Help

ⓘ**Note** To use Karaoke menu, please refer to Wow LG site http://www.wowlg.com.

MP3 [Menu 4-6]

The P7200 has an integrated MP3 player built-in. You can enjoy listening to MP3 music files on a memory in your phone using a compatible headset or via the internal loudspeaker.

Note Because of the small dimension of the speaker, in some cases the audio could be distorted, especially at maximum volume and when there are lots of bass sounds. Therefore, we recommend you to use the stereo headset in order to appreciate the high quality of your music.

The music player supports:

- **MPEG-1 Layer III:** Sampling frequency up to 48KHz, Bit rate up to 192Kbps, stereo
- **MPEG-2 Layer III:** Sampling frequency up to 24KHz, Bit rate up to 160Kbps, stereo
- **AAC:** ADIF, ADTS formats (Sampling frequency up to 48KHz)

Note P7200 doesn't support the variable rate of AAC file. Therefore, you can't change the file from MP3 format to AAC.

You can transfer MP3 files from a compatible PC to the memory in your phone using the LG Contents Bank on the CD-ROM in the sales package.
When you connect the phone to a PC using the USB cable(supplied in the same package), you need to install a driver. For further details, refer to the CD-ROM manual.

Note • The PC should run Windows 98 SE, Windows ME, Windows 2000, Windows XP operating system.

• Besides downloading the MP3 files to the phone, you can upload the pictures taken on the phone to the PC using the USB cable. And you can also manage the phonebook, scheduler, and Memo on the PC. Consult with the authorised dealer for availability of accessories.

• To download MP3 file in Windows 2000, you should set folder option in PC as follow: View WEB ->Use Windows default folder (I).

• **Connect**

Select SyncML from the Connectivity menu and then press the [OK] key.

Select the Connect item and then press the [OK] key. Connect to the server with the selected server profile and the synchronization animation is displayed while the synchronization is performed.

• **Server settings**

This menu allows you to configure the profile for a SyncML.

▶ **Adding a new profile**

- Input and choose the Profile name, Host address, Username, Password, Contacts, Contact name, Calendar, Calendar name, To do, To do name and Access point.

- Press the [OK] key to save the new profile.

- In the Settings screen, press the left soft key [Options] key and select Add new to add a new profile.

▶ **Editing a profile**

- Select a profile to edit.
- Press the left soft key [Options], select Edit, and edit the selected profile.

▶ **Deleting profiles**

- Press the left soft key [Options] and select Delete.
- Select Yes to delete the selected profile.

▶ **Selecting a server**

- Select a desired server profile to synchronise in the Settings screen and then press the [OK] key.

• **Logs**

Select a SyncML item in the Connectivity menu and then press the [OK] key.

Select Logs item and then press the [OK] key to view the log for the last synchronisation operation performed.

Calculator [Menu 9-5]

This contains the standard functions such as +, −, x, ÷ : **Addition, Subtraction, Multiplication,** and **Division.** Furthermore, you can use the various function of calculator such as **sin, cos, log**.

1. Input the numbers by pressing numeric keys.

2. Use a navigation key to select a sign for calculation.

3. Then input the numbers.

4. Press OK key to view the result.

5. If you press the left soft key █ [Function], you can use the virious of calculation.

6. To input the decimal numver, press ▄▄ key. If you press ▄▄ key, you can enter ( ).

7. To end **Calculator**, press the right soft key █ [Back].

Unit converter [Menu 9-6]

This converts any measurement into a unit you want. There are 7 types that can be converted into units: **Currency, Surface, Length, Weight, Temperature, Volume** and **Velocity**.

1. You can select one of four unit types by pressing █ [Unit] key.

2. Select the unit you want to convert by pressing ▄▄ and ▄▄ .

3. Select the standard value by using ▄ , ▄ .

World time [Menu 9-7]

You can view clocks of the world's major cities.

1. Select the city belonged to the time zone by pressing ▄ , ▄ key.

2. You can set the current time to the city time you select by pressing the left soft key █ [Set].

SIM-Menu [Menu 9-8]

This menu depends on SIM and the network services.

