp-edged items such as animal teeth, nails, come into contact with the battery. There is a risk of this causing a fire.

▶ Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

Disconnecting the charger

Disconnect the travel adapter from the phone by pressing its side buttons as shown in the diagram.

Making a call

1. Make sure your phone is powered on.

2. Enter a phone number including the area code.
   To edit a number on the display screen, simply press the ⊂⊃ key to erase one digit at a time.

   ▶ Press and hold the ⊂⊃ key to erase the entire number.

3. Press the ⌒ key to call.

4. When you want to finish, press the END⓪ key.

Making a Call by Send Key

1. Press the ⌒ key, and the most recent incoming, outgoing and missed phone numbers will be displayed.

2. Select the desired number by using the navigation key.

3. Press the ⌒ .

Making an international call

1. Press and hold the 0± key for the international prefix. The '+' character automatically selects the international access code.

2. Enter the country code, area code, and the phone number.

3. Press the ⌒ .

Ending a call

When you have finished a call, press the END⓪ key.

Making a Call From the Contact list

You can store names and phone numbers dialled frequently in the SIM card as well as the phone memory known as the Contact list.

You can dial a number by simply looking up a name in the contact list. For more details on the Contacts feature, .

Adjusting the volume

During a call, if you want to adjust the earpiece volume, use the side keys of the phone.
In idle mode, you can adjust the key volume using the side keys.

Answering a call

When you receive a call, the phone rings and the flashing phone icon appears on the screen.
If the caller can be identified, the caller's phone number (or name if stored in your Address Book) is displayed.

1. Slide up and press the key or the left soft key to answer an incoming call. If the Any Key menu option [Menu #-3-2], , has been set to any key press will answer a call except for the key or the right soft key.

2. End the call by closing the phone or pressing the [END] key.

Note
▶ You can answer a call while using the Address Book or other menu features. In case phone is connected with PC via USB cable, incoming call will be rejected, but after disconnecting phone from PC you can see Missed call window.

Vibrate Mode (Quick)

Vibrate Mode can be activated by pressing and holding the left navigation key.

Signal strength

If you are inside a building, being near a window may give you better reception. You can see the strength of your signal by the signal indicator (▆▁▃▅) on your phone's display screen.

Entering text

You can enter alphanumeric characters by using the phone's keypad. For example, storing names in the Address Book, writing a message, creating scheduling events in the calendar all require entering text. The following text input methods are available in the phone.

Note

▶ Some fields may allow only one text input mode (e.g. telephone number in address book fields).

T9 mode

This mode allows you to enter words with only one keystroke per letter. Each key on the keypad has more than one letter. The T9 mode automatically compares your keystrokes with an internal linguistic dictionary to determine the correct word, thus requiring far fewer keystrokes than the traditional ABC mode.

ABC mode

This mode allows you to enter letters by pressing the key labeled with the required letter once, twice, three or four times until the letter is displayed.

123 mode (Number mode)

Type numbers using one keystroke per number. To change to 123 mode in a text entry field, press 〔#⌇〕 key until 123 mode is displayed.

Symbolic Mode

This mode allows you to enter special characters.

Changing the text input mode

1. When you are in a field that allows characters to be entered, you will notice the text input mode indicator in the upper right corner of the display.

2. If you want to change modes, press 〔#·〕 . The available modes are changed.

Using the T9 mode

The T9 predictive text input mode allows you to enter words easily with a minimum number of key presses. As you press each key, the phone begins to display the characters that it thinks you are typing based on a built-in dictionary. As new letters are added, the word changes to reflect the most likely candidate from the dictionary.

Note

▶ You can select a different T9 language from the menu option or press hold down the key 〔✳☼〕 . The default setting on the phone is T9 disable mode.

1. When you are in the T9 predictive text input mode, start entering a word by pressing keys 〔2abc〕 to 〔9wxyz〕 Press one key per letter

▶ The word changes as letters are typed-ignore what's on the screen until the word is typed completely.

▶ If the word is still incorrect after typing completely, press the down navigation key once or more to cycle through the other word options.

Example: Press [4 ghi] [6 mno] [6 mno] [3 def] to type **Good**

▶ If the desired word is missing from the word choices list, add it by using the ABC mode.

