## Various Security Codes

### ● Cautions on security codes

- Avoid setting security codes using your birthday, part of your phone number, your address or room number, "1111" or "1234" that can be easily guessed by others. Be sure to write down the set security codes and store them in a separate location.
- Do not reveal your security codes to others. DOCOMO is not responsible for damage caused by misuse of your security codes by others.
- If you forget your security codes, you need to bring your identification document (driver's license, etc.), the FOMA terminal, and UIM to the docomo Shop. For details, contact "General Inquiries" at the back of this manual.
- PUK code is written in the application form (copy for subscriber) given at the time of contract. If you have subscribed at a place other than the docomo Shop, bring your identification document (driver's license, etc.) and UIM to the docomo Shop or contact "General Inquiries" at the back of this manual.

### Terminal security code (Default: 0000)

You can change the Terminal security code by yourself.  
Stand-by display ▶  ▶ "Settings" ▶ "Lock/Security"  
▶ "Change security code"

### Network security code (At the time of contract: any number)

The Network security code is a 4-digit number to be used for your identification at an acceptance of order at the docomo Shop, docomo Information Center, or "お客様サポート (user support)", or for accessing network services. You can change the code by yourself.

If you have "docomo ID and Password" for "My docomo", a total support site for a PC, you can change the Network security code from a PC. From i-mode, you can change it by accessing "iMenu" ▶ "お客様サポート (user support)" ▶ "各種設定(確認・変更・利用) (settings (check/change/use))" ▶ "ネットワーク暗証番号変更 (Change Network security code)".

- For "My docomo" and "お客様サポート (user support)", see the back side of the back cover of this manual (Japanese only).

## i-mode password (At the time of contract: 0000)

The "i-mode password" is a 4-digit number required to register/remove contents in My Menu, and subscribe to/cancel the message service or fee-based i-mode services. (Some other information service providers may set individual passwords.)

You can change the password by yourself.

From i-mode, you can change it by accessing "iMenu" ► "English" ► "Options" ► "Change i-mode Password".

## PIN1 code/PIN2 code (At the time of contract: 0000)

You can set PIN1 and PIN2 codes to the UIM. PIN1 code is a 4- to 8-digit number to be entered to identify the user every time UIM is inserted into the FOMA terminal or the terminal power is turned on in order to prevent unauthorized use by third party. PIN2 code is a 4- to 8-digit number used to reset accumulated call charges, etc. You can change them by yourself. To change PIN1 code, set "PIN1 code request" to "ON" beforehand.

Stand-by display ►  ► "Settings" ► "Lock/Security" ► "PIN code" ► Enter the Terminal security code ► "Change PIN1 code"/"Change PIN2 code"

## PUK code (PIN unblock code)

PUK code is an 8-digit number used to unblock PIN1 code or PIN2 code. You cannot change it by yourself.

- If you failed to enter PUK code 10 times in a row, UIM is locked.

#### Information

- When you use "Call forwarding" of a land-line phone and have specified a mobile phone as the forwarding destination, the caller may hear a ring tone even if the mobile phone is busy, out of service area, set to Self mode, or turned off depending on the settings of the land-line phone and mobile phone.
- Even when the UIM is not inserted, emergency phone numbers (911, 999, 112, 000, and 08) can be dialed to make an emergency call overseas. However, when Self mode is set, emergency calls cannot be made.

- This FOMA terminal supports "緊急通報位置通知 (Emergency Location Report)". When making emergency calls to 110, 119, or 118, your current location (location information) will automatically be notified to emergency report reception agencies such as the Police. The agency may not receive accurate location information depending on your current location or signal conditions. When you do not notify of your caller ID by dialing such as with "184" added, your location information and caller ID are not notified. However, when the agency judges that the location information and caller ID are necessary to protect a human life, it may acquire your location information and caller ID regardless of your setting. The region and timing "Emergency Location Report" is introduced vary depending on the preparation of respective emergency report reception agencies.
- When making a call at 110, 119, or 118 from the FOMA terminal, inform an operator that you are calling from a mobile phone and your caller ID and actual location. Do not move around while you are talking during an emergency call to prevent the call from being disconnected unexpectedly. Do not turn the power off immediately after the call is over; and keep the FOMA terminal ready to receive calls for approximately 10 minutes.
- Depending on the area where you are calling, you may not be connected to the local police or fire station. In such a case, use a public phone or land-line phone nearby.

## Using Overseas

**International roaming (WORLD WING) is a service that allows you to use the FOMA terminal used domestically in a service area of international carrier associated with DOCOMO, with the same phone number and mail address. You can use voice call, SMS, and i-mode mail functions without changing settings.**
