

| LSP-410R | USER GUIDE

Please read this manual carefully before operating your set. Retain it for future reference.

Highlights

Congratulations on your subscription to the LSP-410R Fixed Wireless Phone. This phone has been designed to operate on the IS-2000 Air Protocol over the 800MHz band. And the phone has the advanced user interface similar to mobile phone. It has greatly enhanced voice clarity and provides various advanced features.

Key phone features:

- ▶ FM Radio
- ▶ Display is 3 lines text + 1 Icon line. Yellow/Green LCD & Keypad back light
- ▶ Polyphonic Ring tones: A choice of 10 melodies and 5 bell sounds available
- ▶ Large Phonebook with 300 entries
- ▶ Speed Dialling for up to 300 numbers
- ▶ Total of 50 Missed, Received, Dialed calls, and/or In Call Memo stored under Call History Menu
- ▶ 3 Way call conferencing
- ▶ Enhanced SMS features - 1234 Services

- ▶ Hands free Speaker Phone
- ▶ Receiver Off-Hook tone
- ▶ Recent Call History can be dialled by Dial / Flash key
- ▶ Adjustable Ringer volume, Key volume, Earpiece volume
- ▶ Fast charging battery.

Important Information

1.1 Safety Instruction

WARNING / CAUTION

To reduce the risk of fire or electric shock, do not expose this phone to rain or moisture. Do not use this phone in swimming pools or other water bodies.

1.2 Optimal Phone Performance

- ▶ Do not hold the antenna when operating the phone, or operate the phone when someone is within four inches (ten centimeters) of the antenna. Both cases affect the call quality and may cause the phone to operate at a higher power level than required.
- ▶ For the best call quality, keep the antenna free from obstructions and position the antenna upright.
- ▶ Do not use the phone if the antenna is damaged. Replace the damaged antenna immediately by a qualified technician. Use only a manufacturer-approved antenna.
Non-approved antennas, modifications or attachments may impair call quality and damage the phone.

- ▶ RF energy may affect improperly installed or inadequately shielded personal medical devices such as pace-makers or hospital monitors. Consult the manufacturer of any personal medical devices to determine whether they are adequately shielded from external RF energy. Turn your phone OFF in health care centers if any regulations posted in the area instruct you to do so. Hospitals or health care centers may be using equipment that may be sensitive to external RF energy.
- ▶ If this phone causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna
 - Place the radio or television farther away from the phone.
 - Connect the equipment to an outlet on a circuit different from that to which the phone is presently connected.
 - Consult the Authorized LGE Dealer for assistance of an experienced radio/TV technician.
- ▶ Use battery, antenna and AC/DC power adapter provided by LGE. Using parts made by any other

manufactures may invalidate the warranty.

- ▶ Only authorized personnel should service the phone and its accessories. Faulty installation or service can be dangerous and may invalidate the warranty.
- ▶ Do not use the phone in any designated “cellular phone use” area.
- ▶ Avoid using the phone in high temperature or humidity.
- ▶ Avoid spilling any liquid on the phone. If the phone gets wet, turn the power off immediately. If the phone doesn't work, please contact the service provider immediately.
- ▶ Avoid shock or impact.
- ▶ We recommend you to charge the backup battery before initial use. The backup battery may be discharged during delivery.

Important Information

1.3 Care and Service

Before cleaning, always unplug the phone from the wall outlet and remove the antenna (or disconnect the antenna cable). Do not use liquid or aerosol cleaners; use a damp cloth for cleaning.

If the phone doesn't work, do not attempt to disassemble it, contact the authorized LGE Service center for assistance.

If any of the following conditions exist, unplug the phone from the wall plug, remove the battery and call the qualified engineer.

- ▶ The power supply cord is damaged or frayed.
- ▶ Liquid has spilled into the phone.
- ▶ The phone has been exposed to rain or water.
- ▶ The phone has been dropped or damaged.
- ▶ The phone does not function normally even after following the operating instructions.

Important Information

1.4 Safety Information

WARNING

- ▶ For safety, use only an adapter approved by LG.
LG does not bear responsibility for any faults that may arise due to non-conformation to this guide.
Example: LSP-410R
(LG Power Adapter Source: DC 5V / 1A)
- ▶ Do not, in any way, cause a short-circuit. It may start a fire or the phone may explode causing injury.
- ▶ Do not create a sudden impact on the battery by throwing it. Do not dispose off batteries by putting them in a fire. They may explode or catch fire due to the electrolyte within.

CAUTION

- ▶ Do not use the phone with a car battery. It may cause electric shock, fire, breakdown or transformation.
- ▶ Avoid using the phone in high temperature or humidity. Avoid spilling any liquid on this phone. If the phone gets wet, Switch off phone and turn off AC power supply.
- ▶ Keep the phone dry. Submersion, humidity, and liquids contain minerals that may corrode internal electronic circuits.
- ▶ Do not store or use the phone in dusty or dirty areas as this can damage the moving parts.
- ▶ Do not store the phone in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and

- warp or melt certain plastics.
- ▶ Do not store the phone in cold areas. When the phone warms up to its normal operating temperature, moisture can form inside the phone, which can damage the internal electronic circuit boards.
- ▶ Do not attempt to open it. Non-expert handling of the phone could damage it. It may cause fire, electric shock and breakdown. Consult your authorized LG dealer for assistance.
- ▶ Do not drop, knock or shake the phone. Rough handling may break the internal circuit boards.
- ▶ Do not use harsh chemicals, cleaning solvents or strong detergents to clean the phone. Wipe it with a soft cloth that has been slightly dampened in a mild soap and water solution.

Important Information

- ▶ Do not paint the phone. Paint can clog the phone's moving parts and prevent proper functioning.
- ▶ During lightning, do not touch the power plug or the phone line. It may result in an electric shock or death.
- ▶ Do not install the phone under direct sunlight or on an uneven surface.
- ▶ Before using the plug, check the available power voltage. Inaccurate power voltage may cause fire and damage.
Example: LSP-410R Input Voltage: 100 ~ 240V.
- ▶ Do not plug many power cords into one outlet. It may cause fire or electric shock.

Important Information

▶ Do not remodel the power cord or disassemble it. If the power cord or plug is impaired, do not use it. It may cause fire or electric shock.