2. Enter the whole word before editing or deleting any key strokes.

3. Complete each word with a space by pressing the key [0 ±] or [>] key.

To delete letters, press [⊂]. Press and hold down [⊂] to erase the letters continuously.

Note
▶ To exit the text input mode without saving your input, press [^]. The phone returns to the idle screen.

Using the ABC mode

Use the [2 abc] to [9 wxyz] keys to enter your text.

1. Press the key labelled with the required letter:

▶ Once for the first letter

▶ Twice for the second letter

▶ And so on

2. To insert a space, press the [0 ±] key once.

To delete letters, press the [⊂] key. Press and hold down the [⊂] key to erase the letters continuously.

Note

▶ Refer to the table below for more information on the characters available using the alphanumeric keys.

Key	Characters in the order display	
	Upper Case	**Lower Case**
1	. , / ? ! - : ' " 1 @	. , / ? ! - : ' " 1 @
2 abc	A B C 2 Ä À Á Â Ã Å Æ Ç	a b c 2 ä à á â ã å æ ç
3 def	D E F 3 Ë È É Ê	d e f 3 ë è é ê
4 ghi	G H I 4 Ï Ì Í Î Ğ	g h i 4 ï ì í î ğ
5 jkl	J K L 5	j k l 5
6 mno	M N O 6 Ñ Ö Ø Ò Ó Ô Õ Œ	m n o 6 ñ ö ø ò ó ô õ œ
7 pqrs	P Q R S 7 ß Ş	p q r s 7 ß ş
8 tuv	T U V 8 Ü Ù Ú Û	t u v 8 ü ù ú û
9 wxyz	W X Y Z 9	w x y z 9
0 ±	Space 0	Space 0

Using the 123 (Number) mode

The 123 mode enables you to enter numbers in a text message (a telephone number, for example). Press the keys corresponding to the required digits before manually switching back to the appropriate text entry mode.

Using the Symbol Mode

The Symbol Mode enables you to enter various symbols or special characters.

To enter a symbol, press the `0 ±` key. Use the navigation keys to select the desired symbol and press the [OK] key.

Selecting functions and options

Your phone offers a set of functions that allow you to customise the phone. These functions are arranged in menus and sub-menus, accessed via the two soft keys marked [⬯] and [⬯]. Each menu and sub-menu lets you view and alter the settings of a particular function.

The roles of the soft keys vary according to the current context; the label on the bottom line of the screen just above each key indicates its current role.

Your phone provides a number of control functions that you can use during a call. To access these functions during a call, press the left soft key ⊘ [Options].

During a call

The menu displayed on the handset screen during a call is different to the default main menu displayed when in standby mode, and the options are described below.

Making a Second Call (Network Dependent)

You can get a number you wish to dial from the phonebook to make a second call.

Switching between two calls

To switch between two calls, press ⌒ key or the left soft key, and then select Swap Call.

Answering an incoming call

To answer an incoming call when the handset is ringing, simply press the ⌒ key. The handset is

also able to warn you of an incoming call while you are already on a call. A tone sounds in the earpiece, and the display will show that a second call is waiting.

This feature, known as Call waiting, is only available if your network supports it. For details of how to activate and deactivate it see Call waiting (Menu #-3-4, see p. 82)

If Call Waiting is on, you can put the first call on hold and answer the second, by pressing the left soft key ⊘ .

Rejecting an incoming call

You can reject an incoming call without answering by simply pressing the END key.

During a call, you can reject an incoming call by pressing the END key.

Muting the microphone

You can mute the microphone during a call by pressing the [Mute] key. The handset can be unmuted by pressing the [Unmute]. When the handset is muted, the caller cannot hear you, but you can still hear them.

DTMF tones while calling

To switch on DTMF tones while calling (e.g. to use the phone with an automatic switchboard) press the key [Options] followed by Send DTMF on. Select DTMF off to disable DTMF tones. DTMF tones are normally on

Conference Calls

The conference service provides you with the ability to have a simultaneous conversation with more than one caller, if your network service provider supports this feature. A conference call can only be set up when you have one active call and one call on hold, both calls having been answered.

