Making a second call

1. During your initial call, tap the **Menu Key** ≡ and select **Add call**.

2. Dial the number or search your contacts.

3. Tap **Call** 📞 to connect the call.

4. Both calls will be displayed on the call screen. Your initial call will be put on hold.

5. Tap the call entry on the screen to toggle between active calls or tap **Merge calls** 📞 to merge the calls.

6. To end active calls, tap **End** 📞. If there is no active call, it will end the call on Hold.

Ending a Call

Tap **End** 📞 to end a call.

> **NOTE** To redial recent numbers, touch **Redial** 📞 at the end of the call or find the number within the **Call logs** and tap **Call** 📞 to the right of the entry.

If you exit the current call screen and return to the Home screen, you will be notified that you are still on an active call by the green phone icon within the Status Bar.

Active Call Notification
Ending a Call from the Status Bar

1. Touch and drag the Status Bar down to open the Notifications Panel.

2. Tap **End call** 📞 to end the currently active call.

Viewing your call logs

From the Home screen, tap **Phone** 📞, then tap the **Call logs** 🔄 tab.

View a complete list of all dialed, received, and missed voice calls.

TIP!   Tap any single call log entry to view the date, time, and duration of the call.
Tap the **Menu Key** ☰, then tap **Clear** to delete entries individually or **Clear all** to
delete all.

Call settings

You can configure phone call settings, such as call forwarding, and other special features offered by MetroPCS.

1. From the Home screen, tap the **Menu Key** ☰ and tap **System settings**.

2. Tap **Call** and set any desired options.

You can add contacts on your phone and synchronize them with the contacts in your Google Account or other accounts that support syncing contacts.

Searching for a contact

1. From the Home screen, tap **Apps** and then tap **Contacts** to open your contacts.

2. Tap the **Search contacts** box and enter the contact name using the keypad. You can also tap a letter along the right side of the screen to access names starting with the chosen letter.

Adding a new contact

1. From the Home screen, tap **Phone** and enter the new contact's number.

2. Tap **Add to Contacts** > **Create new contact**. Select the desired account (if applicable).

3. If you want to add a picture to the new contact, tap . Choose from **Take photo** to take a picture using the camera or **Select from Gallery**. Then browse for an image and select it.

4. Tap to enter more specific name information.

5. Enter the details about your contact.

6. Tap **Save** to save the contact entry.

Favorite Contacts

You can classify frequently called contacts as favorites.

To add a contact to your favorites

1. From the Home screen, tap **Apps** and then tap **Contacts** to open your contacts.

2. Tap a contact to view its details.

3. Tap the star to the right of the contact's name. The star turns gold and the contact is added to your favorites.

To remove a contact from your favorites list

1. From the Home screen, tap **Apps** ▦ and then tap **Contacts** 🔲 to open your contacts.

2. Tap the **Favorites** tab to view your favorite contacts.

3. Tap a contact to view its details.

4. Tap the gold star to the right of the contact's name. The star turns grey and the contact is removed from your favorites.

Creating a group

1. From the Home screen, touch **Apps** ▦ and then touch **Contacts** 🔲 to open your contacts.

2. Touch the **Groups** tab, then touch the **Menu Key** ▤ and select **New group**.

3. Enter a name for the new group. You can also set a ringtone for the group.

4. Touch **Save** to save the group.

> **NOTE**   If you delete a group, the contacts assigned to that group will not be lost. They will remain in your contacts.

Your phone combines text and multimedia messages into one intuitive, easy-to-use menu.

Conversation view

Messages exchanged with another party are displayed in chronological order so that you can conveniently see an overview of your conversations.

Sending a message

1. From the Home screen, tap **Messaging** 😊, then tap **Compose** 🔵 to create a new message.

2. Enter a contact name or phone number in the **To** field. As you enter the contact name, matching message appear. You can tap a suggested recipient. You can also add multiple message

3. Tap the text field to start entering your message.

4. Tap the **Menu Key** 📃 to open the options menu. Choose from any of the available options.

5. Tap **Send**(or **Send MMS**) to send your message.

> **WARNING!** The 160-character limit may vary from country to country depending on how the text message is coded and the language used in the message.
>
> If an image, video, or audio file is added to a text message, it will be automatically converted into a multimedia message and your service plan will be decremented accordingly.
>
> **NOTE** When you get a text message during a call, there will be an audible notification.