You can access various WAP (Wireless Application Protocol) services such as banking, news, weather reports and flight information. These services are specially designed for mobile phones and they are maintained by WAP service providers.

Check the availability of WAP services, pricing and tariffs with your network operator and/or the service provider whose service you wish to use. Service providers will also give you instructions on how to use their services.

Once connected, the homepage is displayed. The content depends on the service provider. To exit the browser at any time, press the (🔳) key. The phone will return to the previous menu.

Navigating with the WAP browser
You can surf the Internet using either the phone keys or the WAP browser menu.

Using the phone keys
When surfing the Internet, the phone keys function differently to phone mode.

Key	Description
🔳 🔳	Scrolls each line of the content area
🔳	Returns to the previous page
🔳	Selects options and confirms actions

Using the WAP browser menu
There are various menu options available when surfing the Mobile Web.

❶Note The WAP browser menus may vary, depending on your browser version.

Home   [Menu *-1]

Connects to a homepage. The homepage will be the site which is defined in the activated profile. It will be defined by the service provider if you have not defined it in the activated profile.

Bookmarks   [Menu *-2]

This menu allows you to store the URL of favourite web pages for easy access at a later time. Your phone has several pre-installed bookmarks. These pre-installed bookmarks cannot be deleted.

To create a bookmark
1. Press the left soft key 🔳 [Options].
2. Select Add new and press the OK key.
3. After entering the desired URL and title, press the OK key.

After selecting a desired bookmark, the following options are available.

▶ **Connect:** Connects to the selected bookmark.

▶ **Add new:** Select this to create a new bookmark.

▶ **Edit:** You can edit the URL and/or the title of the selected bookmark.

▶ **Delete:** Deletes the selected bookmark.

▶ **Delete all:** Deletes all the bookmarks.

Go to URL   [Menu *-3]

You can connect directly to the site you want. After entering a specific URL, press the OK key.

Settings   [Menu *-4]

You can set the profile, cache, cookie and security related to internet service.

Profiles   [Menu *-4-1]

A profile is the network information used to connect to the Internet.
Each profile has submenus as follows:

▶ **Activate:** Activates the selected profile.

▶ **Settings:** Use this to edit and change WAP settings for the selected profile.

- **Homepage:** This setting allows you to enter the address (URL) of a site you want to use as homepage. You do not need to type http:// at the front of each URL as the WAP Browser will automatically add it.

- **Bearer:** You can set the bearer data service.
  1 Data/2 GPRS

- **Data settings:** Appears only if you select Data Settings as a Bearer/service.

  Dial number: Enter the telephone number to dial to access your WAP gateway.

  User ID: The users identity for your dial-up server (and NOT the WAP gateway).

  Password: The password required by your dial-up server (and NOT the WAP gateway) to identify you.

  Call type: Select the type of data call : Analogue of Digital (ISDN).

  Linger time: You need to enter timeout period. After entering that, the WAP navigation service will be unavailable if any data is not input or transferred.

- **GPRS settings:** The service settings are only available when GPRS is chosen as a bearer service.

  APN: Input the APN of the GPRS.

  User ID: The users identify for your APN server.

  Password: The password required by your APN server.

- **Proxy settings**

  Proxy: Activates or cancels proxy.

  IP address: Input the IP address of the Proxy server you access.

  Port number: Input the Proxy Port.

- **DNS settings**

  Primary server: Input the IP address of the primary DNS server you access.

  Secondary server: Input the IP address of the secondary DNS server you access.

▶ **Rename:** You can change the profile name.

▶ **Add new:** You can add a new profile.

▶ **Delete:** Deletes the selected profile from the list.

Cache [Menu ∗-4-2]

The information or services you have accessed are saved in the cache memory of the phone.

Cookie [Menu ∗-4-3]

The information or services you have accessed are saved in the cache memory of the phone.

Clear cache [Menu ∗-4-4]

Removes all context saved in cache.

ⓘ **Note** A cache is a buffer memory, which is used to save data temporarily.

Clear cookie [Menu ∗-4-5]

Removes all context saved in cookie.