Once a conference call is set up, calls may be added, disconnected or separated (that is, removed from the conference call but still connected to you) by the person who set up the conference call. These options are all available from the In-Call menu. The maximum callers in a conference call are five. Once started, you are in control of the conference call, and only you can add calls to the conference call.

Making a second call

You can make a second call while currently on a call. Enter the second number and press the ⬭ . When the second call is connected, the first call is automatically placed on hold. You can swap between calls, by pressing the ⬭ key.

Setting up a conference call

To set up a conference call, place one call on hold and while the active call is on, press the left soft key and then select the Join menu of Conference call.

Activate the conference call on hold

To activate a conference call on hold, press the S key. Alternatively press the left soft key [Options] and select Join all/Hold all calls. Other users on hold will stay connected. To return to conference call mode, press the left soft key < [Options] followed by Conference call.

Adding calls to the conference call

To add a call to an existing conference call, press the left soft key, and then select the Join menu of Conference call.

Private Call in a Conference Call

To have a private call with one caller from a conference call, display the number of the caller you wish to talk to on the screen, then press the left soft key. Select the Private menu of Conference call to put all the other callers on hold.

Ending a conference call

Currently displayed caller from a conference call can be disconnected by pressing the [END] key.

Menu Tree

Browser

You can access various WAP (Wireless Application Protocol) services such as banking, news, weather reports and flight information. These services are specially designed for mobile phones and they are maintained by WAP service providers.

Check the availability of WAP services, pricing and tariffs with your network operator and/or the service provider whose service you wish to use. Service providers will also give you instructions on how to use their services.

Once connected, the homepage is displayed. The content depends on the service provider. To exit the browser at any time, press the (END) key. The phone will return to the previous menu.

Navigating with the WAP browser

You can surf the Internet using either the phone keys or the WAP browser menu.

Using the phone keys

When surfing the Internet, the phone keys function differently to phone mode.

Key	Description
∧ ∨	Scrolls each line of the content area
⊏	Returns to the previous page
OK	Selects options and confirms actions

Using the WAP browser menu

There are various menu options available when surfing the Mobile Web.

Note
▶ The WAP browser menus may vary, depending on your browser version.

Home   Menu 1.1

Connects to a homepage. The homepage will be the site which is defined in the activated profile. It will be defined by the service provider if you have not defined it in the activated profile.

Bookmarks Menu 1.2

This menu allows you to store the URL of favourite web pages for easy access at a later time.

To create a bookmark

1. Press the left soft key ⬭ [Options].

2. Select Add new and press the OK key.

3. After entering the desired URL and title, press the OK key.

After selecting a desired bookmark, the following options are available.

▶ **Connect:** Connects to the selected bookmark.

▶ **Add new:** Select this to create a new bookmark.

▶ **Edit:** You can edit the URL and/or the title of the selected bookmark.

▶ **Delete:** Deletes the selected bookmark.

▶ **Delete all:** Deletes all the selected bookmarks.

Go to URL Menu 1.3

You can connect directly to the site you want. After entering a specific URL, press the OK key.

Settings Menu 1.4

You can set the profile, cache, cookie and security related to internet service.

Profiles (Menu 1.4.1)

A profile is the network information used to connect to the Internet.

There are default profiles for some operators, stored in phone memory. It's impossible to rename default profiles.

Each profile has submenus as follows:

▶ **Activate:** Activates the selected profile.

▶ **Settings:** Use this to edit and change WAP settings for the selected profile.

- **Homepage:** This setting allows you to enter the address (URL) of a site you want to use as homepage. You do not need to type http:// at the front of each URL as the WAP Browser will automatically add it.

- **Gateway Settings:** IP Adress/Port Number: You need to enter IP adress or Port number that you want.

- **Connection type:** This setting allows you to select the type among HTTP and HTTP with proxy and WAP.

- **Network Profile:** You can select network profile that have set on the [menu 9-5-6-1].

▶ **Rename:** You can change the profile name.

▶ **Add new:** You can add a new profile.

▶ **Delete:** Deletes the selected profile from the list.

▶ **Delete all:** Deletes all profile from the list.