▶ Do not install the phone in an ill-ventilated place. It may cause fire or a breakdown.

▶ Do not touch the plug with wet hands. When disconnecting the power cord of any accessory, grasp and pull out the plug itself and not the cord. It may cause fire or electric shock.

▶ Do not put heavy objects on the power cord. Do not bend the power cord too much. It may cause fire or electric shock.

▶ Use only an LG-approved battery and adapter. If not, it may cause an explosion or result in a short-

circuit. LG does not bear any responsibility for the damage.

▶ When you disconnect the power cord of any accessory, grasp and pull the plug itself and not the cord. It may cause the adapter to breakdown.

2.1 Front View of the Phone

- ① Soft key 1 : Activates Main Menu state
- ② Message : Activates SMS Menu state
- ③ END/PWR : Deactivates states, or Power ON/OFF
- ④ Soft key 2 : Activates Find Menu state
- ⑤ Up Key (▲) : Moves up in the Menu or Volume Up

- ⑪ # : Inputs Symbol '#', or makes a phone lock after long-press, or search frequency during a FM radio play.
- ⑫ MIC : Microphone for hands free speaker phone function.
- ⑬ Attached Antenna

Introduction

2.2 LCD Display

The LCD shows icons on the top of the LCD screen. Different indicators appear based on the phone's operating mode.

Icon	Operating Condition
	RSSI indicator: Indicates the signal strength in the service area.
	No service: The phone is not receiving any system signal.
	In use: Displayed when a call is in progress or the phone is in offhook state.
	Text message: Displayed when a text message is received.
	Voice message: Displayed when a voice message is received.
	Alarm: Displayed when alarm time is set.
	Incoming Call Indicator : Displayed when the Incoming Call is received
	Not used
	Battery charge level: Indicates charged battery level.

Introduction

2.3 Installation

You should follow each step carefully as shown below in order to guarantee the proper operation of CDMA Fixed Wireless Phone.

Main Unit

Dipole Antenna

AC/DC Power Adapter

FM Radio Antenna

User Guide

STEP I. Check Components

▶ The following components are supplied Fixed Wireless Phone.

1. LSP-41 OR Main Phone with Handset
(Including inner backup battery) -1 EA-
2. Dipole Antenna -1 EA-
3. AC/DC Power Adapter -1 EA-
4. User Guide -1 EA-
5. FM Radio Antenna -1 EA-

▶ Please make sure that these components are present before you begin to install the phone. If any of the components are missing or damaged, contact your service provider immediately.

STEP II. Place the Terminal

▶ Place the phone on the stable flat surface area (desk, table, etc.). Serious damage may result if the phone is dropped. Do not place the phone within 1 meter of heaters or radiators.

This phone is designed for desktop usage. Avoid the direct exposure to sunlight and dampness.

▶ Read the SAFETY INFORMATION located in the first part of this document before you place the phone.

STEP III. Connect Components (Please refer to “Installation Steps” in 2.4)

▶ Connect the antenna to the TNC antenna connector located at the top of the phone.

If you have placed the phone on a flat surface, position the antenna pright.

▶ Connect the curl cord of the handset to the RJ-11 port located on the left side of the phone.

▶ Connect the AC/DC Adapter cable to the DC input port located at the top of the phone.

- If it is correct, a beep tone will be heard.

- If it is not correct (Booting fails or beep tone is not heard), you will have to reconnect the adapter or reset the battery switch to “on”.

▶ Please observe the following to get better voice quality.

1. Keep away from electrical appliances such as TV, computer, radio etc.
2. Keep the phone in a high and central location without any obstructions.
3. Raise the integral antenna of the phone to get maximum strength as shown in the figure.

STEP IV. Check the LCD Display

▶ After you follow the installation instruction step I to step III, please check the LCD for normal operation.

▶ If you do not see the status of service, please repeat the 4th instruction of step III.

Then confirm the status of phone to get the proper signal strength from the service operator system.

2.4 Installation Steps

Please follow the procedure below to install the phone properly.

1 Connect basehandset to the handset connector.

2 Connect the antenna to the TNC connector (Turn right).

3 Turn the antenna upright.

4 When you first use the phone, please Turn "on" the battery switch.

5 Connect the AC power supply.

6 Press END/PWR button to operate initially.

Notice

- ▶ Before using the phone, please check that the battery switch is "on".
- ▶ After switching if on, use the phone.
- ▶ When charging the battery, check that the battery switch is "on".
- ▶ The battery will be charged only when the battery switch is "on".

3.1 Making a Call

You can make a call as follows.

1. Pick up the handset or press button.
2. Listen for dial tone.
3. Enter the phone number with area code if needed.
4. Wait for the Auto Time-out or Press Dial/Flash button.
5. The call is connected and you may start conversation.
6. To disconnect the call, replace the handset or press button.

When the user presses the Dial/Flash button after dialing any desired number, if the user picks up the handset or presses the Speaker Phone button, the phone makes a call immediately.

3.2 Messaging

You can send or receive a short message. If you want to send SMS, press **Message** button + 1 **Write** in on-hook state and write "send to" number / message that you want and send your message. When the message received in idle state or during a call, you can confirm your message as follows.

1. Press **Message** button + 2 (**Inbox**) + 1 (**View SMS**).
2. Press Soft key 1 **View** to confirm desired message.

3.3 Redialing Last Number

You can make a redial to last number, shown in All Calls.

1. Pick up the handset or press button.
2. Listen for dial tone.
3. Press Dial/Flash button.

Basic Operations

- The call is connected and you may start conversation.
 - To disconnect the call, replace the handset or press **Mute** button.
- ※ You can also dial any of the last 50 (Missed+Received+Dialled+In Call Memo) numbers stored in All Calls.

3.4 3 way call conferencing

You can start 3 way call conferencing.

- Dial second party phone number while you are in conversation with the first party.
- To make conference call, press '3' + **Dial/Flash** button.
This service should be provided by your service provider.

3.5 Call Waiting

While a call is in progress, you may hear two beeps indicating another incoming call.

When call wait is enabled, you may put the active call on hold while you answer the other incoming call.

