

Part 15.21 statement

" Change or Modifications that are not expressly approved by the manufacturer could void the user's authority to operate the equipment. "

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

LIMITED WARRANTY STATEMENT

1. WHAT THIS WARRANTY COVERS:

LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

- (1) The limited warranty for the product extends for ONE (1) year beginning on the date of purchase of the product.
- (2) The limited warranty extends on to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.
- (3) This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S., including Alaska, Hawaii, U.S. Territories and Canada.
- (4) The external housing and cosmetic parts shall not be covered under these limited warranty terms.
- (5) Upon request from LG, the consumer must provide information to reasonably prove the date of purchase.
- (6) The customer shall bear the cost of shipping the product to the Customer Service Department of LG. LG shall bear the cost of shipping the product back to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

- (1) Defects or damages resulting from use of the product in other than its normal and customary manner.
- (2) Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized connections, unauthorized repair, misuse, neglect, abuse, accident, alteration, improper installation, or other acts which are not the fault of LG, including damage caused by shipping blown fuses spills of food or liquid.
- (3) Breakage or damage to antennas unless caused directly by defects in material or workmanship.
- (4) That the Customer Service Department at LG was not notified by consumer of the alleged defect or malfunction of the product during the applicable limited warranty period.
- (5) Products which have had the serial number removed or made illegible.
- (6) The limited warranty is in lieu of all other warranties, express or implied either in fact or by operations law, statutory or otherwise, including, but limited to any implied warranty of marketability or fitness for a particular use.
- (7) Damage resulting from use of non-LG approved accessories.
- (8) All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.
- (9) Products operated outside published maximum ratings.
3
- (10) Products used or obtained in a rental program.
- (11) Consumables (such as fuses).

3. STATE LAW RIGHTS:

No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY, IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY HEREIN. LG INFOCOMM INC. SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY APPLICABLE TO THIS PRODUCT. Some states do not allow the exclusion of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

4. HOW TO GET WARRANTY SERVICE:

To obtain warranty service, please call the following web address:

For Your Safety

Important Information

This user guide contains important information on the use and operation of this phone. Please read all the information carefully for optimal performance and to prevent any damage to or misuse of the phone. Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment.

Before You Start

Safety Instructions

WARNING! To reduce the possibility of electric shock, do not expose your phone to high humidity areas, such as the bathroom, swimming pool, etc.

Always store your phone away from heat. Never store your phone in settings that may expose it to temperatures less than 32°F or greater than 104°F, such as outside during extreme weather conditions or in your car on a hot day. Exposure to excessive cold or heat will result in malfunction, damage and/or catastrophic failure.

Be careful when using your phone near other electronic devices. RF emissions from your mobile phone may affect nearby in adequately shielded electronic equipment. You should consult with manufacturers of any personal medical devices such as pacemakers and hearing aides to determine if they are susceptible to interference from your mobile phone.

Turn off your phone in a medical facility or at a gas station. Never place your phone in a microwave oven as this will cause the battery to explode.

IMPORTANT! Please read the TIA SAFETY INFORMATION on page 78 before using your phone.

Safety Information

Read these simple guidelines. Breaking the rules may be dangerous or illegal. Further detailed information is given in this user guide.

- ▶ Never use an unapproved battery since this could damage the phone and/or battery and could cause the battery to explode.
- ▶ Never place your phone in a microwave oven as it will cause the battery to explode.
- ▶ Do not dispose of your battery by fire or with hazardous or flammable materials.
- ▶ Make sure that no sharp-edged items come into contact with the battery. There is a risk of this causing a fire.
- ▶ Store the battery in a place out of reach of children.
- ▶ Be careful that children do not swallow any parts such as rubber plugs (earphone, connection parts of the phone, etc.). This could cause asphyxiation or suffocation.