Using smilies

Liven up your messages using smilies.

When writing a new message, tap the **Menu Key** 📃, then tap **Insert smiley**.

Changing your message settings

Your phone's message settings are predefined, so you can send messages immediately. You can change the settings based on your preferences.

• From the Home screen, tap **Messaging** 😊 > **Menu Key** 📃 > **Settings**.

You can use the Email application to read emails from services like Gmail. The Email application supports the following account types: POP3, IMAP and Exchange.

Your service provider or system administrator can provide you with the account settings you need.

Managing an email account

The first time you open the Email application, a set-up wizard opens to help you to set up an email account.

After the initial setup, Email displays the contents of your inbox. If you have added more than one account, you can switch among accounts.

To add another email account:
• Open the **Email** application and tap the **Menu Key** ▤ > **Accounts** > **Menu Key** ▤ > **Add account**.

To change an email account's settings:
• Open the **Email** application and tap the **Menu Key** ▤ > **Account settings**.

To delete an email account:
• Open the **Email** application and tap the **Menu Key** ▤ > **Accounts** > **Menu Key** ▤ > **Remove account** > tap an account you want to delete > **Remove** > **Yes**.

Working with account folders

Open the **Email** application and tap the **Menu Key** ▤ and select **Folders**. Each account has an Inbox, Outbox, Sent and Drafts folder. Depending on the features supported by your account's service provider, you may have additional folders.

Composing and sending email

To compose and send a message

1. While in the Email application, tap Compose ✉ .

2. Enter an address for the message's intended recipient. As you enter text, matching addresses will be proposed from your Contacts. Separate multiple addresses using semicolons.

3. Tap the **Cc** and **Bcc** fields to copy contacts and tap **Attach** 📎 to attach files, if required.

4. Enter the subject and your message.

5. Tap **Send** ➤ to send the message.
   If you aren't connected to a network, for example, if you're working in airplane mode, the messages that you send will be stored in your Outbox folder until you connect to a network again. If it contains any pending messages, the Outbox will be displayed on the Accounts screen.

   TIP!   When a new email arrives in your Inbox, you will be notified by a sound or vibration. Tap the email notification to stop receiving notifications.

To open the Camera application, tap **Camera** 📷 on the Home screen.

Getting to know the viewfinder
❶ **Swap camera** – Switch between the rear–facing camera lens and the front–facing camera lens.

❷ **Voice shutter** – To take a photo, say one of the following words: Cheese, Smile, Whisky, Kimchi or LG.

❸ **Shot mode** – Choose from Normal, Panorama or Continuous shot.

❹ **Flash** – Allows you to turn on the flash when taking a photo in dark conditions.

❺ **Settings** – Touch this icon to open the settings menu. See **Using the advanced settings** on the following page.

❻ **Mode switch** – Touch this icon and drag it downwards to switch to video mode.

❼ **Capture** – Touch to capture a picture.

❽ **Gallery** – Touch to view the last photo you captured. This enables you to access your Gallery and view saved photos while in camera mode.

> **NOTE**   Please ensure the camera lens is clean before taking pictures.

Using the advanced settings

In the viewfinder, tap ![icon] to open the advanced options. You can change the camera settings by scrolling through the list. After selecting the option, tap the **Back Key** ![icon].