- Press **Clear** or **END/PWR** button, Call Waiting window then disappears.
- Press **Dial/Flash** button, you may start conversation with called number.
- Re-press **Dial/Flash** button, you may start conversation with previous number.

3.6 Volume Control

- Press Up/Down button of navigation while in a call, to adjust earpiece volume.
- Press Soft key 2 **Mute** to prevent sound from your end during the call. To cancel Mute, Press again Soft key 2 **Unmute**.

..... Message END/PWR

Soft Key 1 Soft Key 2

To scroll in Menu, press **▲** or **▼** button.

- Press Soft key 1 **Menu** + 3(**Mic Level**) during a call and select Low or High by pressing Soft key 2 **Next** or Press Up/Down button, to adjust MIC volume.

3.7 Receiving a Call

When the bell rings in idle state, you can receive a call as follows

- Pick up the handset or press the **Speaker Phone** button.
- Start a conversation.
- To disconnect the call, replace the handset or press the **Speaker Phone** button.

Basic Operations

3.8 In Call Memo

Allow you to store number during the call.

To store number:

- Press Soft key 1 **Menu** + 1 (**In Call Memo**).
- Enter up to 32 numbers using the keypad.
- Press Soft key 1 **Add** to save.

To retrieve an In Call Memo:

- Press Dial/Flash button to see saved number.

Note: You can store the number by pressing Soft key 1 **Add**.

3.9 Lock Mode

Protects your phone from unauthorized use. Once the phone is locked, it is in restricted mode, until the in lock code is entered. This will allow you to receive phone calls and still make emergency calls. The lock

code/password on your phone is "0000" by default.

If you need to modify the lock code, you may modify it using the change code within the security Menu [4.1.4.6 page no. 34].

You can lock your phone using the '#' (🔒 :Lock) key, also you can lock your phone manually as explained [4.1.4.1 page no. 32].

Under Lock Mode

1. Press '#' button for some time.

The phone is now locked.

2. To unlock, press Soft key 1 **Unlock** .

••••• **Message** **END/PWR** •••••

Soft Key 1

Soft Key 2

3. Enter unlock code. (Default "0000").

3.10 Entering and Editing Information

You can edit the phone book and short messages using various text input mode.

Key Functions

Soft key 2 : Press to scroll and select a mode through menus.

- Soft key 2 : Press to scroll and select a mode through Menus. You can scroll through the modes using Soft key 2 in the following order: ABC, abc, Sym1, Sym2.

-  SPACE key : Press to insert a space.

- Clear key : Press to delete a single space or character. Press and hold to delete entire words.

Input Mode

Text Input provides four modes for entering text, special characters, and punctuation.

- **ABC / abc Mode** : Use ABC or abc mode to input text in English.

⇒ ABC Mode : All subsequent letters are capitalized.

⇒ abc Mode : All subsequent letters are lowercase.

- **Sym1 / Sym2 Mode** : Insert special characters and punctuation. You may use any of the special characters. When the special characters are displayed, you can select the number corresponding to the character that you want to input.

- For number entry, first select the key button you want to input in ABC / abc mode and then press the key button until the number is displayed.

4.1 Menu

You may select from four Main Menu (Sound, Settings, Dial Features, Security) for this item.

If you press Soft key 1 **Menu** is activated.

..... **Message** **END/PWR**

Soft Key 1

Soft Key 2

To scroll in Menu, press ▲ or ▼ button.

To return to the initial screen, press END/PWR button and to return to the previous screen, press Clear button.

4.1.1 Sound

Allows you to set various volume settings and Ring Type.

Press Soft key 1 **Menu** + 1 (**Sound**) in on-hook state.

4.1.1.1 Ring Type

You can select the various ring types.

1. Press Soft key 1 **Menu** + 1 (**Sound**) + 1 (**Ring Type**) in on-hook state.

2. Press Up/Down button or Soft key 2 **Next** to select desired ring type.

3. Press Soft key 1 **Ok** to save setting.

Note: Choose from 15 different ring types (Aahat / Aarti / Dillagi / Nachtmusik / Hamnavaz / SaareJahan / ShubAarti / Symphony / TereSang / ToccataNFugue / Bell_01 / Bell_02 / Bell_03 / Bell_04 / Bell_05).

4.1.1.2 Ringer Volume

You can adjust the ringing volume level of incoming call alert.

1. Press Soft key 1 **Menu** + 1 (**Sound**) +

2 (**Ringer Volume**) in on-hook state.

2. Press Up/Down button or Soft key 2 **Next** to adjust Ring Volume.

3. Press Soft key 1 **Ok** to save setting.

4.1.1.3 Key Volume

The tone when you press a key can be adjusted.

1. Press Soft key 1 **Menu** + 1 (**Sound**) +

3 (**Key Volume**) in on-hook state.

2. Press Up/Down button or Soft key 2 **Next** to adjust key volume.

3. Press Soft key 1 **Ok** to save setting.

4.1.1.4 Earpiece Volume

The voice of the other party can be adjusted.

1. Press Soft key 1 **Menu** + 1 (**Sound**) +

4 (**Earpiece Volume**) in on-hook state.

2. Press Up/Down button or Soft key 2 **Next** to adjust earpiece volume.

3. Press Soft key 1 **Ok** to save setting.

Note : Press Up/Down button to adjust the volume during a conversation.

4.1.1.5 Radio Volume

You can adjust the radio volume.

1. Press Soft Key 1 **Menu** + 1 (**Sound**) +

5 (**Radio Volume**) in on-hook state.

2. Press Up/Down button or Soft Key 2 **Next** to adjust radio volume.

3. Press Soft Key 1 **Ok** to save setting.

Note: Press Up/Down button to adjust the volume during a radio play.

4.1.2 Settings

You can use additional features like Alarm, Call, Backlight etc.

Press Soft key 1 **Menu** + 2(**Settings**) in on-hook state.

4.1.2.1 Alarm

[Set Time]

This function allows you to set alarm time.

1. Press Soft key 1 **Menu** + 2(**Settings**) + 1(**Alarm**) + 1(**Set Time**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select from Off, Once or Always and press Soft key 1 **Ok**.
3. Enter alarm time and press Soft key 1 **AM/PM** and select AM or PM.
4. If you want to modify the time, press Clear

button and reset.