Cache (Menu 1.4.2)

The information or services you have accessed are saved in the cache memory of the phone.

Clear cache (Menu 1.4.3)

Removes all context saved in cache.

Note
▶ A cache is a buffer memory, which is used to save data temporarily.

Security certificates (Menu 1.4.4)

A list of the available certification is shown.

▶ **Authority:** You can see the list of authority certificates that have been stored in your phone.

▶ **Personal:** You can see the list of personal certificates that have been stored in your phone.

WAP information (Menu 1.4.5)

You can check the record of missed, received, and dialled calls only if the network supports the Calling Line Identification (CLI) within the service area.

The number and name (if available) are displayed together with the date and time at which the call was made. You can also view call times.

All calls   Menu 2.1

You can view all lists of outgoing or incoming calls.

Missed calls   Menu 2.2

This option lets you view the last 40 unanswered calls.

You can also:

▶ View the number if available and call it or save it in the phonebook.

▶ Enter a new name for the number and save both in Address book.

▶ Send a message to this number.

▶ Delete the call from the list.

Dialled calls   Menu 2.3

This option lets you view the last 40 outgoing calls (called or attempted).

You can also:

▶ View the number if available and call it or save it in Address Book

▶ Enter new name for the number and save both in Address Book.

▶ Send a message to this number.

▶ Delete the call from the list.

Received calls   Menu 2.4

This option lets you view the last 40 incoming calls. You can also:

▶ View the number if available and call it, or save it in Address Book

▶ Enter a new name for the number and save both in Address Book.

▶ Send a message to this number.

▶ Delete the call from the list.

Call register

Call duration   Menu 2.5

Allows you to view the duration of your incoming and outgoing calls. You can also reset the call times. The following timers are available:

▶ **Last call:** Length of the last call.

▶ **Dialled calls:** Length of the outgoing calls.

MP3 player

The KE800 has an integrated MP3 player built-in. You can enjoy listening to MP3 music files on a memory in your phone using a compatible headset or via the internal loudspeaker.

> **Note**
> ▶ Because of the small dimension of the speaker, in some cases the audio could be distorted, especially at maximum volume and when there are lots of bass sounds. Therefore, we recommend you to use the stereo headset in order to appreciate the high quality of your music.

The music player supports:

▶ **MPEG-1 Layer III, MPEG-2 Layer III, MPEG-2.5 Layer III:** Sampling frequency up from 8KHz to 48KHz. Bit rate up to 320Kbps, stereo.

▶ **AAC:** ADIF, ADTS formats (Sampling frequency from 8KHz to 48KHz)

▶ **AAC+:** V1: (Bit rate 16~128Kbps)
　　　　　　V2 : (Bit rate 16~48Kbps)
　　　　　　(Sampling frequency from 8KHz to 48KHz)

▶ **MP4, M4A:** Sampling frequency up from 8KHz to 48KHz, Bit rate up to 320Kbps, stereo.

▶ **WMA:** Sampling frequency up from 8KHz to 48KHz, Bit rate up to 320Kbps, stereo.

> **Note**
> ▶ KE800 doesn't support the variable bit rate of all mentioned file types. Therefore, you can't change the file from MP3 format to AAC.

You can transfer MP3 files from a compatible PC to the memory in your phone using the Mass Storage. When you connect the phone to a PC using the USB cable (supplied in the same package), and then you can show removable disk through windows explorer. After you copy songs in removable disk, you should execute safe remove from your system.

> **Note**
> ▶ You should copy MP3 to My media\Music folder. If you copy another folder, you can't see MP3 files.
> ▶ The PC should run Windows 98 SE, Windows ME, Windows 2000, Windows XP operating system.

MP3 player [Menu 4-3-1]

The following screen is shown up.