Security [Menu ∗-4-6]

A list of the available certification is shown.

▶ **Authority:** You can see the list of authority certificates that have been stored in your phone.

▶ **Personal:** You can see the list of personal certificates that have been stored in your phone.

Browser version [Menu ∗-5]

The WAP browser version is displayed.

You can check the record of missed, received, and dialled calls only if the network supports the Calling Line Identification (CLI) within the service area.
The number and name (if available) are displayed together with the date and time at which the call was made. You can also view call times.

Missed calls [Menu 0-1]

This option lets you view the last 10 unanswered calls. You can also:
• View the number if available and call it, or save it in the Address Book
• Enter a new name for the number and save both in the Address Book
• Send a message by this number
• Delete the call from the list

Received calls [Menu 0-2]

This option lets you view the last 10 incoming calls. You can also:
• View the number if available and call it or save it in the Address Book
• Enter new name for the number and save both in the Address Book
• Send a message by this number
• Delete the call from the list

Dialled calls [Menu 0-3]

This option lets you view the last 20 outgoing calls (called or attempted).
You can also:
• View the number if available and call it or save it in the Address Book
• Enter new name for the number and save both in the Address Book
• Send a message by this number
• Delete the call from the list

All calls [Menu 0-4]

This option allows you to view all records of call. You can also:
• View the number if available and call it, or save it in the Address Book
• Enter a new name for the number and save both in the Address Book
• Send a message by this number
• Delete the call from the list.

Delete recent calls [Menu 0-5]

Allows you to delete Missed calls and Received calls lists. You can delete Dialled calls and All calls lists at one time.

Call charges [Menu 0-6]

Call duration [Menu 0-6-1]

Allows you to view the duration of your incoming and outgoing calls. You can also reset the call times. The following timers are available:

▶ **Last call:** Length of the last call.
▶ **All calls:** Total length of all calls made and incoming calls since the timer was last reset.
▶ **Received calls:** Length of the incoming calls.
▶ **Dialled calls:** Length of the outgoing calls.
▶ **Reset all:** Allows you to clear the length of all calls by pressing the left soft key 🔳 [Yes].

Call costs [Menu 0-6-2]

Allows you to check the cost of your last call, all calls, remaining and reset the cost. To reset the cost, you need to PIN2 code.

Settings [Menu 0-6-3]

(SIM Dependent)

▶ **Set tariff:** You can set the currency type and the unit price. Contact your service providers to obtain charging unit prices. To select the currency or unit in this menu, you need the PIN2 code.

▶ **Set credit:** This network allows you to limit the cost of your calls by selected charging units.If you select **Read**, the number of remaining unit is shown. If you select **Change**, you can change your change limit.

▶ **Auto display:** This network service allows you to see automatically the cost of your last calls. If set to **On**, you can see the last cost when the call is released.

GPRS information [Menu 0-7]

You can check the amount of data transferred over the network through the GPRS information option. In addition, you can also view how much time you are online.

Call duration [Menu 0-7-1]

You can check the duration of **Last call** and **All calls**. You can also reset the call timers.

Data volume [Menu 0-7-2]

You can check The **Sent, Received** or **All** data volumes and **Reset all**.

Settings [Menu #]

Date & Time [Menu #-1]

You can set functions relating to the date and time.

Set date [Menu #-1-1]

▶ **Set date**
You can enter the current date.

▶ **Date format**
You can set the Date format such as DD/MM/YYYY, MM/DD/YYYY, YYYY/MM/DD.
(D: Day / M: Month / Y: Year)

Set time [Menu #-1-2]

▶ **Set time**
You can enter the current time.

▶ **Time format**
Your can set the time format between 24-hour and 12-hour.

Languages [Menu #-2]

You can change the language for the display texts in your phone. This change will also affect the Language Input mode.

Call settings [Menu #-3]

You can set the menu relevant to a call by pressing [Select] in the Setting menu.

Call divert [Menu #-3-1]

The Call divert service allows you to divert incoming voice calls, fax calls, and data calls to another number. For details, contact your service provider.

▶ **All voice calls**
Diverts voice calls unconditionally.