5. Press Soft key 2 **Ok** to save and exit.

[Set Ringer]

This function allows you to select ringer for alarm alert.

1. Press Soft key 1 **Menu** + 2(**Settings**) + 1(**Alarm**) + 2(**Set Ringer**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select from Alarm Ring 1, Alarm Ring 2, Alarm Ring 3, Alarm Ring 4 or Alarm Ring 5.
3. Press Soft key 1 **Ok** to save and exit.

4.1.2.2 Call

[Call Forward]

“Call Forward” lets you forward all your incoming calls to another number or Voice Mail connection.

1. Press Soft key 1 **Menu** + 2(**Settings**) + 2(**Call**) + 1(**Call Forward**) in on-hook state.

2. Select from Immediate / When Busy / No Reply / Disable All.

“Disable All” deactivates all the activated call forwarding options.

3. Select Enable or Disable.

⇒ If you select Enable, Enter the phone number that you want. Press Soft Key 1 **Ok** to save and exit.

[Call Waiting]

While a call is in progress, you may hear two beeps indicating another incoming call. When call waiting is enabled, you may put the active call on hold while you answer the other incoming call.

1. Press Soft key 1 **Menu** + 2(**Settings**) + 2(**Call**) + 2(**Call Waiting**) in on-hook state.
2. Select Enable or Disable and press Soft key 1

Ok.

⇒ Contact your service provider for more information on Call Forward and Call Waiting.

4.1.2.3 Version

You can confirm your phone S/W version.

1. Press Soft key 1 **Menu** + 2(**Settings**) + 3(**Version**) in on-hook state.
2. To confirm next page, press Soft key 2 **More**, and press Soft key 1 **Ok** to exit.

4.1.2.4 Backlight

Allows you to choose the settings of the LCD and keypad backlight.

1. Press Soft key 1 **Menu** + 2(**Settings**) + 4(**Backlight**) in on-hook state.
2. Select among Always Off / For 10 Seconds / For

30 Seconds / Always On

4.1.3 Dial Features

Press Soft key 1 **Menu** + 3(**Dial Features**) in on-hook state.

4.1.3.1 Hot Line

HotLine automatically calls to registered number by passing setup time in off-hook state.

1. Press Soft key 1 **Menu** + 3(**Dial Features**) + 1(**Hot Line**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select Enable or Disable and press Soft key 1 **Ok** .
3. Press Soft key 2 **Edit** and enter the Hot Line phone number.
4. Press Soft key 1 **Ok** to save and exit.

If you have selected 'Enable' and enter the HotLine Number and Time,

HotLine functions as follows:

When you pick up the handset or press **☎** button, the phone automatically dials the HotLine Number that you have already saved if any number is not dialed for duration specified in HotLine Time.

4.1.3.2 Hot Line Time

1. Press Soft key 1 **Menu** + 3(**Dial Features**) + 2(**Hot Line Time**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select hot line connection time (2~9 Sec.).
3. Press **Soft key 1 Ok** to select.

4.1.3.3 Auto Time Out

Setting the length of time the phone waits before automatically dialing a number. You can select this

duration to be between 2 and 9 seconds.

1. Press Soft key 1 **Menu** + 3(**Dial Features**) + 3(**Auto Time Out**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select Auto Time Out between 2 and 9 Sec.
3. Press Soft key 1 **Ok** to select.

4.1.3.4 Speed Dialing

This function allows you to make a call faster by just pressing a corresponding number.

Up to 300 memory locations can be assigned for speed dial. To speed dialing press the memory number (1 through 300) corresponding to the appropriate memory location and hold for a few seconds.

⇒ This function can be used when the speed dialing is set to enable.

1. Press Soft key 1 **Menu** + 3(**Dial Features**) +

- 4(**Speed Dialing**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select Enable or Disable.
3. Press Soft key 1 **Ok** to save and exit.

4.1.4 Security

4.1.4.1 Lock Mode

This function prevents the usage of your phone without your permission. You can protect your phone by 4 digits lock code/password. Possible settings are Enable or Disable. Disable indicates that the phone is not locked. Enable sets the phone locks immediately.

1. Press Soft key 1 **Menu** + 4(**Security**).
2. Enter 4 digits lock code.
3. Press 1(**Lock Mode**).
4. Press Up/Down button or Soft key 2 **Next** to select Enable or Disable.

5. Press Soft key 1 **Ok** to save and exit.
⇒ Default lock code is "0000".

4.1.4.2 Clear Calls

Clear Calls deletes complete Call History. Dialed, Received, Missed Calls & In Call Memo, all calls are deleted.

1. Press Soft key 1 **Menu** + 4(**Security**).
2. Enter lock code.
3. Press 2(**Clear Calls**).
4. Press Up/Down button or Soft key 2 **Next** to Select Yes or No.
5. Press Soft key 1 **Ok** to exit.

Note : Deleted call history can not be retrieved.

To return to the initial screen, press END/PWR button.

The phone can store a total of 50 Received, Dialed,

Missed Calls and/or In Call Memos in Call History.

4.1.4.3 Clear Memory

This function allows you to erase complete phone book memory.

1. Press Soft key 1 **Menu** + 4(**Security**).
2. Enter lock code.
3. Press 3(**Clear Memory**).
4. Press Up/Down button or Soft key 2 **Next** to select Yes or No.
5. Press Soft key 1 **Ok** to exit.

Note : Deleted phone book memory can not be retrieved.

4.1.4.4 Emergency Calls

Emergency number can store up to three numbers (default 100, 101, 102).

1. Press Soft key 1 **Menu** + 4(**Security**) in on-hook state.
2. Enter lock code.
3. Press 4(**Emergency Calls**).
4. To edit a number, press Soft key 1 **Edit** .
5. Press Soft key 1 **Ok** to save.

4.1.4.5 Restrict Call

You can restrict your outgoing calls including numbers / numbers beginning with specified digit in the Deny Memory.

For example: If "9" is stored in the Deny Memory, all number beginning with "9" cannot be called. However if "92" is stored in Permit Memory, you can call numbers beginning with "92" successfully.