![icon]	Touch if you want to change the viewfinder menu.
![icon]	Zoom in or out.
![icon]	Defines and controls the amount of sunlight entering the photo.
![icon]	Focuses on a specific spot.
![icon]	Selects photo resolution. If you choose high resolution, file size will increase, which means you will be able to store fewer photos in the memory.
![icon]	Finds the appropriate color and light settings for the current environment.
![icon]	The ISO rating determines the sensitivity of the camera's light sensor. The higher the ISO, the more sensitive the camera. This is useful in darker conditions when you cannot use the flash.
![icon]	Improves color quality in various lighting conditions.
![icon]	Applies artistic effects to your pictures.
![icon]	Sets a delay after the capture button is pressed. This is ideal if you want to be in the photo.
![icon]	Activate this to use your phone's location-based services. Take pictures wherever you are and tag them with the location. If you upload tagged pictures to a blog that supports geo tagging, you can see the pictures displayed on a map. **NOTE** This function is only available when the GPS function is active.
![icon]	Selects a shutter sound.
![icon]	Automatically shows you the picture you just took.

|	
🔲	Set the storage location for your pictures. Choose from Internal memory and SD card.
🔄	Restore all camera default settings.
❓	Touch this whenever you want to know how a function works. This icon will provide you with a quick guide.

TIP!
- When you exit the camera, some settings return to their defaults, such as white balance, color effect, timer and scene mode. Check these before you take your next photo.
- The setting menu is superimposed over the viewfinder, so when you change photo color or quality elements, you will see a preview of the changed image behind the Settings menu.

Taking a quick photo

1. Open the **Camera** application.

2. Holding the phone horizontally, point the lens towards the subject you want to photograph.

3. A focus box will appear in the center of the viewfinder screen. You can also tap anywhere on the screen to focus on that spot.

4. When the focus box turns green, the camera has focused on your subject.

5. Touch 🔘 to capture the photo.

Once you've taken a photo

Your captured photo will appear on the screen if Auto review is set to On (refer to Using the advanced settings). Touch image preview in the bottom right corner of the screen to view the last photo you took. The following options are available:

📷	Touch to share your photo using the SmartShare function.
📷	Touch to take another photo immediately.

	Touch to send your photo to others or share it via social network services.
	Touch to delete the photo.

TIP!   If you have a social networking account and set it up on your phone, you can share your photo with your social networking community.

Touch the **Menu Key** to open all advanced options.

Set image as – Touch to use the photo as a **Contact photo, Home screen wallpaper** or **Lock screen wallpaper**.

Move – Touch to move the photo to another place.

Copy – Touch to copy the selected photo and save it to another album.

Rename – Touch to edit the name of the selected photo.

Rotate left/right – To rotate left or right.

Crop – Crop your photo. Move your finger across the screen to select the area to be cropped.

Edit – View and edit the photo.

	Applies a brightness effect to your photo.
	Applies artistic effects to your photos.
	Applies color effects to your photos.
	Applies additional options to your photos.

**Slideshow** – Automatically shows you the images in the current folder one after the other.

Details – Find out more information about the contents.

Viewing your saved photos
You can access your saved photos when in camera mode. Just tap the image preview in the bottom right corner of the screen and your Gallery will be displayed.

- To view more photos, scroll left or right.

- To zoom in or out, double-tap the screen or place two fingers and spread them apart (move your fingers closer together to zoom out).

Getting to know the viewfinder
① **Swap camera** – Switch between the rear–facing camera lens and the front-facing camera lens.

② **Video size** – Touch to set the size (in pixels) of the video you are recording.

③ **Live effect** – Live effect provides various visual effects when taking a video.

④ **Flash** – Allows you to turn on the flash when taking a video in dark conditions.

⑤ **Settings** – Touch this icon to open the settings menu. See **Using the advanced settings** on the following page.

⑥ **Mode switch** – Touch this icon and drag it upwards to switch to camera mode.

⑦ **Record** – Starts recording video.

⑧ **Gallery** – Touch to view the last video you recorded. This enables you to access your Gallery and view your saved videos while in video mode.

TIP!   When recording a video, place two fingers on the screen and pinch to use the Zoom function.