- ▶ Unplug the power cord and charger during lightning storms to avoid electric shock or fire.
- ▶ When riding in a car, do not leave your phone or set up the hands-free kit near to the air bag. If wireless equipment is improperly installed and the air bag is activated, you may be seriously injured.
- ▶ Do not use a hand-held phone while driving.
- ▶ Do not use the phone in areas where its use is prohibited. (For example: aircraft).
- ▶ Do not expose the battery charger or adapter to direct sunlight or use it in places with high humidity, such as a bathroom.
- ▶ Never store your phone in temperatures less than -4°F or greater than 122°F.
- ▶ Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone. There is a risk of this causing a fire.
- ▶ Do not drop, strike, or shake your phone severely. Such actions may harm the internal circuit boards of the phone.
- ▶ Do not use your phone in high explosive areas as the phone may generate sparks.
- ▶ Do not damage the power cord by bending, twisting, pulling, or heating. Do not use the plug if it is loose as it may cause a fire or electric shock.
- ▶ Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause fire or electric shock.
- ▶ Do not handle the phone with wet hands while it is being charged. It may cause an electric shock or seriously damage your phone.
- ▶ Do not disassemble the phone.
- ▶ Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.
- ▶ Only use the batteries, antennas, and chargers provided by LG. The warranty will not be applied to products provided by other suppliers.
- ▶ Only authorized personnel should service the phone and its accessories. Faulty installation or service may result in accidents and consequently invalidate the warranty.
- ▶ Do not hold or let the antenna come in contact with your body during a call.
- ▶ An emergency call can be made only within a service area. For an emergency call, make sure that you are within a service area and that the phone is turned on.

FCC RF Exposure Information

WARNING! Read this information before operating the phone. In August 1996, the Federal Communications (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies.

The design of this phone complies with the FCC guidelines and these international standards.

CAUTION

Use only the supplied and approved antenna. Use of unauthorized antennas or modifications could impair call quality, damage the phone, void your warranty and/or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with skin, a minor burn may result. Contact your local dealer for a replacement antenna.

Body-worn Operation

This device was tested for typical body-worn operations with the back of the phone kept 0.79 inches (2cm) between the user's body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.79 inches (2cm) must be maintained between the user's body and the back of the phone. Third-party belt-clips, holsters, and similar accessories containing metallic components should not be used. Body-worn accessories that cannot maintain 0.79 inches (2cm) separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

Vehicle Mounted External Antenna (optional, if available)

A minimum separation distance of 8 inches (20cm) must be maintained between the user/bystander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements. For more information about RF exposure, visit the FCC website at www.fcc.gov

FCC Part 15 Class B Compliance

This device and its accessories comply with part 15 of FCC rules. Operation is subject to the following two conditions: (1) This device and its accessories may not cause harmful interference, and (2) this device and its accessories must accept any interference received, including interference that may cause undesired operation.

Cautions for Battery

- ▶ Do not disassemble.
- ▶ Do not short-circuit.
- ▶ Do not expose to high temperature: 60°C (140°F).]
- ▶ Do not incinerate.

Battery Disposal

- ▶ Please dispose of your battery properly or bring to your local wireless carrier for recycling.
- ▶ Do not dispose in fire or with hazardous or flammable materials.

Adapter (Charger) Cautions

- ▶ Using the wrong battery charger could damage your phone and void your warranty.
- ▶ The adapter or battery charger is intended for indoor use only.

Do not expose the adapter or battery charger to direct sunlight or use it in places with high humidity, such as the bathroom.

1. **Earpiece** Lets you hear the caller.
2. **Earphone Jack** Allows the use of a headset to hear caller's voice.
3. **LCD Screen** Displays messages and indicator icons. When the phone is turned on, Power Save mode automatically dims the screen and then darkens it if no keys are pressed.
4. **Menu/Left Soft Key** Use to access Contacts.
5. **Call Key** Use to place or answer calls.
6. **Charger Port** Connects the phone to the battery charger or other available accessories.
7. **Alphanumeric Keypad** Use to enter numbers and characters and select menu items.
8. **Vibrate Mode Key** Use to set the vibration mode from standby mode, press and hold for about 3 seconds. Press and hold for another 3 seconds to activate Normal Mode from Vibrate Only Mode.
9. **Microphone**
10. **International Call Prefix Key** To make an international call, press **[*][0][*]** key for 2 or 3 seconds. + means international calling code.
11. **PWR/END Key** Use to turn the power on/off and to end a call. Also returns to the idle display screen.

Charging with PC USB

You can use your computer to charge your phone. Connect one end of a USB cable to the charging accessory port on your phone and the other end to a highpower USB port on your PC (commonly located on the front panel of the computer). When charging with Hub, charge the phone with Hub Power.

Note

To charge the phone with PC USB, USB driver should be installed in advance. LG USB Driver supports Windows 98 SE, ME, 2000, XP and Vista. Drivers can be downloaded from your service provider's website.