▶ **If busy**
Diverts voice calls when the phone is in use.

▶ **If no reply**
Diverts voice calls which you do not answer.

▶ **If out of reach**
Diverts voice calls when the phone is switched off or out of coverage.

▶ **All data calls**
Diverts to a number with a PC connection unconditionally.

▶ **All fax calls**
Diverts to a number with a fax connection unconditionally.

▶ **Cancel all**
Cancels all call divert service.

The submenus

Call divert menus have the submenus shown below.

• **Activate**

 Activate the corresponding service.

 To voice mail centre

 Forwards to message centre. This function is not shown at All data calls and All fax calls menus.

 To other number

 Inputs the number for diverting.

 To favourite number

 You can check recent 5 diverted numbers.

• **Cancel**

 Deactivate the corresponding service.

• **View status**

 View the status of the corresponding service.

Answer mode   [Menu #-3-2]

▶ **Flip open**

 If you select this menu, you can receive an incoming call when only opening flip.

▶ **Any key**

 If you select this menu, you can receive a call by pressing any key except ☎ [End] key.

▶ **SEND key only**

 If you select this menu, you can receive a call by only pressing ☎ [Send] key.

Send my number   [Menu #-3-3]
(network and subscription dependent)

▶ **On**

 You can send your phone number to another party. Your phone number will be shown on the receiver's phone.

▶ **Off**

 Your phone number will not be shown.

▶ **Set by network**

 If you select this, you can send your phone number depending on two line service such as line 1 or line 2.

Call waiting   [Menu #-3-4]
(network dependent)

▶ **Activate**

 If you select Activate, you can accept a waiting (receiving) call.

▶ **Cancel**

 If you select Cancel, you cannot recognize the waiting (receiving) call.

▶ **View status**
Shows the status of Call waiting.

Minute minder [Menu #-3-5]

If you select **On**, you can check the call duration by deep sound every minute during a call.

Auto redial [Menu #-3-6]

▶ **On**
When this function is activated, the phone will automatically try to redial in the case of failure to connect a call.

▶ **Off**
Your phone will not make any attempts to redial when the original call has not connected.

Closed user group [Menu #-3-7]
(network dependent)

Restricts usage of the phone with numbers that belong to certain user groups. When this function is used, every outgoing call is associated with a group index. If a group index is specified, it is used for all outgoing calls. If no group index is specified, the network will use the preferential index (a specific index that is stored in the network).

▶ **Default:** Activates the default group agreed on with the network operator.
▶ **Set:** Select this to activate the selected CUG Index.
▶ **Edit:** You can edit the CUG name and CUG Index.
▶ **Delete:** Delets the selected CUG.
▶ **Delete all:** Delets all CUG.

Security settings [Menu #-4]

PIN code request [Menu #-4-1]

In this menu, you can set the phone to ask for the PIN code of your SIM card when the phone is switched on. If this function is activated, you'll be requested to enter the PIN code.

1. Select PIN code request in the security settings menu, and then press █ [Select].

2. Set **On/Off.**

3. If you want to change the setting, you need to enter PIN code when you switch on the phone.

4. If you enter wrong PIN code more than 3 times, the phone will lock out. If the PIN is blocked, you will need to key in PUK code.

5. You can enter your PUK code up to 10 times. If you put wrong PUK code more than 10 times, you can not unlock your phone. You will need to contact your service provider.

Handset lock   [Menu #-4-2]

You can use security code to avoid unauthorized use of
the phone. Whenever you switch on the phone, the phone
will request security code if you set phone lock to **On**.
If you set phone lock to **Automatic**, your phone will
request security code only when you change your SIM
card.

Call barring   [Menu #-4-3]

The Call barring service prevents your phone from
making or receiving certain category of calls. This
function requires the call barring password. You can
view the following submenus.

▶ **All outgoing calls**

 The barring service for all outgoing calls.

▶ **Outgoing international**

 The barring service for all outgoing international calls.

▶ **Outgoing international except home country**

 The barring service for all international outgoing calls
 except home network.

▶ **All incoming**

 The barring service for all incoming calls.