Using the advanced settings

Using the viewfinder, touch ⚙ to open all the advanced options.

|	
📝	Touch if you want to change the viewfinder menu.
🔍	Zoom in or out.
🔆	Defines and controls the amount of sunlight entering the video.
WB	Improves color quality in various lighting conditions.
🎨	Choose a color tone to use for your new view.
📍	Activate this to use your phone's location-based services.
🎤	Allows you to record with or without sound.
▶	Auto review automatically shows you the video you just recorded.
🗄	Set the storage location for your pictures. Choose from Internal memory and SD card.
🔄	Restore all video camera default settings.
❓	Touch this if you want to know how a function works. This icon will provide you with a quick guide.

Recording a quick video

1. Open the **Camera** application and touch the **Mode switch** button.

2. The video camera viewfinder appears on the screen.

3. Holding the phone, point the lens towards the subject you wish to capture in your video.

4. Touch ● once to start recording.

5. A timer showing the length of the video will appear.

6. Touch ■ on the screen to stop recording.

NOTE   Touch 🔘 on the screen to take a picture while you're recording.

After recording a video

A still image representing your video will appear on the screen if Auto review is set to On. Touch the image preview in the bottom right corner of the screen to view the video. The following options are available:

🔲	Touch to share your video using the SmartShare function.
◻	Touch to record another video immediately.
◄	Touch to send your video to others or share it via social network services.
🗑	Touch to delete the video.

Watching your saved videos

1. In the viewfinder, touch the image preview in the bottom right corner of the screen.

2. Your Gallery will appear on the screen.

3. Tap a video to play it automatically.

Adjusting the volume when viewing a video

To adjust the volume of a video while it is playing, use the Volume Keys on the left side of the phone.

QuickMemo

The **QuickMemo** feature allows you to create memos and capture screen shots.

Capture screens, draw on them, and share them with family and friends with QuickMemo.

1. Enter the QuickMemo screen by pressing both the Volume Keys for one second on the screen you want to capture.
   **OR**
   Open the Notifications Panel and tap 🔲.

2. Select the desired menu option from **Pen type**, **Color**, and **Eraser**. Then create a memo.

3. Tap 🔽 in the Edit menu and select 🔲 to save the memo. To exit QuickMemo at any time, tap the **Back Key** 🔙.

| NOTE | Please use a fingertip while using the QuickMemo. Do not use your fingernail. |

Using the QuickMemo options

You can easily use the QuickMenu options when using the QuickMemo.

🗗	Touch to keep the current memo on the screen and use other phone features simultaneously.
🅰	Selects whether to use the current image or a note image as your background.
◀ ▶	Allows you to undo and redo previous actions.
🖊	Selects the pen type and the color.
🧽	Erases the memo that you created.
◁	Touch to send your memo to others or share it via social network services.
💾	Saves the memo in the Gallery.

Viewing the saved QuickMemo

From the Home screen, tap **Apps** 📱 > **Gallery** 🖼 and select the **QuickMemo** album.

Live Zooming

Live Zooming allows you to zoom in or zoom out on a portion of a video that is being played to make the desired scan appear larger or smaller.

When viewing the video, use your index finger and thumb in a pinching or spreading motion to zoom in or out.

NOTE   • When playing a video, slide the screen up or down to adjust the screen brightness.
   • When playing a video, slide the screen left or right to rewind or fast-forward.
   • Do not to press too hard; the touch screen is sensitive enough to pick up a light, but firm touch.

QSlide

The **QSlide** function enables an overlay on your phone's display for easy multi-tasking.

OR

❶	🔳	Tap to exit the QSlide function and return to full window.
❷	▬	Slide to adjust transparency.
❸	✕	Tap to exit the QSlide function.

NOTE   The QSlide function can support up to two windows at the same time.

1. Open the Notifications Panel and tap the desired app from the **QSlide apps** section.
   OR
   While using an application that supports QSlide, tap 🔳. The function will be displayed continuously as a small window on your screen.

2. Slide ▬ to adjust the transparency level.

Gallery

You can store multimedia files in internal or external memory for easy access to all your multimedia files. Use this application to view multimedia files like pictures and videos.

From the Home screen, tap **Apps** ▦ > **Apps** tab > **Gallery** 🌄.
You can manage and share all your image and video files with Gallery.