12. **BACK Key** Deletes single space or character with a quick press. Press and hold to delete entire word. Also lets you exit out of menus, one level at a time.
13. **OK Key** Selects the function displayed at the bottom of the LCD between the Left and Right Soft Key functions.
14. **Navigation Key** Use for quick access to Browser, Multimedia, Brew and My Menu.
15. **Camera Lens** lets you take pictures.
- 16.

Getting Started

Onscreen Icons

The phone screen displays several onscreen icons which appear when the phone is powered on.

Icons	Descriptions
	Displays the strength of the signal received by the phone and current signal strength is indicated by the number of bars displayed on the screen.
	No service. The phone is not receiving a system signal.
	In use. A call is in progress. * No icon indicates the phone is in standby mode.
	Indicates that a Text Message or E-mail Message has been received.
	Indicates speaker mode is on.
	In Silent mode.
	Indicates key guard is enabled.
	Indicates there is MMS.
	In Vibrate mode.
	Indicates there are SMS and MMS
	In Alarm mode.
	Indicates a microSD memory card is present.
	SMS on Call Reject. (Only shown on incoming mode)
	Indicates voice answering machine is activated.
	Indicates voice mail has been received or there are recorded voice messages.
	Indicates battery charge level. When fully charged, battery icon indicates charging by twinkling.

Using the Battery and Charger

Charge the battery fully before the initial use of the phone. The phone comes with a rechargeable battery. Keep the battery charged while not in use in order to maximize talk and standby time when using the phone.

Installing and Removing the Battery

Installing the Battery

To install the battery, insert the bottom of the battery into the opening on the back of the phone. Push the battery down until it clicks into place.

Removing the Battery

1. Turn power off. Slide the battery cover off the phone by placing your thumb on the raised ledge and sliding it gently away from the phone, then lift and remove it.
2. Place a fingertip in the cutout to lift the edge of the battery, then remove it.

Using the Battery and Charger

Charging the Battery

To use the AC adapter charger provided with your phone :

1. Plug the AC adapter into the electrical outlet.
2. Insert the round end of the adapter into the AC adapter jack on the bottom of the phone. (Make sure the battery is installed.)
 - As the phone charges, the battery icon continually displays a progression from empty () to full ().

It takes about three hours to fully recharge a completely rundown battery. When fully charged, battery icon indicates charging by twinkling.

Battery Charge Level

The battery charge level is shown at the top right of the LCD screen.

When the battery charge level becomes low, the low battery sensor will alert you in three ways: sounding an audible tone, blinking the battery icon outline, and displaying low battery. Recharge soon. If the battery charge level becomes exceedingly low, the phone will automatically switch off and any function in progress will not be saved.

* The colors which are displayed at various stages of charging are different : Blue / Green / Yellow / Red.

Caring for the Battery

- 1) If you use the unauthorized battery, it may cause the damage to or explosion of the battery. Therefore, please prohibit using the unauthorized ones.
- 2) You do not need to wait until the battery completely runs down to recharge the battery.
- 3) Use only LG batteries and chargers specific to your model of phone. LG's chargers are designed to maximize battery life.
- 4) Do not disassemble or short-circuit the battery.
- 5) Keep the battery's metal contacts clean.
- 6) Replace the battery when it no longer provides acceptable performance. The battery can be recharged several hundred times before it needs replacing.
- 7) Recharge the battery if it has not been used for a long time to maximize battery life.
- 8) Do not expose the battery charger to direct sunlight or use it in areas of high humidity, such as the bathroom.
- 9) Do not leave the battery in hot or cold places as it may deteriorate battery performance.
- 10) Long backlight settings, searching for service, data connectivity, and synchronization all may affect battery life, talk, and standby times.

Basic Functions

Turning the Phone On and Off

Turning the Phone On

- 1) Install a charged battery pack or connect the phone to an external power source such as the cigarette lighter charger, car kit or AC Adaptor.
- 2) Hold down the Key  for 2 seconds until the LCD screen flashes.

Note

As any other communication device, avoid any unnecessary contact with the antenna while your phone is turned on.

Turning the Phone Off

- 1) Press and hold  until the display turns off.