▶ **Incoming when abroad**

 The barring service for all incoming calls when roaming.

▶ **Cancel all barrings**

 You can cancel all barring services.

▶ **Change password**

 You can change the password for Call Barring Service.

The submenus:

• **Activate**

 Allows to request the network to set call restriction on.

• **Cancel**

 Set the selected call restriction off.

• **View status**

 View the status whether the calls are barred or not.

Fixed dial number   [Menu #-4-4]
(SIM dependent)

You can restrict your outgoing calls to selected phone
numbers. The numbers are protected by your PIN2 code.

▶ **Enable**

 You can restrict your outgoing calls to selected
 phone numbers.

▶ **Disable**

 You can cancel fixed dialling function.

▶ **Number list**

 You can view the number list saved as Fixed dial number.

Change codes   [Menu #-4-5]

PIN is an abbreviation of Personal Identification Number to prevent use by unauthorized person. You can change the access codes: **PIN1 code, PIN2 code, Security code.**

1. If you want to change the Security code/PIN1/PIN2 code input your original code, and then press 🔲 [OK].

2. Input new Security code/PIN1/PIN2 code and verify them.

Network settings   [Menu #-5]

You can select a network which will be registered either automatically or manually. Usually, the network selection is set to **Automatic.**

Automatic   [Menu #-5-1]

If you select Automatic mode, the phone will automatically search for and select a network for you. Once you have selected "Automatic", the phone will be set to "Automatic" even though the power is off and on.

Manual   [Menu #-5-2]

The phone will find the list of available networks and show you them. Then you can select the network which you want to use if this network has a roaming agreement with your home network operator. The phone let you select another network if the phone fails to access the selected network.

Preferred   [Menu #-5-3]

You can set a list of preferred networks and the phone attempts to register with first, before attempting to register to any other networks. This list is set from the phone's predefined list of known networks.

GPRS settings   [Menu #-6]

You can set GPRS service depending on various situations.

Switch on   [Menu #-6-1]

If you select this menu, the phone is automatically registered to a GPRS network when you switch the phone on. Starting a WAP or PC dial-up application created the connection between phone and network and data transfer is possible. When you end the application, GPRS connection is ended but the registration to the GPRS network remains.

When needed   [Menu #-6-2]

If you select this menu, the GPRS connection is established when you connect a WAP service and closed when you end the WAP connection.

Memory status   [Menu #-7]

You can check free space and memory usage of each repository, SIM memory. You can go to each repository menu.

Reset settings   [Menu #-8]

You can initialize all factory defaults. You need Security code to activate this function.

Accessories

There are various accessories for your mobile phone. You can select these options according to your personal communication requirements.

Travel Adapter

This charger allows you to charge the battery while away from home or your office.

Data cable/CD

You can connect your phone to PC to exchange the data between them.

Standard Battery

Memory card adapter/ Memory card

Stereo headset

Allows hands-free operation. Includes earpiece and microphone.

Note
- Always use genuine LG accessories.
- Failure to do this may invalidate your warranty.
- Accessories may be different in different regions; please check with our regional service company or agent for further enquires.

General

Product name : P7200
System : GSM 900 / DCS 1800 / PCS 1900

Ambient Temperatures

Max. : +55°C
Min   : -10°C

Appendix. RF Exposure Statement

WARNING! Read this information before operating the phone.
In August 1996, the Federal Communications (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency(RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.
The design of this phone complies with the FCC guidelines and these international standards.

CAUTION
Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations.
Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement of antenna.

Body Worn Operation
This device was tested for typical body-worn operations with the back of the phone kept 1.5 cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1.5 cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. The use of belt-clips, holsters, and similar accessories should not containing metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

For Your Safety FCC Part 15 Class B Compliance
This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

Appendix 2. Consumer Information on SAR
(Specific Absorption Rate)

This Model Phone Meets the Government's Requirements for Exposure to Radio Waves. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model.

The highest SAR value for this model phone when tested for use at the ear is 1.35 W/kg and when worn on the body, as described in this user guide, is 0.165 W/kg (body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/fccid after searching on FCC ID BEJP7200.
