

**WARNING:** You may find it easier to use a stylus in this mode, please remember to press lightly to protect your screen from damage.

Handwriting recognition translates stylus gestures into letters, numbers or other character, and displays these characters as text. Handwriting recognition is only active where text can be entered.

**Note:** Most letters can be written using different stroke styles. See the tables below. The arrow selects whether the letter is upper or lower case, not the style of writing.

## Alphabet

If you select capital letter mode (ABC), letters you type will be inserted as capital letters even if you write in small letters, and vice versa.