Making a Call

Every time you make a call, follow these steps :

- 1) Make sure that the phone is turned on. If not, hold down  for 2 seconds.
- 2) Type the phone number and then press  .
 - If the phone is locked, type the lock code.
- 3) To end the call press  .

Note

In no service area,  appears from the screen. When trying voice call in no service area, "Call could not be completed. Please try again" is displayed. It means you are in no service area.

Receiving Calls

- 1) When the phone rings or vibrate (if the Vibrate Mode is

enabled), press any key (except ) or  depending on the Call settings.

- When you press  once, when a call is received, the phone stops ringing or vibrating depending on the mode it is in. Press  twice to disconnect.
- 2) To end an answered call press .
 - 3) If you are not in the condition to receive call, pressing Soft key 2 will disconnect the call and send a preset SMS to Caller. The SMS can be edited using "Edit SMS on Call Reject" function given under Settings.

Signal Strength

If you're inside a building, being near a window may give you

better reception. You can see the strength of your signal by the signal indicator () on your phone's display screen.

About the antenna

Your phone has a built-in antenna. As with any other radio transmitting device, do not touch the antenna unnecessarily when the phone is switched on.

Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than needed.

Not touching the antenna during a call optimizes the antenna performance and the talk-time of your phone. Normal position: Hold the phone as you would any other telephone.

Basic Functions

Quick Adjust

Adjusting Vibrate Mode

Use Vibrate Mode in a public place.

- 1) In standby mode, activate Vibrate Mode quickly by pressing the . (for 2 seconds) instead of using the Menu function.
- When Vibrate Mode is set, Key tone does not sound.

Note

To cancel Vibrate Mode, press  for 2 seconds.

Select Profiles

- 1) In standby mode, press .
- 2) Select one of four Profiles Vibrate Only, Silent, General and Outdoor with .
- 3) Press  or Soft Key 1 Set. Adjusting Speaker Mode On

During a call, to activate or cancel Speaker quickly, press

- 1) In standby mode, activate Speaker Mode by pressing the  for 2 seconds.

Note

To cancel Speaker Mode On, press  for 2 seconds.

In case speaker is activated on in standby mode, speaker mode is continued even after a call without respect to  adjustment during a call.

Select My Menu

- 1) In standby mode, press  to select My Menu.
- 2) Select the item of choice with  and then press or  to select the required menu from My Menu under Settings menu.

- * To add items in My Menu add it from Setting Menu.

Keypad Lock

This function allows you to carry the phone safely without accidentally dialing a number.

When this function is enabled, no call can be made and the access to the Menu will be locked. While the keypad is locked, it is possible to answer a call normally.

To enable the function :

- 1) Press the key  for 2 seconds.

To disable the function :

- 1) Press the key  for 2 seconds.

Note

After the set time in idle mode, Key Guard is automatically enabled. When set as Key Guard before incoming call, lock is enabled after the call.

Call Waiting

Your cellular service may offer a call waiting function. While a call is in progress, you may hear two beeps indicating another incoming call. When call waiting is enabled, you may put the active call on hold while you answer the other incoming call. Check with your service provider for information about this function.

- 1) Press  to receive a waiting call.
- 2) Press  again to switch between calls.

Basic Functions

Mute

The mute function prevents the other party from hearing your voice, but allows you to hear the other party.

- 1) Press Soft Key 1 Menu and  during a call.
- 2) To cancel Mute, press Soft Key 1 Menu and  again.

Redialing Calls

- 1) Press  twice to redial the last number in Recent Calls.
 - You can also dial any of the last 120 (Missed + Received + Dialed) numbers stored in the Recent Calls. (See the Call History List on page 42~43)

Speed Dialing

Speed dialing is a convenient feature, which allows you to make phone calls quickly and easily.

Your phone recalls the phone number from your personal directory, displays it briefly and then dials it.

Memory locations 1 through 9 should be used for one-touch dialing for your most frequently used phone numbers.

- 1) Enter memory location number 1 to 9.
- 2) Press .

Dialing Speed Dials from 10 to 99

Press the first digit and then press and hold the key of the last digit.

OR

Enter the first and second digits and press .

Caller ID

Caller ID lets you know who is calling by displaying the number

Entering and Editing Information

of the person calling when your phone rings. If the caller's name and number are already stored in your phone book, the corresponding name appears with the number.

You should check with your service provider to ensure they offer this feature.

