Entering text

You can enter alphanumeric characters using the keypad.

For example, storing names in Contacts, writing a message, creating a personal greeting or scheduling events in the calendar all require entering text. The following text input methods are available with the handset.

T9 Mode

 Abc  abc

This mode lets you enter words with only one keystroke per letter. Each key on the keypad has more than one letter. The T9 mode automatically compares your keystrokes with an internal dictionary to determine the correct word, thus requiring far fewer

keystrokes than the traditional ABC mode. This is sometimes known as predictive text.

Mode  Abc  abc

This mode lets you enter letters by pressing the key labeled with the required letter once, twice, three or four times until the letter is displayed.

123 Mode (Numbers Mode)

 123

Type numbers using one keystroke per number. To change to 123 mode in a text entry field, press the  key until 123 mode is displayed.

Changing the text input mode

When you are in a field that allows characters to be entered, you will notice the text input mode indicator in the upper right corner of the LCD screen.

- Press  to cycle between  Abc,  abc,  Abc,  abc.
- Press and hold  to switch between text entry mode and number entry mode.

Messaging

Using the T9 Mode

The T9 predictive text input mode allows you to enter words easily with a minimum number of key presses. As you press each key, the handset begins to display the characters that it thinks you are typing based on a built-in dictionary. As new letters are added, the word changes to reflect the most likely candidate from the dictionary.

1. When you are in the T9 predictive text input mode, start entering a word by pressing **2** to **9**. Press one key per letter.
 - The word changes as letters are typed. Ignore what's on the screen until the word is typed completely.
 - If the word is still incorrect after typing completely, press **0** once or more to scroll through the other word options.

Example

Press **2** **4** **2** **6** to type

Good.

Press **0** to get **Home**.

- If the desired word is missing from the word choices list, add it by using the ABC mode.

2. Enter the whole word before editing or deleting any keystrokes.
3. Complete each word with a space by pressing **0**.

To delete letters, press **↵**. You can press and hold down **↵** until the entire words are deleted.

Using the ABC Mode

Use **2** to **9** to enter your text.

1. Press the key labelled with the required letter:
 - Once for the first letter.
 - Twice for the second letter.
 - And so on.
2. To insert a space, press **0** once. To delete letters, press **↵**. Press and hold down **↵** to clear the display.

Refer to the following table for more information on the characters available using the alphanumeric keys.

Key	Characters in the order display	
	Upper Case	Lower Case
	.,?!@'-'_():;&/%*# +<=>"\$£\$¥¤ ¿	.,?!@'-'_():;&/%*# +<=>"\$£\$¥¤ ¿