> **NOTE** • Some file formats are not supported, depending on the software installed on the device.
> • Some files may not play properly, depending on how they are encoded.

Viewing pictures

Launching Gallery displays your available folders. When another application, such as Email, saves a picture, the download folder is automatically created to contain the picture. Likewise, capturing a screenshot automatically creates the Screenshots folder. Tap a folder to open it.

Pictures are displayed by creation date in a folder. Select a picture to view it full screen. Scroll left or right to view the next or previous image.

Zooming in and out

Use one of the following methods to zoom in on an image:

• Double-tap anywhere to zoom in. Double-tap again to return to fullscreen view.

• Spread two fingers apart on any place to zoom in. Pinch in to zoom out.

Playing videos

Video files display the 🅿 icon in the preview. Select a video and tap 🅿 to play it.

Viewing photo and video options

When viewing a photo or video, tap the **Menu Key** ▤ and use the advanced editing options.

Deleting images and videos

Use one of the following methods:

- In a folder, tap 🗑 and select the photos and videos you want to delete, then tap Delete.
- When viewing a photo or video, tap 🗑.

Setting as wallpaper

When viewing a photo, touch the **Menu Key** ≡ > **Set image as** and select **Home screen wallpaper** or **Lock screen wallpaper**.

> **NOTE** • Some file formats are not supported, depending on the device software.
> • If the file size exceeds the available memory, an error can occur when you open files.

Videos

Your phone has a video player that lets you play all of your favorite videos.

Playing a video

1. From the Home screen, tap **Apps** ▦ > **Apps** tab > **Videos** 🎬.
2. Select the video you want to play.

❚❚	Touch to pause video playback.
▶	Touch to resume video playback.
▶▶	Touch to go 10 seconds forward.
◀◀	Touch to go 10 seconds backward.
🔊	Touch to manage the video volume.
▱	Touch to change the ratio of the video screen.
⊞	Touch access QSlide and display the video in small window.
▣	Touch to share your video via the SmartShare function.
🔒	Touch to lock the window.

To change the volume while watching a video, press the Volume Keys on the left side of the phone.

Touch and hold a video in the list to access the following options: Share, Delete and Details.

Music

Your phone has a music player that lets you play all your favorite tracks. To access the music player, from the Home screen, tap Apps ▦ > Apps tab > Music 🎵.

Add music files to your phone

Start by transferring music files to your phone:

• Transfer music using Media sync (MTP).

• Download from the wireless Web.

• Synchronize your phone to a computer.

• Receive files via Bluetooth.

Transfer music using Media sync (MTP)

1. Connect the phone to your PC using the USB cable.

2. Select the **Media sync (MTP)** option. Your phone will appear as another hard drive on your computer. Click on the drive to view it. Copy the files from your PC to the drive folder.

3. When you're finished transferring files, swipe the Status Bar down and touch **USB connected** > **Charge only**. You may now safely unplug your device.

Playing a song

1. From the Home screen, tap Apps ▦ > Apps tab > Music 🎵.

2. Touch the **Songs** tab.

3. Select the song you want to play.

📺	Touch to find the files with YouTube
📱	Touch to share your music via SmartShare function.

⤬	Touch to set shuffle mode
⟳	Touch to set repeat mode
🔊	Touch to manage the music volume
❚❚	Touch to pause playback
▶	Touch to resume playback
▶▶❙	Touch to skip to the next track on the album or in the playlist. Touch and hold to fast-forward.
❙◀◀	Touch to go back to the beginning of the song. Touch twice to return to the previous song. Touch and hold to rewind.
★	Touch to set the current song as a favorite
☰	Touch to see the current playlist
☰	Touch to return to the music library.

To change the volume while listening to music, press the Volume Keys on the left side of the phone.

Touch and hold any song in the list to access the following options: **Play**, **Add to playlist**, **Share, Set as ringtone, Delete, Details** and **Search**.