1. Press Soft key 1 **Menu** + 4(**Security**) + 5(**Restrict Call**) + 1(**Set Restrict**) in on-hook state.

2. Select among No Restriction, Restriction or Emergency Only and press Soft key 1 **Ok** .
3. If **Restriction** is selected,
 - Enter the numbers / starting digit of specific numbers to be restricted in the Deny Memory.
 - Enter the number / starting digits of the numbers to be allowed in the Permit Memory.
 - Press Soft key 1 **Ok** to save and press Clear button to exit.
4. If **Emergency** Only is selected, your phone is enabled for only emergency numbers (default 100, 101, 102).

4.1.4.6 Change Code

Change Code allows you to enter a new four-digit lock code.

1. Press Soft key 1 **Menu** + 4(**Security**).

2. Enter lock code.
3. Press 6(**Change Code**).
4. Enter the new four-digit lock code that you want.
5. Press Soft key 1 **Ok** to go next state.
6. For confirmation, it will ask you to enter the new lock code again.
7. Press Soft key 1 **Ok** to save and press Clear or Soft key 2 **Back** button to exit.

4.1.5 FM Radio

This function allows you to play FM Radio.

1. Press Soft Key 1 **Menu** + 5(**FM Radio**).
 - Default frequency is 87.50 MHz and default name is "FM Radio".
2. Press Star(*) or Pound(#) key to search radio frequency manually.

- If you press for short time, increased or decreased 10 KHz. If you press for long time, the radio frequency is detected to auto scanning function.
3. For listen to saved radio frequency press key button (1 through 9).
 - If the frequency is not saved in the channel, the name is <empty> and the frequency is 87.50 MHz.
 4. To save, delete, change headset or speaker, and edit name correspond to the frequency, Press Soft Key 1 **Option** .
 5. Press Up/Down button and key button between 1 and 4 to select list.
 6. To save, delete, or edit name correspond to frequency, Press key button between 1 and 9.
 7. If you press channel in Naming list, You can change and edit name until 12 pos.
 8. Press Soft Key 1 **Ok** to save name.

Note:

- If a call is incoming during a radio play, The radio is stopped. When you disconnect a call, The radio is played again.
- The radio Hot key is Clear key.
- If you want to listen to radio, Connect a Headset. When you disconnect a headset during a radio play, "Connect a Headset" message is displayed in the LCD.

4.2 Messages

Text messaging, page and voice mailbox become available as soon as the power is on.

You may access the above type of messages using the Message key. The phone can store up to 50 messages in each Inbox and Outbox.

If you press Message Key, SMS Menu is activated.

..... **Message** **END/PWR**

Soft Key 1

Soft Key 2

To scroll in SMS Menu, press ▲ or ▼ button.

At any point of time, to return to the initial screen, press END/ PWR button and to return to the previous screen, press Clear button.

In the list of Inbox, all sorts of the icon have the meaning as follows:

! : Unread message

V : Read message

4.2.1 Write

This function allows you to compose and send SMS.

1. Press **Message** + 1(**Write**) in on-hook state.
2. Enter phone number or press **Ok** .
Soft key 2 **Find** .
3. Write messages. Refer to the 3.10 (page 19) Entering and Editing Information about text input.

4. Select option as following.

Delivery ACK: This function allows you to know

whether the messages have been successfully transmitted to the recipient. If you want to activate

this function, set to Yes.

Store Message: This function allows you to choose whether the sent message shall be saved or not.

You may select Yes or No.

Set Priority: This function allows you to give priority to message as Normal, Urgent or Emergency.

5. Press Soft key 1 **Ok** to send message.

4.2.2 Inbox

4.2.2.1 View SMS

Received messages are stored here.

1. Press **Message** + 2(**Inbox**) + 1(**View SMS**) in on-hook state.
2. To view desired message, select Soft key 1 **View** .
3. To reply the message, select Soft key 1 **Reply** .
4. To erase message, select Soft key 2 **Erase** .

⇒ For example, the meaning of (2/3) in View SMS is that 2 out of 3 messages are unread.

4.2.2.2 Voice Mail

Voice Mail notifications indicate the number of new voice messages in your mailbox.

Only the most recent voice mail notification will be stored in your phone, previous message will be

overwritten.

1. Press **Message** + 2(**Inbox**) + 2(**Voice Mail**) in on-hook state.
2. Pick up the handset or press Speaker Phone button to make a call back your voice mailbox if the number of the voice mailbox is provided by the telecom service company's system.

4.2.2.3 Erase All

This function allows you to erase all received messages.

1. Press **Message** + 2(**Inbox**) + 3(**Erase All**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select No or Yes.
3. Press Soft key 1 **Ok** to exit.

4.2.3 1234 Services

Exciting SMS-based Infotainment services such as News, Jokes, Horoscope etc are available to Reliance subscribers. Using the SMS 1234 services, the user will be able to access interesting information on common subjects through SMS. User needs to send Keyword in specified format to 1234 to access these services.

1. Press **Message** + 3(**1234 Services**) in on-hook state.
2. You may select from eleven items
(1. News / 2. Cricket / 3. Joke / 4. Thought / 5. Contest / 6. Beauty Tips / 7. Health / 8. Horoscope / 9. Bill Info / 0. Unbilled Info / *. Help)
3. You may select the number corresponding to the item that you want to send in subsequent-menu.

4.2.4 Outbox

4.2.4.1 View

All your successfully sent messages are saved here.

1. Press **Message** + 4(**Outbox**) + 1(**View**) in on-hook state.
2. To erase message, select Soft key 2 **Erase** .
3. To view or edit desired message, select Soft key 1 **Edit** .

4.2.4.2 Erase All

To erase all sending messages, select this function.

1. Press **Message** + 4(**Outbox**) + 2(**Erase All**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select Yes or No.
3. Press Soft key 1 **Ok** to exit.

4.2.5 Settings

4.2.5.1 MSG Alert

This function allows you to set the frequency of notification when message is received.

1. Press **Message** + 5(**Settings**) + 1(**MSG Alert**) in on-hook state.
2. Select among Off, Once or Every 2 Min by pressing Up/Down button or Soft key 2 **Next** .
3. Press Soft key 1 **Ok** to save and exit.

4.2.5.2 MSG Ringer

This function allows you to set the ringer-type for notification when message is received.