Entering Information Using T9 Text Input

You can edit the Banner, Scheduler, Text Message, Multimedia Message, E-Mail and Phone Book using T9 Text Input.

T9 Text is an easy way to write. In this input method, you only need to press a key once for each letter.

Key Functions

Soft Key 2 : Press to select mode.

- You can select the modes using Soft Key 2 :
T9En, Abc, 123, Symbols, Smileys, T9Hin, Hindi
- Shift Key  : Used to change the letter case.

 ~  (Type Text) :

In T9 mode, press one key per letter to enter text.

Entering and Editing Information

 ~  (Type Numbers) :
In 123 (Numbers) mode, press once to enter numbers.

 (Next) : In T9En / T9Hin mode, press to display other matching words.

 (Punctuation) : In T9En / Abc mode, press to insert punctuation in a word and complete a sentence.

 (Space) : Press to complete a word or insert a space.

 (Clear) : Press to delete a single space or character. Press and hold to delete entire words.

Input mode

T9 Text Input provides Seven Modes for entering text, numbers, special characters, and punctuation.

T9En (T9) Mode

Type text using one keystroke per letter. The default is Abc mode.

Abc (Multi-tap) Mode

Use Abc mode to add words to the T9 database.

123 (Numbers) Mode

Type numbers using one keystroke per number.

To change to 123 mode in a text entry field, press Soft Key 2 until 123 mode is displayed.

Symbols/Smileys Mode

Insert special characters, punctuation, or smileys. You may use any of the special characters. When the cursor is located where you want the special character, switch to Symbols/Smileys mode. If you want to add a smiley, switch to the smileys mode. Press the Navigation Key  to cycle through the desired characters :

To select Character, Press the assigned number key.

T9Hin(T9) Mode

Type text using one keystroke per letter in Hindi with the help of T9 Hindi dictionary function.

Hindi(Multi-tap) Mode

Use Hindi mode to input text in Hindi language.

Initial Cap (T9En/Abc)

Only the first letter is capitalized.

Caps Lock (T9EN/ABC)

All subsequent letters are capitalized.

Lowercase (T9en/abc)

All subsequent letters are lowercase.

Examples Using T9 Text Input

Typing In T9 Mode

When you want to use T9 Mode, check that T9En is shown at the right bottom of the display. To write the desired word, press each key once for one letter.

For example, to write “Call the office”, follow these steps :

1. Press Soft Key 2 to change letter case to T9En mode.
2. Press    .
3. Press  to complete the word and add a space.
4. Press    
    
 .
5. Display Call the office.

As you can see, the word changes after each key press.

Entering and Editing Information

Therefore you don't need to pay much attention to what happens on the display before you have keyed in the whole word.

Using the NEXT Key

After you have finished typing a word, if the word displayed is not the word you want, press  to display additional choices.

For example, follow these steps :

1. Press    .
2. Display Good.
3. Press .
4. Display Home, Gone, Hood.....

Examples Using Abc (Multi-tap) Text input

Typing In Abc (Multi-tap) Mode

For example, to type "LG", follow these steps:

1. Press Soft Key 2 to change letter case to Abc mode.
2. Press  to change to ABC Caps Lock mode.
3. Press    .
4. Display LG.

Adding Words to the T9 Database

If the word is not in the T9 database, add it by using Abc(Multi-tap) mode text entry. The word is automatically added to the T9 database when you return to T9 mode and press Space key.

Entering and Editing Information

7. Display lmt.
8. Press  to see other matching words.

Key Mapping For Hindi Entry

In Hindi there are 13 vowels, 44 consonants, 15 matras

The Keys are mapped as follows :

Characters in magenta are available only in Multitap mode.

To Edit in Hindi Mode

Press Soft Key 2 and changes to Hindi mode.

Hindi mode Editing

Hindi is a Multi-tap mode.

For example, To type "हिन्दी "

1. Press  2 times.
2. Press  8 times.

3. Press  5 times.
4. Press  4 times.
5. Press  3 times.
6. Press  3 times.

Examples Using T9Hin Text Input for Hindi

For example, To type "Hkkjrh;"

1. Press Soft Key 2 to change letter case to T9Hin mode.
2. Press       .
3. Press  to complete the word and add a space.
4. Display Hkkjrh;

Byte Allocation:

In messages : Every character in Hindi takes 3 bytes while it takes 9 bytes for "Ksha", "Tra", "Gya".
In all other modules : Every

character in Hindi takes 1 byte while "Ksha" , "Tra" , "Gya" takes 3 bytes.

