Welcome

Thank you for choosing LXU-800 USB Modem, cutting edge CDMA 1X technology with the data speed of up to 153.6 Kbps. You can surf the Internet at high speeds, access e-mails as well as make and receive calls and SMS on the move.

How to Plug LXU-800

Please plug LXU-800 into a PC after installing drivers.

1. Pull out the USB connector on the back of the modem.

2. Adjust the USB connector to the desired angle. The USB connector is adjustable to a 45, 90, 135 or 180 degree.

Welcome

How to Plug LXU-800

Please plug LXU-800 into a PC after installing drivers.

3. Extension Cable

The extension cable provided is specially designed to work with your LXU-800. This is a high quality USB cable that is capable of delivering high current to the LXU-800 when necessary. The cable will improve performance.

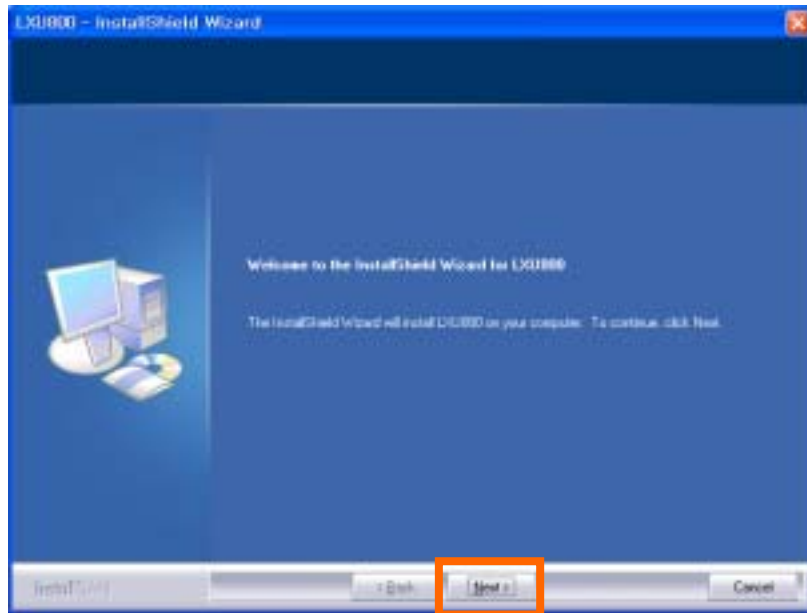

Note:

Your LXU-800 may not operate correctly if you use a standard USB cable in place of the provided extension cable. Adjust the USB connector to the desired angle. The USB connector is adjustable to a 45, 90, 135 or 180 degree.