You can select from 5 choices.

1. Press **Message** + 5(**Settings**) + 2(**MSG Ringer**) in on-hook state.
2. Select a desired ringer type by pressing

Up/Down button or Soft key 2 **Next** .

3. Press Soft key 1 **Ok** to save and exit.

4.2.5.3 Defer Delivery

1. Press **Message** + 5(**Settings**) + 3(**Defer Delivery**) in on-hook state.
2. Select one of the following by pressing Up/Down button or Soft key 2 **Next** :
Immediate **After 30 Min.** **After 1 Hour**
After 2 Hours **After 12 Hours** **After 1 Day**
After 2 Days
3. Press Soft key 1 **Ok** to save.

4.2.5.4 Valid Period

1. Press **Message** + 5(**Settings**) + 4(**Valid Period**) in on-hook state.

2. Select desired time by pressing Up/Down button or Soft key 2 **Next** :

Default **30 Minutes** **1 Hour** **2 Hours**

12 Hours **1 Day** **2 Days**

3. Press Soft key 1 **Ok** to save.

4.2.5.5 Auto DEL Inbox

1. Press **Message** + 5(**Settings**) + 5(**Auto DEL Inbox**) in on-hook state.
2. Press Up/Down button or Soft key 2 **Next** to select Enable or Disable.
3. Press Soft key 1 **Ok** to save.

4.3 Find

This function allows you to search the phone numbers that you have stored in the phone book memory. You may search the numbers from call history also.

If you press Soft key 2, Find menu is activated.

..... Message END/PWR

Soft Key 1

Soft Key 2

To scroll in Menu, press ▲, ◀, ▶ or ▼ button.

To return to the initial screen, press END/PWR button and to return to the previous screen, press Clear button.

4.3.1 Call History

The phone can store a total of 50 Received, Dialed, Missed Calls and/or In

Call Memos in Call History.

When you press the Dial/Flash button, all calls are displayed. In the list of all calls, all sorts of the icons have the meaning as follows :

- Received : ←
- Dialed : →

- Missed : !

- In call Memo : ↵

- Call Waiting : ⤴

- 3 Way Call : ☎

4.3.1.1 All Calls

[In on-hook state]

1. Press Find + 1 (Call History) + 1 (All Calls) or Dial/Flash button.
2. Press Up/Down button to select a number or name in the call history list.
3. To view desired item, select Soft key 1 View .
4. To erase desired number, select Soft key 2 Erase .
5. Press Soft key 2 Time to see more information and press Soft key 1 Save to save the number in the phone book.

[While in a Call]

1. Press Menu +2 (Find) +1 (Call History) + 1 (All Calls) .
2. Press Up/Down button to select a number or name in the call history list.
3. To view desired item, select Soft key 1 View .
4. To erase desired number, select Soft key 2 Erase .
5. Press Soft key 2 Time to see more information and press Soft key 1 Save to save the number in the phone book.

4.3.1.2 Missed

1. Press Find + 1 (Call History) + 2 (Missed) in on-hook state.
2. Press Up/Down button to select a number or

name in the missed call list.

3. To view desired item, select Soft key 1 View .
4. To erase missed call, select Soft key 2 Erase .
5. Press Soft key 2 Time to see more information and press Soft key 1 Save to save the number in the phone book.

4.3.1.3 Received

1. Press Find + 1 (Call History) + 3 (Received) in on-hook state.
2. Press Up/Down button to select a number or name in the received call list.
3. To view desired item, select Soft key 1 View .
4. To erase received call, select Soft key 2 Erase .
5. Press Soft key 2 Time to see more information and press Soft key 1 Save to save the number in the phone book.

4.3.1.4 Dialed

1. Press **Find** + 1 (**Call History**) + 4 (**Dialed**) in on-hook state.
2. Press Up/Down button to select a number or name in the dialed call list.
3. To view desired item, select Soft key 1 **View** .
4. To erase dialed number, select Soft key 2 **Erase** .
5. Press Soft key 2 **Time** to see more information and press Soft key 1 **Save** to save the number in the phone book.

4.3.1.5 In Call Memo

1. Press **Find** + 1 (**Call History**) + 5 (**In Call Memo**) in on-hook state.
2. Press Up/Down button to select desired item in the In Call Memo list.

3. To view desired item, select Soft key 1 **View** .
4. To erase In Call Memo, select Soft key 2 **Erase** .
5. Press Soft key 2 **Time** to see more information and press Soft key 1 **Save** to save the number in the phone book.

4.3.1.6 Erase History

You may erase all history from five options (1. Erase AllCalls, 2. Erase Missed, 3. Erase Received, 4. Erase Dialed, 5. Erase Memo).

1. Press **Find** + 1 (**Call History**) + 6 (**Erase history**) in on-hook state.
2. Select history that you want to erase and press Soft key 1 **Ok** .

4.3.2 Phone Book

This function allows you to search the phone number in three way By Name, By Address and By Number, which you have stored in the phone book memory. Up to 300 entries can be listed here.

To store phone number

1. Enter the area code and phone number (Max. 32 digits) in on-hook state.
2. Press Soft key 1 **Save** .
3. Enter the name. Refer to the 3.1.0 (page 23) Entering and Editing Information about text input.
4. Enter the desired memory location.
5. The phone will display a message asking you whether to keep your number as secret or not. Select No or Yes using Up/Down button or Soft key 2 **Next** and press Soft key 1 **Ok** .
⇒ You will see a confirmation message and the

status of memory used.

[Fast Searching]

Press Soft key 2 **Find** and press Soft key 2 **Find** again.

4.3.2.1 By Name

1. Press Soft key 2 **Find** + 2 (**Phone Book**) + 1 (**By Name**), to retrieve a phone number by name.
2. Enter the name you want and press Soft key 2 **Find** . To find all phone numbers you have stored, press Soft key 2 **Find** .

4.3.2.2 By Address

1. Press Soft key 2 **Find** + 2 (**Phone Book**) + 2 (**By Address**), to retrieve a phone number by address.

2. Enter a memory address to retrieve phone number and press Soft key 2 **Find** . To find all phone numbers you have stored, press Soft key 2 **Find** .