Entering Predicted Words

Sometimes T9 places in the selection list predicted words. Predicted words are words T9 thinks you may want to enter, based on text you've recently entered. Available in both T9 and Abc mode, predicted words are underlined.

If the predicted word you see isn't the one you want, press the next key to view additional predicted words. When you find the one you want, press the  key to add a space and begin the next word.

If none of the predicted words in the selection list is the word you want, just keep entering letters. T9 will remove the predicted word for you automatically.

Menu Features

General Guidelines to Menu Access and Settings

1. Press Soft Key 1 Menu. Nine menu items will appear on the display screen.
2. Press  to go through the list of menu features.
3. Press the corresponding number to the menu item that you want to select. Then the sub-menu list will appear on the screen.
4. Press the appropriate key to select the sub-menu you want to access.
5. Select preferred settings, using the . Press  to go one step backward while accessing menu or selecting settings.
6. Press  to save the settings or  to cancel without saving.

Note

 key is equivalent to pressing Soft Key 1, in the case of Soft Key 1 is associated with “Select” option.

 key is equivalent to pressing Soft Key + selecting first option of popup menu in the case of Soft Key 1 is associated with “Options” option.

You can get more information about this menu.

Messages

Text message, page, E-mail and Voice Mailbox become available as soon as the power is on. You can access the above types of messages using the Message Key .

In addition, you can make a call to the call back number by pressing  during a message check.

The phone can store up to 31 messages (1 voice message : 30 text messages) with 160 byte per message. Every letter in Hindi is taken as 3 characters (However, ksha, tra, gya accounts for 9 characters each.) So, an SMS message in Hindi can have up to 46 characters only.

Users may read and edit messages, saved in the Outbox during transmission and send

them.

However you should check whether your service provider provides the above features.

Phone can store SMS messages each in Inbox(30), Outbox(15 Sent / 15 Unsent), Archive(30), Drafts(30) and Templates(10 fixed / 20 editable).

OR Total 120 messages and 1 Voice Mail.

SMS supports 160 characters(160 in English / about 46 in Hindi). E-Mail subject supports 20 and message supports 140 characters.

E-Mail is consist of subject + E-Mail address + E-Mail message. E-Mail subject supports up to 20 and E-Mail address supports up to 50.

So, message characters is

Messages

calculated by 160 - subject character - E-Mail address character.

MMS (Multimedia Message Service)

Frequently Asked Questions

Before calling for service

Please check to see if any problem which you may have with your phone is described here before taking it for service or calling a service engineer.

When showing symptoms like:	Check this!
When “✕” does not disappear from the screen.	Check whether it is in service area, and if you continue to see “✕” please turn off the power and wait for approximately 2 minutes to turn it back on. If there is no change, check again after relocating to other areas.
When connection is abrupt or is not audible in certain areas.	When frequency environment is unstable in a certain area, connection may be abrupt and not audible. Relocate to other areas and try again.
When connection is not made well or abrupt even when established.	When frequency is unstable or weak, or if there are too many users, connection may be cut off even after it was established. Please try again a little later or try after relocating to other areas.
When LCD does not turn on.	Remove battery and turn on the power after placing it back on. If there is no change even then, sufficiently charge the battery and try again.

When showing symptoms like:	Check this!
When FM Radio is not audible.	Check whether headset is connected to the phone. Fully pressed to the headset to the phone.
When it echoes while connection is made with a certain telephone in a certain area.	Called "Echo Phenomenon," it occurs if connection volume is too high or caused by special properties(semi electronic telephone exchange) of the machine on the other end.
When the phone is heated.	If connection is made for a significantly long duration, or game and Internet and others are used for a long time, the phone may become hot. This has no effect upon the life of the product or performance.
When the Ringer does not ring, or when Backlight or LCD blinks only.	Ringer Type may be set as "Silent" or "Light". Please select "Ring".
Standby duration for battery gradually becomes shorter.	Because battery wear out, its life gradually becomes shorter. If its life becomes shorter over half of that at the time of purchase, you must purchase a new one.
When usage time of battery becomes shorter.	If time for use of battery is short, it may be due to the user environment, or large volume of calls, or weak signals.