> **NOTE** Music file copyrights may be protected by international treaties and national copyright laws. Therefore, it may be necessary to obtain permission or a licence to reproduce or copy music. In some countries, national laws prohibit private copying of copyrighted material. Before downloading or copying the file, check the national laws of the relevant country concerning the use of such material.

Setting your alarm

1. From the Home screen, tap **Apps** ▦ > **Apps** tab > **Alarm/Clock** ⏰ > ⊕.

2. Set the desired alarm time.

3. Set **Repeat**, **Snooze duration**, **Vibration**, **Alarm sound**, **Alarm volume**, **Auto app starter, Puzzle lock** and **Memo**.

4. Touch **Save**.

> **NOTE**   To change alarm settings in the alarm list screen, touch the **Menu Key** ☰ and select **Settings**.

Using your calculator

1. From the Home screen, tap **Apps** ▦ > **Apps** tab > **Calculator** ▦.

2. Touch the number keys to enter numbers.

3. For simple calculations, touch the function you want to perform (**+** , **−** , **×** or **÷**) followed by **=**.

4. For more complex calculations, touch the **Menu Key** ☰, select the **Advanced panel**, then choose the desired function.

> **NOTE**   To view the calculation history, tap ∨.

Adding an event to your calendar

1. From the Home screen, tap **Apps** ▦ > **Apps** tab > **Calendar** 18.

2. Tap   to change the calendar view (Day, Week, Month, Agenda).

3. Tap on the date for which you wish to add an event and touch ⊕. Then select the calendar you wish to add the event to (if necessary).

4. Touch the **Event name** field and enter the event name.

5. Touch the **Location** field and enter the location. Check the date and enter the time you wish your event to start and finish.

6. If you wish to add a note to your event, touch the **Description** field and enter the details.

7. If you wish to repeat the alarm, set **REPEAT** and set **REMINDERS**, if necessary.

8. Touch **Save** to save the event in the calendar.

File manager

The **File Manager** application allows you to manage files in your internal/external storage.

To open the File Manager application

From the Home screen, tap **Apps** ▦ > **Files Manager** 📷.

File Manager Options

📁 : Allows you to create a new folder.

📂 : Allows you to move files and folders to another folder.

🗑 : Allows you to delete files and folders.

🔍 : Allows you to search for files.

Tap the **Menu Key** ▤ to access the following options.

Sort by: Allows you to sort files and folders by Name, Size, Date, and Type.

View by: Allows you to change the view mode to List or Grid.

Copy: Allows you to copy files and folders and paste them in another location.

Share: Allows you to share files and folders with others.

Upload: Allows you to upload files and folders to online storge

Zip: Allows you to compress files and folders into a .zip file.

Exit: Allows you to exit the application.

Application Manager

You can manage your programs with Application Manager.

1. From the Home screen, tap **Apps** ▦ > **Application Manager** 🖼.
2. The Application Manager lists your installed apps along with their size and version.

3. Tap **Uninstall** to uninstall the app, then tap **OK** to confirm.

Application Manager Settings

To adjust the Application Manager settings, tap the **Menu Key** and select **Settings**. The following settings are available.

• **Update notification cycle:** Allows you to set the notification cycle for app updates.

• **Auto app update:** Automatically updates apps if available.

• **Update over Wi-Fi only:** Updates apps only via Wi-Fi.

Visual Voicemail

The **Visual Voicemail** application allows users to view a list of people who left voicemail messages on your phone. You can listen to your message without being limited by the date.

1. From the Home screen, tap **Apps** > **Visual Voicemail**.

2. A list of the voicemail messages will be displayed.

> **Important!** If this is the first time accessing Visual Voicemail, you may be prompted to enter a new PIN code and touch **Next** to activate Visual Voicemail.

> **NOTE** To use your phone's Visual Voicemail capability, you must have the Visual Voicemail service added to your rate plan.

3. Tap an on-screen voicemail message to play it back.

Voice Recorder

Use the voice recorder to record voice memos or other audio files.