4.3.2.3 By Number

1. Press Soft key 2 **Find** + 2(**Phone Book**) + 3(**By Number**), to retrieve a phone number by number.
2. Enter the phone number that you want to fine and press Soft key 2 **Find** . To find all phone numbers you have stored, press Soft key 2 **Find** .

5. Speaker Phone

This function is a convenient feature, which enables you to make a call using the Speaker Phone () button in on-hook state.

Troubleshooting

6. Troubleshooting

Please check the following items before contacting Authorized LGE service center.

Item	Remedy
Phone doesn't operate at all.	<ul style="list-style-type: none"> • Check that the phone is installed correctly. • Check that the battery is fully charged. • Check that the power is on.
Because of noise and cross talking, call status is bad.	Keep away from electrical application such as TV, computer, radio and so on.
When buttons are pressed to call, can't hear the dial tone..	Check that phone cord or power is connected correctly.
Battery fails to charge.	Check that the authorized adaptor (5V/1A) for LSP-410R is correctly connected to the DC power connector of the phone and Battery ON/OFF switch is ON.
Bell sound isn't heard	If bell sound is low, please adjust the volume level.
<ul style="list-style-type: none"> • The LCD repeats on and off when you plug-in the adapter while battery switch is off. • Phone repeats abnormally power-on and power-off after a few second when you plug-in the adapter while battery switch is on and phone is power-off. • There is no charging display when you plug-in the adapter while the phone is power on. 	Check that the adapter is the approved from LG. Adapter should be 5V(DC), 1A

General Information

7. General Information

▶ Main unit

Item	LSP-410R
Tx Frequency	Digital: 824 ~ 849 MHz
Rx Frequency	Digital: 869 ~ 894 MHz
Channel Bandwidth	1.25 MHz
Tx Power	0.282W
Rx Sensitivity	-104 ~ -25dBm
Size (mm)	195 X 163 X 73 (L X W X H)
Weight (gms)	553 (included Li-ion battery)
Operating Temperature	-10 ~ 50° C

▶ AC/DC Adapter

Item	SMPS Type Description
Rated Input Voltage	AC 100 ~ 240V
Operating Input voltage	AC 80 ~ 420V
Rated Input Frequency	50 / 60Hz
Operating Input Frequency	47 ~ 63Hz
Rated Output Voltage, Current	5V(DC), 1A

General Information

▶ Battery

Item	Description
Capacity	3.7V Li-ion (Nominal)
Talk time / Standby time	4 Hours / 120Hours
Charging time duration	3.5 Hours (Standby condition)

Note : Talk time condition : Output Power about 10dBm & full data rate Standby time condition : sector power -90dBm & slot cycle index 2

TIA Safety Information

TIA Safety Information

Provided herein is the complete TIA Safety Information for Wireless Handheld phones. Inclusion of the text covering Pacemakers, Hearing Aids, and Other Medical Devices is required in the owner's manual for CTIA Certification. Use of the remaining TIA language is encouraged when appropriate.

Exposure to Radio Frequency Signal

Your wireless handheld portable phone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radiofrequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously

set by both U.S. and international standards bodies:

ANSI C95.1 (1992) *

NCRP Report 86 (1986)

ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). The design of your phone complies with the FCC guidelines (and those standards).

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

Phone Operation

Tips on Efficient Operation:

- For your phone to operate most efficiently: Do not

TIA Safety Information

touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level

than otherwise needed.

- American National Standards Institute; National Council on Radiation Protection and Measurements; International Commission on Non-ionizing Radiation Protection.

Electronic Devices

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The Health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless

phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research Persons with

pacemakers:

- Should ALWAYS keep the phone more than six inches from their pacemaker when the phone is turned ON.
- Should use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider [or call the customer service line to discuss alternatives.]

Optional for each phone

manufacturer.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Potentially Explosive Atmosphere

Do not install the phone in potentially explosive atmosphere.

Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always marked clearly. Potential areas

TIA Safety Information

may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain, dust, or metal

powders); and any other area where you would normally be advised to turn off your vehicle engine.

For Vehicles Equipped with an Air Bag

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If invehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

FDA Consumer Update

The U.S. Food and Drug Administration's Center for Devices and Radiological Health Consumer Update on Mobile Phones.

TIA Safety Information

1. Do wireless phones pose a health hazard?

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe.

Wireless phones emit low levels of radiofrequency energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research.

In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

2. What is FDA's role concerning the safety of wireless phones?

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit radiofrequency

energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recall the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regulatory actions, FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones

with the best possible information on possible effects of wireless phone use on human health. FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to

this working group:

- National Institute for Occupational Safety and Health
 - Environmental Protection Agency
 - Occupational Safety and Health Administration
 - National Telecommunications and Information Administration
- The National Institutes of Health participates in some interagency working group activities, as well. The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC relies on FDA and other health agencies for safety questions about wireless phones. FCC also regulates the base stations that the wireless phone

TIA Safety Information

networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety

questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term "wireless phone" refers here to hand-held wireless phone with built-in antennas, often called "cell", "mobile", or "PCS" phones. These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's

head. These RF exposures are limited by Federal Communications Commission safety guidelines that were developed with the advice of FDA and other federal health and safety agencies.

When the phone is located at greater distances from

TIA Safety Information

the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones," which have a base unit connected to the phone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of radiofrequency energy (RF) exposures characteristic of wireless phones have yielded conflicting

results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing

chemicals so as to be predisposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we don't know with certainty what the results of such studies mean for

human health.

Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary

gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about longterm exposures, since the average period of phone use in these studies was

around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but 10 or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop - if they do - may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during dayto- day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

TIA Safety Information

6. What is FDA doing to find out more about the possible health effects of wireless phone RF?

FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal studies are conducted to address important questions about the effects of

exposure to radiofrequency energy (RF).

FDA has been a leading participant in the World Health Organization International Electromagnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The Project has also helped develop

a series of public information documents on EMF issues. FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research and Development Agreement (CRADA) to

do research on wireless phone safety.

FDA provides the scientific oversight, obtaining input

TIA Safety Information

from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts to independent investigators. The initial research will include both laboratory studies and studies of wireless

phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. What steps can I take to reduce my exposure to radiofrequency energy from my wireless phone?

