## Making use of USB (Universal Serial Bus) Feature

### NOTE

- 1. To activate the USB hub function, the monitor must be connected to a USB compliant (D5) or a hub with the USB cable connected.
- 2. When connecting the USB cable, check that the shape of the connector is the same as the connector on the connected side.
- 3. When the power is supplied from an electric socket, the peripheral devices connected to the downstream ports will not operate.
- 4. The power supply of the self-powered mode USB compliant device will not operate. Be sure to connect the USB ports (both the upstream and downstream) to the monitor.

## USB specifications

|                         |                                       |
|-------------------------|---------------------------------------|
| USB standard            | Rev. 1.0 complied self-powered hub    |
| Downstream power supply | 500mA for each (MAX)                  |
| Communication speed     | 12 Mbps (full), 1.5 Mbps (low)        |
| USB port                | 1 Upstream port<br>4 Downstream ports |

**FCC Compliance Statement****Communications Regulation Information**

This equipment has been tested and found to comply within the limits of a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception (which can be determined by turning the equipment on and off), the user is encouraged to try to correct the interference by using one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's (or your) authority to operate the equipment. Only peripherals (digital input/output devices, terminals, printers, etc.) certified to comply with the Class B limits may be attached to this monitor. Operation with non-certified peripherals is likely to result in interference to radio and TV reception. Only shielded signal cables may be used with this System.

**Canadian DOC Notice**

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

**CE Conformity Notice**

Products with the "CE" Marking comply with the EMC Directive(89/336/EEC) and LOW VOLTAGE Directive (73/23/EEC) issued by the Commission of the European Community.

Compliance with these directives implies conformity to the following European Norms :

- EN 55022 ; Radio Frequency Interference
- EN 50082-1:1992 ; Electromagnetic Immunity
- EN 60555-2 ; Power Line Harmonics
- EN 60555-3 ; Voltage Fluctuations
- EN 60950 ; Product Safety