Recording a sound or voice

1. From the Home screen, tap **Apps** > **Apps** tab > **Voice Recorder**.

2. Touch to begin recording.

3. Touch to end the recording.

4. Touch to listen to the recording.

> **NOTE** Touch to access your list of recordings. You can listen to the saved recordings. The available recording time may differ from actual recording time.

Sending the voice recording

1. Once you have finished recording, you can send the audio clip by touching .

2. Choose from any of the available methods for sharing.

Task Manager

You can manage your applications using Task Manager. You can easily check the number of applications that are currently running and shut down certain applications.

Task Manager Options

• Touch **Stop** to stop individual apps.

• Tap **Stop all** to stop all currently running apps.

• Tap the **Menu Key** to access **Help, Sort by, Settings**

Polaris Office 4

Polaris Office 4 is a professional mobile office solution that lets users conveniently view various types of office documents, including Word, Excel and PowerPoint files, anywhere or anytime, using their mobile devices.

From the Home screen, tap **Apps** > **Apps** tab > **Polaris Office 4** .

Viewing files

Mobile users can now easily view a wide variety of file types, including Microsoft Office documents and Adobe PDF, right on their mobile devices. When viewing documents using Polaris Office 4, the objects and layout remain the same as in the original documents.

FileShare

This feature allows you to share files from your phone.

1. From the Home screen, tap **Apps** > **Apps** tab > **FileShare** .

2. Choose the types of content you would like to share. Choose from **Images**, **Videos**, **Music** and **Documents**.

3. Tap **Send file** ➤ in the upper right corner of the screen, then checkmark the file(s) you want to share.

4. Tap **Send** at the bottom of the screen to begin scanning for available devices, then select the device you want from the list.

5. Tap **Send** at the bottom of the screen to use the selected device to send your file(s).

Backup

About backing up and restoring smartphone data

It is recommended that you regularly create and save a backup file on the internal storage, especially before updating any software. Maintaining a current backup file in storage memory may allow you to recover smartphone data if your smartphone is lost, stolen, or corrupted by an unforeseen issue.

This Backup application is supported between LG smartphones, other S/W or OS versions. As a result, when you buy the new LG smartphone, you can backup the current phone data to your new phone.

If you have the Backup application preloaded on your smartphone, you can backup and restore most of your smart phone data, including downloaded and pre-installed applications, bookmarks, calendar entries, call logs, contacts, home screen settings, messages, and system settings. You may also:

• Perform a manual backup of your smartphone data.

• Schedule automatic backups of your smartphone data.

• Restore your smartphone data.

> **NOTE** Please note that the Backup function does not support the backup of User data & Media data (Picture/Video/Music). Please backup those files using the Media sync (MTP). Connect your phone to your computer using a USB cable and touch Media sync (MTP).

> **WARNING!** To protect against unexpected shutoff during backup or restore operations, due to insufficient battery power, you should always keep your battery fully charged.

Backup your smart phone data

1. From the Home screen, tap **Apps** ⚏ > **Apps** tab > **Backup** 🔶 >

Manual backup > **Internal Storage** or **SD Card** > **Next**.

2. Touch **New backup** to enter a name for your backup file and select **Next**.

3. Select the check box next to the item you want to backup and select **Backup** to backup.

Restoring smartphone data

To restore data that is in your internal memory, Media sync mode must be turned off.

> **NOTE**   All files that are stored on your smart phone are deleted before the backup file is restored.

1. From the Home screen, tap **Apps** ![] > **Apps** tab > **Backup** ![] > **Restore**

2. On the **Restore** screen, select a backup file that contains the data you wish to restore.

3. Select the item you wish to restore and tap **Restore** to restore it to your phone.

> **NOTE**   Please note that your phone data will be overwritten with the content of your backup.

4. If the backup file is encrypted, type the password that you created to encrypt it.

5. When all selected files have been restored, your phone will reboot.

Enable encryption

You can set Enable encryption to encrypt your backup files for extra protection.

1. Open the Backup application and tap ![] at the upper right corner of the screen.

2. Enter and confirm your password and tap **Done**.

Google+