- Player skin
- File name
- Progressive bar
- Running time
- Stereo/ Playmode/ Shuffle/Hold
- Volume level
- Status of the music controller
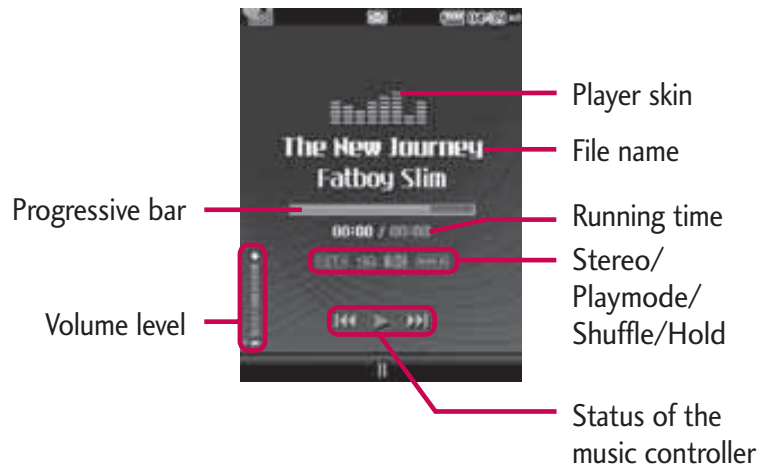

Repeat	
↻	Play all
↻Ⓐ	Repeat all

Home screen shortcut (Menu 9.3.7)

Language   Menu 9.4

You can change the language for the display texts in your phone. This change will also affect the Language Input mode.

Connectivity   Menu 9.5

Bluetooth (Menu 9.5.1)

Bluetooth® functionality enables compatible mobile devices, peripherals and computers that are in close proximity to communicate directly with each other without wires. This handset supports built-in *Bluetooth* connectivity, which makes it possible to connect them with compatible *Bluetooth* headsets, computer applications and so on.

Note
▶ If you use LG PC Sync via *Bluetooth*, you can exchange the data only within phonebook
▶ When you receive data from another *Bluetooth* device, the phone requests confirmation. After confirming the transfer, the file will be copied on to your phone.
▶ Depending on the file type, it will be stored in the following folders:
  - MP3 (.mp3, mp4, aac, m4a, wma): Music folder.
  - Video (.3GP): Video folder.
  - Phonebook contacts (.VCF): Phonebook.
  - Text (.txt): Text folder.
  - Other files (.*.*): File storage folder.
▶ Supported *Bluetooth* software (*Bluetooth* stacks) for DUN: Recommended drivers WidComm Bluetooth for Windows 1.4 and 3.0

Settings

▶ **Set Bluetooth**

You can activate or cancel the Bluetooth function.

▶ **Paired devices/Handsfree devices**

You can view all devices which your KE800 is already paired to. If you enter Paired devices or Handsfree devices menu, you access the options:

- **Add new:** Allows to search new *Bluetooth* devices and add them to your phone's list of paired devices. When you select Add new your handset will start to search for *Bluetooth* devices within range. Once the device you wish to pair appears on the list press the right soft key [Stop]. Scroll to the desired device and press the left soft key [Pair]. You will then be asked to enter a passcode. The passcode can be any code you wish to use (the same passcode must be used by both devices) or is one that is predetermined by the manufacturer of the device you are trying to pair with. Please check the User Manual of the device you are initiating the pair with to see if it already has a predetermined passcode in place.

- **Assign name:** Allows you to change the name of the paired *Bluetooth* device and how it is displayed on the handset.

- **Set as authorised/Set as unauthorized:** Allows you to set an authorised connection between each *Bluetooth* device. For example if you regularly use a *Bluetooth* headset with your phone then setting the connection as authorised will mean the headset will automatically connect to the handset each time the headset is powered on.

- **All services:** Allows to view all services which are supported by *Bluetooth* device.

- **Delete:** Allows to delete a paired *Bluetooth* device.

▶ **Settings**

- **My handset's visibility:** This indicates whether or not your handset will be visible to other *Bluetooth* devices.

- **My handset's name:** You can set the name of *Bluetooth* device. The default name is LG KE800.

▶ **Supported services**

Displays a list of Bluetooth services the handset supports.

- Headset

- Handsfree kit

- File transfer

- Image printing

- Dial-up networking

- Business card transfer

- Browsing other device

- Serial Port Profile

Sync service (Menu 9.5.2)

You can access the network services through the Sync service. If you want to use the Sync service, you should access the menu and activate the modem and then plug in the USB cable.