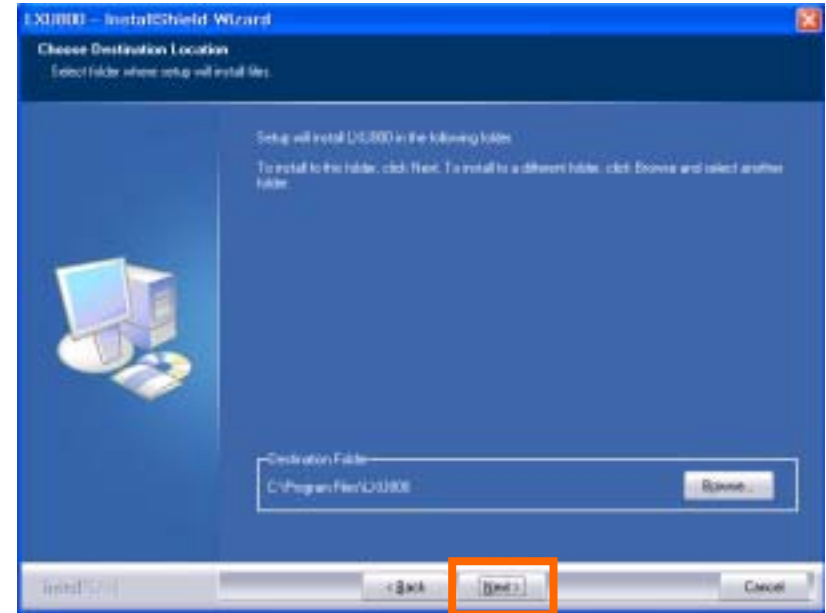

**** USB Length : 50 Cm**

1. Installation – Windows XP

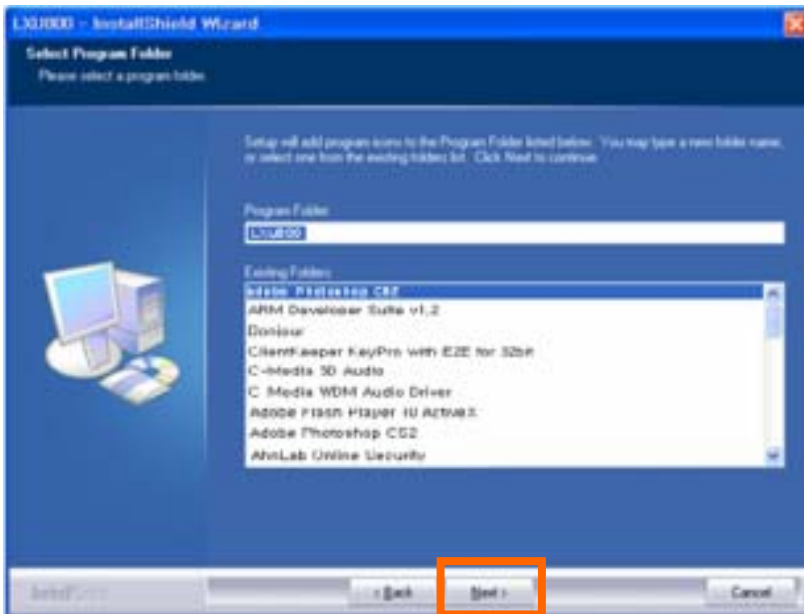

1. Click the "Next" button to install the LXU800

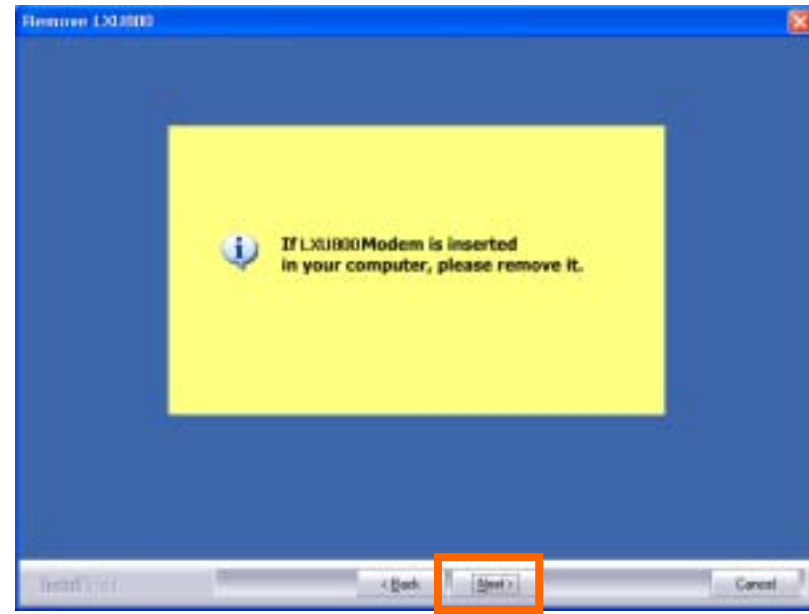

2. Select the installation path (it is recommended to use the default location) and click the "Next" button

1. Installation – Windows XP

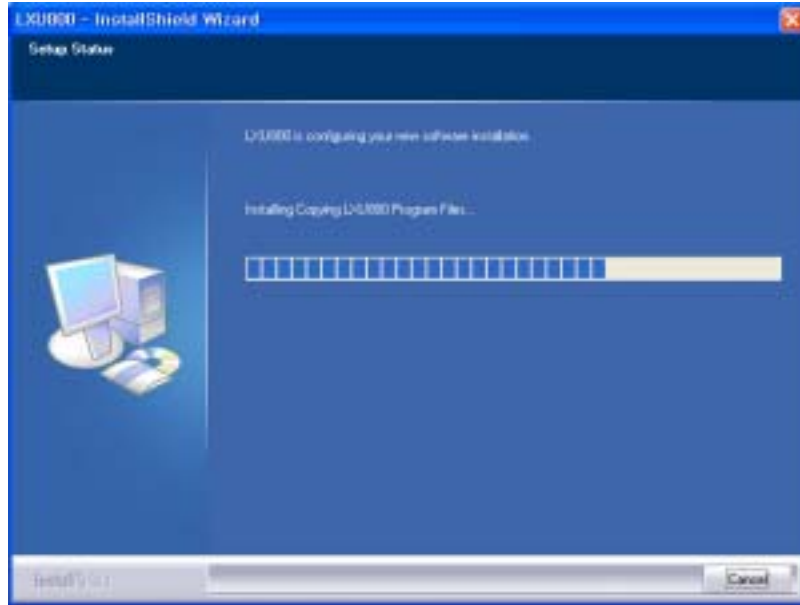

3. Select the Program Folder then click the "Next" button to continue with the installation

4. Before Installation, please remove the modem then click the "Next" button

1. Installation – Windows XP

5. Please wait for the Installation to be completed

5. Once uninstallation is complete, select "Yes, I want to restart my computer now" then click "Finish"

Note: The LXU800 does not need to be connected to the USB port

Part 15.21 statement "

Change or Modifications that are not expressly approved by the manufacturer could void the user's authority to operate the equipment. "

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

FCC Part 15 Class B Compliance

This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

FCC RF Exposure Information

WARNING! Read this information before operating the device. In August 1996, the Federal Communications (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radiofrequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.

The design of this device complies with the FCC guidelines and these international standards.

CAUTION

Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the device, void your warranty and/or result in violation of FCC regulations. Do not use the device with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement antenna.

Near-Body Operation

This device was tested for typical near-body operations with the back of the device kept 0.5 cm from the body. To maintain compliance with FCC RF exposure requirements, it must have a minimum distance including the antenna of 0.5 cm from the body during normal operation.