If there is a risk from these products--and at this point we do not know that there is--it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure.

- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the

RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data do not demonstrate that wireless phones are harmful. But if you are concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

8. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to radiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones.

Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using

wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects.

Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

9. What about wireless phone interference with medical equipment?

Radiofrequency energy (RF) from wireless phones can interact with some electronic devices.

For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless phones.

This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many

TIA Safety Information

other groups, was completed in late 2000. This standard will allow

manufacturers to ensure that cardiac pacemakers and defibrillators are

safe from wireless phone EMI.

FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids

and wireless phones so that no interference occurs when a person uses a "compatible" phone and a "compatible" hearing aid at the same time.

This standard was approved by the IEEE in 2000. FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, FDA will conduct testing to assess the interference and work to resolve the problem.

TIA Safety Information

10. Where can I find additional information?

For additional information, please refer to the following resources:

- FDA web page on wireless phones
(<http://www.fda.gov/cdrh/phones/index.html>)
- Federal Communications Commission(FCC)RF Safety Program
(<http://www.fcc.gov/oet/rfsafety>)
- International Commission on Non-Ionizing Radiation Protection
(<http://www.icnirp.de>)
- World Health Organization(WHO) International EMF Project
(<http://www.who.int/emf>)
- National Radiological Protection Board(UK)
(<http://www.nrp.org.uk/>)

FCC RF Exposure Information

Contact your local dealer for a replacement of antenna.

FCC Part 15 Class B Compliance

This device and its accessories comply with part 15 of FCC rules.

Operation is subject to the following two conditions:

- (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

FCC RF Exposure Information

WARNING!

The antenna used for this transmitter must not exceed 3.0dBi and must be installed to provide a minimum separation distance of 20 cm from all persons.

CAUTION

Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result.

Limited Warranty Statement

Limited Warranty Statement

LG ELECTRONICS Inc. represents and warrants that this subscriber unit and its accessories ("PRODUCT") is free from defects in material and workmanship.

This warranty is subject to the following terms and conditions;

1. This warranty of the PRODUCT extends for a period of 12 months commencing from the date of the activation or 16 months from the date of manufacture whichever is less, except for the battery, for which the warranty is 9 months from the date of activation or 12 months from the date of manufacture whichever is less.
2. During the warranty period, LG ELECTRONICS Inc. or its authorized service network will repair or replace, at LG ELECTRONICS Inc.'s option, the PRODUCT or any relevant parts thereof in the event that the

PRODUCT is found to be defective.

The repaired PRODUCT or the Product/part provided as a replacement for a defective

PRODUCT/part, shall be free from defects. The END USER/consumer purchaser of the PRODUCT or his/her assignee ("CONSUMER") shall not be charged (whether for parts, labour or otherwise) for the repair or replacement of a defective PRODUCT during the warranty period. All replaced parts, boards or equipment shall become

the property of LG ELECTRONICS Inc.

3. The warranty in respect of a repaired or replaced PRODUCT/part shall extend for the remaining warranty period of the repaired PRODUCT or replacement thereof to the CONSUMER.
4. Upon request from LG ELECTRONICS Inc., the CONSUMER may be required to provide the purchase receipt or other documentation or information in respect of the date and place of purchase.
5. The CONSUMER shall have no coverage or benefits under this warranty in the event that any of the following conditions are applicable:

(a) The PRODUCT has been subject to abnormal use or conditions, improper storage, exposure to excessive moisture or dampness, exposure to

excessive temperatures, unauthorized modifications, unauthorized repair (including but not limited to use of unauthorized spare parts in repairs), abuse, accident, Acts of God, spills of food or liquids, improper installation and breakage or damage to antennae (otherwise than by reason of any defects in material or workmanship).

(b) LG ELECTRONICS Inc. has not been notified by the CONSUMER of the defects of the PRODUCT during the applicable warranty period.

(c) The PRODUCT serial number code or the accessory date code has been removed, defaced or altered.

(d) The PRODUCT has been used with or connected to an accessory (i) not supplied by LG ELECTRONICS Inc. or its affiliates, (ii) not fit for use with the PRODUCT or (iii) used otherwise than in the manner intended.

(e) The seals of the PRODUCT'S battery enclosure have been broken or show evidence of tampering or the PRODUCT'S battery has been used in equipment other than that for which it has been

Limited Warranty Statement

specified usable by LG ELECTRONICS Inc.

(f) All plastic surfaces and all other externally exposed parts that are scratched or damages due to normal customer use.

(g) Breakage or damage to antenna unless caused by defects in material or workmanship.

6. In order to derive benefits of this warranty in respect of any defects in the

PRODUCT, the CONSUMER shall ship the PRODUCTS or part thereof at its cost to the authorized service center of LG ELECTRONICS Inc. LG

ELECTRONICS Inc.

shall bear the cost of shipping the PRODUCT or part thereof back to the

CONSUMER after the completion of the service under this limited warranty.

Limited Warranty Statement

NO OTHER EXPRESS WARRANTY IS APPLICABLE TO THIS PRODUCT. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE IS LIMITED TO THE DURATION OF THE

EXPRESS WARRANTY HEREIN. LG ELECTRONICS Inc. SHALL NOT BE LIABLE FOR THE LOSS OF USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER CONSEQUENTIAL DAMAGE, ARISING OUT OF THE USE OF, OR INABILITY OF USE, OF THIS PRODUCT OR FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY OR MERCHANTABILITY OR FITNESS

APPLICABLE TO THIS PRODUCT.

THE CONSUMER UNDERSTANDS THAT LG ELECTRONICS INC. HAS EMBEDDED RELIANCE SOFTWARE AND ITS NETWORK PARAMETERS IN THE PRODUCT. IN CASE THE CONSUMER DELETES,

REMOVES, ALTERS OR MODIFIES SUCH SOFTWARE AND THE PARAMETERS AND/OR INSTALLS ANY THIRD PARTY SOFTWARE, THE WARRANTY AND REMEDIES HEREUNDER

SHALL NOT BE AVAILABLE TO THE CONSUMER.

7. It is hereby expressly clarified that all warranties (express or implied) in respect of the PRODUCT are provided by LG ELECTRONICS Inc. alone.
